
Shore Leave: Passes essential. Currency regulations not stric enforced. Local trishaw costs about Sing.$10.00 per person return t town. Locals very friendly. Area best described as rural. Jakarta is hours flight, 4 hours by car and 6 hours by train from Cilacap.

AUTHORITY: Departemen Perhubungan, Perusahaan Umu Pelabuhan 111, Cabang, Cilacap, Jalan Laut Jawa, Pelabuhan Cilaca *Tel:* (0282) 21334, 22651, 22652, 22653. *Contact:* Soero Prawirosiswojo, Branch Manager. Sojoto Prawirodirjo, Harbour Mast

(b) CILACAP – IRON SAND PORT.

LOCATION: Iron Sand Jetty (loading installation) is situated at the P of Cilacap, South coast of Central Java, in position: Lat. 07° 45′ 03″ S Long. 109° 00′ 51″ E.
FLAGS: To be flown by incoming vessels: Vessel's National F Indonesian Flag; Vessel's Number; Quarantine & Immigration Flag
PILOTAGE: Pilotage is compulsory. Two Government Pilots a available.

There is one pilot station in position Lat. 07° 44′ 08″ S., Lo 108° 59′ 34″ E. If vessel wishes to be piloted to Iron Sand Jetty on d of arrival vessel must arrive at the pilot station before 1500 hrs. lo time at the latest provided the Pilot is available (information of which w be confirmed by Sub-Agent).

DOCUMENTS: To be produced upon vessel's arrival:

15 Crew Lists.
10 Passenger Lists.
5 Parcel Lists.
8 Stores Lists.
8 Cargo Manifests.
3 Narcotic Lists.
5 General Information (if any).
5 Personal Effects Lists.
5 Vaccination Lists.
Last Port Clearance.
10 Firearms & Ammunition Certificates.
10 Harbour Reports.
5 Crew's Radio & Camera Lists.
International Loadline Certificate.
Maritime Declaration of Health Certificate.
Safety Radio Certificate.
Health Book or Bill of Health.
Derat Certificate.
Safety Equipment Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.

Inspection Team: This team consists of the Port Health Officer, Custom Officer, Harbour Master, Immigration Officer and Police.

After the vessel is granted Free Pratique, the Immigration Officer will check Passports, Seaman's Books and Crew List and issue shore passes.

RESTRICTIONS: Vessels served on first come, first served basis. Vessels berth between 0600 hrs. and 1500 hrs. and leave during daylight hours on high water. The depths at LWS are: Alongside wharf, 13.0 m.; Channel Bar 11.30 m.

Vessel's Conditions: The height of vessel from water line to top of hatchcoaming or railing must not exceed 15 m. Each side deck breadth from bulwark to hatchcoaming must be preferably 7 m. minimum and 9 m. maximum.

MAX. SIZE: LOA 186 m. Max. draft 10.40 m. Deeper possible but it depends on depth at the time of passing bar and after consultation with the Harbour Master.

RADIO: Messages to Pasirbesi Cilacap can be sent through Cilacap Coastal Radio Station, call sign PKR 3.

Arrival Notice – Information Required:

Owner's Advice: Owner or Agent to advise by cable to Anekatambang Jakarta and Pasirbesi Cilacap at least 10 working days before vessel's expected arrival at the loading port.

Master's Advice: At least 48 hours before vessel's arrival at Cilacap Pilot Station, the ship's Master or Agent shall give the following information to Anekatambang Jakarta and Pasirbesi Cilacap: Last port of call, draft on arrival, quantity of iron sand to be loaded, stowage plan (hatch division for iron sand cargo) and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Pasirbesi Cilacap waits for the Master's telegram in order to make necessary preparation such as ordering Pilot etc.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING:

Mooring: Vessels are moored alongside 1 jetty and 6 dolphins with 4 bollards with good nylon ropes, 4 fore, 4 aft, 1 fore breastline and 1 after breastline. Distance between the two extreme dolphins is 160 m.

Loading Facilities: Loading installation consists of one boom (stacker), iron sand is loaded into the hold of the vessel by means of conveyor belt. Boom can be hoisted vertically from 00° to 60° but the maximum position for proper operation is only up to 15° inclination angle and can swing 26.85 m. (60°) to each side. The length of boom is 33.33 m. The maximum outreach is about 16.33 m. from jetty to seaward.

Loading Capacity: About 400 – 500 t.p.h., however, it depends on the type of vessel, cargo space and size of hatches available.

Weighing: The iron sand is automatically weighed during loading by means of weightometer. The specific gravity of iron sand is around 2.60.

Unloading: Cargo for Aneka Tambang only.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's Crew members.

STEVEDORES: Loading is performed by shipper's personnel. Loading equipment to be furnished by the vessel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Idulfitri (the fixed 2 consecutive days of the year; Idul Adha (the fixed day of the year); Independence Day (the fixed day of the year); Maulid Day (the fixed day of the year); Easter (the fixed day of the year; Waisyak (the fixed day of the year); Nyepi (the fixed day of the year); Ascension (the fixed day of the year); the first Muharram (the fixed day of the year) and Christmas Day (December 25th). For definite dates consult Port Administrator.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Cilacap Port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

TIME: GMT plus 7 hours.

REPATRIATION: Can be arranged. Repatriant to be guarded by Immigration Officer from Cilacap to Jakarta until his departure from Jakarta to the destined country.

SHORE LEAVE:

General: Crew members are permitted only to go to Cilacap. Shore pass must be carried by crew during shore visit.

Going beyond Cilacap is prohibited without special landing permit, which can be issued by the local Immigration Officer through Agents.

Visitors: Crew members are not allowed to invite friends, hawkers from shore aboard the vessel. It is also prohibited to lower lifeboats or rafts for purpose of fishing, sailing, visits to nearby islands, etc.

At Anchorage: While lying at anchor awaiting berth, no one is allowed to go ashore until vessel cleared.

Shore Leave Hours: From 0600 hrs. to 2300 hrs. local time.

GENERAL:

Fumigation: No facilities.

Nature of Bottom: Sand and hard materials.

Currents: Direction: at high tide, from East to West; at ebb tide, from West to East. Velocity: around 3-5 knots.

Chart: Indonesian Sea Chart No. 108.

AUTHORITY: *Shipper's Local Office:* P.T. Aneka Tambang, Unit Pertambangan Pasir Besi, Cilacap. Jalan Pandanarang, P.O.Box 24, Cilacap Central Java. *Cable Address:* Pasirbesi Cilacap. *Tel:* 22142, 22143. *Telex:* 22457.

CINTA TERMINAL: 05.27 S. 106.15 E. (See Plan)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:

Maritime International Declaration of Health.
Valid Derat or Exemption Certificate.
6 copies of Crew Lists.
Passenger List, if any.
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seaman's Books for all Crew members or passengers.
Notice of Readiness.
Indonesian Consular Clearance.
1 Crew Declaration of Personal Belongings.
1 Ship's Stores Inventory.
6 copies of Cargo Manifest for Cinta Terminal loading.
1 Copy of Cargo Manifest for Transit Cargo with a Summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyd's" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is Lat. 5° 25′ 25″ S., Long. 106° 11′ 09″ E. with a radius of 1 mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The holding area is West of the No. 1 Export SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.

MAX. SIZE: *Minimum Size Tanker Acceptable:* The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. Size Tanker Acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 175,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to Maxus for any delays.

RESTRICTED AREA: The limits of the restricted area is covered by lines between points of the following positions:

AA.	Lat. 04° 48′ S.,	Long. 106° 12′ E.
BB.	Lat. 04° 48′ S.,	Long. 106° 14′ E.

NAVIGATION AIDS: There are 4 SBMs, each fitted with 5 nautical mile white flashing light, flashing Morse code (U) at 15 second intervals.

The positions are as follows:

No. 1 Storage SBM: Lat. 05° 26′ 40″ S., Long. 106° 14′ 42″ E.

Permanently secured to this SBM is a large 602 ft. long barge "Cinta Natomas" used for storage of crude oil and accommodation, (headquarters of Cinta Terminal personnel). The barge shows lights and shapes as prescribed in the International Regulation for Preventing Collisions at Sea for vessels engaged in underwater operations. The barge is also equipped with a foghorn 5 second on, 55 second off, 5 second on, 10 second apart.

No. 2 Storage SBM: Lat. 05° 26′ 23″ S., Long., 106° 13′ 45″ E.

No. 1 Export SBM: Lat. 05° 25′ 25″ S., Long. 106° 14′ 09″ E.

No. 2 Export SBM: Lat. 05° 27′ 03″ S., Long. 106° 13′ 00″ E.

Platform Co-ordinates:

RADIO/VHF: *Cable Address:* "Maxus S.E.S. Jakarta". *Telex:* 44221-1A. *Operating Schedules and Frequencies:* Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2, 4, 8 and 12 MHz bands and by International Marine VHF Channel 16 (156.80 MHz).

Cinta Terminal (call sign: 6ZFT) particulars are as follows: Operated by Maxus South East Sumatra.

Position: Lat. 5° 26′ 40″ S., Long. 106° 14′ 42″ E.

Hours of operation: 24.

Frequencies	*Class*	*Power*	*Mode*
4456.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 – 156.30 MHz	Simplex	
12 – 156.60 MHz	Simplex	
13 – 156.65 MHz	Simplex	
14 – 156.70 MHz	Simplex	
16 – 156.80 MHz	Simplex	
20 – 157.00 MHz	Receive 161.60 MHz	Duplex
26 – 157.30 MHz	Receive 161.90 MHz	Duplex
28 – 157.40 MHz	Receive 162.00 MHz	Duplex

Notes: 6ZFT keeps continuous watch on 4456 kHz. 6ZFT keep continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will b way of this station except should a vessel be unable to contact 6ZF she should send messages through: Singapore Radio/9VG or Pertamin Radio/PKI-2.

Initial Communications: It is most important that ships establis communications with the Cinta Terminal (6ZFT) not less than 72 hour prior to arrival at the Terminal, giving estimated time of arrival. Furthe ETA information should be sent when the vessel is 48 hours, 24 hour 12 hours and 4 hours distant or any time a change of one hour in origina ETA occurs. These messages should specifically state whether ETA i given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which cou affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) wi transmit a message to her giving preliminary requirements and detai as to Terminal. Masters are urged to comply with this in all details i order to facilitate vessel turn-around and Government formalities.

Communications Within 4 Hours of Terminal: Once ships are within th 4 hours distance of Cinta Terminal (6ZFT) communication, valid radi telephone communications on International marine VHF may b established on Channel 16. This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation wi be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she wi require to discharge ballast after arrival. Precise time of arrival shou be given when the ship is 4 hours distant from the Terminal.

Communication in Terminal: The Mooring Master will be in direct contr of all ship communications while in the Terminal Area. Any unauthorise communications will be cause for cessation of all operations exceptin clearing the berth, and the vessel's Notice of Readiness will be nullifie immediately.

PRATIQUE: In accordance with international practice, quarantin signals must be displayed by all vessels approaching Cinta Termin area. These signals shall be displayed continuously until Pratique i granted. By day the flag of Indonesia should be flown throughout th vessel's stay in port. The boarding officials will attend the incomin vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and whe the tanker is in every respect ready to load, the Master may tender h Notice of Readiness. Notice of Readiness will not be accepted durin periods when the Terminal is closed. The Terminal is "closed" when th weather is such that it is too rough for incoming tankers to berth. Th decision regarding the opening and closing of the Terminal will rest wi the Terminal Superintendent. Tenders by vessels to load crude oil carg will be normally accepted and berth assigned to vessels in chronologic order of arrival provided such vessels have current nomination for carg valid at the time of tender, carry clean ballast (if any), and have carg tanks in fit condition to receive cargo. Also they must be in all respec properly equipped and ready to moor. Should berthing be delayed o account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These a under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administra Offices are located on board the 143,391 d.w.t. crude storage barg *Cinta Natomas* permanently moored approximately 8,500 ft. on a li bearing 164° from the First Export SBM. The nearest port with faciliti is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 13.5 m. in diamete and designed to handle tankers in the 175,000 d.w.t. class. The bu is equipped with dual 12 inch floating hose with ASA 150 lb. flang connections. Both strings must be taken aboard. Loading rates will b from 11,000 to 20,000 barrels per hour range. The SBM is also provid with two permanently attached 15 inch circumference synthetic fi floating mooring lines. These lines should be held under tension by th vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle hea the following:

- *(a)* Messenger lines on the forecastle head for bringing 2 moor lines aboard from the SBM (mininum 6 in. circumference).
- *(b)* Mooring winches on forecastle head for handling two 12 i circumference synthetic fibre floating mooring lines from the S
- *(c)* Adequate chafing gear to prevent damage to mooring lines.
- *(d)* Derrick rigged and ready to pick up from launch, moo shackles, nylon strops and hose connection gear on the port s midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon strop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring Master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons minimum hoist size required.) Vessel's loading manifolds should be prepared for two 12 in. ASA 150 lb. Camlock flanged hose connections prior to vessel's arrival at Terminal. Vessel should have adaptors available if their flanges do not correspond to the loading hoses' flanges. For details of Camlock flanges see "Plan". Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8 in. hose connections to be removed; also, if necessary, "Y" pieces removed so that maximum flow through the 12 in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 17,000 b.p.h. (2,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyd's or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is the responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging Ballast at Night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Jakarta. All expenses will be charged to the ship owner.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed 1 litre of beer or 0.5 litres of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: July 1987.

There are 3 SBMs and the Northernmost SBM is used for loading tankers. Middle and Southerly SBMs are for export tankers but are not normally used and, according to the Pilot, are kept as spares.

The storage barge is moored to its own SBM.

After connecting the first line to the SBM, the Pilot goes forward and communicates with the bridge on VHF Channel 13.

AUTHORITY: Maxus S.E.S. Inc., P.O.Box 2759, Five Pillars Office Park, Jl. Letjen Haryono M.T.58, Jakarta, Indonesia. *Tel:* 7991608. *Telex:* JKT. 47121-IA, 47487-1A. *Cables:* Maxus.

CIREBON (Tjirebon): 06.41 S. 108.33 E. (See Plan)

DOCUMENTS:

Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Compulsory. Applications made through Agent or to Port Administrator via Cirebon Radio.

ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35′ 30″ E. and the parallels of 06° 42′ 15″ S. and 06° 43′ 40″ S.

A light buoy on the position of Lat. 06° 42′ 10″ S., Long. 108° 36′ 20″ E. is placed on the guidance line to the entrance of the harbour.

RESTRICTIONS: Cirebon Roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong Light Buoy at port hand. Only ships with 5 m. max. draft can enter Inner Harbour and moor alongside wharves.

All other ships anchor at outer roads.

HEALTH: Usual international procedures.

RADIO: Cirebon Coastal Radio Station. Call sign PKZ-2. Working freq. 6491.5 kHz and 8799.5 kHz, watching freq. 6265 – 6285 kHz and 8204 – 8249 kHz. Working time 0030 – 0130 hrs. and 0600 – 0700 hrs. GMT.

VHF: Port on Channels 16, 12 and 14.

TUGS: Tug services available. Order through Agents.

BERTHING: Muarajati II Wharf: Length 238 m. Depth at LWS – 5.0 m.
Linggarjati Wharf: Length 131 m. Depth at LWS – 4.5 m.

STEVEDORES: Arranged by Agent.

MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.
TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.
DENSITY: 1025.
FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.
FUEL: Not available.
CONSULS: At Djakarta, 280 km. from Tjirebon.
REPAIRS: Light repairs only by local dockyard.
DRY DOCK: Graving dock of 600 d.w.t. capacity.
GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.
OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.
CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.
CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.
REPATRIATION: Can be arranged by Agents.
AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.
TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.
HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August); Maulud, Mir'adj and Idul Fitir determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitir (2 days) not guaranteed due to labour shortage.
POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.
SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.
IDENTIFICATION CARDS: Preferably Passports, Seamen's ID Cards (issued by maritime authorities; vessel's country).
DELAYS: Bad weather (mostly rain).
DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.
AUTHORITY: Port Administrator. *Tel:* (0231) 2697, 3688. *Telex:* 28292.

DILLI: 08.33 S. 125.31 E. (See Plan)

PILOTAGE: Compulsory.
RESTRICTIONS: All foreign vessels calling at this port should obtain the Special Security Clearance, this is arranged by the vessel's Agent.
MAX. SIZE: Maximum LOA 120 m.
RADIO: Kupang Radio. Call sign PKK.
Frequencies: 2,182 kHz and 6,115 kHz.
VHF: Kupang Radio on VHF Channel 16.
TUGS: 1 tug of 240 h.p. and 1 mooring boat.
BERTHING: Length of wharf 180 m., breadth 20 m., depth alongside 7.0 m.
Storage: There is a godown with 1,600 sq.m.
Fork Lifts: 4×2 tons – 3 tons.
CRANES: 1×7 tons capacity.
STEVEDORES: Available.
FRESH WATER: Available alongside in small quantities.
FUEL: Not available.
REPAIRS: Repairs not possible.

DUMAI: 01.41 N. 101.27 E. (See Plan)

IMPORTANT FEATURES:
1. There are 4 CPI Oil Loading Berths, 2 Government Cargo Wharves and 2 Pertamina Refinery Wharves (6 berths) at Dumai. The CPI Oil Loading Berth No. 4 can be utilised for handling refined oil product, Oil Berth No. 4 can also be utilised for discharging crude oil. The Pertamina Refinery Wharves are for sole use of the Refinery. The Government Dry Cargo Wharf No. 1 can handle a vessel with a draft of 8 m. and 20,000 g.r.t., whilst No. 2, which can also be utilised for handling palm oil, is for handling dry cargo vessels with a capacity of 10,000 g.r.t. and a draft of 6 m.
2. Government Pilots moor and unmoor all vessels at Dumai Harbour. CPI supervises the movements of all vessels at the CPI loading berths.
3. Safety rules are strictly enforced. The safety requirements are based upon the provisions of the Codes of Safe Practice currently accepted by the Oil and Tanker Industries.
4. The Indonesian Government maintains a radio station (call letters "PKP") at Dumai. All incoming vessels should establish early contact with this station, in order to transmit ETA data, etc.
5. Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by Harbour Authorities on a 24 hour basis (subject to change).
6. The laws of the Republic of Indonesia are in force at Dumai; and all personnel, for their own protection, are urged to abide by them.
7. Display of quarantine signals on approach to Dumai must be maintained, until Pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port.

PORT LIMITS: See "Pilotage" – "Harbour Pilot Area".
DOCUMENTS:
Copy of Agency Agreement Letter of Appointment (SIT LKP).
International Maritime Declaration of Health.
Valid Derat or Derat Exemption Certificate.
13 Crew Lists.
13 Passenger Lists (if passengers carried).
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seamen's Certificates for all crew membe and passengers.
Harbour Report/Last Port Clearance.
Load Line, Ship's Registry, Safety Radio, Construction and Equipme Certificates.
International Certificate on the Prevention of Pollution from Oil an Poisonous liquids.
For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copie Stores List.

APPROACHES: The Dumai Port installations can be reached by dee draft vessels by proceeding from Malacca Strait into Bengkalis an following a buoyed channel on a Southerly course for a distance 22 miles to the junction of the Rupat Strait. Vessels must make a tu of approximately 180° to enter the Rupat Strait and thence Westerly a distance of 33 miles to Dumai. The Bengkalis and Rupat Stra Fairways have been wire-dragged clear to a depth of 24 m. and 18.3 LWS respectively.

Last survey was carried out from April to June 1982. Based on th survey, Dumai Sea Communication imposed the maximum draft vessels passing Rupat Strait in/out bound Dumai Port is 17 m. (55.77 and LOA of 315 m. (1,033 ft.)

Vessels which have an LOA more than the above should have an obtain special guidance and permit from Government Harbour Maste

PILOTAGE: Harbour pilotage is performed by Government Pilots. Th Harbour Pilot will board a vessel at anchorage for berthing immediately on arrival at Buoy No. 18 when berth is available.

Harbour Pilot Area is:
Lat. 01° 44′ 00″ N., Long. 101° 22′ 50″ E.
Lat. 01° 44′ 00″ N., Long. 101° 26′ 50″ E.
Lat. 01° 42′ 35″ N., Long. 101° 30′ 00″ E.
Lat. 01° 40′ 00″ N., Long. 101° 30′ 00″ E.

Sea Pilots: Sea piloting for the Rupat and Bengkalis Straits is provide by the Department of Sea Communication.

According to the Dumai Port Authority's letter dated June 25, 197 there are 2 piloting areas for Sea Pilot.

1. Bengkalis Strait and Rupat Strait from Fairway Buoy or Easter part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Lon 101° 30′ 00″ E.).
2. Rupat Strait and Bengkalis Strait from Eastern limit of Dum Harbour Pilot Area (Long. 101° 30′ 00″ E.) to Northern limit of Sung Pakning Harbour Pilot Area.

Pilotage is compulsory for vessels with a capacity exceeding 105 g.r

6 hours prior to arrival Dumai Harbour area, all vessels should conta CPI through VHF Radio Channels 10 or 16 and 69. At Fairway Buoy vessels should hoist International Code Flag "I require a Pilot" an contact Morong Pilot Station via Channel 16 for a "request for Pilot".

According to the Dumai Port Authority's memo dated May, 197 effective on 1st June, 1972, all vessels proceeding to Dumai shou hoist the International code flags "H" or "PT" when passing Buoy No. 1 as "requesting for Pilot" and call CPI's radio telephone (VHF) Channel 12. You will be informed whether or not Pilots are available not you may then proceed directly to Dumai Harbour Anchorage Are

The practice of berthing and unberthing vessels utilising CPI Moori Masters has been discontinued.

Shipmaster's Report: 1977. Sea pilotage for the Rupat and Bengkal Straits is now compulsory. The Sea Pilot will board vessels at Fairwa Buoy, position Lat. 01° 54.5′ N., Long. 101° 51.5′ E.

Contact with the pilot station "Morong" is allowed on Channel 16.
In case the Pilot is not available, the recommended anchorage are is 0.5 miles N.N.E. from Fairway Buoy.

ANCHORAGE: The Dumai general anchorage area is North and We of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. sho spot to East of general anchorage should be noticed. Holding ground anchorages considered good, bottom clay. Area large with sufficie manoeuvring and swinging room for several vessels of size to b accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instruc by the Dumai Port Control Radio to berth on arrival, it is suggested th they proceed to the recommended anchorage area.

Cargo Ships:

Lat. 01° 43′ 20″ N.	Lat. 01° 42′ 50″ N.
Long. 101° 25′ 30″ E.	Long. 101° 27′ 00″ E.
Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 10″ N.
Long. 101° 25′ 30″ E.	Long. 101° 27′ 00″ E.

Ballasted Tankers:

Lat. 01° 44′ 20″ N.	Lat. 01° 43′ 34″ N.
Long. 101° 24′ 30″ E.	Long. 101° 27′ 00″ E.
Lat. 01° 43′ 36″ N.	Lat. 01° 42′ 46″ N.
Long. 101° 24′ 30″ E.	Long. 101° 27′ 00″ E.

For Deep Draft or Loaded Tankers:

Lat. 01° 43′ 34″ N.	Lat. 01° 42′ 46″ N.
Long. 101° 27′ 00″ E.	Long. 101° 29′ 50″ E.
Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 00″ N.
Long. 101° 27′ 00″ E.	Long. 101° 29′ 50″ E.

Prohibited Area:

Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 16″ N.
Long. 101° 27′ 00″ E.	Long. 101° 28′ 46″ E.
Lat. 01° 41′ 12″ N.	Lat. 01° 40′ 58″ N.
Long. 101° 27′ 00″ E.	Long. 101° 28′ 46″ E.

MAX. SIZE: Length 315 m., draft 17.7 m. Vessels over 315 m. hav have a special permit.

Also see "Approaches" and "Shipmaster's Report" dated Octo 1983 – "Circular".

RESTRICTIONS: *Requirements for Entering Restricted Maritime Zone of Sumatra:* For some years, the Rupat-Bengkalis Straits area has been designated a Restricted Maritime Zone by decree of the Government of Indonesia.

A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this Zone has been granted by the Indonesian Navy to tanker vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable. All vessels inbound to Dumai from the time abreast Raleigh Bank Light Buoy until anchored off Dumai Terminal must display the following recognised signals:

By Day:	The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.
By Night:	A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian Naval Patrol Crafts.

The foregoing is subject to change.

RADIO/VHF:

1. *Means of Communications:* The following communication systems are available for vessels proceeding to Dumai:

(a) Dumai Radio Call Letters "PKP" (Government Coastal Radio).
(b) VHF Station Channel 16 (CPI and Pertamina operated).
(c) Telex CPI No. 44386 Jakarta or 56271 Dumai.
(d) Telex Pertamina No. 45348 Perta Jakarta or 49285 Perta Jakarta.

2. *ETA Messages:* Vessels proceeding to Dumai shall send ETA Dumai message as follows:

2.1. When proceeding direct from any port other than Palembang and Singapore:

(a) 96 hours prior to arrival at Dumai, transmit ETA Dumai message by vessel's radio to "Caldum" Dumai and "Pertaminaship" Dumai through Dumai Radio Station Call Letters "PKP".
(b) Should ETA Dumai change by 3 hours, send an amended ETA message immediately to "Caldum" Dumai and "Pertaminaship" Dumai.
(c) 24 hours before arrival at Dumai, *confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai regardless of any change in last ETA message sent.

2.2. When proceeding from Singapore:

(a) 96 hours prior to arrival at Singapore, cable ETA Dumai and estimated time of stay in Singapore to "Caldum" Dumai and "Pertaminaship" Dumai. Include words "From Singapore" in ETA message.
(b) At Singapore, when departure time from Singapore is known, *confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai through vessel's Agent in Singapore.
(c) Immediately upon departure from Singapore, and when vessel's radio can be used legally, re-*confirm* or *amend* ETA Dumai to "Caldum" Dumai and "Pertaminaship" Dumai.

2.3. When proceeding from Palembang:

(a) At Palembang, when departure time from Palembang is known, cable ETA Dumai to "Pertaminaship" Dumai through vessel's agent in Palembang.
(b) Immediately upon departure from Palembang, and when vessel's radio can be used legally, *confirm* or *amend* ETA Dumai to "Pertaminaship" Dumai.

3. *Operating Schedule and Frequencies:* There is a Government Coastal radio station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name : Dumai Radio
Call Letters : "PKP"

Time (GMT)	*Transmits*	*Listens On*
0000 – 0030	448 kHz	500 kHz
0400 – 0500	448 kHz	500 kHz
0800 – 0900	448 kHz	500 kHz
1200 – 1300	448 kHz	500 kHz
1300 – 1400	8726 kHz	8726 kHz
0030 – 0130	8726 kHz	8726 kHz
0230 – 0330	13101 kHz	13101 kHz
0630 – 0730	17184 kHz	17184 kHz
0130 – 0200	2182 kHz	2182 kHz

If contact cannot be made with Dumai Radio, contact Singapore Radio, Call Sign "9VG" and forward ETA message to Amoseas Singapore "RS-21349".

4. *Radio Telephone (VHF):* A CPI operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities.

The following channels are available:

Channel 10 with Frequency : 156.500
Channel 16 with Frequency : 156.800
Channel 69 with Frequency : 156.475

Also see "General" before first port.

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until Pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not Free Pratique).

TUGS: At present mooring and unmooring assistance is provided by 5 Government 3200 h.p. diesel tugs which are stationed in the immediate vicinity of the wharves. Tugs lines used. While rendering assistance the tugboats are under orders of the Pilot on duty.

Number of tugs required is based on vessel's length.

71 m. – 100 m. length	1 tug
101 m. – 150 m. length	2 tugs
151 m. – 200 m. length	2 tugs
201 m. – 300 m. length	3 tugs
Over 301 m. length	4 tugs

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 8 wharves. 2 wharves are Government-owned and operated cargo wharves. One wharf is Pertamina owned and consists of 2 berths. A new wharf is Pertamina owned and consists of 4 berths. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading/unloading of crude oil. These oil wharves are equipped with docking sonar for monitoring speed and distance of approaching vessels to be berthed at the wharves.

Terminal Official will relay the indicated speed and distance by walkie-talkie radio to the Pilot or Master on board vessel.

(a) C.P.I. Oil Wharf No. 1, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 28′ 07″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 61 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 285 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow.

(b) C.P.I. Oil Wharf No. 2, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 52″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,424 ft. 8 in. Least depth at face of wharf 59 ft. (LWS). In terms of vessel's size and design this would be an LOA of approx. 350 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow. Under certain circumstances in favourable weather conditions, slack tide during day time, this wharf is capable of receiving a VLCC with special arrangements.

(c) C.P.I. Oil Wharf No. 3, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 42″ E. Design capacity 100,000 d.w.t. Length between outer dolphins 1,170 ft. In terms of vessel's size and design this would be an LOA of approx. 260 m., and a draft of 17.7 m. Orientation of the wharf parallels the current flow at 095° – 275° true.

(d) C.P.I. Oil Wharf No. 4, located in approximate position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 31″ E. Design capacity 55,000 d.w.t. Length between outer dolphins 1,005 ft. 6 in. In terms of vessel's size and design, this would be an LOA of approx. 210 m., and a draft of 15.3 m. Orientation of the wharf parallels the current flow.

(e) Government Cargo Wharf No. 2, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 04″ E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (LWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of 5 tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

(f) Government Cargo Wharf No. 1, located next to Cargo Wharf No. 1, has designed capacity of 10,000 d.w.t.

(g) Pertamina Wharf Nos. 1 – 6.

1. Approximate Location:
   Berth Nos. 1 – 2: Lat. 01° 41′ 12″ N., Long. 101° 28′ 16″ E.
   Berth Nos. 3 – 6: Lat. 01° 41′ 12″ N., Long. 101° 28′ 39″ E.
2. All 6 berths are utilised for loading/unloading refined products, residue, Coke (Berth No. 4 only) and LPG.
3. Design Capacity:

Berth No.	*Max. d.w.t.* (tonnes)	*LOA* (m.)	*Draft* (m.)	*Least Depth at face of wharf at LWS* (m.)
1	100,000	275	17.2	18
2	10,500	135	13.0	15
3	35,000	200	16.4	16
4	25,000	154	16.0	15
5	35,000	200	15.6	16
6	3,000	90	16.1	15

4. Orientation of the berths parallel to the current flow.
5. Put into service:
   Berth Nos. 1 – 2 in 1971, Berth Nos. 3 – 6 in 1984.
6. Wharf Facilities:

Berth No.	*No. of Chiksans*	*Size* (in.)	*Capacity*	*Bunker*	*Fresh Water*	*Deballast Facility*
1	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	16	2,500 l.t.p.h.			
	1	8	600 l.t.p.h.			
2	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	8	600 l.t.p.h.			
3	3	12	1,500 l.t.p.h.	N/A	Available	N/A
4	1	—	600 t.p.h. 500 t.p.h. (coke)	N/A	Available	N/A
5	3	12	1,500 l.t.p.h.	N/A	Available	N/A
6	1	4	280 cu.m./hr.	N/A	Available	N/A

Notes: Berth Nos. 1 and 2:

Terminal: Also known as Putritujuh (Seven Sisters), Pertamina Terminal (Berth Nos. 1 and 2) consists of a finger shaped oil jetty with 2 loading berths (Outer and Inner) which are utilised for refined products. A barge pier lies immediately Westward of the oil jetty. All are owned and operated by Pertamina.

At the Outer Berth (Berth No. 1) 3,200 h.p. tugs are being used to berth/unberth vessels at any time and any stage of the tide by using the minimum vessels' engine and working in "lock" position nosing vessel at forward, midship and aft. Mooring boats assist in bringing lines to mooring dolphins. Head and stern lines are sent first.

The Jetty is a steel/concrete piling system with a concrete slab paving. The fendering is very efficient and in good condition and consists of 4 steel framed pads with springs and rubber bumpers chained to the jetty. Ordinary mooring equipment (ropes and/or wires) is requested from the vessel. No shore moorings are provided. Minimum vessel size for this berth is 13,000 d.w.t.

At the Inner Berth (Berth No. 2) mooring and unmooring is restricted to tide flooding current (Eastward), vessels always to berth with starboard side to 2 fendering pads similar to those at the Outer Berth ensure a good berthing. Vessels to provide only the ordinary mooring equipment existing on board. No additional moorings are provided by shore.

(h) General Wharves

Berth	*Length* (m.)	*Width of Apron* (m.)	*Depth* (m.)
Barges Wharf	40	16	9.0
Pilot Wharf	34	6	7.0
Domestic Wharf	60	6	6.0
Domestic Wharf	40	7	6.0
Palm Oil Dolphin			12.0

CARGO: There are 3 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API gravity 36° approximate. Pour point 100°F. Solid point ±85°F.
2. Duri Crude with API gravity 22° approximate. Pour point ±60°F. Solid point ±55°F.
3. Pedada Crude. This crude is classified as Sumatran Light Crude.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

C.P.I. Oil Wharf	*Size of arms* (in.)	*No. of arms*	*Size of flanges* (in.)	*Sumatra Light and Medium Crude Peak Capacity*	*Average Capacity*
No. 1	12	4	12	50,000	35,000
No. 2	16 – 12	3	12	75,000	40,000
No. 3	12	4	12	50,000	35,000
No. 4	12	2	12	25,000	15,000

All the loading arms flanges are designed to U.S. standard flanges, faced and drilled. All these wharves have Chicksan loading arms. The above peak and average capacity rates are for Sumatran Light Crude. For Duri Crude the above rate should be reduced to approximately 70%.

In case of low stock position, the average capacity may be reduced to approximately 50%.

Responsibility for Loading Arrangements: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by a ship's Officer, and sufficient personnel should be on deck at all times to handle the loading and/or unloading operation.

Upon completion of loading and/or unloading, the vessel will be required to leave the wharf immediately after disconnecting hoses to await clearance at the anchorage.

Hose Handling: Wharf crews are on duty to handle loading arms and/or oil hoses on the wharf. Any required reducers and/or elbows to be fixed to ship's manifolds should be handled by ship's personnel (will not be handled by CPI personnel).

Cargo Loading Procedures: Before the loading is begun, the Master will assure that Terminal and Port Regulations pertaining to readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive cargo, and that all precautions required by the circumstances have been taken. When the vessel is in all respects ready, the following loading procedure will apply:

(a) The Chicksan arms and/or cargo hoses will be swung on board by lifting gear located on the wharves and also with the assistance of the vessel's gear if required.

The required reducers and elbows to fit vessel's manifold must be connected and disconnected and taken from or to shore by ship's personnel.

(b) Notice must be given by the vessel to the Head Wharfman 90 minutes before the vessel completed deballasting.

(c) Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradually be increased until the desired rate has been reached.

(d) The vessel must give 30 minutes notice to the wharf before starting to "top off", and shall advise if a decrease in loading rate is desired.

(e) The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the Head Wharfman may reduce to 1 pump.

(f) Ship's valves shall not be closed against loading pump pressure.

(g) On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

(h) All cargo tanks openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

The vessel will be unmoored immediately after completion of loading as tide and weather condition permit.

Suspension of Oil Handling Operations: Terminal personnel are authorised to suspend oil handling operations in the event any of the safety rules mentioned under "Safety Regulations" are not observed, or in the event of non-compliance with safety rules generally observed by competent tanker personnel. Oil handling operations may also suspended if any other danger is believed to exist.

Oil Inspectors: There is no independent agency providing oil inspectio service at Dumai.

Vessel's Gangways: Vessels shall supply safe gangway from ship shore, which shall be adequately illuminated during the hours darkness.

BALLAST: *Pollution of Sea by Oil:* The discharge of dirty ballast wi the territorial waters of Dumai Port and entrance passage (Rupat a Bengkalis Straits) is strictly prohibited. Shore facilities for disposal dirty oily ballast water is available at Dumai, however only for domes tankers. For safe manoeuvring purposes, it is therefore compulsory th tankers arrive with sufficient clean ballast water on board to meet th requirement for minimum safe manoeuvring draft. All ballast water o board tankers other than domestic tankers loading at Dumai Wharv must be pumped overboard after arrival at berth and prior to loading after arriving alongside, a vessel is found to have dirty ballast water o board, such vessel will be sent to sea to accomplish the necessary ta cleaning. Such action will be on the vessel's expense and C.P.I. will n accept responsibility for the resulting delay to the vessel or any clai of the result thereof. A new Notice of Readiness to load must therefo be tendered. "Load-on-Top" procedure is expected to be carried out b each vessel loading at Dumai.

Ballast Requirements: Vessels should arrive with sufficient clean balla water to enable safe manoeuvring under prevailing weather condition The accepted standard of deballasting time is 6 hours.

Deballasting Facility: Deballasting facilities have been constructed Dumai and connected to all 4 C.P.I. Wharves.

However, this facility is only for domestic sailing tankers. Oceangoi tankers are expected to arrive with sufficient clean ballast water.

Minimum Draft: Minimum draft schedule recommended for vario tonnage tankers are as follows:

	d.w.t	*Forward*	*Aft*
a.	12,000 – 22,000	12 ft.	20 ft.
b.	22,000 – 32,000	16 ft.	24 ft.
c.	32,000 – 45,000	18 ft.	26 ft.
d.	45,000 – 60,000	19 ft.	27 ft.
e.	60,000 and over	22 ft.	28 ft.

The above is a recommendation only and the Master should use h own discretion in order to have safe manoeuvrable draft on arrival a while berthing.

READINESS: *Notice of Readiness:* The Master or his representative required to hand to C.P.I. or its Agent at loading port, a written Notic of Readiness to load during business hours (24 hours everyday). Recei of such Notice of Readiness by C.P.I. does not necessarily imp acceptance.

Every effort will be made to berth and load vessels on arrival in po Arrival means anchoring or arrival at anchorage area in Dum Harbour, see "Anchorage".

Readiness to Load or Unload: The following will apply in regard to Noti of Readiness to Load or Unload.

Notice of Readiness to Load or Unload is a warranty on the part the Master that the vessel is in all respects ready to load or unload a that all tanks, pumps, pipe-lines and appurtenances of the vessel are to receive the cargo to be loaded or unloaded.

STEVEDORES: ETA should be sent to Agency or stevedoring compa 2 days before arrival in order that necessary gangs may be arrange Main commodity rates: Palm oil 200 tonnes/p.h. Sawn timb 25 cu.m.p.h. and bagged cargo 20 – 25 t.p.h.

MEDICAL: The Port Health Doctor has only limited facilities for medic treatment. If the services of more complete and/or specialised medic assistance are needed or emergency cases arise on board tanke calling at Dumai, the Port Health Doctor might refer such cases to C.P. hospital facilities or Pertamina Hospital. Dental facilities availab However, Masters of all vessels bound for Dumai are requeste if possible, to call at Singapore for medical assistance.

CRANES: 1×13 tonnes. 1×18 tonnes used for small ships and barge

DENSITY: 1020.

FRESH WATER: Fresh water is available in limited quantities at wharves. A request statement must be submitted to the Port Author through the vessel's Agent.

FUEL: Not available.

FIRE PRECAUTIONS: Perumpel I Dumai Co., Tel: 2469. Calte Tel: 261. Pertamina, Tel: 272.

CONSULS: There are no Consuls or other foreign Governme Representatives located at Dumai, or in the immediate vicinity.

REPAIRS: No repairs shall be carried out to the main propulsio machinery and/or essential auxiliaries while alongside. The vesse main propulsion machinery shall be in readiness for instantaneous u on short notice. No repair facilities ashore.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesi Customs Officials on arrival and will remain sealed until the vesse leave Indonesian waters.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters tankers calling at Dumai maintain a close security watch while at anch as well as when alongside the wharves. It is further recommended th on board the tankers unoccupied rooms should be securely locked a port holes closed before being vacated.

OPENING/CLOSING HATCHES: By stevedores.

CARGO GEAR:

Forklifts:	3×2 tonnes.
	2×3 tonnes.
	1×5.5 tonnes.
Head Truck:	2×40 tonnes.
Trailers:	2×40 tonnes.
	4×20 tonnes.
Top Loader:	1×40 tonnes.

AIRPORT: Distance to airport 10 km. Jakarta: 3 flights weekly serv by Merpati Pelita. Medan: 4 flights weekly served by Merpati Pel Batam: 3 flights weekly served by Merpati Pelita.

REPATRIATION: Due to transportation difficulties and shortage of accommodation, normally no crew members from any vessel are allowed to disembark for repatriation purposes.

In emergency cases such as sickness and accident, however, C.P.I. may at its own discretion and upon request of the Master of the vessel concerned, assist in the repatriation process.

TIME: GMT plus 7 hours all year round.

HOLIDAYS: 12 religious and national holidays.

POLICE/AMBULANCE/FIRE: Tel: 21351 or 381 or 266.

EMERGENCY CO-ORDINATION CENTRE: Tel: 21437 (Coast Guard).

BANKS: 5 National Banks available.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. Shipmaster to inform Agency who will contact leveransir Company.
3. Distance 4 km.
4. Yes.
5. Contact Agent.
6. Riggers can be employed to assist with storing.

SHORE LEAVE: Shore liberty may normally be granted to ship's Officers and crew after clearance of the vessel by Harbour Authorities. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the C.P.I. compound is out of bounds with the exception of the road from the wharves to the village road. Penalties imposed for violation of Harbour Regulations or local laws have been severe and C.P.I. can not intervene in such cases.

IDENTIFICATION CARDS: I.D. Cards and Passports required.

PROVISIONS: There are very limited facilities to handle ship's laundry and supply ship's provisions.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during Spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.E. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 hrs. and 0200 hrs.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70% – 90%).

SAFETY: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

Emergency Facilities: The following shore fire fighting facilities are available at each wharf to assist a vessel in the initial stages of a fire at wharf.

(a) *C.P.I. Oil Wharf Nos. 1 – 4:*
1 fire pump capacity 750 g.p.m.
1 fire fighting monitor.
6 fire hydrants.
2 fog spray hydrants.
2 revolving nozzles underneath wharf.
1,000 ft. fire hoses of 2.5 in.
16 cans foam compound.
6×20 lbs. safety meter dry chemical powder.
1 set booster hose.
1 set foam equipment.
2×150 lbs. Yamato dry chemical powder fire extinguisher.

(b) *Tugboats:* Under instructions of Port Authority, equipped with fire fighting equipment and remote controlled nozzles.

Emergency Signal:

(a) The ship should sound an emergency station's signal consisting of a continuous ringing of the ship's alarm bells supplemented by a series of short blasts of the ship's whistle or siren. C.P.I. will then take such action as is necessary.

(b) A telephone is fitted on each wharf. C.P.I. personnel should be telephoned for assistance.
If no C.P.I. personnel are available, ship's personnel may call for emergency assistance by dialling telephone number 222 from each wharf.
After dialling, state the following:
1. Your name and name of vessel.
2. The exact location of the fire.
3. The nature of the fire if possible.

(c) Assistance can be summoned on VHF Radio if necessary. Use International Channel 12 or 16 on VHF. Given location and extent of assistance required.

(d) Refer to Fire Instructions Pamphlet as usually given to all vessels alongside the wharves.

(e) The shore signal in the event of an emergency is a fire siren or an alarm.

DEVELOPMENTS: One new berth for palm oil under construction, also 3 berths for sawn timber, fertiliser, palm kernels, rubber and general cargo.

GENERAL: *Charts and Publications:* Masters of vessels proceeding to Dumai should obtain the latest sailing directions, charts and Hydrographic bulletins for the area.

In this respect attention is invited to the latest editions:

(a) U.S. Hydrographic Office Publication 162, Sailing Directions for Malacca Strait, Cape Rachado to Singapore;
(b) U.S. Hydrographic Office Chart No. 3764, Bengkalis and Rupat Straits;
(c) Netherlands Hydrographic Office Chart No. 18 (East Coast of Sumatra);
(d) British Admiralty Chart No. 795 (Cape Rachado to Singapore);
(e) The Indonesian Hydrographic Office Chart No. 18 covering Bengkalis and Rupat Straits.

Boarding on Arrival: A Government Pilot will board vessel on arrival if Wharf is available and will advise and assist in proceeding to wharves. A representative of the ship's Agent will also board the vessel at anchorage or alongside one of the wharves to deliver publications and forms and will make the necessary arrangements for vessel to load.

Port Officials: The Indonesian Government Port Authorities are located in the Government building situated along Jalan Laksamana (Laksamana Street).

General Cargo: General cargo consigned to C.P.I. is handled at the Government Cargo Wharf at Dumai. Only mobile cranes with a maximum lifting capacity of five tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

Compulsory Sea Pilot Area: Bengkalis Strait and Rupat Strait from Fairway Buoy or Eastern port of Morong Pilot Station to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.).

Other Areas Requiring Sea Pilot: Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area. (Applicable to vessels bound for Sungai Pakning from Dumai or v.v.).

General: While vessels are at anchor, no physical communication is allowed with shore except in emergency cases and/or with prior approval from the Harbour Authorities.

Lowering of ship's boats is prohibited without the prior approval from the Harbour Authorities.

Pilferage has taken place recently on board tankers at Dumai anchorages and wharves. C.P.I. of course regrets this practice, and strongly suggests that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside, the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated. C.P.I. also wishes to draw all Masters' attention to the practice of trading with local sampans at the anchorage, which is also a fire hazard, and will not be tolerated by C.P.I. C.P.I. request that all possible steps be taken by ship's personnel to keep sampans away from the vessels while alongside, as loading may be stopped until this hazard has been cleared.

It should be noted that Harbour Authorities prohibited the presence of sampans near alongside vessels.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, precious stones and metals, fire arms, ammunition, sheath knives and similar weapons, or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws. C.P.I. employees are prohibited from bringing firearms, knives, liquor, cigarettes, food stuffs or other articles ashore and shipboard personnel must not offer such items to them. Commissions for the importation of goods from other countries are not to be solicited or accepted.

Compliance: Masters are requested to inform ship's Officers and crews of the foregoing regulations pertaining to contraband, shore liberty, etc., to assure that they are completely understood, and to require the full compliance of all hands.

SHIPMASTER'S REPORT: October, 1983.

Documents: 14 Crew Lists required and all ship's personnel require passes. Immigration stamp all Discharge Books and/or Passports on arrival and Agent will take them ashore about 1 hour before unberthing for stamping again, when all passes also returned.

Pertamina, as vessel's Agents, have own forms for N.O.R., and Dry Certificates.

Cargo Inspector has his own forms.

Berthing: Vessel (140,000 d.w.t.) berthed at No. 2 Berth, stemming the tide. 3 tugs used, 1 forward, 1 aft and 1 midships with tugs' lines. Moorings 3, 3, 2 each end. Forward headlines first then breasts then springs and aft springs first, then breasts then sternlines. 2 watchmen on board all the time and they are very efficient.

After loading and if on maximum permissible draft, (see "Circular") then vessel unberths and anchors off berth to await HW.

Density: Density varied between 1008 and 1015 depending on state of tide.

Services: Ship Chandler will arrange for a barber to come on board and will also bring on board items for sale such as batik.

A telex message sent through Agents took 51 hours to reach Singapore.

Identification Cards: All visitors to vessel require a pass issued by Texaco. Also see "Documents".

Circular: To All Agency Tankers Calling at Port of Dumai:

Based on the Circular of Dumai Harbour Master dated 14th January, 1982, Ref. No. S.DMI.AL.14/1/1982 regarding the draft limitation for vessels passing Dumai-Morong route, based on the result of the survey carried out by the Sea Communication Team, we herewith inform you that for the sake of your vessel's safety, your vessel's draft should not be more than 17 m. (max. LOA 315 m.) when passing the above mentioned route. Please be advised too, that you are recommended to pass this route during the high tide only.

Dumai, 20th January, 1982,
Pertamina of Shipping Dumai.

AGENCY: See "General" before first port.

AUTHORITY: Port Administration of Dumai, JL. Datuk Laksamana, Dumai. *Tel:* 21469, 21369, 21325, 21442. *Telex:* 56290. *Cables:* Adpel Dum. *Contact:* H. Simanjuntak, Port Administrator. Tel: 21162.
Note: Pilot Station, 21442-278-372, contact 24 hours.

C.P.I.: 434-261-278. Pertamina: 272-372.

P. T. Caltex Pacific Indonesia. (Head Office), Kebon Sirih 52, Jakarta 10110, Indonesia. *Tel:* 376908. *Telex:* 44386 Caltex IA. *Cables:* Calpacem, Jakarta.

Operating Office: Rumbai, Pekanbaru 28271, Sumatra. *Tel:* 21377. *Telex:* 56112 Caltex PBR, 56271 Caltex DUM (Dumai Terminal Office). *Cables:* Calpacem Pekanbaru.

GEBE ISLAND: 00.03 S. 129.23 E. (See Plan)

LOCATION: Port of Gebe Island is situated in the Halmahera Sea, North Maluku in position Lat. 00° 03′ 50″ S., Long. 129° 22′ 44″ E.
DOCUMENTS: *Documents to be produced upon vessel's arrival:*

11 copies Crew List.
11 copies Passengers List (if any).
4 copies Parcel List (if any).
4 copies Stores List.
5 copies Cargo Manifest.
5 copies Narcotic List.
6 copies General Information.
4 copies Personnel Effects List.
3 copies Vaccination List.
5 copies Fire Arms & Ammunition List.
Ship's Register.
Certificate of Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
International Load Line Certificate.
Maritime Declaration of Health Certificate.
Derat Certificate.
Last Port Clearance.
Safety Radio Certificate.
Harbour Report.

Ship's Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel has been granted Free Pratique, the Immigration Officer checks Passports, Seamen's Books and Crew List and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Gebe Island.

Use of ship's radio transmitter is prohibited while lying in port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

PILOTAGE: Pilotage not compulsory. There is a Pilot at Gebe Island.
Pilot boarding position: Lat. 00° 03′ 25″ S., Long. 129° 22′ 10″ E.
ANCHORAGE: Anchorage position for ore loading at Gebe Island is Lat. 00° 03′ 50″ S., Long. 129° 22′ 33″ E. Depth 65 m. LWS.
Chart: Indonesian Sea Chart No. 388.
RESTRICTIONS: Vessels may berth/unberth at any time between 0600 hrs. and 1800 hrs. local time.

Vessel may leave the loading point between 0600 hrs. and 2200 hrs.
RADIO: Cables to Adhiguna Jakarta, Antam Jakarta and Antam Ternate can be sent through Jakarta Coastal Radio Station, call sign PKE and Ternate Coastal Radio Station, call sign PKE 5.
Arrival Notice: *Owner's Advice:* Owner to advise by cable to Adhiguna Jakarta and Antam Ternate, with copy to Antam Jakarta, at least 8 working days notice of vessel's ETA at loading port.
Master's Advice: At least 48 hours before vessel's arrival at Port of Loading, Master shall give the following information to Adhiguna Jakarta and Antam Ternate, with copy to Antam Jakarta; Last port of call, draft on arrival, quantity of nickel ore to be loaded, stowage plan, quantity and kind of commodity to be discharged and other necessary information.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience has shown that one cannot rely on telegrams regarding ETA sent by Agents at last port of call to arrive on time, therefore Antam Ternate will wait for the Master's telegram before making the necessary preparations.
TUGS: Available and compulsory.

CARGO HANDLING:
Lighters: A number of lighters of 120 d.w.t. to 600 d.w.t. are availab
Wharves: No facilities.
Loading/Unloading Facilities for General Cargo: No facilities.
Loading Facilities for Ore Carriers: Loading of nickel ore at Gebe loadin point is done by means of ore barges.
Number of Gangs: 4 gangs are usually used by vessels equipped wit cranes or derricks. If necessary stevedores can provide 6 gangs.
Loading Capacity: About 2,000 tons/24 hours per vessel depending o the type of vessel, vessel's cargo gear, weather conditions, etc.
Ore Carriers: All types of fully loaded draft ore carriers are acceptab (Steep bottom sea around the loading point).

Vessels without cranes or derricks, including buckets, are no acceptable.

Minimum capacity of cranes or derricks must be 5 tons.
Unloading: Cargo for Aneka Tambang only.
STEVEDORES: Loading is performed by Shipper's personnel.
Working Hours: Loading to be effected on weather working days o 24 consecutive hours, Sundays and holidays are excepted:

New Year, 1st January.
Idhul Fitri, fixed – 2 consecutive days of the year.
Idhul Adha, fixed day of the year.
Independence Day, 17th August.
Maulid Day, fixed day of the year.
Easter, fixed day of the year.
Waisyak, fixed day of the year.
Nyepi, fixed day of the year.
Ascention, fixed day of the year.
The First Muharram, fixed day of the year.
Christmas, 25th December.

Despatch/Demurrage money to be settled in accordance with th related contract.
Labourers: Labourers will be supplied by Aneka Tambang. Making th vessel ready for loading to be done by vessel's crew members.
MEDICAL: Hospital not available, doctor and inoculations are availab
DENSITY: 1020.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
OPENING/CLOSING HATCHES: The first opening and the last closin as well as removing and reinstalling of hatch beams to be done b vessel's crew.
SURVEYORS: On/Off Hire surveys can be arranged.
REPATRIATION: Can be arranged.
AIRPORT: There are 3 flights per week between Ternate and Gebe an vice-versa, served by Aneka Tambang Charter Flight. Flying time i about 60 minutes.
TIME: GMT plus 9 hours.
HOLIDAYS: See "Stevedores".
SHORE LEAVE: Shore pass must be carried by the crew during sho visit.
Invitation: Vessel's crew members are not allowed to invite friend hawkers from shore aboard the vessel.
Leaving for Ternate: The crew members are prohibited to leave Geb for Ternate, except Master and Officers who must be guided by Agent

Local leave in Gebe is permitted as concession.
GENERAL: *Priority:* First come first served.
Flags to be flown by incoming vessels: Vessel's National flag Indonesian flag, Vessel's numbers, Quarantine and Immigration flag
Ship Chandler: None. In emergency cases, for a limited quantity, Agent can act as ship's chandler.
Fumigation: No facilities.
Vessel's Disbursement Accounts: All vessel's disbursement accoun will be charged to the related principals through the General Agents
Despatch/Demurrage: To be settled in accordance with the relate contract.
Cash in Rupiah: Cash advance at Master's request can be supplied b Agents in a reasonable amount.
AGENCY:
General Agents: P.T. Pelayaran Bahtera Adhiguna, Jakarta, 10 12 Jl. Kalibesar Timur, P.O.Box 1315, Jakarta, Indonesia. Cab Address: Adhiguna Jakarta. Telex: 42854 Adhiguna JKT. Tel: 67654 672613.

Local Agents (Head Office): P.T. Aneka Tambang, 24–26 Jl. Bung Besar, Jakarta, Indonesia. Cable Address: Aneka Tambang JKT. Tele 49147 Antam JKT. Tel: 410108 (Hunting system).

Local Agents at Loading Port: P.T. Aneka Tambang, U Pertambangan Nikel Gebe, Jl. Merdeka No. 4, P.O.Box 37, Terna North Maluku, Indonesia. Cable Address: Antam Ternate. Telex: 731 ATKTTE IA. Tel: (0921) 21686.

GRESIK: 07.09 S. 112.40 E. (See Plan)

BERTHING: Main jetty with length 284.5 m. and berthing dolphin 50 m. from jetty. Depth of water 15 m. – 18 m. Vessels up to 30,000 d.w.t. able to berth off seaward side and 10,000 d.w.t. on shore side.

CARGO FACILITIES: *Discharge Facilities:* 15 ton grab Kangaroo crane with normal operating capacity of 300 t.p.h. and max. 550 t.p.h.

Multi-purpose conveyor to transport materials from the jetty to TSP plant – 600 t.p.h. capacity.

Pumping system for phosphoric acid from vessel to TSP plant tanks, complete with pump – 300 t.p.h. capacity.

Pumping system for ammonia −33°C from vessel to TSP plant complete with pump – 150 t.p.h. capacity.

FRESH WATER: Available.

SHIPMASTER'S REPORT: July 1984.

Location: Lat. 07° 08.4′ S., Long. 112° 39.6′ E., about 4.8 nautical miles N.W. of Sourabaja.

Documents:
Ship's Register.
Derat Certificate.
Load Line Certificate.
Radiotelegraphy Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Seamen's Books.

These documents will be kept ashore during the vessel's stay at Gresik.

For Gresik:
2 Crew Lists.
2 Stores Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
1 Cargo Manifest and/or 1 Bill of Lading.

In addition for Sourabaja:
9 Crew Lists.
2 Stores Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
2 Cargo Manifests and/or 2 Bills of Lading.

Customs: The Customs will not seal the bonded stores, but strictly controls the said quantity of narcotics.

Pilotage: Compulsory, same Pilots as for Sourabaja. ETA to be sent at least 24 hours in advance. Normally the Pilot boards the vessel when passing the Karang Jamuang Island (pilot station), but if required, specially for deep draft vessels, the Pilot will board the vessel at the Outer Anchorage.

Anchorage: Position Lat. 06° 51′ S., Long. 112° 45′ E., depth of water between 35 m. and 40 m.

Gresik Anchorage: Position: Lat. 07° 05.7′ S., 112° 39.8′ E., 2.5 cables off the Petro Kimia Jetty. Sandy ground, no safe anchorage.

Restrictions: Maximum depth of water 33 ft. Maximum breadth of channel: 90 m. Official allowed sea water draft 32 ft., but Pilots accept 32 ft. 06 in.

Berth: Petro Kimia Jetty (private berth). Length of berth 320 m. approx., equipped with large rubber fenders every 40 m. Depth of water between 12 m. and 15 m. Height of tide about 2.5 m.

VHF: Call "Sourabaja Pilots" on Channel 12 or Channel 16 if no reply.

If vessel enters the channel without Pilot, a second call before passing Buoy No. 5 is required.

Tugs: Same tugs as for Sourabaja.

Vessel with a length of more than 150 m. has to take 3 tugs, (one of them only for stand by).

Cranes: 2 cranes, but only one used for discharging sulphur. This crane has a discharging capacity of 300 tonnes/hr.

Working Hours: Day and night, even during "Ramadan".

Times: 0800 – 1200
1300 – 1800
1900 – 2400
0100 – 0600

Fresh Water: Available from the jetty.

Fuel: Available by barge at Sourabaja Anchorage only.

Repairs: From Sourabaja.

Medical: In Sourabaja only.

Shore Passes: Given by Agent, to be returned before departure.

General: No Immigration and Port Health board the vessel at this berth. No foreign currency declaration necessary. Crew changes not allowed.

AUTHORITY: Harbour Master.

JAKARTA (Tanjung Priok): 06.10 S. 106.50 E. (See Plan)

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. (c) through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's Arrival and Departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Ship's Certificate: The Ship's Certificate should be delivered to the Harbour Master through the Agent. This certificate will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

PILOTAGE: Compulsory and available throughout 24 hours. Pilot boards 1 mile North of harbour entrance (Master has reported that pilots like to board inside the breakwater, with engines stopped).

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of 27 MHz is used for communication between the pilot boats and the pilot station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater (Position Lat. 6° 04′ S., Long. 106° 53.2′E.).

APPROACHES: *Navigable Channel:* Length 8,000 m. Minimum width 250 m.-350 m. Minimum depth 11.0 m.-12.0 m. (Chart datum).

RESTRICTIONS: Max. draft is approximately 11 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	190	9.50
2nd	190	9.50
3rd	190	11.00
Oil	190	11.00
Coaster	60	5.00
Bogasari (wheat)	190	9.60
DKP (chemicals)	180	9.00

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose Master has declared that a quarantineable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantineable disease (QL/QQ).

The concerned vessel is free from quarantine measures when Free Pratique has been obtained. The Free Pratique becomes invalid when a vessel is in quarantine as stated above or a quarantineable disease occurs during the validity of Free Pratique.

The Port of Tanjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "Provisional Pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "Provisional Pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "Free Pratique".

Accordingly vessels enjoying "Provisional Pratique" are still required to hoist the quarantine flag.

Vaccination/Immunisation: Vaccination and immunisation against cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

Harbour Master	Channels 16, 8, 12
Pilot	Channels 12, 14, 16
Tugboat Operations	Channels 8, 12
Port Operations	Channel 14
Public Service	Channel 16

CRANES:

	No.	*Capacity* Tonnes
Mobile Cranes	9	5 – 35
Floating Cranes	3	15 – 200
Quay Cranes	3	35 – 40
Transtainers	9	35 – 40

TUGS: Tugs are operated by the Port Administration. Vessels of 100 m. LOA and over have to use 2 tugs. 10 tugs available from 135 h.p. to 1,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth (Chart Datum)* (m.)
Coaster Harbour	663	5.0
1st Inner Harbour	2,677	9.5
2nd Inner Harbour	2,040	9.5
3rd Inner Harbour	2,236	11.0
Container Wharf	400	9 – 12
Conventional Wharf	500	9 – 11.5
Mineral Oil Harbour		
Oil Jetty	100	11.0
Bogasari (wheat)	200	9.6
Liquid Chemical	180	9.0

Buoys	*Number*	*Capacity* (tons)
West Buoys	6	15,000
East Buoys	10	5,000
1st Inner Harbour Buoys	7	6,000
3rd Inner Harbour Buoys	4	15,000
Nusantara Buoys	2	5,000
Dredging Yard Buoys	1	2,000

SPECIALISED CARGO-HANDLING FACILITIES: There are 2 transporters with grippers available at the coal wharf. 18 head trucks up to 40 tonnes capacity. 112 forklifts 2 tonnes – 40 tonnes capacity.

Container Facilities:

4 gantry cranes with capacity 40 tons.

6 straddle carriers with wide span and capacity 40 tons.

7 straddle carriers with small span and capacity 35 tons.

Container yard with capacity for 1,969 TEUs, including 186 reefer plugs.

STEVEDORES:

Working hours: The usual working hours at the harbour are:

Monday-Thursday	0800 – 1200 hrs. 1300 – 1600 hrs.
Friday	0800 – 1100 hrs. 1330 – 1600 hrs.
Saturday	0800 – 1200 hrs. 1300 – 1400 hrs.

Overtime is allowed on request.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipe-line or barge, rate 15 – 120 t.p.h. Barge capacity 60 – 350 tons.

FUEL: Available by pipe-line or barge, (3×400 tonnes), supplier is Pertamina. Rate: 65 t.p.h. – 80 t.p.h. by pipeline, and 45 t.p.h. – 60 t.p.h. from barge.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CUSTOMS ALLOWANCES: Tobacco: Each crew member is allowed to carry 200 cigarettes or 50 cigars or 100 grams of tobacco ashore without paying import duty. Alcohol: There is no allowance for alcoholic drinks. Other commodities: Maximum value of U.S.$100. Each crew member is allowed to bring personal goods in use up to maximum value of U.S.$100.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available. Joining crew must hold an Indonesian Transit Visa.

AIRPORT: Kemayoran International Airport is approximately 8 km. from Tanjung Priok, and Halim International Airport is approximately 25 km. Kemayoran Airport, Tel: 47031.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire 291399; Security 291691/291459; Ambulance 291045/290097.

SHIP SUPPLY SERVICE:

P.T. Harapan Insani, 25 Jalan Imam Bonjol, Jakarta. Tel: 334-032, 334-084, 334-180, 334-214, 349-971. Telex: 44912 Incate Jkt, 46855 Insani Jkt. Branch: Balikpapan (East Kalimantan).

P.T. Patra Supplies & Services, No. 3 Gedung Patra, Jalan Gatot Subroto, P.O.Box 377/KBY, Jakarta. Tel: 513-955, 511-356. Telex: 44976 Cater Ia. Branches: Balikpapan (East Kalimantan) and Singapore.

P.T. Tata Wisata, Jalan Iskandarsyah Raya No. 1, Kebayoran Baru. Tel: 713-707 (3 lines). Telex: 47331 Tata Ia.

P.T. The First Trijaya, Jalan Tanah Abang II/97, Jakarta. Telex: 45965 Fitric Jkt. Cable: Fitricate.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CREW IDENTIFICATION CARD: Crew members having no Passport are required to carry a Seamen Identification Card (S.I.C.).

DEVELOPMENTS: Dredging underway. Container berth to be extend by 400 m. 2 container cranes and 14 rubber tyred gantry cranes order.

AUTHORITY: Tanjung Priok Port Administration, P.O.Box 98, Ja Palmas No. 1, Tanjung Priok, Indonesia. *Tel:* 491132, 491207, 4912 491364, 492208. *Telex:* 49282. *Contact:* Port Administrator.

AGENT: Jardine Shipping Services, c/o P. T. Mitranava, Level Wisma Metropolitan I, 29 Jalan Jendral Sudirman, Tromolpos 1418/JK Jakarta 10002, Indonesia. Tel: 62-21-514009. Telex: 62161. Fax: 6 21-514228.

Associated with Jardine Shipping Agencies.

JAMBI: 01.35 S. 103.38 E.

PILOTAGE: Compulsory. Pilot station at Muara Sabak.

RESTRICTIONS: The port is located approximately 90 miles from t outer bar of Batanghari River.

Maximum depth at the outer bar at high water is 4.0 m.

RADIO: Jambi Coastal Radio Station. Call sign PKC-3.

Frequencies: 6,491.5 kHz (A1), 3,825 kHz (A3).

VHF: Jambi Coastal Radio Station on Channel 16.

BERTHING: Concrete wharf with length 72 m. and depth alongsi 2.0 m.

Storage: There is a godown with 700 sq.m.

Fork Lifts: 2×2 tons – 5 tons.

CRANES: 2×5 tons – 10 tons mobile cranes.

STEVEDORES: Available from the labour pool.

MEDICAL: Medical assistance available.

FRESH WATER: Available in limited quantities.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Barges available with capacity 300 tons.

JAYAPURA: 02.37 S. 140.39 E.

PILOTAGE: Pilotage is compulsory. Pilot boards vessel at t anchorage.

ANCHORAGE: Vessels anchor in position 02° 32′ 12″ S., 140° 43′ 24

RADIO: Jayapura Coastal Radio Station. Call sign PKN.

Frequencies:	8,694	kHz. (A1)
	13,101	kHz. (A1)
	17,074.4	kHz. (A1)

TUGS: No tugs available.

BERTHING: Concrete wharf length 132 m., depth alongside 8.8 m.

Storage: There is a godown with 4,100 sq.m. and an open storage ar with 2,000 sq.m.

Fork Lifts: 4×2.5 tons – 3.5 tons.

CRANES: 1×5 ton mobile crane.

TANKERS: There is an oil jetty for small tankers. Length of jetty 33

STEVEDORES: Available from labour pool.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No facilities available.

KAKAP NATUNA MARINE TERMINAL:
05.01 N. 105.57 E. (See Pla

LOCATION: The Kakap Natuna Marine Terminal is located about 1 nautical miles North from the nearest land, in a group of Indonesi islands called the Anambas Islands.

Position of SPM Buoy: Lat. 05° 01′ 28″ N., Long. 105° 57′ 02″ E.

Position of Wellhead Platform: Lat. 05° 01′ 44″ N.,
Long. 105° 55′ 55″ E.

Charts for the area as follows: British Admiralty Charts No. 2660 3573, 1311 and 1371.

Description: The Marine Terminal consists of a floating productio storage and offloading facility (FPSO). The FPSO, a converted tan of 137,160 Summer d.w.t. tonnes, is permanently moored to a caten anchor leg mooring buoy (SPM). The FPSO and buoy are connec by a rigid 'Delta' frame yoke. To accommodate motion, the yoke is hing to the FPSO stern and the arm is attached to the buoy turntable allow the FPSO and export tanker to rotate 360° around the moorin response to current, wind and wave conditions. The export tanke moored in tandem and loaded by means of a floating hose from the b of the FPSO to the midship manifold of the tanker. Total crude oil stor capacity of the FPSO is 750,000 barrels. The greatest single lift avail to an export tanker is approximately 660,000 barrels.

The fluids from wells, located on a wellhead platform, flow throu 7,000 ft. of dual subsea pipeline, through the flexible risers, the f swivel on the buoy, and then through rigid piping on the arm of the y to the processing equipment on the deck of the FPSO.

There is a flare located on a self-standing tripod connected by a bri to the wellhead platform. The flare gives an orange light, often vis at a great distance from the terminal.

PORT LIMITS: *Terminal Limits:* The area within a radius of 1,750 m. from the SPM buoy and 500 m. from the wellhead platform is a prohibited area and must not be entered without a Company Mooring Master on board.

The area within the operational map as delineated or bounded by the coordinates, HH, II, JJ, KK, LL, is a restricted area and anchoring is prohibited:

Coordinates	*Latitude*	*Longitude*
HH	05° 07′ 00″ N.	105° 52′ 40″ E.
II	05° 06′ 28″ N.	106° 00′ 13″ E.
JJ	05° 04′ 45″ N.	106° 03′ 40″ E.
KK	04° 56′ 53″ N.	106° 11′ 09″ E.
LL	04° 51′ 45″ N.	105° 59′ 17″ E.

MINIMUM STANDARDS OF ACCEPTANCE: *For tankers loading at Kakap Natuna Marine Terminal:*

1. *Size:* Vessel size not to be more than 100,000 tons Summer d.w.t.
2. *Vessels Loading:* Vessels loading at the Kakap Terminal must comply with the latest SOLAS and MARPOL Conventions and Protocols. Vessels found to be seriously deficient or substandard in any safety requirements will be refused mooring and loading.
3. *De-Ballasting:* Vessels must arrive at the Terminal with clean ballast. Vessels should be able to deballast concurrently with loading. Vessels unable to do so will be allowed 6 hours to complete this operation. Prolonged deballasting will necessitate either removal from the berth or to commence loading. The Terminal is not responsible for any free water or deadfreight.
4. *Inert Gas System:* All vessels must be equipped with an Inert Gas System conforming to the SOLAS Regulations. This must be operable throughout the vessel's operations at Kakap Natuna Terminal. Tanks to be monitored by vessel's crew to ensure the correct atmosphere is maintained.

   In turn, the Terminal reserves the right to check the condition of the tanks on arrival and throughout the operation. In the event of prolonged failure of the system or, when tank atmospheres depart from industry accepted limits, the vessel will be removed from the berth.
5. *Mooring Equipment:* Vessel to be equipped with correct mooring equipment relevant to its size as laid down in the "OCIMF Standards of Equipment Employed in the Mooring of Ships at a Single Point Mooring". The minimum dimensions of the centre bow fairlead are 600 mm. wide and 450 mm. deep, in order to accommodate the chafe chains.
6. *Hose Connecting Equipment:* Vessel to be equipped with loading manifold in accordance with the "OCIMF Standards for Ships Manifold". Flanges to be prepared to accept 12 in. 150 ASA connections. Derricks and rigging to be not less than 10 tons SWL and certified.
7. *Certificate of Deratisation and General Cleanliness:* Vessel to be in possession of a valid Certificate of Deratisation and other deinfestation measures as appropriate. Should the vessel be infested with rats, vermin or other insects which could be a threat to the health or well being of Terminal personnel, then the vessel will not be accepted.
8. *Loading Rates:* Terminal can load at a maximum rate of 24,000 bbls./hr. through 1 × 12 in. hose. Vessels which cannot accept this loading rate will be rejected.
9. *Air-Conditioning:* Due to the climatic conditions of the area, vessels not fitted with a working air conditioning system pose a threat to the safety of loading operations. Only in exceptional circumstances when a vessel has demonstrated its ability to comply with all conditions of the I.S.G.O.T.T. Safety Check List, will a vessel without air conditioning be accepted for loading.
10. *Crew:* Vessel's crew must be qualified to the requirements of the International Convention on Standards of Training Certification and Watchkeeping for Seafarers 1978. If any infringement of safety regulations or the inability of ship's crew to operate safety and efficiently is noticed, then the vessel will be removed from the berth.
11. The vessel's owner or bareboat charterer is to be a party to TOVALOP and have insurance covering the liabilities under the international convention of Civil Liabilities for Oil Pollution Damage 1969 (C.L.C.).

    The cargo to be loaded will be covered by CRISTAL, and/or the International Convention of the Establishment of an International Fund for Compensation for Oil Pollution Damage 1971 (C.L.C.).
12. Tankers are expected to conduct operations using a closed loading method. The loading of any vessel which is unable to comply, will be at the discretion of the Mooring Master.

ARRIVAL PROCEDURE:

1. *Order of Berthing:* Vessels will normally berth in order of arrival, with due regard to nominated date ranges, etc.
2. *Hours of Operation:* The Kakap Natuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances, at the sole discretion of the Company Operations Superintendent, night berthing may to allowed if all conditions are favourable.

   Unmooring will be carried out at any hour.
3. *Vessel Anchoring:* If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed due to adverse weather conditions, etc.), Master will be advised by radio and requested to anchor (See "Anchorage").
4. *Notice of Readiness:* The Mooring Master will act on behalf of the Company to sign acknowledgement of tanker's Notice of Readiness, which should be tendered at time of arrival at the anchorage.
5. *Port Closed:* Notice of Readiness will not be accepted during periods when the Port is closed. The Port is closed when the weather is such that it is too rough for incoming tankers to berth or remain safely moored to the FPSO. Any decision regarding the opening and closing of the Port will be made solely at the discretion of the Kakap Natuna Operations Superintendent. In such a case the Terminal will provide the Master with a written notice of the times during which the port was closed due to adverse weather.

   The Company reserves the right to decline to berth a specific tanker if its conditions or facilities are unsafe for berthing or loading, even though the berth may be open to other tankers. Various combinations of wind, sea and tidal conditions and also the size, length, ballasted trim and handling qualities of a vessel can affect the decision to berth a vessel at Kakap Natuna Marine Terminal. All these factors have to be evaluated before a final berthing decision is made. Should a vessel be rejected for any of the aforesaid reasons, the Terminal will supply the vessel and owner/charterers with written reasons for non-acceptance.

   The decision of the Company Operations Superintendent to permit a vessel to berth shall be final. On receipt of such permission, berthing will be at the discretion of the Master in agreement with the Company Mooring Master.
6. *Indonesia Flag:* The national flag of the Republic of Indonesia shall be prominently displayed by the vessel at all times at the Kakap Natuna Marine Terminal.
7. *Indonesian Government Regulations:* Masters are informed that the following Indonesian Government Regulations are strictly enforced. Signals to be Displayed on Arrival: In accordance with practice in Indonesian Ports, Quarantine, Immigration; Pilot and Call Sign flags must be displayed by all vessels approaching Kakap Natuna Marine Terminal. These signals shall be displayed continuously until clearance is granted.

   The signals are as follows:

   Sunrise to sunset : Quarantine flag " Q".

   The "N" flag should be flown until the Immigration Officer boards the ship.

   The "G" flag (request for pilot) should be flown until the Mooring Master boards.

   As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the pilot is aboard. During the hours of darkness the appropriate International lights should be substituted for the flags.

NAVIGATION AIDS: The SPM, FPSO and platform and flare tripod within the Kakap Natuna Restricted Areas display the following visual navigational aids and characteristics. During restricted visibility the following sound signals will also be given:

SPM :	Light	(1) yellow "U" flash, vis. 5 miles.
FPSO :	Light	(2) red "U" flash (bridge) vis. 5 miles. (1) white "U" flash (foc'sle) vis. 5 miles.
	Sound	'U' morse.
Platform and Flare Tripod :		
	Light	(8) white flash, vis. 10 miles. One at each corner of platform and 4 along flare bridge.
	Sound	'U' morse.

ANCHORAGE: For tankers required to anchor, the recommended anchorage area is located North and East of the SPM and is centered on position Lat. 05° 02′ 54″ N., Long. 105° 58′ 29″ E.

This position represents the centre of a circle with a radius of 1,609 m. Anchoring within the terminal limits is strictly prohibited.

MAX. SIZE: 100,000 tons Summer d.w.t.

RADIO/VHF: All incoming tankers must advise Kakap Marine Terminal of their best ETA at the anchorage area (05° 02′ 54″ N.,105° 58′ 29″ E.), on departure from their last port of call and 72 hours, 48 hours and 24 hours before arrival. Any appreciable change of ETA should be advised accordingly. Vessel may contact Kakap Natuna Marine Terminal directly on intership frequency 8,291.2 kHz. Listening watches are observed everyday between 0300 hrs. – 0500 hrs. and 1200 hrs. – 1900 hrs. GMT and 72 hours, 48 hours and 24 hours before scheduled arrivals of incoming tankers.

Time to be used for ETA is local time, which is GMT plus 7 hours throughout the year.

Initial Message: In addition of the ETA, the first message should include:

(a) Name of tanker and radio call sign.
(b) Cargo requirements.
(c) De-ballasting time.
(d) Maximum loading rate.
(e) Arrival draft, fore and aft.
(f) Last port of call.
(g) Confirm that vessel has clean Bill of Health.
(h) If there is any sickness onboard, give all available information as to the possible type of sickness.
(i) Distance in feet from the bow to the tanker's loading manifold (max. allowable distance bow to manifold is 440 ft.).

Addresses: The above communications with Kakap Natuna Marine Terminal should be made via:

Marathon Petroleum Indonesia, Ltd.
Lippo Life Building, 4th Floor,
Jl. H.R. Rasuna Said Kav. 8 – 10,
Jakarta,
P.O.Box 3293,
Indonesia.
Telex : 62690 Maroilb IA.
Telephone: 511540, 512290.

In the absence of direct telex or telephone link to the above numbers, messages may be relayed to MPIL for onward transmission to Kakap Natuna Marine Terminal through the Pertamina Coastal Radio Station at Jakarta.

VHF/FM Radio Communications: The Terminal maintains a continuous watch on VHF Channel 16 (156.8 MHz) and Masters are recommended to use this when they are within range. The Terminal is able to select any public VHF channel for use as a working channel after initial contact.

Attention to VHF communications may be the means of avoiding delay in berthing and vessel turn around time. While in the Terminal area the ship's radio will be under the sole control of the Master. The Terminal Facility radios will be under the sole control of the Terminal Operations Superintendent or his designated alternate.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain a CONSTANT listening watch on Channel 16 to receive Terminal instructions.

Any delay due to a failure to maintain a constant listening watch on Channel 16 will be for ship's account and will not be included in calculation of the laytime.

Frequencies for HF/SSB: In the event that incoming tankers are unable to contact the storage tanker by any of the above procedures, the storage tanker also maintains a continuous watch on the following HF/SSB frequencies.

Watch kHz :	11,528.50	Working kHz :	5,373.50
	13,812.50		16,411.50

Pertamina Control Radio Station: In the event that incoming tankers are unable to contact Kakap Natuna Marine Terminal on the foregoing VHF/FM frequencies, or by HF/SSB, Masters should request Jakarta Radio to relay the necessary information to MPIL by telex or telephone.

MOORING:

1. The Mooring Master will board incoming tankers at either the anchorage area or other agreed location. The Mooring Master will advise the ship's Master on approach to the FPSO, mooring and unmooring, connecting and disconnecting hoses, and all other operations within the Terminal area including all manoeuvring of the tanker. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.
2. The services of a Mooring Master are provided upon the expres understanding and condition that when any Mooring Maste furnished by the Company goes aboard a tanker for the purpose o assisting such tanker, he becomes for such purposes the servar of the owners of the vessel, and the Company shall not be liab for any damage or injury which may result from the advice o assistance given or made by such Mooring Master while aboard o in the vicinity of such vessel.
3. Support vessels assist in mooring tankers. These are under th direct control and supervision of the Mooring Master. Any servic and/or facilities provided by the Company including, but not limite to, the services of Mooring Master, support vessels and their crews or mooring and loading equipment, are at the vessel's risk. Th furnishing of a Mooring Master, support vessels or other service and facilities, shall not be construed to be, or give rise to, a persona contract.
4. Tankers due for mooring must have a pilot ladder or hoist secure rigged on the port side. Vessels with a freeboard of more tha 30 ft. shall have an accommodation ladder rigged so that the lowe platform is not more than 10 ft. above the water level with a shor pilot ladder rigged for access to the platform. Upon the approac of the Mooring Master in the support vessel, the tanker will provid a good lee on the port side. Tankers shall also have the port derric rigged and manned ready for use.
5. The Mooring Master and his assistant, who will advise a tanker crew during mooring and hose connection, will normally board tanker from the support vessel which also serves as a stand-by safety boa throughout the loading operation. Immediately the Mooring Maste and his assistant have boarded, the support vessel will proceed t the port side derrick area of the tanker where mooring and hos connection equipment will be lifted aboard. Sufficient crew must b available on deck to transfer the mooring equipment from the derric area to the forecastle.

   The following equipment, provided by the vessel, shall be ready t use on the forecastle head when the Mooring Master boards:
   (a) 1 mooring rope, polypropylene or other man-made fibr situated forward.
   (b) 1 mooring rope, polypropylene or other man-made fibr situated aft.
   (c) 2 messenger lines, minimum 3.5 in. circumference × 300 f natural fibre.
   (d) A selection of shackles, wire strops and tools (sledge hamme crowbar, etc.).
6. When the approach to the terminal commences, a support vesse will be in attendance to assist by pushing if necessary. At this time another support vessel will prepare the mooring and standby at th FPSO.
7. *Approach to the FPSO involves manoeuvring at close quarters t the FPSO. It is therefore imperative that all measures are taken t ensure that there is no loss of power or steering during thes manoeuvres.*
8. Another support vessel will be situated near the bow of the FPS with 2×10 in. circumference polypropylene pick-up ropes, eac secured by a 54 mm. chafe chain, or 1×10 in. circumferenc polpropylene pick-up rope secured by 1×76 mm. chafe chai depending on the size of the tanker's centre leads, secured to th main mooring, which consists of a 21 in. circumference nylon rop connected to one standard O.C.I.M.F. chafing chain (76 mm.).
9. During the approach of the tanker towards the bow of the FPS the ship's crew, with the advice of the Mooring Master will prepar the forecastle for the mooring operation (see "Plans"). This w include passing one or two messenger ropes through the centr bow fairlead (or other fairleads designated by the Mooring Maste taking the end to the after port corner of the forecastle and, fro this point, lowering the end to sea level. The mooring attachme will also be prepared, and will be, in order of preference:
   (a) Bow stopper (AKD).
   (b) Bitts.
10. Vessels which, in the Mooring Master's opinion, do not have suitable method of attaching the mooring, will be refused permissio to berth. Should bitts have to be utilised, or should the bow stoppe be located at a substantial distance from the fairlead, wire snotte of 2 in. diameter and various lengths are available from the berthi tug.
11. Upon the close approach of the tanker's bow, the standby supp vessel manoeuvres alongside the port shoulder and attaches t mooring pick-up rope to the ship's messenger line. The tanker w then heave up the messenger and pick-up rope, carefully picki up the slack as the tanker approaches the bow of the FPSO. Th unsecured support vessel will now be stationed at the end of t floating hose string in order to tow the hoses clear of the ship's si should this become necessary.
12. The pick-up rope should be continually hove in as the tanker nea the FPSO bow. The distance between both bows will b continuously relayed to the Mooring Master on the bridge from t forecastle and by the support vessels. When the pick-up wire h been brought inboard though the fairlead, it may be necessary t adjust the direction of pull and assist the chain through the fairlea Action required by the tanker's crew in this respect will be advise by the Mooring Master.
13. When the chain is inboard, depending upon the method o attachment available, the connection will be made (see "Plans"
14. After the connection to the mooring is made, it may be necess to run the engines astern to ensure the tanker does not contact t FPSO. The Mooring Master will then advise "Finished w Engines", *but at no time during the tanker's stay at the Termi shall the engines be immobilised.*
15. Shortly after the mooring operation is completed, the support vess will be secured from the stern of the tanker using a 12 circumference polypropylene rope supplied by the support vess

BALLAST:

1. There are no ballast or slop reception facilities at Kakap Natuna Marine Terminal, therefore all vessels must arrive with clean ballast suitable for discharging directly to sea in accordance with the standards set by the International Conventions. Vessels arriving with ballast unsuitable for discharge to sea will be rejected for loading. Any tanker rejected because of contaminated ballast or sea pollution will automatically invalidate her Notice of Readiness and will lose any priority of loading. Vessels discharging contaminated ballast overboard shall be subject to the anti-pollution laws of Indonesia.
2. Vessels arriving at Kakap Natuna Marine Terminal should have sufficient ballast to ensure safe handling and manoeuvrability in the prevailing weather and sea conditions and in accordance with good seamanship practice.
3. Whenever possible, loading procedures should be so arranged as to allow for concurrent deballasting and loading operations, provided that a 2 valve separation can be maintained. Permanent ballast should not be discharged before the vessel has loaded at least the equivalent amount of cargo.
4. The Mooring Master or his assistant will witness the tank inspection prior to loading, but will not sign certificates attesting to the emptiness, cleanliness or suitability of tanks for loading. The ullaging of the slop tank and determination of oil content will also be witnessed.
5. Penalties for pollution are harsh.

LOADING: *Hose Connection:*

1. Upon completion of the mooring operation, the loading hose will be connected to the tanker's port manifold, which must have been prepared to accept 1×12 in. 150 ASA flange prior to berthing. Hose connection will be made by the ship's crew who must be under the supervision of a responible deck officer. The Mooring Master's Assistant will advise on the correct procedures to be adopted.
2. Depending on the freeboard of the tanker, the weight of the hose to be lifted could approach 10 tonnes, and all tankers calling at Kakap Natuna Marine Terminal must have their port derrick rigged to lift at least 10 tonnes.
3. A support vessel will tow the tanker end of the hose to a position below the manifold area and connect the ship's cargo runner to the hose pick-up chain. The hose will then be lifted to a position above the main deck so that the hang-off chain can be made fast to the hose bitts in such a way that the hose flange will closely align with the required manifold flange. The hose end will then be lowered to the deck for the blind flange to be removed. The hose flange will normally be connected to the manifold by a Camlock coupling.
4. When the hose is connected, the length between the manifold and rail will remain supported on 2 slings by the ship's derrick. This is to ensure that there is no undue strain on any part.

Loading Operations:

1. When the officer-in-change on board the tanker has declared the vessel ready to load, with all necessary valves open, the hose end butterfly valve will be opened and the Mooring Master will instruct the Terminal to commence loading at a slow rate. The rate will not be increased until the tanker has confirmed that the hose connection is tight, that cargo is being received in the selected tanks and that no leakage is taking place through the sea valves. Thereafter, the loading rate will be increased, on request by the tanker, to a maximum of 24,000 bbl.p.h.
2. Throughout the loading, a responsible deck officer shall be in charge of operations, either on deck, or in the cargo control-room. In addition, an efficient deck watch in constant contact with the cargo control-room must be maintained at all times.

   Additionally, one man must be stationed on the forecastle at all times to observe and report on the mooring condition, i.e., the state of the mooring and the distance and attitude of the Tanker to the FPSO.
3. At any time during loading operations. the rates can be reduced on request. Except in an emergency, 10 minutes notice should be given to the Terminal when rate reduction is required. As in normal tanker practice, valve *must not* be closed against the oil flow without permission from the Terminal.

   If, for any reason, radio communications between the Tanker and the Terminal are lost, the Terminal will stop the loading until communications are re-established.

   In the absence of radio contact, oil flow can also be stopped by sounding the Emergency Flow Stop Signal, consisting of continuous blasts on the ship's whistle.
4. The volume of oil loaded is accurately available at all times from the Terminal, and periodic comparisons should be made between Tanker and Terminal.
5. The question of ship or Terminal responsibility to stop cargo on loading the required quantity will be discussed and agreed before loading commences.

Request for the Terminal to stop the flow of cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error, and that in the case of the being overloaded, the excess cargo cannot be pumped back to the FPSO. The ship's Master will also be held responsible for any spills caused by this request.

Hose Disconnection: On completion of loading, and when the tanker is informed by the FPSO Control that all flow has ceased, the hose end butterfly valve will be closed first, followed by the ship's manifold valve. The hose will then be disconnected from the manifold (sufficient drip trays must be available to contain any oil remaining in the spool pieces and reducer) and the blind flange will be replaced on the hose. The weight of the hose will be taken on the derrick and pick-up chain to allow the hang-off chain to be released from the hose bitts and re-connected to the eye on the hose flange collar. The hose will then be lowered to the water where a support vessel will be in attendance to remove the cargo hook and tow the hose clear.

Kakap KH Crude Oil Specifications:

Gravity at 60°F	42° – 48° API
Salt Content	Nil – 0.01 % WT
B.S.& W.	Nil – 0.25 % Vol.
Sulphur	0.01 – 0.06 % WT
Pour Point	Max. 80°F
Viscosity	2.2 – 3.0 Cst
Reid Vapour Pressure	3 p.s.i. – 12 p.s.i.

Cargo Documentation and Inspection:

1. Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples, etc. are prepared at Kakap Natuna Marine Terminal. When the tanker has been loaded, the documents will be completed and taken aboard the tanker for the Master's signature. Signing of these documents by the Master will take place at the same time final departure clearance formalities are being carried out.
2. Immediately upon completion of loading, the offical Bill of Lading quantity will be relayed to the Mooring Master by radio. In the event of a dispute, the vessel will be requested to recheck the measurement and calculations of the quantity, but the Mooring Master will not witness such measurement and calculations. After both ship and shore figures have been verified, should an appreciable difference still exist, receipt of a Letter of Protest will be acknowledged by the Mooring Master.
3. Notes of Protest if any, should be handed to the Mooring Master for further delivery to Marathon Petroleum Indonesia, Ltd. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only, and is not authorised to accept such letters.
4. From time to time owners, charterers, consignees, or other interested parties may appoint third party oil inspectors to survey the loading operation on their behalf. Any delays caused by oil inspectors, shall be considered "vessel delays".

DEPARTURE: *Departure Procedures:*

1. Immediately after the loading hose is disconnected and transferred to the custody of the support craft, unmooring of the vessel will commence. The support vessel at the stern of the tanker will be released but will remain on location to assist if required. On advice from the Mooring Master, the mooring hawser will be heaved in by the tanker, the snotter and it's attachment disconnected. In some cases it may be necessary to steam the vessel ahead to relieve the weight on the mooring. As soon as the mooring is released, the engines will be ordered astern and the vessel will back away from the FPSO. During the move astern, the mooring hawser will be lowered into the water by the pick-up rope.
2. When the vessel is safely clear from the FPSO, the Kakap Natuna Marine Terminal mooring equipment will be taken from the forecastle to the port derrick to be transferred to the support craft, together with the hose connecting equipment.
3. Any remaining cargo calculations and paperwork will be completed before the vessel sails. When such paperwork has been completed, the vessel will make a good lee on the port side to disembark "shore" personnel. Upon disembarkation of all such personnel, the vessel is cleared to proceed to sea.

MEDICAL: Only available in cases of emergency.

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: Not available.

REPATRIATION: Not available.

SAFETY: *Safety Requirements:*

1. As for all tanker terminal operations, vessels visiting Kakap Natuna Marine Terminal must comply with the minimum safety requirements specified in the International Safety Guide for Oil Tankers and Terminals (I.S.G.O.T.T.).

   Kakap Natuna Marine Terminal operations are of a special nature in that vessels must soft-moor in tandem to the floating production and storage vessel, which is complete with production train and ground flare. Hence, Company requirements may be more stringent than those specified in I.S.G.O.T.T. These requirements will be enforced.
2. When the Mooring Master boards the vessel, he will present to the Master a safety booklet containing details of the Safety and Fire Regulations, Safety Check List and a letter to the Master. When fully checked and understood, the Regulations will be signed by both the Terminal Representative and the Ship's Master.
3. Safety and Fire Regulations will be strictly adhered to and a Terminal Representative will make periodic checks to ensure that they are being enforced. If any infringements of these safety regulations are observed, they will be brought to the attention of the Master or his Deputy for corrective action. If such action is not taken immediately, the Mooring Master will take such measures as appear most appropriate to deal with the situation, and shall advise the Master accordingly.

WEATHER: The Kakap Natuna Marine Terminal is an open unsheltered mooring. On occasions there may be circumstances or a combination of circumstances which may preclude mooring operations. In these circumstances good judgement should be used by the Master, under the Mooring Master's advice as to what action to take.

Currents: The surface currents of the Natuna Sea in the Kakap area are wind generated, currents therefore will be in the direction of the prevailing monsoon. These currents will generally exceed 1 knot and on occasions exceed 2 knots.

Typhoons: The Kakap area is not normally affected by "typhoons".

Weather Pattern: In the Kakap area the N.E. monsoon becomes established during November, although in some years it may not blow regularly until December. During this period the wind direction over the open sea is predominantly Northeasterly and the average force when fully developed is about Force 4, South of Latitude 5° North, and Force 5 to the North of this Latitude.

The winds tend to blow in successive pulsations, periods of comparatively fresh winds followed by periods when the wind is less strong. At times the wind freshens to Force 6 or 7, while at others it does not exceed Force 3. The frequency of Force 7 winds is estimated to be about 1% in most of this season, probably reaching 2% – 3% during December, the month of greatest frequency. From about May to October, winds are predominantly South-westerly, mainly Force 3 or 4. Over the open sea, the South-westerly winds can reach Force 6 but nearer the coast they are weaker and more irregular. During October the winds become variable before the onset of the N.E. monsoon.

Although during the Summer, monsoon wind speeds of Force 7 are rare, squalls, know locally as "Ribut" in which gale force winds may be reached temporarily are fairly common. The most dangerous type is the arch squall which is preceded by clouds rising from the horizon in the form of an arch, heavy rain is usual when the arch is passing overhead.

Tidal Streams: Tidal streams can be expected to reach 1.5 knots during Spring tides.

Relative Humidity: This is high over the area for most of the year, averaging about 90% – 95% in all months at 0700 hrs. and falling to about 70% – 74% by 1300 hrs.

Temperature: The average air temperature is high throughout the year. April is the warmest month with a mean daily air temperature of about 88°F. January is the coldest month with a mean daily temperature of 86°F.

Fog and Visibility: Fog is rare throughout the area, however during rain squalls visibility can be extremely limited.

Rainfall: Average annual rainfall near the Kakap area is about 100 in. Rainfall is most abundant from about October to January, i.e. at the onset and in the early part of the N.E. monsoon, however thunderstorms and heavy rain squalls occur frequently throughout the S.W. monsoon.

SHIPMASTER'S REPORT: April 1990.

Officials: Before berthing the vessel is boarded by the following Officials:

2 Agents (Pertamina).
2 Customs.
2 Immigration.
2 Harbour Masters.

These officials are flown out to the Storage Barge before the loading vessel berths and stay there until she sails.

Documents:

5 copies Crew List.
5 copies Arms and Ammunition List.
5 copies Dangerous Drugs List.
5 copies Passenger List.
3 copies Manifest of Cargo for discharge at Kakap Natuna ("Nil" return).
1 copy Vaccination List.

Loading:

The well produces approximately 25,000 bbls./ day.

The average number of ships is 2 per month.

The average loading rate supplied was 3,000 cu.m.p.h.

Cargo: Certificate of Quality (API was different from Terminal Booklet).

AGENCY: *Procedure for Appointing Agent:* Indonesian Government Regulations require that Pertamina Directorate of Shipping and Telecommunication be appointed General Agent for all tankers proceeding to load in Indonesia.

Address : Pertamina Directorate of Shipping and
Telecommunication,
Attention: Agency Department,
19th Floor, Pertamina Building,
Jl. Meden Merdeka Timur 1A,
Jakarta, Indonesia.
Cable Address: Pertaminaship IA.
Telex : 44450 and 45348.
Telephone : 343 806, 303 3356, 303 3307, 303 3305.

For vessel arriving for the first time in Indonesian waters, Owners or Charterers are requested to appoint Pertamina Directorate of Shipping and Telecommunication Agency Department as General Agent to attend the vessel at Kakap Natuna Marine Terminal by letter of Appointment. This Letter of Appointment must be endorsed by the nearest Indonesian Consulate to point of dispatch of the Letter, and must be sent at least 2 weeks prior to ship's arrival. The above applies also to vessels which may have changed their name and vessels for whom the Letter of Appointment has expired. Owners or Charterers can attach a list of vessels under their management/control which are scheduled for operating in Indonesian waters. In such cases the single Letter of Appointment will be valid for all ships named in the Letter. Letters of Appointment have a validity of 1 year, after which they must be renewed. Each tanker entering Kakap Natuna Marine Terminal must have requested and have been granted an Entry or Agency Permit prior to its arrival. It is vital that the General Agent receives the following information 2 weeks before vessel's arrival to enable the necessar permits to be obtained from the Govenment Directorate General of Se Communications:

(a) Name and full address of Owners.
(b) Name of tanker and call sign.
(c) Deadweight tonnage and length overall.
(d) Flag and Port Registry.
(e) Certificate of Registration Number.
(f) Name of Master.
(g) Number of Crew.
(h) ETA at Kakap Natuna Marine Terminal anchorage area (Lat. 05° 02′ 54″ N., Long. 105° 58′ 29″ E.).
(i) Last Port of Call.
(j) Intended Indonesian Ports of Call.
(k) Destination after loading.
(l) Quantity and type of crude oil to be loaded.

Also see "General" before First Port.

AUTHORITY: *Operator:* Marathon Petroleum Indonesia, Ltd., 4th Floo Lippo Building, Jl. H.R. Rasuna Said Kav. B-10, P.O.Box 3293, Jakart Selatan, Indonesia. *Tel:* 512290, 511540. *Telex:* 62690 Maroil Ia, 6294 Maroil Ia, 44654 Maroil Ia. *FAX:* (021) 511540, 512290 (ext. 2628).

KASIM MARINE TERMINAL: 01.18 S. 131.01 E.

(See Pla

LOCATION: The terminal is located at the mainland Irian Jaya.

DOCUMENTS:

Certificate of Registry.
International Oil Pollution Prevention Certificate.
Load Line Certificate.
Safety Equipment.
Safety Construction Certificate.
Radio Certificate.
Derat Certificate.
15 Copies Crew Lists.
6 Copies cargo/no cargo declaration by Master
6 Vaccination Lists.
2 Crew Declaration.
4 Stores Lists.

PILOTAGE: Compulsory. Pilot boards in-bound vessels in positio 00° 53′ S., 131° 10′ E. Vessels berth and unberth at any stage of th tide during the day.

Accommodation ladder is required. Also see "Anchorage". Vesse must make a lee for Pilot boat in choppy seas.

ANCHORAGES: Recommended anchorage area is 4.5 miles West o Sorong in position 00° 53′ S., 131° 10′ E. Under no circumstances shou any vessel enter the restricted area around the structure at Kasi Terminal without a Mooring Master aboard. The area is marked by th dotted lines on the plan. (See "Plan".)

Any vessel arriving in the anchorage area after 1400 hours local tim may have to wait in the anchorage area until first light the next mornin to transit the Sele Strait to the terminal.

On arrival at anchorage contact "Sorong Control" and Pertami Sorong Radio on VHF Channel 16 and between hours of 0600 and 180 contact Kasim Marine Terminal Channel 16.

Note: Terminal Marine Advisors: Ensure that vessels do not ancho within Sorong Port Limits marked on chart. If they do Harbour Maste will charge double fee.

It is preferable to anchor just outside the marked area. The anchora position recommended is outside the harbour area.

RESTRICTIONS:

	Controlling depth (MLW)	*Mean tidal range*	*Velocity of current*	*Nature of bottom*
Entrance:	51 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, mud
Channel:	51 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, hard clay, co
Anchorage:	120 ft.	Approx. 5 ft.	Max. 7 kt.	Hard clay, sand
Berth:	60 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, hard clay, co

MAX. SIZE: The channel is swept to a depth of 57 ft. Vessels max. dr is 50 ft. Also see "Berthing".

PRATIQUE: Available night and day. Customs and Immigration boa on arrival.

RADIO: *Advice for arrival:* 72 hours prior to arrival at Sorong vesse should advise the Company of their estimated time of arrival by cab sent via "Pertamina's Coastal Radio" Station at Jakarta or Governme Radio Station at Sorong. They should also confirm or amend them wh they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, EPV, Sorong.
Cable address: Pertamina – Jakarta.

Pertamina Coastal Radio Stations:

1) Name of Station/Call Sign: Pertamina Jakarta Radio – PKZ.

It is recommended that vessels arriving on weekends and public holidays and/or whenever there is no response from Pertamina PKY–41 contact the Government Coastal Radio Station PKY–4 who work every day, including holidays.

The following information should be included in the cable:
(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.
Also see "General" before first port.

TUGS: 2 tugs of 45 ton bollard pull each and 2×220 h.p. mooring boats.

BERTHING: Berthing is usually daylight hours but night berthing undertaken if required. It is not unusual to undock with a strong stern tide running.

Kasim Terminal is owned by Pertamina-Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 50 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksan loading arms and vessels with non-standard manifolds must provide their own reducers. Max. loading rate 39,000 bbls. p.h.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is an octagonal wooden structure on piles, situated at the mouth of a small river 300 m. N.E. of the Loading Pier.

A Mooring Master remains on board throughout the vessel's stay and is in radio contact with the tank farm, pump station and Marine Office.

The berth has its own gangway which is placed onboard the ship by shore crew.

Crude Oil Characteristic:
API Gravity at 60°F. : 35.3
Reid Vapour Pressure at 100°F. : 3.5 p.s.i.
Sulphur Content : 0.7 % wt.
Carbon Residue : 1.0 – 3.0 % wt.
B.S. & W. : 0.1 % vol.
Flash Point (PMCC) : Below 50°F.
Pour Point : 30°F.
Loading Temperature : 95°F.

DRY CARGO BERTH: 370 ft. long with depth of 15 ft. MLWS alongside vertical steel face with rubber fendering. 2 cranes available for discharge/loading with SWL 40 tons and 60 tons.

MEDICAL: Doctor available.
FRESH WATER: Limited supply (100 tons approx.) available at U.S.$3.75 per ton in an extreme emergency only.
FUEL: Not available.
REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
REPATRIATION: Possible in an emergency.
TIME: GMT plus 9 hours.
STORING: Not possible to store by truck or barge. Customs regulations state that nothing can be moved internally or externally without informing them. No riggers or equipment available.
SHORE LEAVE: No shore leave.
GENERAL: No stores. Clinic available.

During daylight hours Indonesian flag must be shown.

AGENCY: See "General" before first port.

AUTHORITY: Petromer Trend Corp., Kasim Marine Terminal, Sorong, Irian Jaya, Indonesia. *Telex:* (In Jakarta) 47163 JKT. *Cables:* Trendex JKT. *Contact:* Petromer Trend, Jakarta. L.R. Zeigler, Resident Manager; Captain Manopo Sambow, Marine Superintendent.

Jakarta Office: Five Pillars Office Park, Jalan Letjen, M.T. Haryono 58, P.O. Box 209, Jakarta. *Tel:* 791308. *Telex and Cables:* See above.
Government Authority: Kesyahbandaran Sorong, Direktorat Jenderai, Perhubungangan Laut IX, Sorong, Irian Jaya.

Harbour Master – Sorong, lln. Jend A. Yani No. 13, Sorong. *Tel.:* 21839. *Contact:* Captain Delson Nainggolan.

KIJANG: 00.51 N. 104.37 E. (See Plan)

LOCATION: The Bauxite Loading Port of Kijang is situated at the S.E. coast of Bintan Island in the Riau Archipelago, in position Lat. 00° 50′ 44″ N. and Long. 104° 36′ 31″ E.

FLAGS: To be flown by incoming vessel:
Vessel's National Flag.
Indonesian Flag.
Vessel's Number.
Quarantine & Immigration Flag. ("Q" and "N").

DOCUMENTS: To be produced upon vessel's arrival:
12 Crew Lists
4 Passenger Lists (if any).
4 Parcel Lists (if any).
4 Stores Lists.
4 Cargo Manifests.
4 Narcotics Lists.
2 General Information.
4 Fire Arms & Ammunition Lists.
4 Personal Effects Lists.
2 Vaccination Lists.
1 *Declaration of Health Certificate.
2 *Harbour Reports.
International Load Line Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
Safety Radio Telegraphy Certificate.
Derat Certificate.
Last Port Clearance.
*Forms to be supplied by Agents.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted Free Pratique, the Immigration Officer checks Passports, Seamen's Books & Crew List and issues shore passes.

PILOTAGE: One Government Pilot available. Pilot compulsory.
Pilot's office : c/o Port Administration Tanjung Pinang.
Priority : First come first served.
There are 2 Pilot boarding positions:

1. Tanjung Tillie:	00° 48′ 12″ N.	104° 35′ 30″ E.
2. Temborak Laut:	00° 49′ 00″ N.	104° 41′ 30″ E.

If vessel wishes to be piloted to the port on arrival day, vessel has to arrive at the desired Pilot boarding position at under mentioned times:
1. Tanjung Tillie: Not later than 1800 hrs. local time.
2. Temborak Laut: Not later than 1600 hrs. local time.

However, it depends on Pilot's decision after considering tide and current's conditions.

In case vessel is long overdue (3 hours delay after Master's last ETA cable), Perbaki shall charge compensation for keeping labourers waiting, etc.

RESTRICTIONS: The height of vessel from waterline to top of hatch coaming or railing must not exceed 12.00 m. Each side deck breadth from bulwark to king post or mast must not be less than 6.50 m. vertically and from bulwark to hatch coaming must be preferably 7.00 m. min., and 9.00 m. max. Minimum breadth 20.0 m.
Cable Way: There is a cable way across the entrance channel about 500 m. South of the jetty. Height above LWS is 45 m.

MAX. SIZE: LOA 185 m. Max. draft 11.00 m. Max. beam 28.0 m.

Greater max. draft and LOA might be possible after consultation with the Pilot/Harbour Master and considering the depth at entrance of the port upon departure.

RADIO: Cables to Perbaki Tanjung Pinang can be sent through Tanjung Pinang Coastal Radio Station, Call sign "PKJ2". Station also on VHF Channel 16.
Arrival Notice: Owner's advice: Owner to advise by cable to Adhiguna Jakarta and Perbaki Tanjung Pinang, with copy to Aneka Tambang Jakarta: at least 8 working days notice of vessel's ETA at loading port.

Master's advice: At least 48 hours before vessel's arrival at Pilot Station, Master shall give the following information to Adhiguna Jakarta and Perbaki Tanjung Pinang, with copy to Aneka Tambang Jakarta: last port of call, draft on arrival, quantity of bauxite to be loaded, stowage plan (hatch division for bauxite cargo), quantity and kind of commodity (ies) to be discharged — if any — and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience has shown that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Perbaki Tanjung Pinang waits for the Master's telegram in order to make necessary preparation such as ordering Pilot, etc.

Availability of berthing space: The availability of berthing space will be confirmed by Sub-Agents.

TUGS: Available and compulsory. 6 tugs 170 h.p. – 1,600 h.p.

BERTHING: Vessels are moored alongside 2 jetties and 7 dolphins with good nylon ropes, 5 fore, 5 aft, 2 foresprings, 2 after springs, 2 fore breastlines and 2 after breastlines. For Spring tide a hercules wire rope (extra) is obtainable.

Same will be carried out from the Southern part of bauxite jetty and serves then as additional breastline. If a vessel has not got sufficient lines, same may be hired from Perbaki.

When moored alongside jetties, vessels must take special care of the moorings during hours of ebb-tide, which runs in S-N. direction.

Due to strong current in Strait of Kijang the ship's Master is kindly requested to pay attention to Sub-Agents advices.

Vessels over 20,000 d.w.t. will need extra 2 stern and 2 head lines.

Shifting Ship: Shifting ship will be done during slack water only by utilising ship's gear and with assistance of tugboat if necessary. But to finalise loading as scheduled in stowage plan, shifting may be done even during flood/ebb tides using vessel's engine.

Jetty: There is no quay. Vessels are moored alongside 7 dolphins and 2 jetties.

Distance between the 2 extreme dolphins is 135 m.

Loading Facilities: Loading installation consists of 2 loading conveyors or stacker. Bauxite is loaded in the hold of vessel by means of conveyor belt.

Stacker can be moved vertically from 13° to 35°, but the maximum position for proper operation is only up to 18° inclination angle.

Each stacker can swing 8.00 m. (4.0 m. to inner side and 4.0 m. to outer side).

Distance between the 2 stackers in parallel position is 50.00 m.

The length of stackers is 47.79 m. each. At the lowest position (13°) the end of stackers outreach about 10.50 m. from jetty seaward. (In this position the height from water line to the end of stackers is about 15.0 m. HWS).

Loading Capacity: About 7,000 tons per day using 2 stackers.

Weighing: The bauxite is automatically weighed during loading by weightometer. The specific gravity of bauxite is around 1.25 and stowage factor around 29.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Labourers will be supplied by Perbaki. Making the vessel ready for loading/unloading to be done by vessel's crew members.

Loading is performed by Shipper's personnel. Loading/unloading equipments to be furnished by the vessel.

If necessary and at vessel's request, trimming of the bauxite can be done by bulldozer, except in deep tanks, cross bunkers, small holds in which bulldozer cannot operate. Weight of bulldozer is 5 tons, so double gear is compulsory when loading, discharging or shifting bulldozer. In hold where bulldozers are going to operate, all beams of upper as well as lower tween decks have to be removed. This has to be done by vessel's Crew members. Loading/unloading and shifting bulldozers (with engine off) to be done by vessel's crew members. The vessel is responsible for any damage to the bulldozers while loading/unloading or shifting.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours, Sunday and Holidays included.

MEDICAL: Doctor, hospital and inoculation service available.

DENSITY: 1020.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

HATCHES: The first opening and the last closing of hatches as well as removing and reinstalling of hatch beams to be done by the vessel's crew.

CUSTOMS ALLOWANCES: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Kijang port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

REPATRIATION: Can be arranged.

AIRPORT: There are regular daily flights from Tanjung Pinang, a domestic airport near Kijang, to Jakarta. Flying time is about 2 hours 15 minutes. Also a daily ferry service is available from Tanjung Pinang to Singapore. Sailing time about 3–4 hours.

TIME: GMT plus 7 hours.

SHORE LEAVE: *Shore Pass:* Shore pass must be carried by Crew members during shore leave.

Invitation: Vessel's Crew members are strictly prohibited to invite friends and hawkers from shore aboard the vessel.

Anchorage: While lying at anchor waiting for berth no one is allowed to go ashore as long as vessel is not cleared.

It is also prohibited to lower lifeboats or rafts for the purpose of fishing, sailing, visiting nearby islands etc.

Leaving for Kijang and Around: Permitted.

HOLIDAYS: The following National Holidays are non-working days. Ne Year, 1st January; Idul fitri, the fixed 2 consecutive days of the yea Idul Adha, the fixed day of the year; Independence Day, 17th Augu Christmas Day, 25th December; Maulid Day, the fixed day of the yea Easter, the fixed day of the year; Waisyak, the fixed day of the yea Nyepi, the fixed day of the year; Ascension Day, the fixed day of th year; Mi'radz, the fixed day of the year and The First Muharam, the fixe day of the year.

SERVICES: *Cash Advances:* At Master's request can be supplied b Agents in a reasonable amount.

Fumigation: No facilities.

Ship's Chandlers: None. In emergency cases, Perbaki can act as ship chandler for a limited quantity.

GENERAL:

Depths: Entrance: 10.50 m. LWS; Alongside jetty: 11.00 m. LWS

Current: Direction: At high tide, from North to South; At ebb tide, fro South to North.

Velocity: Around 2–6 knots.

Chart: Indonesian Sea Charts No. 42 and 65.

Nature of bottom: Sand and soft materials.

SHIPMASTER'S REPORT: 1977.

Vessel's Dimension: Length 185.5 m. Beam 25.5 m.

Vessel sailed after loading wet bauxite ore in bulk. Vessel ha previously visited the port 3 times and loaded to a draft of 11.2 m however, due to poor tides loaded draft this voyage was 10.8 m.

Entrance to the port is from the North between Mapor Island an Merapas Island. The channel is clear and swept to 13.5 m. (chart datu there are no navigational problems and Pilot boards in positio 00° 50′ N. and 104° 43′ E. Also one can proceed onwards to the Nor of Kambat and Rusa Islands and then between Gabi and Riau to Tanjun Tillie anchorage. This is the accepted Pilot boarding ground and pilotag is compulsory and daytime only. The Pilot is accommodated at Tanjun Pinang but drives by car to the bauxite terminal and takes a launch fro there to the vessel. He may not board upon arrival of vessel if the ti is unsuitable for berthing, as the ebb tide can reach 8 knots in Sel Kijang. There are 3 tugs available which are small, but quite adequa for berthing. The vessel proceeds past the berth then turns so as t berth starboard-side alongside. Moorings consist of 6 headlines, 1 brea line and 2 springs forward and 3 springs and 6 stern lines aft. Nylo lines are in position and can be hired as needed from the shor The loading arms are fixed and shifting of the vessel is carried out a slack water.

Communication can be difficult at times. Tanjung Uban functions f 15 minutes in the hour and is not normally raised until day of arriva All cables are sent through radio "PKI" Jakarta and seem to arrive a their destination. If possible despatch 3 copies of the Crew List to th port in advance as this speeds up clearance on arrival.

AGENCY:

Contact: Harbour Master.

KRUENG RAYA (Malahayati): 05.35 N. 95.31 E.

PILOTAGE: Compulsory. Pilot may be contacted on VHF Channel 1

ANCHORAGE: Vessels anchor in position 05° 36′ 30″ N., 95° 30′ 30″

RADIO: Coastal Radio Station PKA-5.

Frequencies: 4,055/5,165/5,295/6,926 kHz.

TUGS: No tugs available. One mooring boat of 99 h.p. available.

BERTHING: Length of wharf 100 m. Depth alongside 6.0 m.

Storage: Godown with capacity of 2,000 tons.

Fork Lifts: 4×2 tons – 5 tons.

CRANES: 1×15 ton mobile crane.

STEVEDORES: Available from labour pool U.K.A.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No facilities available.

KUALA BEUKAH: 04.53 N. 97.57 E.

PILOTAGE: Not compulsory.

RESTRICTIONS: Berthing during daylight hours only. Unberthing any time.

MAX. SIZE: 61,000 d.w.t. Max. LOA 220 m.

RADIO/VHF: Kuala Beukah Coastal Radio Station. Call sign PK Station operated by Pertamina.

BERTHING: Vessels moor to 5 buoys in position Lat. 04° 53′ 08″ N., Long. 97° 56′ 47″ E. Depth of water 25 m.

The buoy berth accepts vessels between 3,600 d.w.t. and 61,000 d.w.t. with an LOA of 185 m. – 220 m.

Vessels should have port side manifold ready to accept 1×10 in. hose. Crude oil is loaded at a rate of 6,000 bbls.p.h.

Shore Storage Tanks: Total capacity for crude oil 282,735 bbls.

MEDICAL: Clinic available.

DENSITY: 1020 – 1025.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

TIME: GMT plus 7 hours.

AUTHORITY: *Operator:* Pertamina.

KUALA TANJUNG: 03.22 N. 99.28 E.

PILOTAGE: Compulsory. Pilotage is arranged by vessel's Agent.

ANCHORAGE: Vessels anchor in position 03° 23′ 05″ N., 99° 28′ E.

The holding ground in the anchorage is good and consists of clay and silty sand. Depth of water 15 m. – 23 m.

RESTRICTIONS: There are 2 recommended approach routes to the port. These routes are 2 miles wide and were surveyed by the Indonesian Hydrographic Office in 1979. Minimum depth of water in the area is 12.2 m. (C.D.).

No obstructions have been found in the area but many fish traps exist on both sides of the approach routes.

RADIO: All communications are passed via Belawan Coastal Radio Station.

VHF: Channels 16, 14 and 12 available.

TUGS: 2×1,300 h.p.

BERTHING:

Wharf	*Length* (m.)	*Depth* (m.)
A	200	9.0
B	150	9.0
C	80	5.6

Storage: There is a godown with 10,700 sq.m. and an open storage area of 12,800 sq.m.

Fork Lifts: 10×3 tons – 5 tons.

MEDICAL: Hospital facilities available.

STEVEDORES: Available from labour pool.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No facilities available.

LABUANTRING BAY (Lembar): 08.44 S. 116.04 E. (See Plan)

AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:

Health Certificate.
1 Vaccinations List (Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Stores Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar with Labuantring Bay, normally call Ampenan and await particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: None.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kHz and 430 kHz. Times GMT: 0000–0100, 0500–0600: except Friday and Saturday: 0000–0100, 0900–1000. Sunday and holiday closed.

BERTHING: Length of quay at Labuantring Bay (Lembar) 128 m. Depth alongside 6.5 m.-7.5 m. Berthing at Ampenan (anchorage) for all sizes of vessel.

CRANES: None.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Yellow Fever Certificates inspected on arrival.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

TANKERS: Berthing at Ampenan.

FRESH WATER: Available.

FUEL: Available in limited quantities.

CONSULS: None available locally.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Derat Certificate, Clearance from previous port, all to be shown on arrival.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

OPENING/CLOSING HATCHES: Normally carried out by stevedores; ship's crew may if required by vessel to do so.

CUSTOMS ALLOWANCES: No restrictions. Custom's Officer supervises opening and resealing of bond.

AIRPORT: Served by regular airlines to Bali and Java.

TIME: GMT plus 8 hours.

HOLIDAYS: 1st January; Independence Day (17th August); Christian, Islamic and Balinese holidays as appointed by the Indonesian Government.

GENERAL: Vessels should not use ship's radio station. Harbour Police and Customs' guards on board during ship's stay in harbour.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

SHORE LEAVE: Crew allowed ashore; passports required whilst ashore.

DELAYS: November to April is the rainy season. High winds and rain can affect cargo work.

LAWI LAWI (Sepinggan): 01.27 S. 116.46 E. (See Plan)

LOCATION: The Shore Terminal is situated approximately three miles inshore on the East coast of Kalimantan, Indonesia, in the Makassar Strait. It is about 12 miles South of Balikpapan.

The Single Buoy Mooring is approximately 5.75 miles offshore in position 01° 27′ 30.1″ S., 116° 45′ 37.1″ E. in 22 m. of water. The submarine line to the SBM sea bed manifold is 30 in. diameter. A double string of 20 in. diameter flexible submarine rubber hoses joins the sea bed manifold to the SBM.

DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique:

Certificate of Registry.
Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Exemption Certificate.
Cargo Certificate.
Derat Certificate.
Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Lawi Lawi Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Flag Dispensation: Each tanker entering the Lawi Lawi Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for Provisional Pratique through the Directorate of Quarantine and if granted a cable advice is sent to the Harbour Authorities. Port Health clearance is issued prior to the tankers arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

READINESS: *Procedure when berth available on arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuverable, mooring ropes on deck, windlasses, winches, etc. in good working order, Notice of Readiness will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Lawi Lawi Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) that it is within the hours of daylight-deemed to be from 0600 hours, local time to 1800 hours, local time.

b) that it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.

c) that the port is open.

d) that vessel's arrival is within her accepted date range.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clause (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep pilots (Mooring Masters) on station in the anchorage.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Delay due to excessive deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Exact arrival time: It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Lawi Lawi Terminal.

Conditions of use of port: The Master of each tanker will be given a copy of the "Conditions of use of Port of Lawi Lawi Terminal" which he will be asked to sign before the Company mooring and connecting equipment is hoisted on board and before any manoeuvre is commenced under the Mooring Master's advice.

ANCHORAGE: *Recommended Anchorage:* If vessels are obliged or instructed to anchor they must do so in the designated anchorage area. On no account is a vessel to anchor North of Latitude 01° 26′ 30″ S. or West of Longitude 116° 47′ E. The depth of water in the anchorage is 30 m. The bottom is mud/clay and the holding ground is considered good.

RESTRICTIONS: Berthing during daylight only, unberthing possible at any time.

Minimum depth 25.0 m. Tidal range 2.2 m.

MAX. SIZE: *Minimum Size Tanker Acceptable:* The minimum size of tanker that can be accepted for loading at the SBM is 15,000 d.w.t. and 145 m. LOA.

Maximum Size Tanker Acceptable: With the presently fitted, mooring assembly and hose string length, the maximum size tanker that can be loaded at the SBM is 135,000 d.w.t. and 290 m. LOA.

RADIO: *Advice of arrival:* 72 hours prior to arrival at the Terminal, vessels should advise Union Oil of their ETA's by cable sent via "Pertamina" coastal radio station at Balikpapan. They should also confirm or amend them when they are 48 hours and again when 24 hours, distant from the terminal.

Union Oil Company of Indonesia cable address:
Pertamina Tanjungsantan

Pertamina Coastal Radio Stations:
I. Name of Station – Balikpapan Radio
Call Sign – PKN 2
Frequency – Keeps watch on 2182 kHz A3
Answers on: 4415 kHz A3
6520 kHz A3
Class – A3H – A3J
Power – 500 Watt
Service – 24 Hours
Location – Lat. 01° 16′ S.
– Long. 116° 50′ E.

ETA messages sent to PKN2 should be addressed:
Pertamina Tanjungsantan =
Message =

Details of cable:

The following information should be included in the cable:

1. Name of vessel and radio call sign.
2. ETA in GMT and date (local time is GMT + 8 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Vessel's draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which cou affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.
11. Flange dimensions of vessel's manifold connection if not to AN B16.5, B.S. 1560, Series 150 or equivalent.

Also see "General" before first port.

VHF: Vessels equipped with VHF radio telephone should contact "La Lawi Control" on the International Maritime Service Channel (156.80 MHz) when in range to request instructions, working Channel 8.

Language: The language of the terminal is English and Indonesian.

BERTHING: *Work Crew Service:* Mooring and un-mooring, liftin lowering, connecting and disconnecting hoses will be done by a Termin work crew under the direction of the Mooring Master. Assistance fro the ship's personnel in operating windlasses, winches, etc. will required. Ship's crew will assist in hose connection/disconnectio mooring/un-mooring and carrying equipment from deck to forecastle required. Any vessel whose crew do not give such assistance may rejected and returned to the anchorage. Costs of such a delay wou be for the ship's account.

Mooring: This description is only intended as a general outline and m be varied as to the order in which lines are taken up, etc. according the circumstances prevailing at the time of mooring.

Moorings required from Tanker: The ship must provide and have rea the following. Two mooring ropes and one rope messenger line forecastle.

The Approach: The ship approaches the buoy from down tide and wi taking care to keep the wind right ahead. Adequate ballast must retained on board to ensure that the vessel retains full manoeuvrabi throughout the approach to the buoy and the actual mooring.

Bringing Aboard the Mooring Lines: The vessel will be brought to position close to the buoy with the vessel stopped in the water and w the buoy fine on the port bow. During the approach to the buoy a while mooring, a Terminal work boat will keep the hoses pulled well cle to port. Under normal conditions the port rope will be the first taken board. The Mooring Master will advise as to which rope is to be tak first and as to which fairlead this will be taken and the actual work mooring will be done by a Terminal work crew. The ship will lowe strong messenger line to the mooring boat who will in turn make t fast to the approach rope. The approach rope of 10 in. circumferen will be hove aboard and will in turn be hove on until the chafing ch and open links are centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being ho aboard a strong wire strop will be made fast to a set of forecastle bi To the end of this strop will be fitted a 50 ton shackle and the strop be so made fast that the end and the shackle will be about 5 ft. inboa of the fairlead. The approach rope will be hove on until the large link the chafe chain is sufficiently far inboard for it to be connected to t strop by the 50 ton shackle. When this is done the approach rope be slacked off until the full weight comes on the strop/chafing cha buoy rope. The buoy rope is 150 ft. long and is 12 in. circumferen nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a prevent

The second rope is now taken aboard and made fast in the sa way. When both the ropes are fast, good ropes or strops, provided ship, can be made fast to the spare links on the chafing chains to ba up the main mooring if required.

Fire Wire: A fire wire must be rigged on the starboard side forward a on the stern. These must be tended throughout the vessel's stay at S to ensure that they are kept within 2 to 3 ft. of water. In the case of the tugs would connect to these wires to pull vessel clear of the SB

Connecting Hoses: When the mooring is completed the work b holding the hoses clear will bring these alongside the ship in way of port side manifold.

Strops and Shackles: Strops and shackles will be provided by t Terminal and put on board as the vessel approaches the buoy. The s must provide 2 mooring ropes at least 8 in. circumference a 100 fathoms long, a 4 in. circumference messenger line, and 2 m lashings 4 in. in circumference and 15 ft. in length. These lashings sho be of Manila or Polypropylene, nylon is not acceptable.

Unmooring: To unmoor from the buoy any extra back-up lines that ha been made fast to the chafing chains are slipped first. The appro ropes are then taken to the ship's windlass/capstan and the weight ta on them until the shackle between the strop and chafing chain is undo With the vessel moving slowly astern the approach ropes are slac off and finally slipped and allowed to float free. While the ship unmooring, a Terminal work boat will keep the floating hoses to clear and will keep them clear until the ship has slipped the moor and is clear of the buoy.

HOSES: *Hose Lifting Capacity:* Tankers must be equipped with a h lifting derrick at the port side manifold, with a lifting capacit conformance with the table shown on Page C2 of Appendix "C" to International Oil Tanker and Terminal Safety Guide. For instan 15,000 d.w.t. ship, at ballast draft with smooth sea conditions w have to lift a weight slightly in excess of 3.5 tons. For this purpose essential that the derrick is double rigged and that there is sufficient runner wire on the winch for the block to reach the water when hooking the hose on. The winch must be in good working order, the end of the runner securely fastened to the drum end and the winch brake operative. The hoses at the Terminal are 16 in. internal diameter with the tanker rail hoses having an internal diameter of 12 in.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to connect 8 in., 10 in., 12 in. and 16 in. manifolds. Ships manifolds must terminate in flanges of ASA 150 series.

Details of ASA 150 flat face flanges are shown in the "plan" section. Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of sizes and or ratings other than those specified above, will be rejected.

1×16 in. self floating hose is run from the buoy to the tanker. The last 3 hoses of the string, including the tanker rail hose, are 12 in. diameter. This reduction in diameter is made at the tanker end of the string so that the ship has less weight to lift when hoisting the hoses on board.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

LOADING: *Loading Rate:* Maximum loading rate is 13,500 bbls.p.h., and maximum discharging rate is 21,000 bbls.p.h. It is recommended that vessels take maximum flow, with due regard to safety, in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the vessel will contact the Terminal Despatcher ashore every 30 minutes by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF, the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a Terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a "Shore Stop" will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting "Shore Stop". When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for overload the vessel, it is not possible to pump oil back from the ship to the shore.

Lawi Lawi Crude Oil Specifications:

Gravity at 60°F.:	39 A.P.I. to 34 A.P.I.
Salt Content:	Less than 12 pounds per 1,000 bbls.
B.S. & W.:	0.30 Vol. % or less.
Sulphur:	0.04 – 0.15 Weight %
Pour Point:	15°F. to 20°F.
Viscosity:	1,000 to 2,000 cST @ 100° F.
Reid Vapour Pressure:	3 to 8 p.s.i.

BALLAST/POLLUTION: *Adequate Ballast:* Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by Governmental Authority for pollution shall be for the vessel's account.

In the event that the Company has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters, all labour and equipment costs for cleaning operations will be to the vessel's account.

REPAIRS: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in the berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission must be obtained before any such increase in revolutions.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs Officer will seal the stores.

AIRPORT: Sepinggan Airport, distance 8 km.

TIME: GMT plus 8 hours.

FACILITIES: There are no facilities of any kind at Lawi Lawi S.B.M.

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.

GENERAL: *Charts:*

British Admiralty Charts:

3014	Balikpapan Bay to Pulo Laut.
3031	Plans on the East Coast of Kalimantan.
941 B	Eastern Archipelago Sheet 2 Western Portion.
2637	Strait of Macassar South Port.

U.S. Naval Oceanographic Office Charts:

HO. 3045 Southern Part of Macassar Strait.
HO. 6188 Tanjung Tamarong to Sungai Pasir.

Sailing Directions: Indonesia Pilot Vol II, 1st Edition 1976.

Hydrographic Survey: A detailed hydrographic survey including a wire sweep was carried out from November 1975 to February 1976. This survey covers the approach channel, anchorage area and the manoeuvring area in the vicinity of the SBM (See "Plan").

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personal who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel to which any person may be lawfully required to proceed are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor at the SBM and such access shall be adequately illuminated between sunset and sunrise.

Operations: No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or both, or for infringement of Port Regulations. Unsatisfactory conditions will be reported to the Company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient crew members must be immediately available at all times to assit with any or all operations on board the vessel at the terminal.

Floating Logs: Masters are advised to keep a good lookout for partially submerged logs floating in this area. These can be large and a hazard to safe navigation.

AGENCY: See "General" before first port.

AUTHORITY: The installations of this Terminal are owned by P. H. Perusahaan Pertambangan Minjak Dan Gas Bumi Negara (Pertamina), a State Enterprise of the Republic of Indonesia.

Operator: Union Oil Company of Indonesia, Ratu Plaza Building, 7th Floor, Jl. Jend. Sudirman, Indonesia. *Mailing Address:* P.O.Box 264/DKT, Jakarta, Indonesia. *Cables:* Petroleum Jakarta *Telex:* 47335 Union-Ia. *Tel:* 712509, 737344, 712161.

LHOKSEUMAWE (Including Hagu, Blang Lancang and Krueng Geukueh): 05.15 N. 97.07 E. (See Plan)

LOCATION: The port is situated on the North coast of Sumatra, Indonesia. The port limits (compulsory pilotage) are:

North:	Lat. 05° 17′ 00″ N.	Long. 97° 10′ 00″ E. to
	Lat. 05° 17′ 00″ N.	Long. 96° 58′ 20″ E.
West:	Lat. 05° 17′ 00″ N.	Long. 96° 58′ 20″ E. to the coast.
East:	Lat. 05° 17′ 00″ N.	Long. 97° 10′ 00″ E. to the coast.

South: Along the coast between East and West limits include Blang Lancang and Public and Special Fertiliser Harbour (K.G.).

The Blang Lancang outer buoy is in position:
Lat. 05° 15′ 22″ N. Long. 97° 07′ 02″ E. Fl. 8 sec.

Chart and Sailing Directions for the area:
Republik Indonesia Hidral No. 8 Plant Chart No. 25.
Sailing Direction.
List of Lights.
Special Publication.

Lhokseumawe Harbour is divided into 4 areas:
1. Lhokseumawe Harbour.
2. Hagu Pertamina Special Oil Terminal.
3. Blang Lancang Pertamina Special Harbour (LNG/LPG/Condensate Terminal).
4. Krueng Geukueh Harbour (Fertiliser Terminal and Public Berth).

DOCUMENTS: *Clearance:* The Document Clearance will be undertaken at any port (anchorage or berth).

Cholera Vaccination Certificates for all crew members and passengers (date not exceeding 6 months).

Certificates of Inoculation against any contagious diseases.

Customs, Immigration, Quarantine and Harbour Master will require the following for inspection:
10 Crew Lists.
3 Crew Declaration of Personal Effects.
3 Ship's Stores Lists (inventory).
2 Passengers Lists (if any).
5 Cargo Manifests, with a summary for transit cargo.
Clearance from the Last Port of Call.
Valid passports and/or Seaman's Certificates for all crew members.
International Maritime Declaration of Health.
Valid Derat or Derat Exemption Certificate.
Arms and Ammunition Declaration.
Load Line Certificate, Ship Registry, Radio Safety/Telegraphy Certificate, Ship's Construction Certificate, Safety Equipment Certificate.
U.S.C.G. Letter of Compliance.
General Information.

In accordance with practice in Indonesian ports the vessel's national flag, the Indonesian country flag, Quarantine, Immigration and Pilot flags must be displayed by all vessels approaching Lhokseumawe Harbour. These signals shall be displayed continuously until clearance is granted.

PILOTAGE: Compulsory for any movement of the ship in harbour and within the port limits.

Lhokseumawe Harbour: Pilot will board the vessel at the anchorage.

Hagu Special Oil Jetty: Pilot will board the vessel at the anchorage.

Blang Lancang Harbour: Pilot will board the vessel at the sea buoy or in the Anchorage Area about 3 miles from the breakwater.

Krueng Geukueh Harbour: Pilot will board in the Anchorage Area or one mile from breakwater.

Master, Owner or Agent should request the Pilot 6 hours in advance for berthing and 3 hours in advance for unberthing. The vessel should be stopped when the Pilot is boarding. Call the Lhokseumawe/Blang Lancang/Krueng Geukueh pilot station by VHF on Channel 12 (24 hours). Moving the ship for berthing and unberthing available in good conditions. The limit is: for the wind not more than 10 m./sec. and swell not more than 2 ft./sec. (for MBM) and visibility not less than 1 mile.

RESTRICTIONS: If there are two LNG ships alongside the dock no other ship will move to West Cargo Dock in the Blang Lancang Harbour, except P & T marine craft actually assisting the LNG tanker.

No ship will enter Blang Lancang Harbour with ammunition on board.

Vessel not allowed to proceed into the Blang Lancang MBM restricted area without permission.

No ship will berth during night time at Lhokseumawe/Hagu Wharf or at Blang Lancang SPM/MBM. Blang Lancang Harbour open for 24 hour service. Krueng Geukeuh Harbour open for day time only.

ANCHORAGE: A vessel which has been informed by the Agent anchor on arrival shall proceed to the designated Anchorage Area.

Anchorage Area for Lhokseumawe Harbour and Hagu Special Terminal is in position:
Lat. 05° 10′ 32″ N. Long. 97° 09′ 20″ E. Depth 20 m.

There are two Anchorage Areas at Blang Lancang Pertamina Spe Harbour:
1. Anchorage Area for LNG and LPG tankers:
Lat. 05° 15′ 15″ N. Long. 97° 07′ 45″ E. Depth of water 60
2. Anchorage Area for condensate tankers:
Lat. 05° 15′ 15″ N. Long. 97° 07′ 25″ E. Depth of water 60

No dry cargo ship will anchor in Blang Lancang Special Harbour. dry cargo ships visiting Blang Lancang Special Harbour should anc in Lhokseumawe Harbour for clearance and awaiting a berth.

All vessels visiting Krueng Geukueh Harbour should anchor 1 m North from breakwater in position:
Lat. 05° 16′ 00″ N. Long. 97° 01′ 40″ E. Depth of water 42

The holding ground in the Anchorage Area is reported to be poor. vessels are required to maintain engines on one hour's notice in go weather and 15 minutes' notice when wind speed exceeds Beau Scale 4 (moderate breeze).

MAX. SIZE:

Old Lhokseumawe Harbour: Only barge and tugboats are able moor at the dock, depth 2.4 m.

Hagu Wharf: Max. draft 6.0 m.

Blang Lancang Harbour:

LNG Dock I (North):	Max. LOA	– 300 m.
	Max. draft	– 13 m.
LNG Dock II (South):	Max. LOA	– 300 m.
	Max. draft	– 13 m.
West Cargo Dock:	Max. LOA	– 180 m. General cargo.
	Max. draft	– 6.5 m.
LPG Dock:	Max. LOA	– 270 m.
	Max. draft	– 13 m.
	Max. d.w.t.	– 65,000
MBM:	Max. LOA	– 275 m.
	Tankers	– 30,000 – 100,000 d.w.t.
SPM:	Tankers	– 40,000 – 280,000 d.w.t.

Krueng Geukueh Harbour:

Berth A–AAF	Max. d.w.t.	– 10,000
	Max. LOA	– 169 m.
	Max draft	– 9.50 m.
Berth B–AAF	Max. d.w.t.	– 15,000
	Max. LOA	– 175 m.
	Max. draft	– 9.5 m.

HEALTH: In order to obtain Free Pratique vessel must cable name a nationality of the ship; ports of call during the voyage; number of cr and passengers (if any); port of destination and Agent; condition of hea of all onboard with details of any sickness and whether all vaccinat

Officials will board before with Pilot. Quarantine flag "Q" a Immigration flag "N" must be flown until clearance is granted.

RADIO: Ships proceeding to Pertamina/Pt. Arun: Call Lhokseuma Radio Station, call sign PKB 20. (Owned/operated by Pertamina). Op 24 hours. See "List of Radio Signals" or on VHF Channel 16 or P Station on VHF Channel 12.

The following information is required.
(a) Name of Owner.
(b) Name of vessel and Radio Call Sign.
(c) Flag.
(d) SDWT.
(e) Name of Master.
(f) Last port of call and departure date.
(g) Discharge port and ETA.
(h) Number of crew and passengers.
(i) Maximum loading rate in barrels for oil tankers and cubic meters for LNG/LPG tankers.

Dry cargo ships: Call the General Agent in Belawan. Call Belaw Radio PKB 1. (Owned/operated by Port Authority). See "List of Ra Signals."

VHF: For Lhokseumawe Harbour and Krueng Geukueh Harbour: Lhokseumawe Pilot on Channel 12. Mooring and unmooring Channel 8 at Krueng Geukuh.

For Blang Lancang Harbour: Lhokseumawe Radio PKB 20 Chan 16. Marine Office Channels 16, 9 and 13. Pertamina Channels 16 19 (working). Mooring and unmooring on Channels 6 and 13 at Bl Lancang.

For Pilot Station: Call Blang Lancang Pilot Station and Lhokseuma Pilot on Channel 12.

Language: Indonesian and English.

RADAR: No radar service available.

TUGS: No tugs available in old Lhokseumawe Harbour.

Blang Lancang Harbour: 5 tugs available – 4 tugs with 4,200 1 tug with 3,200 h.p. 2 mooring launches 550 h.p.

For Supertanker and LNG: Tanker will use the tug's lines. Tug's will be charged by Company/Pertamina: Rates will be subject to cha in accordance with operation cost and will not be subject to adva notice.

Cargo ships will use ship's line.

In Krueng Geukueh Harbour: 2 tugs available with 1,000 h.p. ship's line. 1 mooring launch, 105 h.p. 1 pilot boat, 250 h.p. and 1 boat, 270 h.p.

Tug Requirements:

MBM: 3 tugs for berthing and 2 tugs for unberthing.

SPM: 2 tugs for berthing and unberthing.

LNG/LPG: 4 tugs for berthing and unberthing.

STEVEDORES: Available. PBM Stevedoring Company.

MEDICAL: Hospital facilities available.

BERTHING: *Old Lhokseumawe Harbour (Lhokseumawe Terminal):* A small pier with length 60 m. Construction: Piles with wood on the top. Depth 2.4 m. Only barges and small vessels under 500 d.w.t. can berth.

Blang Lancang Harbour (Arun Terminal): 2 special LNG docks, 400 m. length each with 10 mooring dolphins and 4 rubber fenders. Depth 14 m. at LWS.

One special LPG dock, 270 m. length, with 6 mooring dolphins and 2 rubber fenders. Depth 14 m. at LWS.

West Cargo Dock: Length of the dock 400 m. Depth 6 m. at LWS.

East Cargo Dock: No longer operational.

MBM: The berth which is located offshore is designed for oil tankers ranging from 30,000 d.w.t. to 100,000 d.w.t.

Vessel approaches berth heading 250°T between Buoys 6 and 7 (see "Plan").

The MBM consists of 9 cylindrical mooring buoys secured by 3.5 in. stud-link chain to 30,000 lb. anchors. Some of the mooring buoys are fitted with 44 mm.×750 ft. long preventer wires for use with large ships.

Ships using the 16 in. hoses must have a derrick on the port side with SWL of 10 tons with which to lift the hoses from the seabed. The winches of ship for taking on the shore wires on the drum must be able to withstand 35 tons breaking strain.

Engines to be on one hour's notice throughout.

New SPM: Located 1 km. N.W. of MBM in position: Lat. 05° 15′ 18.23″ N., Long. 97° 04′ 03.33″ E. The SBM is designed for 40,000 d.w.t. – 280,000 d.w.t.

Asean Aceh Fertiliser (AAF Special Fertiliser Harbour): Berth A: Special fertiliser in bulk. 200 m. long with 8 dolphins (4 fenders). Depth. 10 m. at LWS. Designed capacity : Max. d.w.t. 10,000 or 169 m. length able to moor.

Berth B: General cargo berth. Concrete construction 300 m. long with fenders every 20 m. Depth 10 m. at LWS. Max. size 160 m. LOA able to moor.

PIM Special Fertiliser Berth: Located S.E. from Berth "Berth A" – AAF berth. (PIM – Pupuk Iskandar Muda; AAF – Asean Aceh Fertiliser). Designed capacity : Max. d.w.t. 10,000 or 169 m. length able to moor.

New Lhokseumawe Public Berth: Length 80 m. Vessels with Max. LOA 150 m. are able to moor using dolphin and mooring buoy.

TANKERS: Oil tankers will be berthed at the MBM or the SPM.

The Loading/Mooring Master will provide shore labour for connection/disconnection of the submarine hose strings. He maintains communication links with terminal.

Diameter of load line – 2×16 in. for large tankers.

- 2×8 in. for small tankers.

Ships visiting Blang Lancang should have clean ballast. No dirty ballast or slops facilities available.

LPG/LNG:

Storage Capacity:

LNG	636,000 cu.m.
Liquid nitrogen	6,500 gallons

Working Pressure:

LNG	70 p.s.i.
LPG	22 p.s.i.

LNG Characteristics:

Explosion limits	5.3 – 14 % vol.
Flammable	Yes
Boiling point	−161°C.
Flash point	−175°C.
Critical pressure	45.6 kg./sq.cm.
Critical temperature	−82.5°C.
Condensing ratio	0.8038

Loading:

	LNG	Vapour Return	LPG	Vapour Return
Pipeline (in.)	24	30	28	24
Loading rate (cu.m.p.h.)	11,000		3,400-4,770	
Discharging rate (nominal cu.m.)		77,880		10,700 (Propane) 12,400 (Butane)
No. of lines	3	1	2	1 (Propane) 1 (Butane)
Hose connection (in.)	16	16	12	12 (Propane) 12 (Butane)
Max. vertical limit (m.)	7.0		11.9	
Manifold to rail (m.)	3.35 (max.)		2.60 (max.) 1.25 (min.	

Condensate:

Storage capacity:	340,000 k/l
Loading temperature:	90°F.
Working pressure:	220 p.s.i.
Reed Vapour Pressure:	13 p.s.i.
API Gravity at 60°F.:	56-51
Loading rate (Bbls.p.h.):	55,000-60,000
Pipeline:	42 in.
Hoses:	2×12 in.

Also see "Berthing".

DENSITY: 1024.

FRESH WATER: Available at a rate of 20 t.p.h.

FUEL: Not available.

FIRE PRECAUTIONS: No smoking will be allowed on board while the ship is berthed and on the plant site of Arun Terminal, except in places approved by Harbour Master.

CONSULS: No Consuls in Lhokseumawe.

REPAIRS: Minor repairs possible.

SURVEYORS: Saybolt Surveyor attends at Blang Lancang CBM/SPM/LNG dock.

DRY DOCKS: No facilities.

GANGWAY/DECK WATCHMEN: Ship's crew maintain deck watch.

Gangways: Cargo and oil tankers use ship's gangway. LNG and LPG tankers use shore gangway.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: Lhokseukon Mobil Oil Domestic Airport, about 30 km. from Lhokseumawe.

Malikussaleh/Kreung Mane PT. Arun Public Airport (Domestic) about 30 km. from Lhokseumawe.

Polonia International Airport located in Medan, about 360 km. from Lhokseumawe.

TIME: GMT plus 7 hours.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes/10 cigars. 100 grams of tobacco. No spirits to be taken ashore.

CARGO GEAR: At Lhokseumawe Terminal/Hagu no facilities for heavy lifts.

At AAF Cargo Dock/Blang Lancang Cargo Dock, heavy lifts can be handled.

HOLIDAYS: For LNG and Condensate: No holidays in operation. For other vessels: Idul Fitri – Idul Adha, no operations.

POLICE/AMBULANCE/FIRE: *Police:* Lhokseumawe/Hagu Area: (Sector) Public Tel: 110. (Resort) Tel: 21490.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Shore pass as required by Agent.

DELAYS: Vessels calling at Blang Lancang CBM may be delayed if ship's mooring system is unsuitable or when berth is affected by strong winds and/or swell.

GENERAL: *Post Office:* Lhokseumawe: Jl. Samudera. Tel: 21026.

Blang Lancang/Krueng Geukueh: Batuphat (PT. Arun Tel: 3159).

Telegraphic Office: Centre or Interlocal: Jl. Merdeka. Tel: 21757.

Port Services: Jl. Pelabuhan Tel: 21181. Harbour Master Tel: 21485.

Restricted Area: 1.75 nautical miles radius of the centre of the SPM position.

SHIPMASTER'S REPORT: April 1981 (Updated 1990).

Arun Terminal:

Documents: See "Jakarta".

Chart: B.A. 3584.

Berthing: There are jetties for LNG loading.

North Dock: Lat. 05° 13′ 23″ N., Long. 97° 05′ 55″ E.

South Dock: Lat. 05° 13′ 09″ N., Long. 97° 05′ 49″ E.

This is an open sea loading point located just at the right hand side of the port of Blang Lancang for ships to load condensate cargo only.

Pilotage: Compulsory, Loading Master together with 4 – 6 shore personnel will assist in mooring, Pilot also onboard.

Loading: Vessel should be equipped with 10 ton derrick on port side, manifold 2×12 in. on port side, 2 mooring winches/drums, 1 minimum available at forward maindeck and 1 at after maindeck for serving the preventer wire 44 mm.×750 ft., as breast lines for 2 buoys. Vessel should also be equipped with 14 mooring lines minimum length 210 m. each for 9 mooring buoys. Loading Master will discuss the mooring procedures with Master before mooring.

Shore Facilities: None.

Agent: Pertamina, Blang Lancang, Cable Address: Pertaminaship, Jakarta.

SHIPMASTER'S REPORT: September 1983 (Updated 1990).

Arun Terminal:

Documents:

On arrival Health, Immigration and Harbour Master's Officer will board with the Agent to issue clearance.

Papers required:

Maritime Declaration of Health.
Vaccination Cards.
Derat Certificate.
Crew List (10-12 copies).
Passports/Seamen's ID Books.
Last Port Clearance.
Arrival Report (supplied by the Agent).

The Agent will require the following documents to take to the Custom House ashore:

Ship's Register.
International Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Certificate of Financial Responsibility (oil pollution).
Derat Certificate.

Immigration may take some, or all Passports/ID ashore.

After these formalities have been completed 4 or 5 Customs Officers will board. They will require:

Ship's Stores List.
Crew Personal Effects List.
Cargo Manifest ('nil' declaration if applicable).

About 4 – 5 copies of each of the above should be adequate. The bond store, and possibly other storerooms, will be checked and some or all cabins will be searched.

Cargo documents should normally be ready by the time the hoses are disconnected, (about 1.25 hours after completion of loading). Return of Ship's Certificates, Passports, and issue of Port Clearance, can, it is reported, cause some delay. Vessels are not allowed to wait at the berth for documentation.

Pilotage: See "Berthing".

Anchorages: A designated waiting anchorage for tankers lies about 1.25 miles North-Eastward of the berth, in depths of about 60 m. (clay).

Restrictions: Mooring of condensate tankers carried out in daylight only. Unmooring is allowed day and night.

Restricted area: 1.75 nautical miles radius from centre of SPM.

Max. Size: The tanker berth is designed to accept vessels up to 100 MDWT, with LOA 275 m.

Approaches: Charts: BA 2777; BA 3585.

Apart from an active fishing industry operating in the area there are no navigational hazards in the approaches. There are adequate navigational lights serving Blang Lancang and Pelabuhan Blang Lancang, (although neither the light or racon on the beacon at Ka Geukueh, about 1.5 miles Westward of the terminal were active 9th-15th September, 1983). The storage tanks and gas flares at the terminal are prominent day and night.

Radio: Send ETA 72, 48, 24 and 5 hours in advance to Lhokseumawe Radio Station, Telex No. 51696 (Station operated by Pertamina). Additional information regarding the vessel's details, last port, cargo requirements, etc., is not obligatory as far as is known but seems advisable.

Radio Station 'PKB 20', at Lhokseumawe will handle traffic concerning navigation, cargo, etc., but watch schedules do not appear to be regular. The terminal may, via PKB 20, request information from the vessel regarding cargo requirements, loading rate, deballasting time (if applicable), number/type of mooring lines.

VHF: When within appropriate range the terminal may be contacted on VHF Channel 16; working Channels 9 and 19. The call sign is 'Arun'.

Tugs: Three tugs, each 4,200 h.p., assist the berthing. One tug is made fast forward and one aft; centre leads; tugs' towing ropes. One tug pushes at amidships as required. Two tugs attend during unberthing. Two large mooring boats are employed for mooring/unmooring.

Berthing: The terminal, owned and operated by Pertamina, together with Mobil and Japanese interests, exports Arun Natural Crude and LNG. Tankers load at a multi-buoy berth about 1.5 miles off-shore. Gas carriers load in a small artificial harbour (Pelabuhan Blang Lancang), about 1.5 miles E.S.E of the terminal. The small port of Lhokseumawe lies about 5 miles S.E. of the terminal. New Lhokseumawe Public Harbour and Fertiliser Terminal (AAF & PIM) located in Terminal Krueng Geukueh, about 5 miles WNW of the Blang Lancang outer buoy.

The tanker berth is located in an open roadstead in depths of 35 m. – 50 m. There are 9 mooring buoys, 2 bow buoys, 2 breasting buoys each side, 2 quarter buoys and 1 stern buoy. The tanker will require 4 bow lines, 4 breast lines and 5 stern lines. Wire ropes are acceptable, preferably with nylon tails. The bow lines should be at least 250 m. in length. Additionally the tanker will be required to pick up a 42 mm. diameter wire rope from each of the breasting buoys. Prior to berthing the vessel's mooring equipment will be inspected by the Mooring Master who will discuss the mooring operation with the Ship's Officers. The Mooring Master and Assistant will board with the Pilot at the time of berthing to supervise the mooring operation.

Accommodation on board is required for the Loading Master and one Mooring Master.

Scuba divers are in attendance to sort out any underwater problems that may occur with regard to the moorings and hoses.

Loading: Arun Natural Crude is a condensate, (akin to naphtha), very light and gassy. Approximate quality details are:

API, 55; temperature, 32°C; RVP, 11 psi. Cargo is loaded via two 12 in. flexible hoses. The terminal supplies labour for connecting/disconnecting the hoses. Ship's crew required to assist and operate winch and derrick. Allow for about 6 tons lift on each hose. Maximum loading rate is 65,000 bbls/hour. The terminal meters the quantity of cargo loaded. The meter is proved at each loading and the ship should receive a proving report on completion of loading.

Medical: Treatment available.

Fresh Water: None. (Said to be available at Pelabuhan Blang Lancan

Fuel: None. (Said to be available at Pelabuhan Blang Lancang).

Airport: There is, reportedly, an air service with Medan, about 150 mi S.E. of Blang Lancang. Medan is said to be served by internatio flights.

Shore Leave: Permitted.

Developments: Plans to install an SBM, as an additional berth, ha been approved, it is reported.

General: Tides: Refer Lhokseumawe. Tides are semi-diurnal. Spr range is 1.4 m. Rates appear to be fairly weak. A ship will generally windrode at the anchorage.

Weather: November to March winds from N.E. prevail. June September winds from S.W. prevail. The area is subject to SW'ly squa May-September, and particularly June-August. Thunderstorms are mo frequent March – April and October – November.

DOCUMENTS:

Certificate of Registry
Crew List
Log Book
Certificate of Seaworthiness
Load Line Certificate
Radio Certificate (Solas Certificate)
Health Certificate
Equipment Certificate (Solas Certificate)

Shipping documents as follows:

Manifest of cargo
Bills of Lading
Charter Party (if necessary)

PILOTAGE: Pilotage compulsory for vessels of more than 150 cu.m. gross volumes.

To order a Pilot:

1. Contact the ship's Agent in this port via Macassar Radio (call si PKF) by ship's radio or VHF Channel 16.

2. Also contact Macassar Pilot Station tower by VHF Channel 16.

Pilotage Information:

1. Every vessel of 71 m. LOA and over under Pilot's direction t berthing and unberthing is to use the Port Administration tugs.

There are 2 tugs available with initial letters "PA" on their blue funn

M.T. "Anggada VII" 800 h.p.
M.T. "Selat Tanakeke" 1,160 h.p.

2. Every vessel of 31 m. LOA and over, under Pilot's direction t berthing and unberthing is to be assisted by Port Administration moor boat.

ANCHORAGE: The anchorage for vessels awaiting a Pilot is arou the position Lat. 05° 07′ 30″ S., Long. 119° 22′ 30″ E. with depth water 25 m. at LWS.

RESTRICTIONS: Entry not permitted after 1800 hrs. Every fore vessel is to have special permission from Indonesian Government Directorate General of Sea Communication for entering and should ha representatives or handling Agent before entering this port.

Warships should contact the Indonesian Navy Commander of Territo VII (Pangdaeral VII) before entering the port.

MAX. SIZE: Max. LOA 200 m. Max. draft 9.0 m.

RADIO: See "Pilotage".

VHF: Harbour Master on Channel 16. Pilot Station on Channel 12.

TUGS: 5 tugs available.

BERTHING:

Depths of Water:

Main Entrance Channel: 13 m. at LWS.
Soekarno Wharf: Length 1,350 m. Depth 8.0 m. – 9.0 m. at LWS.
Hatta Wharf: Length 550 m. Depth 8.0 m. – 9.0 m. at LWS.
Oil Jetty (Pertamina Jetty): 8 m. at LWS.
Anchorage in the inner waters: 11 m. at LWS.

Special Attention in West Monsoons (November to February):

All vessels alongside Soekarno and Hatta Wharf should use fore a aft mooring lines to buoys which are available, to prevent the bea of ship's hull against the wharf.

STEVEDORES: Stevedoring by Port Labour (UKA). Capacity discharging: 12 ton gang/hour – General Cargo. 17 ton gang/hour – B Cargo (in bags). Heavy cranes available, capacity 15 tons.

MEDICAL: Doctor and clinic available.

FRESH WATER: Available rate 50 t.p.h.

FUEL: Available, MFO 50 t.p.h.

IDENTIFICATION CARDS: Needed by Immigration Office.

CONSULS: Japan and Norway.

REPAIRS: Minor deck or engine repairs possible.

GANGWAY/DECK WATCHMEN: There are no special deck wa men services but can be arranged through Agent.

OPENING/CLOSING HATCHES: Work carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco. Only sufficient for personal use (500 grams tobacco or 200 cigarettes for one passenger).

Wine and/or spirits not permitted out of bond.

AIRPORT: Macassar Airport, called "Mandai Airport", distance from town about 23 km.

Services: Macassar–Kendari and Jakarta–Surabaya–Macassar Manado every day (3 times a day). Macassar–Ambon–Jayapura.

TIME: Middle Indonesian Time, GMT plus 8 hours.

HOLIDAYS: Every Sunday; New Year (January 1st); Idul Adha (November 11th); 1st Muharam 1399 H. Isa Almasih (May 15th); Proclamation Day (August 17th); Mi'radj Muhammad (July 3rd); Idul Fitri (September 9th); Maulud Muhammad (February 20th); Santa Maria (May 15th); Christmas Day (December 25th). Work can be arranged at overtime rates.

POLICE/FIRE/AMBULANCE: Police, Fire 4306. Ambulance 7227.

TELEPHONES: No arrangements exist for placing telephones on board.

DELAYS: Caused by rain (bad weather).

DEVELOPMENTS: In near future, Macassar to have bonded warehouse, godown for dangerous cargoes and be able to handle containers.

SHIPMASTER'S REPORT: March 1986.

5 buoys marked swept channel which has been realigned west of Kudingareng Lompo. Most local vessels use the alternative swept channel which passes South and East of Kudingareng Lompo. Mariso Beacon has been replaced by Ujong Pandang Beacon. The windows of the flour mill and silo terminal are the most positive mark for approaching the pilot station. The light beacons close to the entrance are impossible to identify from the city lights behind.

Pilot station has VHF Channels 12 and 16. 24 hour pilotage service is now available. The Harbour is cluttered by a dozen unlit mooring buoys, and great care is needed for ship's propellers.

Standard Indonesian Arrival Formalities soon after arrival. Inspection team consists of 2 Immigration Officers, 2 Customs Officers, Officials from the Harbour Masters Office and 2 Agents.

Vessels loaded crated plywood, standard 8 in. × 4 in. sheets, averaging 1.070 kg. Freight measurement 1.8 cu.m., gross measurement 2.02 cu.m. stowage about 3.06 cu.m. in centre holds. Small fork lift stows 6 tiers high, then lay steel plates and load up to a further 6 tiers. Vessel worked 3 hooks which averaged 50 – 60 crates per hook per hour. Factory 10 km. by road. Special alertness required for closing hatches in sudden torrential rain at night. Also Special precautions required for pilferage, such as removing all pressure gauges from hydraulic systems in deck houses. Long hasp padlocks provide no security at all, being broken more quickly than they can be unlocked.

AUTHORITY: Department of Communication, Directorate of Sea Communication, Port Administration Macassar, 6th Sea Communication Regional Office, Ujang Pandang.

MADURA: 06.51 S. 112.57 E.

PILOTAGE: Mooring Master boards in position Lat. 06° 48′ 30″ S., Long. 112° 56′ 49″ E.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

MAX. SIZE: Max. d.w.t. 105,000. Max. LOA 250 m.

RADIO: Surabaya Radio. Call sign PKD.

VHF: Surabaya Radio. Call sign PKD 6.

BERTHING: Depth alongside storage tanker 21.3 m.

LOADING: Crude oil is loaded at an average rate of 15,000 b.p.h. through 2×12 in. hoses.

Characteristics of Crude Oil:

API Gravity at 60°F.	:	46.1
Reid Vapour Pressure at 100°F.	:	3.9 psi
Viscosity at 100°F.	:	1.75 cST
Sulphur Content	:	0.02 % wt
Carbon Residue	:	0.7 % wt
Flash Point (PMCC)	:	Below 50°F.

MEDICAL: First-aid available.

DENSITY: 1020-1025.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

AIRPORT: Juanda Airport at Surabaya is the nearest airport.

TIME: GMT plus 7 hours.

GENERAL: *Charts:* Indonesian Charts No. 84 and 96. British Admiralty Charts No. 1066, 1653 (C) and 921.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: December 1985.

Location: The terminal is located 2.5 miles off the island of Madura on the N.W. coast in position: Lat. 06° 50′ 40″ S., Long. 112° 56′ 45″ E., near the entrance of Surabaya Strait.

Documents: See "Jakarta".

Pilotage: Compulsory within the terminal limits. Pilot boards in the anchorage or if berthing on arrival Pilot will board 2 miles North of the storage tanker "Asoka Nusantara". Pilot comes on board from a tug flying the "H" flag and requires a lee with pilot ladder or accommodation ladder rigged on lee side.

Anchorage: Within a 500 m. radius of position: Lat. 06° 45′ 30″ S., Long. 112° 56′ 49″ E. (2 miles North of storage tanker). Depth of water 32 m.

Restrictions: Normally daylight berthing only. Unberthing at any time.

Max. Size: Max. LOA 250 m. Depth of water 75 ft.

Health: The Health Authorities come on board after completion of berthing. They come from Surabaya by helicopter.

Radio: All incoming tankers are to send 72 hours and 48 hours notice of ETA to Kodeco-Madura Marine Terminal, through Pertaminaship Jakarta (Telex: 44450 and 45348) as Agents, giving best ETA. The first message should also include the following information:

1. Name of tanker and radio call sign.
2. Cargo requirements.
3. De-ballasting time; if a separate/permanent ballast system is fitted on board, this must also be stated.
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last port of call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give all available information as to the possible type of sickness.
9. Specification, difficulties, defective equipment or gear which could present a hazard or difficulties when mooring/unmooring or during operations.

Further ETA message should be sent (to Kodeco-Madura Marine Terminal via, Pertamina local Agent; Cable address: Pertaminaship Surabaya. Telex: 31390 PSHSB) when the tanker is 24 hours and 12 hours from the terminal and if any significant change occurs in the original ETA or those subsequent thereto.

VHF: The storage tanker keeps watch on Channel 16 throughout 24 hours. The Pilot works on Channel 6.

Whilst in the anchorage vessel is to maintain watch on Channel 16.

Tugs: 2 tugs, "Ogan" 1,700 h.p. and "Semeru" 3,200 h.p. assist in berthing.

Berthing: The storage tanker "Asoka Nusantara" is of 107,000 d.w.t., LOA 260 m. and is permanently moored to an SBM by a 14 in. line. To load crude oil, the export tanker will be moored alongside the starboard side of the storage tanker. For this purpose 4 Yokohama fenders are laid on the water along the starboard side of the storage tanker. Six ropes are required at each end. Berthing is port side to.

Hose Connection: 2×12 in. rubber hoses with camlock quick release mechanisms. Ship's derrick required and connection is made by ship's crew.

Loading: The storage tanker has 3×10,000 bbls.p.h. pumps. Maximum loading rate is 30,000 bbls.p.h. and minimum loading rate is 15,000 bbls.p.h.

Madura Crude Oil is as follows:

API at 60°F	47.0 – 46.0
Temperature	85°F – 90°F
Pour point	10°F

Facilities:

1. No dirty ballast facilities.
2. No slop tanks available.
3. No fresh water available.
4. No shore leave allowed.
5. No crew changes possible.
6. No stores available.
7. No clinic is available.
8. No bunkers available.

Time: GMT plus 7 hours.

AUTHORITY: *Operator:* Kodeco Energy Co. Ltd., Nusantara Building, 19th Floor, Jakarta, Indonesia. *Tel:* 336244. *Telex:* 44734 Kdcegy-Ia.

MALILI: 02.39 S. 120.59 E. (See Plan)
MANGKASA: 02.44 S. 121.04 E. (See Plan)

OPERATOR: P.T. International Nickel Indonesia (P.T. Inco).

LOCATION: Malili and Mangkasa Tanker Terminal are situated in the Gulf of Bone, South Sulawesi about 300 miles N.E. of Ujung Pandang.

Malili:

Malili port is situated in the Gulf of Bone, South Sulawesi about 5 miles from Mangkasa Sea Tanker Terminal.

Vessels arriving at Malili port must remain in the Roads Anchorage, Anchorage Light Buoy (Qk. Fl.) in position Lat. 02° 42′ 30″ S., Long. 121° 01′ 40″ E. Anchorage is to the South of the buoy and having average depth of more than 20 m. (LWS)

This port *is to be assigned for* dry general cargo discharging and loading of nickel ore.

The sea chart to be used is Indonesian Chart No. 319.

Mangkasa Sea Tanker Terminal:

The terminal is located at Lat. 02° 44′ 25″ S., Long. 121° 04′ 00″ E. This terminal is provided for tankers of about 20,000 d.w.t. which are to be equipped with hose lifting derrick at the port side manifold.

The sea terminal itself consists of a four buoy mooring.

The hose has a diameter of 12 in. and fitted with 12 in. × 150 lb. ASA flange. Max. pressure allowed 7 kg./sq.cm. The submarine pipe diameter is 20 in.

FLAGS: In accordance with the practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching the port. These signals shall be displayed continuously until clearance is granted.

The above mentioned signals are:

Sunrise to sunset: quarantine flag "Q".
Sunset to sunrise: signal lights red over white.

The flag "N" should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Pilot boards.

The vessel should also fly its call sign until the vessel is secured in the berth. These call sign flags must be flown again when the vessel is sailing until the vessel is clear of the anchorage area and the Pilot has departed.

The "G" flag should be replaced by "H" flag if the Pilot is already aboard the vessel.

The "P" flag may may be flown if the vessel is going to sail within 24 hours.

DOCUMENTS: Indonesian Immigration, Customs and Port Officials will board the vessel to grant clearance. Each crew member should be in possession of an International Vaccination Card and passport.

The following documents may be required for granting Pratique for the vessels arriving from foreign ports:

Certificate of Registry.
Ship's Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Derat or Exemption Certificate.
Cargo Gear Certificate.

The last Port Clearance and Crew Lists are also required.

Flag Dispensation: All foreign vessels entering Indonesian ports must have requested and been granted Flag Dispensation prior to the arrival at the port. Also a loading or discharging permit must have been applied for from the authority concerned. All this will be done by the general Agent.

PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided.

MAX. SIZE: The tanker buoy mooring is designed for a vessel of 20,000 d.w.t., 26,700 tons displacement, LOA 600 ft., and max. draft of 31 ft.

RADIO: Vessels arriving between 0700 – 2300 hrs. (local time) should contact Malili Radio "PKF-7" on VHF Channel 16 four hours before arrival to confirm arrival time.

Notice of Arrival: 72 hours prior to the arrival at Malili or Mangkasa Tanker Terminal, the Master has to cable his ETA to "Inco Ujungpandang" through Ujung Pandang Coastal Radio Station which then, will be passed on to Malili or Mangkasa Coastal Radio Station.

The Master has to reconfirm or amend the ETA 48 hours and 24 hours before arrival at the port.

The cable address of "P.T. International Nickel Indonesia" (P.T. "Inco") of Ujung Pandang is Nikel Indonesia Ujung Pandang.

The coastal radio station of Ujung Pandang has the following particulars:

Name of Station: Ujungpandang Radio.
Call Sign: PKF.
Frequency: 465 – 500 – 8686 – 13101 kHz (A1), and 4409 – 2182 – 6518.6 – 8738.4 kHz (A3).
Power: 1 kW.
Service Hours: See book of Indonesia Coastal Radio Stations.
Geographical Location: Lat. 05° 06′ 30″ S., Long. 119° 26′ 20″ E.

Details of Cable: The information cable should give the following data:

1. Name of vessel and radio call sign.
2. ETA in GMT and date (local time, GMT plus 8 hours).
3. The quantity of cargo to be discharged.
4. Maximum discharging capacity (for tanker only).
5. Vessel's draft on arrival.
6. If there is any sick crew on board or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead or valve leakages which may cause pollution (for tanker only).
9. Distance in feet from bow to vessel's manifold connection.
10. Flange dimensions of vessel's manifold.
11. Any requirements such as provisions, fresh water, etc.

Language: The languages used are Indonesian and English.

BERTHING: Mangkasa Sea Tanker Terminal: Mangkasa Sea Tanker Terminal is an offshore system with 4 fixed anchors connected to buoys which have a quick release mooring system. Buoys are located to suit 20,000 tonners with 2 buoys on the bow and 2 buoys at the stern. These buoys are not lit.

Connection to tank farm is via 12 in. flexible hose joined to 20 in. undersea pipe to the tanks. The flexible hose is fitted with a 12 in.×150 lb. ASA flange.

If the jetty of Mangkasa Tanker Terminal or "four mooring buoys" is unoccupied and has been fixed for certain vessel, the vessel will be boarded by a Mooring Master in the anchorage area providing that the vessel in all respects ready to commence discharging her cargo. The NOR tendered by the Master concerned will be accepted at the time the Mooring Master boards.

Anchoring: A vessel which has to anchor on arrival due to certain circumstances has to inform Balantang Base (VHF Channel 16) of her exact time of arrival at the port. This is important for adjusting the acceptance of the NOR tendered, providing:

1. It is within daylight, i.e. 0600 to 1800 hrs. local time. The NOR is considered to be accepted at the time the Mooring Master boards. Should the vessel have been at anchor, NOR is also accepted at the time the anchor is aweigh providing the Mooring Master is already onboard the ship.

2. It is not a public holiday or Sunday, unless the vessel is actually handled on that day.

3. The port is still open.

In addition to the above conditions, vessels arriving at an unreasonable time ahead of their last signalled estimated time of arrival will not be accepted.

Exact Time of Arrival: It is stressed that every Master has to advise the Port Control of his exact time of arrival to avoid unfavourable situations.

Work Crew Service: Mooring and unmooring, lifting, lowerin connecting and disconnecting hoses will be done by a terminal w crew under the direction of the Mooring Master. Assistance from sh personnel in operating windlasses, winches etc., will be required.

Tanker Engines and Hose Lifting Derrick: Being an open roadste vessels must keep engines on stand-by during their stay in the be No repairs to main engines may be undertaken while in berth. Po must be kept on deck winches in case adjustments to mooring lines a found necessary. Ship's booms and deck winch must be capable operating with a SWL in conformance with table shown on Page C2 Appendix C to the International Oil Tanker and Terminal Safety Gui Vessels with inadequate hose lifting equipment will be rejected.

Safety: Every vessel which berths at the buoys shall remain under t charge of the Master who will take all steps necessary to preserve t safety and security of such vessel, crew and terminal personnel w may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage secured to the mooring buoys shall ensure that all parts of the ves to which any person may be lawfully required to proceed are prope illuminated.

Efficient and easy means of access shall be provided to every ves at anchor and at the mooring buoys and such access shall be adequat illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel oth than by the gangway or other proper means provided for the purpos

The Mooring Master may require the vessel to unmoor at any ti he deems necessary for the safety of the vessel or the moorings or bo or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Logis Superintendent, who is empowered to reject a vessel for future ca unless the reported deficiencies have been remedied.

Sufficient crew members must be immediately available at all tim to assist with any or all operations on board the vessel at the termin

MEDICAL: Treatment possible at the Nickel Projects Hospital Soroako, about 60 km. from Malili. Clinic at Malili available emergencies.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: No facilities.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matche spirits, wine, beers, perfume, arms, ammunition and possibly other ite have to be locked up under Customs and sealed from time the s arrives in port until she leaves territorial waters.

Each person is allowed to bring in 200 cigarettes or equivalent grams of tobacco or cigars. Special allowances are made for the Mas under special circumstances. The Customs officials will seal the stor

REPATRIATION: Crew changes especially foreign crew are difficult arrange.

AIRPORT: P.T. "Inco" operate a charter flight between Malili and Uju Pandang (formerly Makassar) once a day with a Twin Otter aircra flying time 1 hour.

SERVICES: Provisions and stores not available.

GENERAL: *Chart:* Chart for the area is the Republic of Indonesian Ch No. 319 (The Gulf of Bone).

Facilities: Malili region in which nickel ore mine exploration is tak place is a newly opened region, isolated in the middle of the jung It is, therefore, not surprising if no facilities are available at present.

AGENCY: Owners have to appoint one of the Indonesian shipp companies as their general Agent for Indonesia. This shipping compa will then appoint P.T. "Inco" to be their sub-agent for the Port of Ma and/or Mangkasa tanker terminal to attend the arriving vessel.

The agency appointment which should be confirmed by offic company letter which has to be received at least 10 days prior to t ship's arrival at Malili Port or Mangkasa Tanker Terminal to give t general Agent a chance to arrange the necessary permits from t Indonesian Government.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Not available.

PALEMBANG: 02.59 S. 104.45 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 copies Crew List.
6 copies Passenger List.
2 copies Ship's Articles.
2 copies Stores List.
Manifests.
Bills of Lading.
Maritime Declaration to be completed by Master upon arrival, obtainable from boarding Quarantine officer, or via Agency.

ARRIVAL: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services.

Agent/Owners to advise Port Administration (Pilot Division) of vessels arrival 24 hours in advance.

PILOTAGE: Compulsory, consisting of Outer (River) and Harbour Pilot. Applications should be cabled to pilot vessel via Palembang Radio Station. Pilot vessel located at station position Lat. 02° 11′ 08″ S., Long. 104° 57′ 08″ E.

The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Vessels arriving in afternoon and unwilling to navigate the river in darkness should not hoist the pilot signal. The signal station is at the aforementioned pilot vessel, which answers the pilot signal as follows:
By night:

A flare-up light slightly over the railing, or waving with a white light means: Pilot will soon board the vessel. 1 red light vertical over a white light means: No Pilot available, vessel allowed to proceed until Pilot is met.
By day:

1. The international flag signal KYS from the International Code of Signal meaning: Pilot unable to attend due to motor defect or heavy seas. The Pilot can be picked up by ship's motor-boat.

2. The flag signal KKO meaning: No Pilot available, vessel allowed to proceed until Pilot is met.

Use of Harbour Pilot in Palembang is compulsory.

ANCHORAGE: *Musi Bar:* anchorage position Lat. 2° 08′ 30″ S., Long. 104° 58′ 30″ E., in depth of 9 fathoms, used for topping up ocean tankers from river craft.

RESTRICTIONS: Palembang is 54 miles upstream. The main entrance is the River Arun between Tg. Tjarat and Tg. Gedeh.
Depths from sea to Palembang/Musi River:

Sungai Lais	53 Dm. at mean level.
Kumbang Merah	49 Dm. at mean level.
Selat Djaran	49 Dm. at mean level.
South part of Pulau Ayam	54 Dm. at mean level.
Parit XII	54 Dm. at mean level.
South of St. Pandan	56 Dm. at mean level.
Tanjung Carat	50 Dm. at mean level.
South of Pulau Payung	56 Dm. at mean level.

Incoming ships have priority in passing the Outer Bar from 2 hours to 1 hour prior to HW. From 2 hours to 45 minutes prior to HW, outgoing ships have to wait between Tangjung Gedeh and Tandjung Tjarat.

Channel East of Pajung for incoming ships.

Channel West of Pajung for outgoing ships.

MAX. SIZE: Max. length 185 m. Max. draft 7.5 m.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port. The provisional Free Pratique is only valid for this port, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO: Palembang Coastal Radio Station. Call sign PKC.
Working Frequencies: 500/448 kHz, 8437 kHz, 2182/2690 kHz, 8,808.8 kHz.

VHF Channel 16, 20, 22, 26 and 28. Time operating (local time) 0700 – 1330, 1500 – 1730, 1900 – 2100 hrs.

VHF:

Harbour Master	Channel 14
Pilot	Channel 12
Tugboat Operations	Channel Not known
Port Operations	Channel 12 – 16
Safety/Security	Channel 09 – 12 – 16

TUGS: Vessels over 60 m. length are required to use at least 1 tug. 4 tugs available, 1,160 h.p. – 1,800 h.p. 2 fire-fighting tugs at Pertamina, 750 and 850 h.p.

BERTHING: Boom Baru: Concrete Wharf, length 630 m., depth alongside 7 m. at LWS.
Fertiliser Wharf:
PUSRI I : Length 125 m. Depth 6 m.
PUSRI II : Length 100 m. Depth 6 m.
PUSRI III & IV : Length 280 m. Depth 7 m.
Also see "Plaju".

CRANES: *Palembang:* (Mobile cranes). 1 at 7 tons capacity, 1 at 10 tons, 3 at 15 tons, 2 at 18 tons, 1 at 25 tons and 1 at 30 tons.

There are 19 fork-lift trucks available, capacity 2 tons – 15 tons.

Pusri: 2 mobile cranes, capacity 5 & 7.5 tons. 3 shore cranes, capacity 25, 40 and 100 tons.

MEDICAL: Hospital and First Aid available.

TANKERS: Pladju Terminal (Right Bank): Downstream of Harbour Board quay operated by P. N. Pertamina Unit II (Pladju) (ex-Shell). Also see "Plaju".

Sungai Gerong Terminal (Right Bank): Downstream of Harbour Board quay, operated by P. N. Pertamina Unit II Sungai Gerong (ex-Stanvac). Also see "Plaju".

STEVEDORES: According to the requirements of the vessel concerned, labourers are requested from the U.K.A. (Port Labour Pool).

The usual working hours at the harbour are:

Monday – Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1300 – 1600 hrs.
Saturday	0800 – 1200 hrs.
	1300 – 1400 hrs.

Overtime is allowed on request.

DENSITY: 1000.

FRESH WATER: Piped water supply is at 15/20 t.p.h., and through water barges is at 50/60 t.p.h. Water barge capacity 100 tons.
FUEL: Obtainable from Pertamina provided payment is arranged in advance through their Head Office in Jakarta. Delivery by pipe-line or barge.
REPAIRS: Facilities available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 100 grams of tobacco. There is no alcohol allowance.
REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.
AIRPORT: Talang Betutu Airport is approximately 12 km. from the port.
TIME: The Port is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 104° 46′ 36″ East Longitude.
POLICE/FIRE/AMBULANCE: Security – 22386, Fire 20451/22386, Ambulance 22531.
IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.). A re-entry into country if there is no S.I.C.
CUSTOMS/NAVY REG.: Upon vessels arrival/departure, boarding team will come on board consisting of:
- 2 Navy Officers.
- 2 Customs Officers.
- 2 Health Officers (in case vessels coming from infected ports or abroad).
- 2 Immigration Officers (in case vessels coming from abroad only).
- 3 Clerks from Agents.

Nobody allowed on board until this team declares the vessel cleared.
AUTHORITY: Port Administrator.

PANARUKAN: 07.42 S. 113.56 E.

DOCUMENTS:
- Port Clearance.
- 5 B/Model/Customs Clearances.
- Customs papers.
- Stores List.
- Crew List.
- Passenger List.
- Light Dues Certificate.
- Seaman's Book and Health Certificate.
- Ship's Registry.
- Load Line Certificate.
- Safety Radio Certificate.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: December 1978.
Location of SBM: Lat. 04° 13′ 05″ N., Long. 98° 24′ 30″ E.
General: Normally weather is fair with moderate variable winds. But fro November to March there are very often very strong Northeasterly win together with heavy rain showers and thunderstorms. There are 2 tid a day, following the coast-line. The current on flood tide sets fro N-buoy to S-buoy, the ebb tide sets from S-buoy to N-buoy. The dept around the SBM inside of these buoys are between 18 m. to 25 Vessels up to 100,000 d.w.t. are berthed at the SBM. The density approximately 1023.

For approaching B.A. Chart No. 1353 is used. The Operator of th Terminal is Pertamina, Pangkalan Susu.
Navigation: Agent in Pangkalan Susu is Pertaminaship. Cable addre is Pertaminaship Pangkalan Susu. ETA cables should be sent 72, and 24 hours prior to arrival. First ETA should include the requested carg

Pangkalan Susu Radio belongs to Pertamina. Call sign is "PKB 2 Frequency 6456.5 kHz, calling band 6 MHz. The working hours are fro 0700 to 1900 hrs.

VHF Channel for calling (Susu Radio) Channel 16, working Chann 12, 19, 20 and 24 for information. No Radio Pratique.

On arrival vessel has to anchor 2 miles East of SBM. At the anchora the Pilot boards with the Loading Master and 7 crew, after the vesse cleared by the Port Authorities. All stay on board to assist berthing a connecting cargo hose, and vessel has to supply food a accommodation. Regarding food – they are all very strict Moslem They will also stay until the loading operation is completed.

Pilotage is compulsory (Government Pilot). A vessel will berth o during daylight, but unmooring day and night. After which the vessel h to anchor to await cargo papers.

Vessel must arrive with sufficient clean ballast for berthing at the SB Pilot ladder only is required.

Berthing at the SBM is normal SBM procedure with messenger ro from the vessel to pick up 1 rope only from the SBM. Then 3 ship rope eyes going from the vessel to the SBM and then back to the ves again. During the vessel's stay at the SBM one tug is made fast w the ship's rope aft and the tug keeps the vessel clear of the SBM.
Tugs: Three tugs are used as follows:
- 1 tug 300 h.p. for floating hose.
- 1 tug 300 h.p. for line handling during mooring.
- 1 tug 1,700 h.p. for towing the vessel off the SBM and keeping h clear during the whole operation.

Steam turbine vessels have to run their turbine with 3–5 revs aste during their stay at the SBM and the tug aft.
Wharves/Buoys: SBM Pangkalan Susu is situated at Lat. 4° 13′ 05″ and Long. 98° 24′ 30″ E. and has a diameter of 15 m. and a heig 4.4 m. The buoy is an orange colour and has a red light with 3 lo flashes, also 1 floating hose with 12 in. diameter. The SBM is used export production of Katapa Crude and North Sumatra Crude. Fo buoys are situated around the SBM within 1,000 m. of the SBM. Th positions are as follows:

"N"–Buoy	Lat. 4° 13′ 38.5″ N.,	Long. 98° 24′ 30″ E.
"S"–Buoy	Lat. 4° 12′ 40.0″ N.,	Long. 98° 24′ 30″ E.
"E"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 25′ 30″ E.
"W"–Buoy	Lat. 4° 13′ 04.0″ N.,	Long. 98° 23′ 57″ E.

The depth of water is between 18 m. and 25 m. in this area.

Time: GMT plus 7 hours.
Repairs/Dockyards: No repairs possible.
Supplies/Service: Provision supply possible. But no bunkers, water, Deratting Certificate, no Consuls, crew change or medical treatment available.
Cargo Operations: Terminal Operator is Pertamina, Pangkalan Susu. Cargo information can be received on Channel 19. Other information on Channel 16 (Susu Radio) 19, 20 and 24. Loading rate 2,000 t.p.h., but can be reduced to 1,600 cu.m. when necessary for topping tanks. One × 12 in. cargo hose is connected from SBM to ship's manifold, for connections, ship's derrick is used on portside with minimum 5 tons load (SWL). Seven crew with Loading Master assist for connecting the hose.

API = 50.0   Temp. = 85°F

One hour and again half-hour before completion of loading the Loading Master is to be informed. He will then stand by for stopping the cargo. All papers are typed on board the vessel and vessel has to supply typewriters, two if possible, to reduce the waiting time. After completion of loading the vessel will anchor about 1 mile off the SBM to wait for the cargo papers to be completed (about 2 to 3 hours).
Rescue/Distress: No salvage or Coast Guard available.
Port Authority: The vessel has to anchor about 2 miles off the SBM and the Custom Officials, Immigration, Quarantine Officer and Agent will board the vessel at the anchorage, about 12 persons in all. The authorities also clear the vessel if she is also bound for Kuala Beukah. For clearance the following are requested:

12 Crew Lists; 2 Vaccination Lists; 3 Stores Lists; 3 Crew Effects Lists; 1 Health Declaration; 1 Ship's Health Book for Indonesian Ports only, if not on board it will be issued by the authorities.
Approaches: The approach is very easy. The coast line gives a very good picture on the radar for navigation. But it is very difficult to pick up the SBM on the radar due to many fishing boats and fishing houses. The fishing boats will also interfere with the approach, especially during the night, many of them are showing no lights, until the vessel is very close.

AUTHORITY: *Operator:* Pertamina, Pertamina P&T, Daeran Sungagut, Pangkalan Brandan, Indonesia. *Tel:* 373657. *Telex:* 51794 Perta PBO. *FAX:* (061) 322688.

PANGKALBALAM: 02.06 S. 106.08 E. (See Plan)

DOCUMENTS:
Health Documents:
Maritime Declaration of Health.
Derat Exemption Certificate.
Vaccination Certificates.
Crew and Passenger List.
Health Book.

(a) Port Health Measures: The Port Health Service is responsible for the protection of the port against the introduction or dissemination of quarantinable diseases. This responsibility is based on:
1. The National Quarantine Law.
2. The National Epidemiological Law.
3. International Health Regulations.

(b) Vaccination/Immunisation:
Vaccination and Immunisation against cholera can be carried out by the Port Health Service. Yellow Fever prevention is carried out by the Port Health Service and General Hospital.

(c) Extermination of rats is carried out by the Port Health Service at the expense of shipping Agent.

Ship's Certificates: The Ship's Certificate should be delivered to the Harbour Master through the Agent.

The certificates will be returned to the ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's Manifest should be delivered to the Port Administration through the Agent.

Ship's Arrival/Departure:

(a) Two days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs, and Security for preparation of services.

(b) Before departure Port Clearance is issued by the Harbour Master, after Clearance has been obtained from Customs, the Port Health Service and Immigration.

Immigration: Vessels carrying passengers arriving at Indonesian ports from abroad should have to show the "N" flag.

The Master is required to furnish the boarding Immigration Officer with a Passenger List showing the names of all on board and classified as:
(a) Disembarking passengers.
(b) Transhipment passengers.
(c) Through passengers (from abroad to ports outside of Indonesia).

PILOTAGE: Not available.
ANCHORAGE: Safe anchorage at green buoy, 10 m. Anchorage area: Lat. 02° 04′ S., Long. 106° 14′ 30″ E.
RESTRICTIONS: No anchoring at Eliot (red buoy).
MAX. SIZE: Length 140 m., breadth 30 m. Only vessels with draft of 8 ft. allowed to discharge alongside the quays.
RADIO: Coastal Radio Station Pangkalbalam Radio, call sign PKC5.
Time Schedule:

Frequencies		*Working Times*	
2182 kHz	A.1	0000–0100	GMT
2690 kHz		0300	GMT
2090 Rx		0600	GMT
2075 Rx		0000–0600	GMT
2085 Rx			
2100 Rx			
2638 Rx			
Channel 16 VHF.			

VHF: Channels 16, 15, 10, 20, and 22.
TUGS: 4 tugboats available, owned by P.N. Djakarta Lloyd, P.T. Samudera-Indonesia, and P.T. Pelni for communication between shore and ships. Capacity 150 h.p. – 350 h.p.
BERTHING: First Wharf: Length 60 m. Depth 1.65 m. at LWS.
Second Wharf: Length 60 m. Depth 1.65 m. at LWS.
CRANES: 2×10 tons (Port Authority), 4×10 tons and 1×4 tons (Private), All mobile cranes.

Port Authority has 2×2.5 ton fork lift trucks. 2×2.5 tons (Private) also available.
STEVEDORES: Ordered by Agent. Rates 15/20 t.p.h. per gang.
MEDICAL: First aid available at the scene of accident. Medical treatment or advice available regularly from the Port Health Service. Hospitalisation available at general and private hospital at Pangkalbalam.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
REPAIRS/DRY DOCKS: None.
CUSTOMS ALLOWANCES: *Customs Regulations:* Ports in Indonesia are divided into:

(a) Sea Ports, i.e. ports at which foreign vessels may call without a "Flag Dispensation" from the Ministry of Communications (Directorate General of Sea Communications) and the Ministry of Finance. (Concerning the import and export of goods).

(b) Coastal Ports at which only vessels flying the Indonesian flag may call according to the Regulations.

The Port of Pangkalbalam is a Sea and Coastal Port. Vessels unloading and loading cargoes have to get a Customs Permit. The Cargo Manifest, the Ship's Stores List and the List of Crew's Belongings have to be delivered to Customs within 48 hours.
Tobacco Allowance: Each crew member is allowed to carry 200 cigarettes or 100 grams of tobacco ashore without paying import duty.
Alcohol Allowance: There is no allowance for alcoholic drinks.
Other Commodities: Maximum value of U.S.$100.

Each crew member is allowed to bring in goods for personal use up to maximum value of U.S.$100.
REPATRIATION: A valid document is needed, entry permit from the country concerned is sufficient, if there is no passport available.
AIRPORT: Pangkalpinang 14 km. Regular flights to Jakarta and Palembang every day.
HOLIDAYS: On Moslem holidays, no cargo work.
POLICE/AMBULANCE/FIRE: Police 386 LB; Ambulance 444 OTM; Fire 326 LB.
SHORE LEAVE: After permission by Chief of Immigration.
IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.)
REGULATION: Every ship on arrival must be passed by; Customs, Harbour Master, Maritime Police, Health service and Immigration Chief.
DELAYS: Due shortage of lighter space.
AUTHORITY: Pangkalbalam Port Administration, Jl. Yos Soedarso, Pangkalpinang, Indonesia. *Tel:* 21736, 21737. *Contact:* Mr. Soenaryo, Port Administrator.

PANJANG (Lampung), Including Tarahan: 05.28 S. 105.19 E. (See Plan)

PORT LIMITS: The Southern limit of the port is along the parallel 5° 34′ S.
DOCUMENTS:
Quarantine:

Vessels arriving from abroad have to hoist "Q" flag on arrival until boarded and released by Quarantine Officer.

Documents which have to be prepared:
Declaration of Health.
Derat (Exemption) Certificate.
Valid International Vaccination Certificates.
Crew and Passenger Lists showing the validity dates of above certificates.

Immigration:
Immigration, Crew and Passenger Lists.
Crew/Passengers to be cleared.

Customs:
General Declaration of Cargoes Aboard Ship.
(Copies of each Manifest).
Crew/Passenger Lists and Personal Effects Lists.
Ship's Stores List.
Clearance from Last Port.

Harbour Master: After having filled Harbour Report (handed to Harbour Master's Office or Boarding Agent), ships have to prepare the following documents to be kept in custody of Harbour Master during ship's stay in port.

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate(Passenger Ship).
Safety Equipment Certificate (Cargo Ship).
Safety Radio Telegraph/Telephony Certificate, and Ship's Radio-Station Certificate of Approval.
Declaration of Health.
Last Port's Clearance.
Subscription of Light and Harbour Dues and wharfage.
Crew/Passenger List.

PILOTAGE: Compulsory for vessels of 70 g.r.t. and over. Pilots are in Government Service. Pilot signals according the International Code of Signals. Boarding area is on the outer (West) side of a line of reefs, which extends from South to North on the West of the harbour basin. Pilot (7) can be ordered from the Port Administration via ship's Agents not less that 8 hours prior to berthing, and 4 hours prior to unberthing and shifting.

Pilotage information can be obtained from the Pilot Radio Station, Panjang Pilot/Panjang Radio/PKC9. VHF Channels 12 and 14, opened daily from 0030-1200 GMT. Pilotage available throughout 24 hours.

APPROACHES: *Navigational Report:* Approaching Panjang there are numerous small fishermen's houses built on bamboo sticks at sea, some without lights. Therefore approaching or sailing from Panjang at night time should not be attempted.

ANCHORAGE: Panjang Roads; outer (West) side of the reef about 2 miles from the breakwater in depth of 15 m..

MAX. SIZE: Max. draft 9.5 m.

HEALTH: During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

Also see "Documents".

RADIO/VHF:

(a) Coastal Radio Station, Panjang Radio, call sign PKC4.
Frequencies: 6523, 430 and 450 kHz.
(b) Pilot Radio Station/Panjang Radio/PKC9, working hours:
Channel 12 and 14: 0030 – 1200 GMT.

Vessels are requested to report correct ETA to Pilot Radio Station 2 or 3 hours before arrival and inform the ship's particulars as follows:

Name and Nationality of the vessel.
LOA, g.r.t., draft.
Last Port and Next Port of Call.

TUGS: It is compulsory for ships with a length of 70 m. and over to use tugboats in berthing and unberthing operation.

The port owns 3 tugboats of 300 h.p. – 840 h.p.; 4 other diesel tugboats from 100 h.p. to 230 h.p. owned by the PJKA (2) and the PT. Djakarta Lloyd (2).

BERTHING:

Quay A on the South side, length 172 m., depth 8.5 m. LW.
Quay B on the East side, length 212 m., depth 5.5 m. LW.
Quay C on the West side, length 138 m., depth 3 m. LW.
Quay D on the North side, length 400 m., depth 9.4 m. LW.
Oil Jetty on the South side of Quay C, length 20 m., depth 5.5 m. LW.
Oil dolphin of Pertamina in the outer basin, South side of the reefs, depth 6.0 m.

Ocean vessels can also be berthed at 3 buoys in the inner basin (harbour).

Tarahan: Terminal is one mile to the South of Panjang, operated by P.T. Tambang Batubara Bukit Asam. Berth length 170 m., depth 12.0 m., distance between dolphins 240 m. Max. size: 40,000 d.w.t. Max. LOA 179 m., max. beam 27 m., max. draft 8.0 m. Loading rate (coal) 5,000 t.p.h.

LIGHTERAGE: 16 lighters available, capacity between 70 and 170 tons, owned by Port Administration and Shipping Agents, can be hired for loading vessels at anchor or buoys.

STEVEDORES: There are 1,300 registered labourers; working hours 0800 – 1200 and 1300 – 1600 local time. Overtime possible after being granted by the authorities concerned; 24 hours per day working time recommended.

Gang's average capacity 20 t.p.h. for bulk cargo and 15 t.p.h. for general cargo.

Mobile cranes 3.5 tons – 15 tons and fork lifts 2 tons – 15 tons capacity available.

MEDICAL: Medical attention can be arranged through the Agents. There is a port doctor. The general hospital is in Tanjungkarang, about 13 km. away, where sick crew members may be hospitalized.

TANKERS: See "Berthing".

FRESH WATER: Supply is handled by the Port Administration to the wharves through pipe-lines. All berths fitted with fresh water connections (6 hydrants). Capacity is normally about 72 t.p.h. No water barge available.

FUEL: Bunkering not available.

FIRE PRECAUTIONS: The Port Administration handles 1 fire-fighting truck and 1 fire trailer.

Smoking strictly prohibited in warehouses, inside the Pertamina yard, on oil-jetty, and on board tankers. During the time a tanker is discharging, fire extinguishers must stand ready on the pier.

CONSULS: No local representation.

REPAIRS: Minor repairs can be carried out.

DRY DOCKS: None available.

SURVEYORS: No Classification Society is represented at the port.

GANGWAY/DECK WATCHMEN: None available.

OPENING/CLOSING HATCHES: Opening and closing of ship's hatches is normally carried out by stevedores.

CUSTOMS: It is strictly prohibited to take undeclared foreign curren ashore. It is recommended that Masters consult the Agent about local prevailing Customs Regulations with regard to currency, cigarette spirits, etc., to prevent unnecessary difficulties and eventually fines.

CARGO GEAR: Loading and discharging effected by ship's ge 6 mobile cranes, between 3.5 tons and 15 tons, are available from Port Administration, as well as 17 forklifts (between 2 and 15 tons) own by Port Administration and shipping Agents.

AIRPORT: Branti Airport situated about 34 km. from Panjang. Regu (domestic) flights, Tanjungkarang–Jakarta v.v. 4 times daily.

TIME: GMT plus 7 hours.

HOLIDAYS: Fixed dates are: New Year (1st January); Independen Day (17th August) and Christmas Day (25th December). Other holiday Idhul Adha, First of Muharram, Maulid of the Prophet Mohamma Good Friday, Christ's Ascension, Mi'radj of the Prophet Mohammad a Idhul Fitri (2 days).

POLICE/FIRE: Port security is maintained by the state police; tel: 31.2 (Harbour Police). Fire Brigade, tel: 31113 or 52.741.

TELEPHONES: No arrangement exists for placing telephone on boa

SERVICES: Radar and radio repairs possible.

SHORE LEAVE: Crew members are allowed ashore. See "Shipmaste Report".

IDENTIFICATION CARDS: Shore passes needed, obtained via Agen

DELAYS: Normal expected delays due to shortage of berthing facili and rainy weather.

GENERAL: The port's status is general exports (rubber, coffee, pepp timber, cattle fodder, corn, etc.)

Charts and nautical publications concerning this port are issued the Indonesian Naval Hydrographic Office (HIDRAL).

All Government offices in the port (Except Customs) keep work hours as follows: Monday to Thursday 0730 – 1430, Friday 0730 – 11 Saturday 0730 – 1330 (Customs 0700 – 1600).

Ferry Network: Panjang – Merak (West Java) twice a day 2300 hrs. a 1100 hrs. (Government railway ferry). 6 hour voyage.

Panjang – Jakarta: On Monday, Wednesday and Saturday 1300 h by Government Boeing Jetfoil (3 hours voyage).

Srengsem (2 miles South of Panjang) – Merak: twice daily Ro ferry, 4 hours voyage.

Bakauheni (100 km. S.E. from Panjang) – Merak: Ro/Ro ferry ea hour, 1.5 hours voyage. Panjang – Bakauheni 1.5 hours by car.

DEVELOPMENTS: Construction works for the extension of Quay D w another 200 m. pre-stressed concrete wharf are under way; includ transit shed (3,000 sq.m.) directly behind new wharf.

Container – yard (25,000 sq.m.) behind new wharf.

Dredging under way.

SHIPMASTER'S REPORT: November 1987.

Anchorage: Due to numerous fishermens' houses on bamboo sticks designated anchorage area, vessels can anchor at distance of ab 0.5 miles to 1.0 miles West of reef that closes the port or South designated anchorage area and more to the East of bay where fishermens' houses observed.

Berthing: There are 2 berths on North side with depths of 9.4 m. a 10 m. Length of pier is about 450 m.

Gangway/Deck Watchman: Available through agent and stron recommended due to the fact that many "stevedores" try to come board for the purpose of stealing. Shore watchmen can distinguish genuine stevedores.

Customs: Vessels are required to declare foreign currency. Bond store is not sealed.

Stowaways: Vessel should be checked for stowaways.

Shore Leave: Extreme caution should be taken when going ashore there are numerous attacks on crews, some resulting in killing of cr members. Stevedores/agents advise crew not to go ashore at night.

AUTHORITY: Port Perum Branch Panjang, Directorate General of S Communication, Communication Dept. (Lampung – Indonesi Jl. Sumatera Pelabuhan Panjang, Lampung, Indonesia.

POLENG: 06.39 S. 112.55 E.

SHIPMASTER'S REPORT: April 1978.

LOCATION: The Poleng Terminal consists of the tanker "Lynda" moored stern first to an SBS. The "Lynda" is a tanker of some 72,000 d.w.t. The position of the "Lynda" is 06° 38′ 42″ S., 112° 55′ 23″ E.
PILOTAGE: Performed by the Master of the "Lynda".
ANCHORAGE: The anchorage position is anywhere North and West of the "Lynda" distance 1 mile. The depth of water is 26 fathoms and 9 shackles of cable is recommended.
RESTRICTIONS: The "Lynda" is moored in 180 ft. of water and there is no restriction regarding the draft or the size of ship that she can accommodate alongside.
RADIO: The Post and Telecommunications Department do not permit the use of the WT/RT on the "Lynda" so all ETA's are sent via Pertaminaship Jakarta.

Once the "Lynda" receives the ETA they then organise the 'opening of the Port' and the officials to clear the ship are ordered from Surabaja. The usual documents are required and 2 Agents come out with the officials.
VHF: The "Lynda" keeps watch on Channel 6 and only monitors Channel 16 when a vessel is expected.
BERTHING: The "Lynda" has 4 "Yokohama" type fenders on her port side for berthing. Six ropes are required at each end. Berthing is port side alongside.

The "Lynda" is loaded direct from the well and the API is 55 with a loading temperature of 84°. Normally, the API is 47-42. The pumping capability of the "Lynda" is 2,000 t.p.h. although we were only able to get 1,557 t.p.h. The cargo is loaded through 1×12 in. hose.

Prior to loading the tanks on the "Lynda" are ullaged in the presence of the Customs and the cargo calculated. This is repeated at the end of the load for the Bill of Lading figures. Clearance is granted from Poleng and all documents are signed prior to sailing. There being no early departure available.

At present they are receiving 1 ship about every 2 months, mainly topping-off operations and it is thought that the vessel may be moved to another position.
FRESH WATER: Not available.
FUEL: Not available.
STORES: Not available.
GENERAL: No Walport film exchange. All shore personnel are accommodated aboard the "Lynda". Some vessels have parted their mooring lines during the Winter months with winds of 25 knots and 8 ft. – 18 ft. seas running.

POMALAA (Tanjung Lepee): 04.14 S. 121.32 E.

(See Plan)

LOCATION: Port of Pomalaa, Kolaka, is situated in the Gulf of Bone, S.E. Sulawesi in position Lat. 04° 10′ 30″ S., Long. 121° 36′ 00″ E.
LOADING POSITIONS:
Berth: Lat. 04° 10′ 30″ S., Long. 121° 35′ 56″ E.
Anchorage position for ore loading at Pomalaa: Vessels of 15,000 d.w.t. and over, Lat. 04° 10′ 00″ S., Long. 121° 35′ 24″ E. Vessels up to 15,000 d.w.t., Lat. 04° 10′ 06″ S., Long. 121° 35′ 30″ E.
Anchorage position for ore loading at Tanjung Lepee: Lat. 04° 13′ 38″ S., Long. 121° 32′ 31″ E.
FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessels numbers; Quarantine & Immigration Flag.
DOCUMENTS: To be produced upon vessel's arrival:

14 Crew Lists
4 Passenger Lists
5 Parcel Lists
5 Stores Lists
8 Cargo Manifests
3 Narcotics Lists
3 General Information
5 Personal Effects Lists
3 Vaccination Lists
5 Arms and Ammunition Lists
International Load Line Certificate
Maritime Declaration of Health Certificate
Health Book or Bill of Health
Derat Certificate
Last Port Clearance
Safety Radio Certificate
Harbour Report.

Inspection Team: This team consists of the Port Health Officer, Custo Officer, Harbour Master and Immigration Officer.

After the vessel is granted Free Pratique, the Immigration Offi checks Passports, Seaman's Books and Crew List and issues sh passes.
PILOTAGE: Pilotage is not compulsory and there is no Pilot at Pomala Because Pomalaa waters are still declared as uncleared waters, i advisable that vessels calling for the first time at Pomalaa, use a Pi

Pilot can be ordered from Ujung Pandang via Nikel Ujung Panda not less than 72 hours before vessel's arrival at pilot station.

There are 2 pilot stations: (1) For Pomalaa loading point and ber Lat. 04° 04′ 03″ S., Long. 121° 28′ 00″ E. (2) For Tanjung Lepee load point, Lat. 04° 15′ 00″ S., Long. 121° 29′ 00″ E.

If vessel wishes to be piloted to the loading/unloading point on arri day, vessel has to arrive at pilot station before 1200 hrs. local time Pomalaa loading point and berth and before 1400 hrs. local time Tanjung Lepee loading point.
RESTRICTIONS: *Arriving/Departing Hours:* Arrival: from 0600 – 1800 h local time. Departure: 1. Pomalaa loading point and berth: from 060 1600 hrs. local time. 2. Tanjung Lepee loading point: from 060 1800 hrs. local time.
Mooring: The undermentioned vessels can be moored alongside ber General cargo vessels of max. LOA 135 m. and tankers of max. LO 110 m.
Depths: Bar channel 11.00 m. (LWS); Alongside berth, North P 5.00 m. (LWS); South Pier, 7.00 m. (LWS). At Pomalaa anchorage loading point: for vessels of 15,000 d.w.t. and over – 13.00 m. (LW for vessels up to 15,000 d.w.t. – 11.00 m. (LWS). At Tanjung Lep anchorage or loading point – 24.00 m. (LWS).
MAX. SIZE: *General Cargo:* At North Pier: LOA not to exceed 135 and fully loaded draft not more than 5.00 m. At South Pier: LOA no exceed 135 m. and fully loaded draft not more than 7.00 m.
Tankers: LOA not to exceed 110 m. and fully loaded draft not more th 7.00 m.
Ore Carriers: Fully loaded draft not to exceed 11.00 m. Vessels with cranes or derricks are not acceptable. Minimum capacity of cranes derricks must be 5 tons.
General Cargo at Anchorage: Fully loaded draft not to exceed 11.00
RADIO: Cables to Nikel Ujungpandang can be sent throu Ujungpandang (Macassar) Coastal Radio Station, call sign PKF.
Arrival Notice: Information required.

Owner's advice: Owner to advise by cable to Adhiguna, Ane Tambang Jakarta and Nikel Ujungpandang at least 8 working da before vessel's arrival at loading port.

Master's advice: At least 48 hours (or 72 hours if Pilot's assistan required) before vessel's arrival in Pomalaa waters, Master shall g the following information to Adhiguna and Aneka Tambang Jakarta a Nikel Ujungpandang. Last port of call, draft on arrival, estimated d on departure, quantity of nickel ore or ferro-nickel ingots to be loade stowage plan (hatch division for the respective cargo), quantity and k of commodity(ies) to be discharged and other necessary messag Final amended arrival time must be sent at the latest 24 hours bef arrival.

Previous experience showed that one cannot rely on telegra regarding ETA sent by Agents at last port of call in due time, theref Nikel Ujungpandang waits for the Master's telegram in order to ma necessary preparation.

Shipper/Agent's advice: Shipper/Agents shall cable the Mas 3 working days before vessel's arrival indicating the loading/unload position prepared and other necessary messages.
Ship's radio transmitter is not to be used while lying in port.
VHF: Communication by marine VHF possible with the port.
TUGS: Available.
BERTHING: The wharf consists of a concrete quay extending 70 seaward and 18 m. breadth.
Priority: Ore carriers. First come first served. Other vessels: Priority be given to tankers.
Loading/Unloading Facilities for General Cargoes:

Shore facilities: A number of mobile cranes with capacities of 5 to and 20 tons are available, also forklifts.

Lighters: A number of lighters of 70 d.w.t. up to 120 d.w.t. are availab

Loading/Unloading capacity: About 12 tons per gang per working ho depending on the type of vessel, available cargo spaces, vessel's ca gear, kind of cargoes, size of hatches, etc.
Unloading Facilities for Tankers:

Pipe-lines: 1 line of 10 in.×1,600 m. for M.F.O.
1 line of 8 in.×1,600 m. for I.D.O.

Pumps: 3 booster pumps with capacity of 150 cu.m./h. each.

Hoses: 4 pieces flexible hoses of 10 in.×9.40 m. with ASA 150 flang connections.

Unloading capacity: maximum 200 t.p.h. by ship or shore pumps

Tank farm capacity: 2×5,000 KL for M.F.O.
1×1,500 KL for I.D.O.

Tank cleaning: Tank cleaning operation is not allowed in Pomal waters.

Lay-time: Lay time shall commence 6 hours after N.O.R. tendere
Loading Facilities for Ore Carriers:

General: Loading of nickel ore at Pomalaa and Tanjung Lepee loa point is done by means of barges.

Number of gangs: Usually 4 gangs are used by vessels equipped cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading capacity: About 2,000 tons/24 hours per vessel, depen on the type of vessel, vessel's cargo gear, weather conditions, etc

Unloading: Cargo for Aneka Tambang only.
Vessels without cranes or derricks are not acceptable.

Labourers will be supplied by shipper. Making the vessel read loading/unloading to be done by vessel's crew members.
CRANES: Mobile cranes with capacity 5 tons – 40 tons.

Forklifts also available.

FRESH WATER: None. In an emergency water can be supplied in limited quantity (max. 200 tonnes). This supply is intended for special ship which can berth alongside the jetties.
FUEL: Not available.
CONSULS: None.
STEVEDORES: Stevedoring is performed by P.T. Aneka Tambang's personnel. Loading/unloading equipment to be furnished by the vessel.
Working Hours: Loading to be effected on weather working days of 24 consecutive hours Sunday and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Buddhist New Year; Hindu New Year; Independence Day (August 17th); Christmas Day (December 25th). Idul Adha, Maulid Day, Easter, and Lebaran determined by Moslem calendar and differ from year to year by international calendar. For definite dates consult Port Administrator.

Despatch/demurrage money to be paid in accordance with the related contract.

Loading/unloading to be effected with customary quick despatch (C.Q.D.) on good weather working days whereby Sundays, holidays, governmental local holidays and Saturdays between noon and midnight and Mondays between 0000 hrs. and 0800 hrs. are always excepted.

At Shipmaster's request, work on these excepted days can be arranged. The principals will pay the overtime charge on these excepted days.
MEDICAL: Doctor, hospital and inoculation services available.
TANKERS: See "Berthing".
CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves port.
Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.
REPATRIATION: Can be arranged. Repatriant is to be guarded by Immigration Officer from Pomalaa to Jakarta via Ujung Pandang until his departure from Jakarta to the destined country.
AIRPORT: There is one flight a week between Ujung Pandang and Pomalaa, served by Merpati Nusantara Airlines (MNA) using Cassa or Oisi Planes. Flying time about 60 minutes.
TIME: GMT plus 8 hours.
SHORE LEAVE:
Shore Pass: Shore pass must be carried by crew whilst ashore.
Visitors: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.
Visiting Kolaka: Crew members are prohibited to leave Pomalaa for Kolaka, except Master and Officers, who must be guided by Agents. Local leave in Pomalaa concession is permitted.
Shore Leave Hours: From 0600 hrs. to 2300 hrs. local time.
GENERAL:
Cash Advances: Cash advance at Master's request can be supplied by Agents in a reasonable amount.
Fumigation: No facilities.
Survey On/Off Hire: Can be arranged.
Ship's Chandler: None. In emergency cases, for a limited quantity Agents can act as ship's chandler.
Chart: Indonesian Sea Chart No. 152.
Nature of Bottom: Sand and soft materials.
M.P.S. Tax: So called M.P.S. Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of M.P.S. Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remits advance payment for disbursements. The final calculation of the M.P.S. Tax will be made later.
Disbursements: At least 14 days before vessel's arrival at Pomalaa, vessel's principal have to remit U.S.$4,000 to the account of General Agents, at Jakarta as advance payment of the related ship's disbursement.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the General Agents.
AGENCY:
General Agent for Ore Carriers: PT Pelayaran Bahtera Adhiguna. 10-12 Jalan Kalibesar Timur, P.O.Box 1313, Jakarta, Indonesia. Tel 276547. Cable Address: Adiguna Jakarta, Telex: Adiguna Jkt 42854.
General Agent for Non-Ore Carriers: To be nominated by principals.
Sub-Agents: PT Aneka Tambang, Unit Pertambangan Nikel, Pomalaa. Jalan Dr. Sam Ratulangi 60, P.O.Box 213, Ujung Pandang, Indonesia. Cable address: Nikel Ujungpandang. Tel: 22237 – 22234.
Sub-Agent's Head Office: PT Aneka Tambang 24-26 Jalan Bungur Besar, Jakarta, Indonesia. Tel: 410108, Telex: Antam Jkt 49147. P.O.Box 2513, Jakarta.
AUTHORITY: Port Authority of Pomalaa, Pomalaa, Sulawesi Tenggara, Indonesia. *Contact:* Harbour Master.

PONTIANAK: 00.01 S. 109.19 E.

SHIPMASTER'S REPORT: March 1986.

PILOTAGE: Compulsory. Pilot boards at Muara Kubu.
ANCHORAGE: Ocean-going ships anchor S.W. of safe water buoy clear of prohibited area. Soundings have been reduced by up to 1.5 fathoms from those charted.
MAX. SIZE: Max. LOA 110 m., max. draft 5.0 m.
DOCUMENTS: Inspection team of 2 Immigration Officers and Agent board at anchorage. This was the second Indonesian port of call.

Standard Indonesian Arrival Forms required, soon after arrival at anchorage.
15 copies Crew Lists (8 signed/dated for arrival – 7 signed/undated for departure).
2 copies Vaccination Lists.
Indonesian Health Book.
5 copies Personal Effects Declaration.
2 copies Bonded Stores Lists.
5 copies Deck, Engine, Provisions Lists.
5 copies Ship's Dutiable Goods.
5 copies Narcotics List.
5 copies Ports of Call List.
5 copies Parcel List (even if "nil").
5 copies Arms and Ammunition List (even if "nil").
5 copies Animals List (even if "nil").
5 copies Currency List (even if "nil").
5 copies Passenger List (even if "nil").
5 copies Import Manifest (even if "nil").
5 copies Transit Manifest (even if "nil").
RADIO: Call sign PKS. Frequencies 500 and 6355 kHz.
VHF: Pilot station on VHF Channels 12, 14 and 16.
LOADING: Vessel loaded plywood crates of standard 8 ft. × 4 ft. sheets, averaging 1.070 kg. to 1.146 kg. Freight volume 1.8 cu.m., gross volume 2.02 cu.m., stowage 3.06 cu.m. centre holds. Vessel worked mostly one hook from a single barge alongside, 50-80 crates per hour. Using 1 forklift truck to stow 6 tiers, then laid steel plates and loaded up to 6 further tiers.

A large barge of 1,200 crates capacity, required 6.5 days to return to factory for a further load. Single tarpaulins on barges leave damp patches after heavy rain. Stevedores lived onboard. 19 miles by launch to city, about 3 hours and $115.00 per trip. Speedboat for 2/3 people about 30 minutes each way and about U.S.$136 per trip.
FRESH WATER: Available in limited quantities.
FUEL: Not available.

PULAU SAMBU: 01.09 N. 103.54 E.

LOCATION: Wharf No. 1 is located in position Lat. 01° 09′ 35″ N., Long. 103° 53′ 41″ E. There are 2 additional wharves and 2 jetties nearby.
DOCUMENTS: Upon arrival ships have to fill in the following forms:
Harbour Report (obtainable from the boarding Pilot).
Pilot Certificate.
Also required from the Masters are:
6 copies of Crew List.
1 copy Stores List.
1 copy Personal Effects List.
PILOTAGE: Pilots are in Government Service. Pilot signals according to the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agent. Pilot boards in position Lat. 1° 10′ 44″ N., Long. 103° 52′ 19″ E. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.
RESTRICTIONS: Daylight berthing and unberthing only.
MAX. SIZE:

Berth	*Max. d.w.t.* (tons)	*Max. LOA* (m.)
Wharf No. 1	60,000	225
Wharf No. 2	2×400	2×56

"BW"	Lat. 02° 16′ 40″ S. Long. 104° 13′ 10″ E.	16.5	Bad weather

LOADING: Crude oil (API 38) is loaded at the jetty at a rate of 1,000 t.p.h. through 2×8 in. loading arms.

Storage capacity of crude oil 100,000 bbls.
MEDICAL: Clinic available.
DENSITY: 1000 – 1010.
FRESH WATER: Available at the jetty.
FUEL: Available at the jetty.
CONSULS: None.
AIRPORT: Sultan M. Badaruddin II Airport at Palembang.
TIME: GMT plus 7 hours.
AUTHORITY: *Operator:* Asamera Oil, Muggala Wanakbhakti Building, Block 4, 7th & 8th Floor, Jl. Jend. Gatot Subroto, P.O.Box 2858, Jakarta, Indonesia. *Tel:* 583641 (10 lines), 583511 (6 lines). *Telex:* 45697 Asamera-Ia, 47115 Asamera-Ia.

Asamera (South Sumatra) Ltd., Jl. Jend. Basuki Rachmat 1496, P.O.Box 76, Palembang, Indonesia. *Tel:* 24059, 24850. *Telex:* 27418 Asamera-Plb.

SABANG: 05.50 N. 95.20 E. (See Pla

DOCUMENTS: Upon arrival vessels have to produce the followin Certificates and Documents, which will remain in the Harbour Maste custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Health Book or Bill Health and vaccination certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists with vaccination dates.
Ship's Articles.
Stores List.

Passport or Seaman's Card remain in Immigration Office until clea and the crew to use shore pass to go on shore, issued by t Immigration.
PILOTAGE: *Approach:*

Vessel should steer on the light of Klah Island and keep at least 1 mi offshore, especially of Ujung Masam owing to an inward drift, until t bay is well open. When entering the bay, the light-buoy South of Uju Lho Me should be kept on port side.

The Signal Station at Peunimpun reports day and night the arrival ships, by night an unofficial white light, showing all around is show visible at a distance of 12 miles.

Signals by day with flags according the International Code of Signa and by night by signal lamp.
ANCHORAGE: Lat. 05° 53′ N., Long. 95° 32′ E.
HEALTH: Vessels arriving from abroad direct have to apply wel advance to the Department of Health (Quarantine Section) for provisional Free Pratique, as said Pratique has to be cabled to the P The provisional Free Pratique is only valid for this Port, the next por call must be a First Class Port as no further provisional Free Prati will be issued, unless the vessel sails directly abroad.
RADIO: Sabang Radio. Call sign: PKA. Frequency: 500 kHz/438 k Time: 0100–0200, 0400–0500, 0900–1000 GMT. 8473 kHz/8686 k Time: 0200–0230, 1000–1030 GMT. 17184.5 kHz Time: 0230–03 1030–1100 GMT. VHF – Available. Power – 1 kW.
TUGS: A small tug available for mooring assistance, subject adva notice.
FRESH WATER: Available, rate 30 t.p.h. with one hose. Usual to u 3 hoses. Water can be pumped faster if additional water pump use
FUEL: Not available.

BERTHING: The usual anchorage in the inner roads is the North side of the bay, vessels can approach shore until in 32 m. and 29 m. depth. There is good holding ground. During S.W. or S.S.W. squalls in the West monsoon vessels have to be kept free from the quays by means of the mooring buoys moored off the berths.

Western Coal Wharf: Usable berth length 140 m. with depths alongside of 7 m. at LWS.

Eastern Coal Wharf: Usable berth length 150 m. Depths 6.8 m. at LWS.

Commercial Wharf: Usable berth length 150 m. Depths 8.0 m. at LWS (length: 220).

At the head of the oil jetty there is a depth of 10 m. at LWS.

REPAIRS: Minor repairs can be carried out at the West end of the Coal Wharf at the repair shop and electrical power station.

CUSTOMS ALLOWANCES: It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: One domestic flight a day, 15 minutes drive from the Harbour.

AUTHORITY: Department of Sea Communication.

SALAWATI: 01.21 S. 130.59 E. (See Plan)

OPERATORS: Pertamina.

LOCATION: Salawati Marine Terminal is located in the Sele Straits between the Island of Salawati and mainland Irian Jaya, Indonesia.

Salawati Marine Terminal Office is located on board the storage barge "Wampum" adjacent to the export tanker mooring.

Mooring system is positioned in Latitude 1° 21′ 18″ S. and Longitude 130° 58′ 39″ E. The minimum water depth in the area of the mooring system is 51 ft.

FLAGS: In accordance with practice in Indonesian Ports, Quarantine, Immigration, Pilot and call sign flags must be displayed by all vessels approaching the anchorage. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

Sunrise to sunset:	Quarantine Flag "Q"
Sunset to sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

DOCUMENTS: The boarding team, e.g. Agent, Customs, Immigration, Port Health Officers, Harbour Master will board the vessel in the anchorage area to grant clearance.

The Customs Officer will board the vessel to seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo on board the vessel and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B Form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Salawati is granted.

The Harbour Master submits a Harbour Report Form for the Master to complete. The Agent prepares the Ship's Documents Check List Form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Cargo Gear Certificate and Derat/Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance on departure provided clearance is also granted by the other governmental authorities (A Panamanian port clearance for Panamanian flag vessels is not required at Salawati).

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the crew list.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Prior to the vessel's departure the Immigration Official requires 2 copies of the Crew List to be marked for departure immigration clearance. The Master is given a signed copy by the Immigration official of the Crew List for departure.

Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal. When the tanker has been loaded, the documents shall be completed and signed by the Master. Final clearance formalities will be carried out aboard the vessel in the anchorage area.

Customs will issue the 5–B form which is for departure clearance of the vessel.

The Master should be prepared to issue:

15 copies of Crew List.
4 copies of Cargo Manifest.
4 copies of Personal Effects.
4 copies of Bonded Store List.
4 copies of Stores List.
4 copies Narcotics List.
2 copies of Vaccination List.

Before leaving the terminal area, the Master should advise the terminal the Vessel's ETA at destination.

PILOTAGE: The Salawati Terminal Pilot will board the vessel in the anchorage area for passage to the Salawati Terminal. The channel is marked with numerous Navigational Aids to permit safe passage through the Sele Strait. Vessels arriving in the anchorage area after 1400 hrs. local time (GMT + 9 hours) will be berthed at the terminal at Pilot's discretion.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use, and long enough to reach the mooring launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Mooring Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for the Mooring Master both when boarding and leaving.

ANCHORAGE: If requested to anchor, the recommended anchorage area is 4.5 miles West of Sorong in position Latitude 00° 53′ 00″ S. and Longitude 131° 10′ 00″ E. Under no circumstances should the export tanker enter the restricted area around the structures without the Mooring Master aboard.

RESTRICTIONS: The approach channel has a minimum depth of 49 ft. A minimum under keel clearance of 6 ft, is required, restricting the maximum loaded draft of an export tanker to 43 ft.

Strength of Tide: Up to 4.5 knots.

MAX. SIZE: Salawati Marine Terminal can accept vessels up to 60,000 d.w.t. Under certain weather conditions, vessels up to 100,000 d.w.t., light loaded to the equivalent of a 60,000 d.w.t. vessel may be accepted. Such acceptance is at the discretion of the Area Superintendent or his designated alternate.

The Ship's Master must not permit his vessel to be loaded to a depth of more than 43 ft. deepest draft due to the restrictions of water depth in Sele Strait unless permitted to do so by The Company Area Superintendent or his designated alternate.

HEALTH: Each tanker entering the Port of Salawati must have requested and been granted entry permit/agency permit prior to its arrival. At the same time application is made for provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities. Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If provisional pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card.

RADIO: It is most important that incoming tankers contact Salawati Marine Terminal 72 hours before the estimated time of arrival. Further cables should be sent to the terminal 48 hours and 24 hours in advance of arrival, or when ETA changes by more than 3 hours. Communications with Salawati Marine Terminal can be established using one of the following links.

Master should request Pertamina Sorong Radio to relay the necessary information to Salawati Marine Terminal.

Details of Arrival Cable:

The following information should be included in the cable sent to Salawati Marine Terminal 72 hours in advance of arrival.

1. Name of vessel and radio call sign.
2. ETA in GMT and date (Local time is GMT + 9 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Arrival draft.
7. If there is any sickness aboard give whatever information is available as to the possible type of sickness, or confirm that vessel has clean bill of health.
8. Last Port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could effect loading or cause pollution.
10. Flange dimension of vessel's manifold connection.

Entry Permit or Agency Permit:

Each tanker entering Salawati Marine Terminal must have requested and been granted entry permit prior to its arrival. It is vital that the General Agent receives the following information two weeks before vessel's arrival to obtain agency permit for foreign vessel from the Government/ Directorate General of Sea Communication:

1. Name of owners/principals and full address.
2. Name of vessel.
3. d.w.t./Call Sign/Flag.
4. Name of Master/Number of Crew.
5. Last Port of Call.
6. ETA.
7. Destination after loading.
8. Indonesian Ports of Call.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area. Unauthorised radio communication will be cause for cessation of all operations, except clearing of the berth, and vessel's notice of readiness will be immediately nullified.

Also see "General" before first port.

VHF: Vessels equipped with VHF radio telephone should contact terminal on International Mobile Service Channel 16/156.80 MHz from 0000–2400 hrs. GMT. The language of the terminal is English and Indonesian.

BERTHING: The Company Area Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Salawati Marine Terminal. All of these factors have to be evaluated before a final berthing decision is made.

After a vessel has been berthed, a terminal official will board to discuss loading arrangements. Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted. A deck inspection will be made by Salawati officials and if the vessel is suitable for loading crude oil a signed notation to this effect will be made on the Company Dry Certificate.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended. Salawati personnel will constantly check the vessel's mooring and at any time may direct the lines to be heaved tighter or slackened off under the supervision of a responsible ship's officer, as circumstances warrant.

During the vessel's stay at the mooring emergency towing wires shall at all times be hung over the ship's bow and stern. These wires shall be secured to the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

The terminal official will report unsatisfactory conditions to the Company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing therefrom will be for the ship's account.

A ship may be rejected, if, upon inspection, it is not properly equipped, or if it is not suitably manned, or if it has dirty ballast or tanks unsuitable for the cargo as determined by the Company Area Superintendent or his designated alternate.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships, or partially inoperative ships will be rejected. Should it become inoperative while at the moorings it will be removed at the vessel's expense.

No repairs are to be made while mooring or unmooring, or at the moorings without the express permission of the Company Area Superintendent or his designated alternate.

A vessel must have both bower anchors in good working condition and in such sizes and amounts as to meet either "Lloyd's or A.B.S." standards although they may be, in fact, classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry adequate, synthetic lines used for mooring purposes. No wire ropes should be used for mooring export tankers at this terminal. Each mooring rope must not be less than 100 fathoms in length.

To assist in vessel's turn around, the Mooring Master will advise necessary booms and cargo gear rigged and ready before the ship is berthed.

BALLAST: No facilities are available for disposal of dirty ballast.

Owners and Masters are required to observe International Convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Sele Strait.

It is the responsibility of the ship's Master to see that no oil of kind is pumped or spilled overboard from his ship. Drip pans, s dispersant etc., should be used at all times especially w disconnecting hoses, in order to avoid any spillage overboard.

The categories of pollution include oily water from bilges, c residual from previous voyages, or any other matter that may resu pollution of the sea.

Any fines imposed by governmental authority for pollution shall be the vessel's account.

In the event that the Company has to settle any third party claim a result of damages to property caused by pollution attributable in way to the vessel, they will have the right to reimbursement by th responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters all labour employment costs for cleaning operations will be to the vessel's acco if caused by the vessel.

As soon as practical after arrival, all tankers will be inspected b Salawati Marine Terminal Official for dirty ballast. During discharg ballast similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship wil rejected, and will not be accepted again until satisfactory evidenc produced that such ballast was disposed of in a proper manner. If du inspection, or during progress of loading, it is revealed that ship's ta are not tight, or that oil is leaking from the ship, the ship may be rejec or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted loading.

A tanker must have sufficient ballast for safe handling having regard to existing weather and sea conditions and also for safe passa through the Sele Strait. Through a careful watch of the weather and conditions, frequent exchange of information between ship and termi and by a knowledge of the behaviour of his own ship, a ship's Mas may come to the terminal with a minimum of ballast and thus less any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels at the moorin discharging ballast or loading cargo during darkness will brillia illuminate the sea around the ship, so that any pollution will noticeable. The lighting will be of an approved and permanent natu

Tankers equipped with a separate system of ballast tanks will allowed to discharge ballast, and load oil simultaneously, provid approval is first obtained from the Company Area Superintendent or designated alternate or independent inspector.

Most responsible ship Owners have adopted a system of tank clean using circulatory methods of transfer of tank washings with chemica The result is that no oil discharges into the sea and oil separated collected in a slop tank. The terminal will load on top of such slo unless otherwise directed. This system is highly recommended to av pollution of the Sele Strait.

Masters are warned that inspection of ballast is strict.

Any tanker rejected because of dirty ballast or sea pollution automatically nullify his notice of readiness and will lose any priority position for loading.

LOADING: It is absolutely essential that extremely careful supervis be exercised by officers of vessels while loading operations are progress. A responsible ship's officer is required to be on d continuously at a point near to the tanks being loaded. He will be assist by an adequate number of ship's personnel in these operations.

Raising, lowering, connecting, tending and disconnecting of oil load hoses as well as other labours and duties on shipboard connected w loading of cargo or maintaining mooring lines in a correct manner be performed by the ship's crew directed by a responsible officer required by the terminal official. Loading of export tankers is throu two loading hoses with 10 in. ASA 150 connections.

All ships using Salawati Marine Terminal must be able to connect th manifold to the 10 in. flanges. Masters are reminded that it is the shi responsibility to provide such reducers as may be required to make t connection and that the hose connecting operation will normally carried out while the ship is de-ballasting.

The Terminal Official will report unsatisfactory conditions to t Company Area Superintendent or his designated alternate, who ma in turn, reject the ship until corrections are fully made. All costs accru there from will be for the ship's account.

Request for the terminal to stop the flow of oil cargo at a predetermin tonnage must be in writing. The request must include the statement the ship's Master that the Company will not be held responsible for a error and that in case of the vessel being overloaded the excess ca cannot be pumped back to the storage tanker. Ship's Master will a be held responsible for any oil spills caused by this request.

The export tanker must move the loading hoses from the oil stora barge by means of its own derrick and using its own crew. The ca derrick required to raise the loading hoses from the oil storage ba side must have minimum lifting capacity (SWL) of 5 tons and have sufficient length of strong lifting wire rope on the drum to enable cargo hook to reach the oil storage barge side, which is approxima 45 ft. away from the tanker's side, and still have adequate turns of left on the drum to ensure safety. Vessels which may consider the li capacity of their gear to be marginal should strengthen their g accordingly. A common way to do so is to rig a second topping lif the boom.

An A.O. Smith metering system is used to load the export tanke

Two loading hoses with 10 in. of ASA 150 camlock flange connectio are used to load the export tanker. All vessels not having 10 connections must provide their own reducers.

A loading rate of approx. 20,000 bbls.p.h. can be accomplished

If, at any time an overflow of crude oil occurs, loading wil suspended immediately, and not be resumed until the oil is cleaned and removed from the decks of the vessels, and/or from the surfac the sea, and any damage is repaired and no further danger exists stressed that during loading operations, the Salawati cargo super will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer in charge of loading.

All spillages of oil must be reported immediately to the Company Area Superintendent, or his designated alternate, and subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

CARGO: *Typical Salawati Crude Analysis:*

API – Gravity at 60°F	41
Reid Vapour Pressure	2.0 at 100°F
Sulphur, Wt.%	0.5%
Kinematic Viscosity at 100°F	4.2 cST
Pour Point	+20°F
Carbon Residue	1.3% by weight
B S & W	0.1% by weight
Flash (PMCC)	Below 50°F

CARGO DOCUMENTATION: Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Reports, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal.

When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Notes of protest, if any, should be handed to the Company Area Superintendent or his designated alternative for further delivery to Phillips Petroleum Company Indonesia, Jakarta.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: No clinic available.

REPAIRS: No facilities.

CONSULS: None.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Master should prepare two copies of the Stores List for Customs use.

REPATRIATION: Not possible. If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: GMT plus 9 hours throughout the year.

SHORE LEAVE: Not possible.

DELAYS: Delays to vessels using Salawati Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

GENERAL:

Logs: Masters are advised to keep careful watch on the approaches for semi-submerged floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Admiralty Chart No. 3744
2. Admiralty Chart No. 3745.
3. Admiralty Chart No. 1416.
4. Indonesian Hydrographic Charts No. 213, 217 & 219.

Winds: Winds can reach a maximum of 75 m.p.h. during local storms and all vessels must make sure they carry sufficient ballast to be manoeuvrable in the restricted waters of Sele Strait during these storms.

Stores: Not available.

Visitors: Only authorised personnel or visitors are permitted on the storage barge and/or export tanker.

Crude Oil Testing: The crude oil testing laboratory is equipped to perform the following tests:

API Gravity, BS & W, Pour Point, R.V.P. and salt content. Any additional tests that may be required will be performed in Jakarta.

Flag: During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: August 1978.

General: The loading terminal is located on the East coast of Salawati Island at Sele Strait. Salawati marks the Western part of New Guinea and belongs to Indonesia.

Reference: Refer to B.A. Charts 3744, 3745, 1416.

Coast Pilot 35, Eastern Archipelago Volume III.

Documents: Inward and outward clearance carried out at anchorage. Watches in excess of one, radios, cassette recorders, perfume etc., will be sealed by Customs. Seal will be inspected when receiving outward clearance. Papers required for clearance:

15 Copies of Crew Lists.
4 Copies of Cargo Manifest
4 Copies of Personal Effects
4 Copies of Bonded Store List
4 Copies of Stores List
4 Copies of Narcotics List
2 Copies of Vaccination List

Ship's registry taken ashore and returned on outward clearance.

Pilotage: Government Pilot and Mooring Master – usually from Kasim Terminal board at anchorage. Mooring Master acts as Pilot. From the anchorage vessel proceeds through Sangoilin Mon (Heilige Straat) and Sele Strait towards Salawati. Heilige Straat is marked by unlit buoys and beacons, privately maintained by the oil companies. The min. depth is 49 ft., max. sailing draft from Salawati is 43 ft.

Anchorage: Recommended anchorage in position Lat. 00° 53′ S., Long. 131° 10′ E. in approx. 25 fathoms of water.

Restrictions: Usually transit from anchorage towards Salawati is carried out during daylight hours only.

Vessels of 100,000 d.w.t. have been berthed at Salawati.

Health: Radio Pratique not available.

Radio: Pertamina office listens on VHF Channel 16 but calls are seldom answered. Kasim Marine Terminal listens on 16 and contacts Pertamina office by telephone.

Advance notice. As per Charterer's instructions to Pertamina, Jakarta.

Tugs: Two tugs are available from Kasim Terminal to assist in berthing and unberthing.

Berthing: Berth is constructed of 2 mooring dolphins and 2 breasting dolphins with storage barge "Wampum" being moored to the Western side of dolphins and export tanker being moored to the Eastern side.

Vessel may berth port or starboard side to, depending on stage of tide. The vessel is moored with 8 ropes forward and 8 aft, ropes being handled by mooring launches.

Two hoses of 10 in. are connected to ship's manifold by ship's crew. The barge is said to have a capacity of about 70,000 LT, the maximum loading rate of Salawati crude is 20,000 bbls./hr.

Vessels not having received inward clearance by 1500 hrs. local time at the latest will have to await the following daylight before proceeding towards Salawati.

Weather/Winds: Uniformly high temperatures, high humidities and abundant rainfall. Winds are usually light, with a seasonal reversal as N.W. and S.E. Monsoon, however, winds can reach a maximum of 75 m.p.h. during local storms.

Tide: Between 2 – 5 knots at berth and in Sele Strait, rise of tide about 2 m.

Repairs: Not available.

Supplies/Services: None available.

Shore Leave: Not possible.

AUTHORITY: Pertamina, Jalan Yos Soedarso No. 32-34, Jakarta, Indonesia. *Tel:* 62.21.490311. *Contact:* Mr. Indra Kartasasmita.

SAMARINDA: 00.30 S. 117.09 E. **(See Plan)**

PILOTAGE: Pilotage is compulsory. Pilot boards at Muara Pegah. There are 14 Sea Pilots and 4 Harbour Pilots.

ANCHORAGE: Vessels entering Samarinda inner harbour anchor at Muara Pegah: 01° 00′ S., 117° 21′ E. Depth 22 m.

Vessels loading/discharging at outer anchorages: Muara Berau: 00° 14′ 30″ S., 116° 34′ 04″ E. or at Muara Jawa: 01° 02′ 30″ S., 117° 15′ 00″ E. Depth of water 20 m.

APPROACHES: The distance from the port of Samarinda to the outer basin is about 60 km.

The depth of channel before the dredging was 5.00 m. LWS and had various widths.

After dredging it has a minimum depth of 6.0 m. LWS and a width of about 100 m.

The current speed is between 1.00 km./hr. – 2.0 km./hr. in the inner harbour.

The current speed is between 2.5 km./hr. – 4 km./hr. at the outer bar/channel.

RESTRICTIONS: Maximum LOA entering outer bar 156 m., with maximum draft 6.0 m. Depth of outer bar 6.0 m. at LWS. Depth of inner harbour 7.0 m. at LWS.

MAX. SIZE: 6,000 d.w.t. and draft 6.0 m.

RADIO: Samarinda Coastal Radio, call sign PKN-6, frequency 8,445 kHz.

VHF: Samarinda Radio, call sign PKN-13, Channels 16 and 12.

TUGS: One tug and 4 pilot boats available.

BERTHING: Concrete Wharf: Length 450 m., depth 7.0 m. and width 125 m.

Warehouses: 2 × 1,600 sq.m.

Open Storage: 19,398 sq.m.

Folk Lifts: 4 × 3 tons and 1 × 5 tons.

CRANES: 2×15 tons mobile cranes.

STEVEDORES: Available from labour pool.

MEDICAL: Hospital facilities available.

FRESH WATER: Available, rate 18,000 litres per hour.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Privately owned barges available.

AUTHORITY Perum Pelabuhan IV, Cabang Kelas II Samarinda, Niaga Timur Street 130, Samarinda, East Kalimantan, Indonesia. *Tel:* (0541) 22044 – 21615. *Telex:* 38237. *Contact:* Mr. Baharuddin Zaenal, BA, Head of Branch.

SAMPIT: 03.06 S. 113.04 E.

LOCATION: The port is located 45 miles from the outer bar.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in position 03° 06′ 00″ S., 113° 02′ 15″ E.

RESTRICTIONS: Maximum depth at outer anchorage 2.10 m. at LWS.

RADIO: Sampit Coastal Radio Station. Call sign PKG-2. Frequencies: 2,182/6,215.5 kHz.

TUGS: Not available.

BERTHING: Length of wharf 208 m. Depth alongside 4.5 m. at LWS.

Storage: Godown and open storage available.

Fork Lifts: Available.

CRANES: Available.

STEVEDORES: Available from labour pool.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Not available.

SANGATTA: 00.22 N. 117.34 E.

PILOTAGE: Mooring Master available.
ANCHORAGE: The anchorage whilst awaiting berth is located in position Lat. 00° 18′ 58″ N., Long. 117° 37′ 35″ E.
RESTRICTIONS: Berthing during daylight hours only. Unberthing at any time, day or night.
MAX. SIZE: *CBM:* 36,500 d.w.t. Max. LOA 220 m.
VHF: Balikpapan Radio, call sign PKN-2, on VHF. Station operated by Pertamina.

Sangatta Radio, call sign PKN-4, on VHF. This station also operated by Pertamina.
BERTHING: There is a CBM (4 buoys) located in position Lat. 00° 21′ 35″ N., Long. 117° 34′ 26.5″ E. Depth of water 21.0 m. Crude oil is loaded at a rate of 8,570 bbls.p.h. through 2×12 in. hoses.

There is a jetty in position Lat. 00° 23′ 03″ N., Long. 117° 33′ 58.0″ E. The depth alongside the jetty is 1.5 m. at LWS.
LOADING:
Shore Storage Tanks:

Oil Products	Total Safe Capacity
Crude Oil	250,000 bbls.
Premium	290 k/l.
HSD	870 k/l.

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	34
Reid Vapour Pressure at 100°F.	:	3.8 psi
Viscosity at 100°F.	:	2.7 cSt
Sulphur Content	:	0.08% wt.
Carbon Residue	:	0.65% wt.
B.S. & W.	:	0.15% vol.
Flash Point (PMCC)	:	Below 50°F.
Pour Point	:	75°F.

DENSITY: 1020 – 1025.
FRESH WATER: Not available.
FUEL: Not available.
AIRPORT: Temindung Airport at Samarinda.
TIME: GMT plus 8 hours.
AUTHORITY: *Operator:* Pertamina.

SANTAN TERMINAL (Attaka): 00.06 S. 117.32 E.

(See Plan)

LOCATION: The Terminal is situated on the East Coast of Kalimantan, Indonesia in the Makassar Strait. It is about 80 miles North of Balikpapan.
DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique. Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Exemption Certificate, Cargo Certificate and Derat Certificate. Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Santan Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Each Crew member should be in possession of an International Vaccination Card and Passport or Seaman's Book. Indonesian Immigration, Customs and port officials will board the vessel to grant clearance.

Flag Dispensation: Each tanker entering the Santan Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for provisional Pratique through the Directorate of Quarantine and if granted, a cable advice is sent to the harbour authorities. Port Health clearance is issued prior to the tanker's arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Customs and Immigration: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching Santan. These signals shall be displayed continuously until clearance is granted.

The signals are as follows:

Sunrise to Sunset:	Quarantine Flag "Q"
Sunset to Sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign, (signal letters). This signal may however be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.
PILOTAGE: *Procedure When Berth Available on Arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, mooring ropes on deck, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Also see "Operations".

ANCHORAGE: If vessels are obliged, or instructed, to anchor, they should do so in the recommended anchorage and on no account are they to manoeuvre or anchor West of Longitude 117° 33.5′ E. unless Mooring Master is on board. The depth of water is 40 m. with a bottom of mud/clay. Holding ground is considered good.

The Southern limit of the anchorage is defined by two buoys Number "10" coloured red and Number "12" coloured red and white chequers. At night both buoys show a white light flashing 1 second every 6 seconds.

The Southerly limit of a reef on the Northern side of the anchorage area is marked with a buoy numbered "11" and coloured black. At night this buoy shows a green light flashing green 1 second every 5 seconds. Another buoy coloured with red and black horizontal bands and marked with the letter "A" shows a group flash light showing 3 white flashes every 6 seconds.

All the buoys are fitted with radar reflectors.

READINESS: *Procedure When Instructed to Anchor on Arrival:* A vessel which has been instructed by Santan Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) Vessel is within scheduled date range.
b) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
c) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
d) That the Port is open.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clauses (a), (b) and (c) above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep Pilots (Mooring Masters) on station in the anchorage. Santan Port Control maintains a continuous listening watch on Channel 16 VHF.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Also see "General".

NAVIGATION:
Attaka Reef: The Attaka Reef is marked with a buoy coloured red and yellow chequers. At night it shows a white light flashing 2.5 seconds every 6 seconds.
Ship Approach Channel: The ship approach channel to the Santan Anchorage is marked with 4 buoys and numbered from seaward 2, 4, 6 & 8 respectively. At night they show a white light flashing 0.5 seconds every 2 seconds. The No. 2 buoy is positioned at Lat. 00° 04′ 7.5″ S., Long. 117° 47′ 39.5″ E. Ships should stay to the North of these buoys.
SBM: The SBM is fitted with a radar reflector and at night shows a Qk. Fl. W. light. One of the floating hose strings is fitted with two winker lights.
Inshore Area: Inshore of the SBM area a concrete pile beacon painted red and numbered "16" shows a white flashing light every 6 seconds and marks the Northerly limit of two dangerous reefs.

The work boat canal is marked by 2 buoys, the Northerly one numbered "15" and showing a white flashing light and the Southerly numbered "18" and showing a red light.

There is a beacon on each bank of the canal, at the shore line. The North bank beacon showing a white light and the South bank a red light.
Onshore Area: A radio antenna approx. 150 ft. high is located at approximately Lat. 0° 05′ 24″ S., Long. 117° 26′ 34″ E. The mast shows fixed red air lights by night on the top and midsection.

RESTRICTIONS: Berthing during daylight only, unberthing at any time.

MAX. SIZE:
Minimum Size Acceptable: The minimum sized tanker acceptable at the Terminal is the T-2 Class or equivalent of not less than 17,000 d.w.t.
Maximum Size Acceptable: The maximum sized tanker acceptable at the Terminal calling for a full cargo is 125,000 d.w.t. and 275 m. LOA.
RADIO:
Procedure for Appointing Agent: Owner should cable: Pertamina Ship Jakarta. The cable should appoint Pertamina as Agent to attend the tanker at Santan and should be sent 2-4 weeks prior to vessel's arrival.
Advice of Arrival: 72 hours prior to arrival at the Terminal vessels should advise the company of their estimated times of arrival by cable sent via Pertamina's Coastal Radio Station at Balikpapan. They should also confirm or amend ETA when they are 48 hours and again when 24 hours distant from the Terminal.

Union Oil Company of Indonesia cable address: Pertamina Tanjungsantan.
Pertamina's Coastal Radio Stations:

I. Name of station – Balikpapan Radio; Call Sign – PKN 2; Frequency – Keeps watch on 2182 kHz A3, answers on 4415 kHz A3, 6520 kHz A3 (vessel's selection); Class – A3H-A3J; Power – 500 watt; Service – 24 hour; Location – Lat. 01° 16′ S., Long. 116° 50′ E.

ETA messages sent to PKN2 should be addressed:

Pertamina Tanjung Santan =
Message . . . .
Master. . . . .

As long as no direct contact exists with PKN2, ships send ETAs to PKI2 (See below).

II. Name of station – Jakarta Radio; Call sign – PKI2; Frequency – 500 kHz (operates on 452 kHz), 2182 kHz answers on: 4178, 4280.5, 4363, 4410, 6457.5, 6520, 6516 kHz. 8 MHz (operates on 8628 kHz). Class – A1 500 kHz; A3 2182 kHz; A1 8 MHz; Power – 1 kW, 500 kHz; 500 watt, 2182 kHz; 1 kW 8 MHz.

Service – 500 kHz H24, 2182 kHz 0400 – 0500, 0700 – 0800, 1000 – 1100, 1500 – 1600, 2000 – 2100, 2300 – 2400 hrs. GMT; 8 MHz 0100 – 0300, 0500 – 0600, 0900 – 1000, 1100 – 1200, 1400 – 1500, 1730 – 1900, 2100 – 2200 hrs. GMT.

Location: Lat. 06° 08′ 00″ S., Long. 106° 50′ 00″ E.

ETA messages sent to PKI2 should be addressed:
Pertamina Tanjungsantan via PKN2 =
Message ....
Master..............

Details of Cable: The following information should be included in the cable:

Name of vessel and radio call sign.
ETA in GMT and date (local time is GMT+8 hours).
Cargo requirements.
Deballast time.
Maximum loading rate.
Vessels draft on arrival.
If there is any sickness aboard or clean bill of health.
Last port of call.
Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
Distance in feet from bow to vessel's loading manifold.
Flange dimensions of vessel's manifold connection if not to ANSI B76.5, B.S. 1560, Series 150 or equivalent.
Also see "General" before first port.

VHF: Vessels equipped with VHF radio telephone should contact "Santan-Control" on Channel 16 (156.80 MHz) when within range to request instructions.

Language: The language of the Terminal is English and Indonesian.

MOORING/UNMOORING: This description is only intended as a guide and may be varied as to the order in which lines are taken up etc. according to the circumstances prevailing at the time of mooring.

Moorings Required From Tanker: The ship must provide and have ready the following: Two mooring ropes and one rope messenger line on the forecastle.

The Approach: The ship approaches the buoy from down tide and wind, taking care to keep the wind right ahead. Adequate ballast must be retained on board to ensure that the vessel retains full manoeuvrability throughout the approach to the buoy and the actual mooring.

Bringing Aboard the Mooring Lines: The vessel will be brought to a position close to the buoy with the vessel stopped in the water and with the buoy fine on the port bow. During the approach to the buoy and while mooring, a terminal work boat will keep the hoses pulled well clear to port. Under normal conditions the port rope will be the first taken on board. The Mooring Master will advise as to which rope is to be taken first and as to which fairlead this will be taken. The actual work of mooring will be done by a terminal work crew. The ship will lower a strong messenger line to the mooring boat who will in turn make this fast to the approach rope. The approach rope of 10 in. circumference will be hove aboard and will in turn be hove in until the chafing chain and triangular plate is centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being hove aboard, a strong wire strop will be made fast to a set of forecastle bitts. To the end of this strop will be fitted a 50 ton shackle and the strop will be so made fast at the end and the shackle will be about 5 ft. inboard of the fairlead. The approach rope will be hove on until the large link of the chafing chain is sufficiently far inboard for it to be connected to the strop by the 50 ton shackle. When this is done the approach rope will be slacked off until the full weight comes on the strop/chafing chain/buoy rope. The buoy rope is 150 ft. long and is 12 in. circumference double nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a preventer. The second rope is now taken aboard and made fast in the same way. When both the ropes are fast, good ropes or strops, provided by ship, can be made fast to the spare links on the chafing chains to back up the main moorings.

Fire Wires: A fire wire must be rigged on the starboard side for'd and on the stern. These must be tended throughout vessels stay at the SBM to ensure that they are kept within 2 ft. to 3 ft. of water. In case of fire the tugs would connect to these wires to pull vessel clear of the SBM.

Connecting Hoses: When the mooring is completed, the work boat holding the hoses clear will bring these alongside the ship in way of the port side manifold.

Unmooring: To unmoor from the buoy any extra back up lines that have been made fast to the chafing chains are slipped first. The approach ropes are then taken to the ship's windlass/capstan and the weight taken on them until the shackle between the strop and chafing chain is undone. With the vessel moving slowly astern the approach ropes are slacked off and finally slipped and allowed to float free. While the ship is unmooring, a terminal work boat will keep the floating hoses towed clear and will keep them clear until the ship has slipped the moorings and is clear of the buoy.

Strops and shackles will be provided by the Terminal and put on board as the vessel approaches the buoy. The ship must provide 2 mooring ropes at least 8 in. circumference and 100 fathoms long, a 4 in. circumference messenger line, and two rope lashings 4 in. circumference and 15 ft. in length. These lashings should be of manilla or polypropylene, nylon is not acceptable.

BERTHING FACILITIES: The Sea Terminal consists of a "single point mooring" loading berth also known as a "mono-buoy" or "single buoy mooring". The berth is located at Lat. 00° 06′ 18.6″ S., Long. 117° 32′ 18.8″ E.

The "single buoy mooring" is approximately 4.33 miles offshore in 28 m. of water. The submarine line to the "single buoy mooring" is 30 in. in diameter. A single string of 20 in. submarine hose connects the submarine line header to the "single buoy mooring". Two strings of 16 in. floating hose connect the "single point mooring" to the tanker rail hoses which are 12 in. in diameter. The hoses are always taken up on the port side.

Hose lifting Derrick Capacity: Tankers must be equipped with a hose lifting derrick with a lifting capacity in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to also connect to 10 in., 12 in., and 16 in. manifolds. Tanker manifolds should terminate in ASA Series 150, flat face flanges. Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of other sizes or ratings will be rejected.

BALLAST/POLLUTION:

Adequate Ballast: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian government regulations concerning pollution of the sea, having particular regard for this area of the Makassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by governmental authority for pollution shall be for the vessel's account.

OPERATIONS:

Mooring Master: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

Work Crew: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches, etc. will be required. Ship's crew will assist in hose connection/disconnection/mooring/ unmooring and carrying equipment from deck to forecastle as required. Any vessel whose crew do not give such assistance may be rejected and returned to the anchorage. Costs of such a delay would be for the ship's account.

Tankers Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with the table shown on Page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Only the automatic turning gear should be used. If it should become necessary to turn the propeller(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission *must* be obtained before any such increase in revolutions.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel, to which any person may be lawfully required to proceed, are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor or at the SBM and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient Crew members must be immediately available at all times to assist with any or all operations on board the vessel at the Terminal.

LOADING: *Loading Rate:* Maximum loading rate will be about 30,000 bbls.p.h. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressures which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Crude Oil Characteristics:

		Attaka	*Badak*	
API Gravity at 60°F.	:	43.3	43.2	
Reid Vapour Pressure at 100°F.	:	7.6	7.3	psi
Viscosity at 100°F.	:	1.42	1.38	cSt
Sulphur Content	:	0.06		% wt.
B.S.& W.	:	0.05	0.04	% vol.
Pour Point	:	15	10	°F.

Storage Capacity:

Crude 2,500,000 bbls.
Propane 20,000 k/l.

Loading Temperature:

Propane 85°F. 90°F.

Radio Contact: During loading operations the vessel will contact the Terminal Despatcher ashore every half hour by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a shore stop will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting shore stop. When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for overload the vessel, it is not possible to pump oil back from the ship to the shore.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officer will seal the stores.

FACILITIES: There are no facilities of any kind at Santan. There are no engineering repair shops; no fresh water; no bunkers available; no provisions or stores; no crane or barge service; no shore leave; no crew changes; no consulates available.

GENERAL: *Exact Arrival Time:* It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Attaka Unit.

Conditions of Use of Port: The Master of each tanker will be given a copy of the Conditions of Use of Port of Santan Marine Terminal, which he will be asked to sign.

Delay Due to Excessive Deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Republic of Indonesia, Chart 130, East coast of Kalimantan, Balikpapan to Muara Berau.
2. Republic of Indonesia, Chart 37, East coast of Kalimantan, Muara Berau Kutie River to Cape Mangkalihat.
3. U.S. Naval Oceanographic office, old Chart H.O. 3044, new Chart N.O. 72014 Borneo East coast. Sandakan Harbour to Sungai Mahakam.
4. U.S. Naval Oceanographic office, old Chart H.O. 6185, new Chart N.O. 72110 Borneo East coast, Tanjung Mangkalihat to Tanjung – Tamarong.
5. British Admiralty, Chart 2636, North part of Strait of Makassar.
6. British Admiralty, Chart 2660, China Sea – Southern Portion.
7. British Admiralty, Chart 941-B, Eastern Archipelago.

Sailing Directions: Sailing directions are in the following:
Eastern Archipelago Pilot, Vol II. 7th Edition, 1961.

Hydrographic Survey: A detailed hydrographic survey was carried out from November 1971 to January 1972, of an area between Lat. 0° 03′ S. and 01° 23′ S. and extended from the shore line to some 20 miles offshore. Charts are available on request from the Terminal showing the results of this survey for the approaches to the Terminal on a natural scale of: 1:25,000 and for the anchorage and loading area on a natural scale of 1:12,500.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: 1976

Situated about 80 miles North of Balikpapan on the East coast of Borneo, in 00.07 S. 117.28 E., the only chart available BA.2636 is of too small a scale to advise safe first time entry in darkness. So, afte number of unsuccessful attempts to contact Santan Terminal instructions – only the latter portion of his transmissions were be received, and very underpowered, it was decided to await daylig cruising on 118° Meridian.

At 0600 hrs. vessel was again in the vicinity of Attaka Buoy, Pi contacted by VHF 16. He instructed us to proceed 270° T and he wou meet us, East of SBM. The SBM is located about 4.5 miles offsho marked by a QK.FL.W. light, vis. 6 miles, and is impossible to distingui from Attaka Buoy.

The best approach is to reach a point 4 miles North of Attaka Bu which has a Ra.Refl. and was identified at just under 12 miles. Fro thence, subject to the Master's assessment of the situation, a assuming possession of a copy of the Chartlet, to proceed inward 257° T, which will take him along the Approach Channel. But he shou be prepared for quite strong set to North or South – this being m experience, both inward and outward. Pilot states that up to 125,00 d.w.t. can be handled. Originally, the channel had 4 buoys, marking t South side of the channel, but the outer 2 have been withdrawn. Chann has been swept and min. depth shown is 50 m. Each buoy has a Ra.Re and with 3.5 mile spacing, are easy to track on radar and visually, onc their existence is known, from the Chartlet.

An anchorage area exists between 0.5 and 2 miles East of the SB bounded by 3 buoys to West side and 1 to South. These mark Co Shoals. The Pilot said it was acceptable to come straight in from Attak Buoy, in ballast, but loaded vessels must stay in Swept Channel, as th possibility of isolated Coral Heads exists, and the area South of th channel has not been fully swept.

A mooring/hose party boards with the Pilot, and takes care of thes duties, the vessel only being required to provide an officer and winchmen on the foc's'le and an officer and winchman for connecti the hoses (2×16 in.). A ship's mooring line is lowered to the launch pick up the port SBM polypropylene line, this finally brings up a cha (approx. 8 in. dia. link). A special very flexible wire, provided by shor is secured round both Port and Starboard forward bitts on foc's'le hea with an eye at each end projecting forward. The mooring chain is the shackled to this. A stout messenger is acceptable for picking up th starboard mooring, but it is advisable to have a second mooring lin available on deck in our opinion. The chain is then shackled to the Sout eye of the shore wire, which is around the bitts. There is no provisio for quick release gear, so letting go in an emergency, e.g. wind, wou not be easy.

Hoses are 16 in., but fitted with 12 in. flanges (not reducers) and ar bolted to manifold, again no quick release provided. Pilots' estimate weight of each hose is 7.5 tons. Hoses are hung off on chains passe round manifold supports, instead of cruciform bollards – apparent because of the length of chain used. Hose/mooring party work well an safely.

EDP is not available, and vessel had to lie awaiting papers afte leaving SBM for about 40 minutes, after which passage outward alon the channel was without problem, with adequate water depths all th way.

Radio messages are sent via Balikpapan PNK2 to Petroleu Balikpapan, but appears to be on only 2 hours a day. But Pilot said the had not received our ETA's, but said this was quite normal. Agents wer Pertaminaship Jakarta. No relief facilities, stores, water or bunke available, and mail both in and out not advised, due uncertain deliver

SHIPMASTER'S REPORT: May 1986.

Vessel: 95,000 d.w.t.

All papers as per Senipah were required, also transit cargo or cargo manifest, in duplicate. Terminal is operated by Unocal 76. Coa Guard boarded with Agent to inspect vessel's documents which wer also taken ashore by Agent. Polypropylene rope aft for tow boat.

With reference to Admiralty Chart No. 3040 only No. 8 channel bu still exists. According to the Pilot the depth of 18.5 adjacent to Buoy is decreasing.

AUTHORITY: *Operator:* Union Oil Company of Indonesia, Ratu Pla Building, 7th Floor, Jl. Jend. Sudirman, P.O.Box 264, Jakarta, Indonesi *Tel:* 712509, 737344. *Telex:* 47335 Union-la.

SEKUPANG: 01.07 N. 103.55 E.

PILOTAGE: Pilot not available.

ANCHORAGE: Vessels anchor in position 01° 07′ 30″ N., 103° 5 30″ E. Depth of water in the anchorage is 15 m. – 20 m. at LWS.

RADIO: Sekupang Radio Station. Call sign PKJ 20.

BERTHING: There is a concrete wharf with a length of 80 m. and dep alongside 12.0 m. at LWS.

Storage: There is a transit shed of 6,000 sq.m.

Fork Lifts: There are 5 units with capacity 2 tons – 5 tons.

CRANES: 4×10 tons – 25 tons mobile cranes.

STEVEDORES: Local labour available.

FRESH WATER: Available.

FUEL: Not available.

SELAT LALANG: 01.11 N. 102.13 E.

DOCUMENTS:
6 copies Crew List.
6 copies Passenger List.
1 copy Cargo Manifest.
1 copy Ship's Stores List.
1 copy Crew Personal Effects List.
1 copy Maritime Declaration of Health.
Last Port Clearance.

PILOTAGE: Compulsory. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.

ANCHORAGE: The anchorage whilst awaiting the sea pilot is in position Lat. 01° 56′ 30″ N., Long. 101° 50′ 30″ E.

RESTRICTIONS: Berthing and unberthing during daylight hours only.

MAX. SIZE: 140,000 d.w.t. Max. LOA 280 m.

RADIO: Dumai Radio on HF, call sign PKP. This station is operated by Ditjenla.

VHF: Sungai Pakning Radio, call sign PKP-5. This station is operated by Pertamina.

BERTHING: The storage barge "Hudbay Riau" is moored in position Lat. 01° 11′ 22″ N., Long. 102° 13′ 03″ E. Depth of water 22.7 m. Vessels require starboard manifold to be ready to accept 2×12 in. hoses.

Shore Storage Tanks:

Oil Products	Total Safe Capacity
Crude Oil	1,012,142 bbls.

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	39.9
Reid Vapour Pressure at 100°F.	:	1.0 psi
Viscosity at 100°F.	:	12.9 cSt
Sulphur Content	:	0.04% wt.
Carbon Residue	:	1.3% wt.
Pour Point	:	95°F.

MEDICAL: First Aid clinic available.

DENSITY: 1012 – 1020.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

AIRPORT: Simpang Tiga Airport at Pekanbaru.

TIME: GMT plus 7 hours.

AUTHORITY: *Operator:* Hudbay Oil (Malacca Strait) Ltd., Arthaloka Building, 4th Floor, Jl. Jend. Sudirman 2, Jakarta, Indonesia. *Tel:* 587381, 584001. *Telex:* 45218 Homsl-la, 46055 Homsl-la.

SEMARANG: 07.01 S. 110.27 E. (See Plan)

DOCUMENTS:
Required for inward and outward:
Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Radio Telegraphy Safety Certificate.
Derat Exemption Certificate.
Last Port of Clearance.
Safety Equipment Certificate.
Health Book (used Indonesian Port only)
Crew List (9 copies).
Stores List.
Personal Effects List.
Free Pratique Granted.
Light Dues Bill from last Port of Call.
Customs Cargo Clearance (PU) Import.
Customs 5 B Form from Last Port of Call.
Manifest (25 copies).
Customs Documents Export Cargo (if any).
Customs Documents Transhipment (Model H if any).
Authorities boarding the vessels on arrival:
Immigration Officer.
Customs Officer.
Quarantine Health Officer and Police Officer.

PILOTAGE: Compulsory. Pilot boards at anchorage, can be contacted on VHF Channel 16.

ANCHORAGE: Anchorage 3 nautical miles from coast, where depth 9 m. For smaller ships safe anchorages 1,900 m. from pier, where depth 5.0 m. – 7.0 m.

HEALTH: Vessels arriving must hoist "Q" flag. Work can only begin after inspection of security team boarding vessel upon arrival during working hours.

RADIO: Semarang Coastal Radio Station. Call sign PKR. Frequencies: 500, 8249 and 8354 kHz. Also VHF Channel 16.

TUGS: Normally tugs join vessel in roads.

BERTHING: New Wharf: Length 605 m. Depth alongside 9.0 m. at LWS. Domestic Wharf: Length 340 m. Depth alongside 5.0 m. at LWS.

STEVEDORES: Necessary to inform Agent exact time of arrival. Labour gangs to be arranged 1 day before. Also details of cargo to be discharged needed to arrange stevedoring materials, especially for ships anchoring in roads.

Gang Capacity:
In Semarang Port there are 1,409 stevedore workers registered at the Labour Pool (Y.U.K.A.) 1 gang labour = 15 stevedore workers.

Working Rates:
(a) From vessel to barges and vice versa:
- Load/discharge general cargo – 12 tons gang hour.
- Load/discharge bulk cargo – 20 tons gang hour.

(b) From barges to Godown and vice versa.
- Load/discharge general cargo – 10 tons gang hour.
- Load/discharge bulk cargo – 18 tons gang hour.

(c) From vessel to Godown and vice versa. (if vessels at the quay).
- Load/discharge general cargo – 15 tons gang hour.
- Load/discharge bulk cargo – 18 tons gang hour.

(d) Discharge glass sheet from vessel to barges; same as general cargo.

(e) Discharge steel bars from vessel to barge – 20 tons gang hour.

Working Hours (normal working hours):
Monday – Thursday 0800 – 0400 hrs.
Friday – Saturday 0800 – 0200 hrs.

EQUIPMENT: One day's notice required for hiring.

Cranes/Forklifts:
P.L.T.U. Projects: 1 shore crane with max. capacity 90 tons. Can be used if not required by P.L.T.U.
Port Administration (Perum Pelabuhan): 3 mobile cranes with max. capacity 10 tons, 10 forklifts max. capacity 2.5 up to 10 tons.
Unit Terminal P.A: 2 mobile cranes with max. capacity 10 tons, 5 forklifts with max. capacity 3 up to 5 tons.
Samudera Indonesia: 2 mobile cranes with max. capacity 3 tons and 10 tons.
Gesuri Lloyd: 3 mobile cranes with max. capacity 4 tons. 1 forklift max. capacity 2 tons.
Djakarta Lloyd: 2 mobile cranes with max. capacity 3 and 4 tons. 3 forklifts max. capacity 2.5 tons each.
Bahari: 2 forklifts with max. capacity 3 tons.

Godowns:
Trikora Lloyd: 1,960 sq.m.
Djakarta Lloyd: 5,400 sq.m.
Samudera Indonesia: 3,480 sq.m.
Pelni: 3,510 sq.m.
Bahari: 3,000 sq.m.
PN.VTP/Tobacco: 1,780 sq.m.
Unit Terminal PA: 10,520 sq.m.
Dangerous cargo Warehouse: 800 sq.m. (one only)

Open Storage:
Trikora Lloyd: 4,000 sq.m.
Unit Terminal PA.I-II-III.: 15,470 sq.m.
Djakarta Lloyd II.: 1,200 sq. m.
Djakarta Lloyd III.: 1,200 sq. m.

Tugs:
Samudera Indonesia: 4 tugs.
Gesuri Lloyd: 4 tugs.
Pelni: 1 tug 300 h.p.
Trikora Lloyd: 1 tug 120 h.p.
Hesti Kencana Lloyd: 1 tug 120 h.p.
Atrind Marina Graha: 6 tugs.
Bahari: 1 tug.

Lighters:
Samudera Indonesia: 18 lighters (3,955 tons capacity).
Djakarta Lloyd: 12 lighters (1,850 tons capacity).
Pelni: 9 lighters (1,100 tons capacity).
Trikora Lloyd: 11 lighters (1,925 tons capacity).
Bahari: 5 lighters (500 tons capacity).

MEDICAL: Medical assistance can be given upon ship's arrival. First aid can be given by harbour doctor in harbour area. Serious cases taken to hospitals in town. 4 hospitals available. Port Health Officer can issue vaccination/fever Certificates if required.

TANKERS: Buoy mooring in position Lat. 06° 53.6′ S., Long. 110° 25.8′ E.

FRESH WATER: Can be supplied by 100 ton barge once a day. Also available alongside, rate 10 t.p.h.

FUEL: Fuel oil and diesel oil available in limited quantities, only to coasters.

CONSULS: No local representation.

REPAIRS: Minor repairs only. Dock for repairing small vessels, tugs and barges.

SURVEYORS: Bulk and general cargo surveyors available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Opening and closing hatches done by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent in tobacco permitted for each crew member to hold out of bond. Wine and/or spirits, maximum value of U.S. $10.

REPATRIATION: Repatriation of crew members arranged by Agents by contacting Immigration Officer for permits concerned.

AIRPORT: Airport (A. Yani) 5 miles from harbour. Domestic flights only.

TIME: GMT plus 7 hours.

HOLIDAYS: New Year (1st January); Independence Day (17th August); Id el Fitr; Christmas Day (25th December), Waisak.

POLICE/AMBULANCE: Semarang 245 or 726.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Needed.

SERVICES: No facilities for underwater repairs, electrical repairs or tank cleaning.

SHIPMASTER'S REPORT: November 1987.
Pilotage: There is no need for vessels of draft over 3.5 m. to anchor in roads.
Berthing: There are 2 berths for vessels of max. draft up to 9.0 m. Length of berth about 600 m. We loaded tapioca in bags.
Tugs: 2×1,500 h.p.
Customs Allowances: Bonded store not sealed. It was possible to take beer and cigarettes without permission of Customs.
Time: GMT plus 7 hours.
Delays: It seems that no loading is carried at anchor any more.

AUTHORITY: Port Authority Tanjung Emas, Jl. Sers. Marinir Usman Janatin No. 8, Semarang, Central Java, Indonesia. *Tel:* 24491, 20687. *Telex:* 22305. *Cables:* Kacab Smg. *Contact:* Captain Alex Moniaga, Branch Manager.

SENIPAH TERMINAL: 01.03 S. 117.13 E. (See Plan)

LOCATION: The Sea Terminal consists of a SBM (Single Buoy Mooring), loading berth also known as "mono-buoy". Berth is located in position Lat. 1° 03′ 05″ S., Long. 117° 13′ 13″ E.

The Terminal is situated about 45 km. N.E. of Balikpapan on East Coast of Kalimantan, Indonesia, at position 0° 58′ 05″ S., 117° 08′ 27″ E.

DOCUMENTS: Indonesian Immigration, Customs, Harbour Master and Port Officials will board the vessel to grant clearance and will require the following for inspection:

2 Parcel Lists.
2 Currency Lists.
2 Arms & Ammunition Lists.
2 Inventory Lists.
2 Vaccination Lists
2 Animals Lists
2 Narcotics Lists.
8 Crew Lists.
2 Crew Declaration of Personal Belongings.
2 Ship's Stores List (inventory).
3 Passenger Lists (if any).
2 Cargo Manifest for Transit Cargo with a summary.
Clearance from the Last Port of Call.
Valid Passport and/or Seaman's Certificate for all crew members.
Certificate of Inoculation against any contagious diseases.

If arriving from a foreign port, the following documents may be required for granting Pratique: Certificate of Registry; Ship's Construction Certificate; Load Line Certificate; Life Safety Equipment Certificate; Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate and Derat or Exemption Certificate. TOVALOP Certificate.

Crude oil loading documents will be prepared at the Senipah Terminal and when the vessel has been loaded, the documents will be completed and final clearance formalities will be carried out on board.

Also see "General" before first port.

FLAGS: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Senipah. These signals shall be displayed continuously until clearance is granted.

The signals are as follows: Sunrise to Sunset: Quarantine Flag "Q". Sunset to Sunrise: Signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Mooring Master boards. The vessel should also fly its call sign (signal letters). This signal may, however, be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area and the Mooring Master has left. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag. The tanker may fly the "P" flag if it is going to sail within 24 hours.

PILOTAGE: *Procedure when berth is available on arrival.*

A vessel for which the berth is available on arrival will be boarded by a Mooring Master in the anchorage area and, providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be acknowledged as soon as tendered to the terminal by the Master of the vessel.

The Mooring Master will advise the Master on all manoeuvres to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch.

At night, adequate lighting should be provided.

When Mooring Master boards all mooring and hose equipment will be lifted on board from the mooring launch.

NAVIGATION AIDS:

S.B.M.: The S.B.M. has a 360° yellow light, flashing every second, visible for 5 miles under an atmospheric transmissivity of 0.85. This operates from sunset to sunrise.

Oil Platforms: Oil platforms of Bekapai Oil Field which are situated approximately 17 miles East by North of Senipah SBM, show at night a white light flashing, 2 short and 1 long flash (letter U).

ANCHORAGE: If vessels are obliged, or instructed to anchor, they should do so in the recommended anchorage area which is centred at position: Lat. 1° 05′ 29″ S., Long. 117° 15′ 01″ E. and has a radius of 1 mile. Water depth is between 40 m. to 45 m. While at anchor they should exercise vigilance and keep in touch with the Terminal by VHF at all times.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Senipah Terminal to anchor on arrival should, after doing so, inform the Terminal of the precise anchoring time. According to the practice of the Terminal acknowledgement of the Notice of Readiness will coincide with this anchoring time, providing:

a) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
b) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
c) That the Terminal is open.
d) That cargo is available in accordance with accepted loading date.

In addition to clauses (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last advised ETA. It is not the practice of the Terminal to keep Pilots (Mooring Masters) on station in the anchorage area. Senipah Terminal maintains a continuous listening watch on VHF (Channel 6).

RESTRICTIONS: Berthing during daylight only. Unberthing at any time.

MAX. SIZE:

Minimum Size: Minimum size tanker acceptable at the Terminal is 50,000 d.w.t. However, on an exceptional basis, it will be possible to accommodate tankers of 32,000 d.w.t. minimum size but must be able to use SBM mooring system. Minimum LOA 195 m.

Maximum Size: Maximum size tanker acceptable lifting a full cargo will be 125,000 d.w.t. On exceptional basis, Terminal can consider handling a tanker up to 150,000 d.w.t. Max. LOA 275 m.

Tankers of a larger size may be accommodated in the future, provid that Senipah is their first port of loading and that they load a part ca only. These limits are at present under study.

Draft Requirement on Arrival: Vessels arriving at Senipah Mar Terminal should have the following draft:

d.w.t.	Fore	Aft
Under 60,000	5.0 m.	8.0 m.
Over 60,000	7.0 m.	9.0 m.

RADIO: *Advice of Arrival:* 72 hours prior to arrival at the Termi vessels should advise the Company of their ETA by cable sent v Pertamina's Coastal Radio Stations at Jakarta/Merak/Balikpapan. Th should also confirm or amend them when they are 48 hours, and ag when 24 hours, distant from the Terminal.

Total Indonesie cable address: Totalindo Balikpapan. Attentio Senipah Marine Terminal and Totalindo Jakarta. Attention: Shipcoor

Note: 1. All messages destined to "Pertaminaship" can be sent to eith PKI2, PKQ or PKN2.

Details of Cable: The following information should be included in cab

(a) Name of vessel and radio call sign.
(b) ETA and date in local time (GMT plus 8 hours).
(c) Cargo requirements.
(d) Deballast time.
(e) Maximum loading rate.
(f) If there is any sickness aboard or clean bill of health.
(g) Last port of call.
(h) Any hull, bulkhead, valve or pipe-line leaks on vessel which cou affect loading or cause pollution.
(i) Distance in metres from bow to vessel's loading manifold.
(j) Flange dimensions of vessel's manifold connection, if not to AS series 150 or equivalent.

2. For tankers equipped with telex system, can make direct conta to: TI JKT attention Ship-Coord: Telex No. 44108. TI BPPN attentio Snp-Term: Telex No. 37101 or 37181.

Failure to advise Terminal of ETA may lead to loss of berthing turn.

Also see "General" before first port.

VHF: Vessels equipped with VHF Radio Telephone should conta terminal on international mobile service Channel 6 from 0000–2400 h GMT. Other Channel used is 16.

Language: The language of the Terminal is English and Indonesian.

BERTHING: The SBM is approximately 6 miles (11.1 km.) offshore approximately 28 m. of water.

The SBM is served by 2 submarine lines of 26 in. diameter. T strings of 20 in. hose connect the SBM to submarine line header. T 20 in. floating hose strings reduced to 12 in. are connected to Tan for loading purposes. Hoses are lifted up and connected individually port side.

Work Crew Service: Mooring, unmooring, lifting, lowering, connec and disconnecting hoses will be done by ship's crew under the direc of the Mooring Master and assistance of Terminal crew.

Accommodation and meals: The Company Mooring/Loading Master a his crew (2 persons) stay on board the tanker during the time of operations. Free accommodation and meals of the same standards those of the Tanker's officers (for the Mooring Master) and of the Tan crew (for company crew) must be provided.

Tanker's Engines: Being on open roadstead, vessels must keep eng on standby during their stay in berth. No repairs to main engines m be undertaken while in berth.

Only the automatic turning gear should be used. If it should bec necessary to turn the propeller(s) at revolutions greater than minimum obtained by the automatic turning gear, application mus made to the Mooring Master in order to ensure that there is inconvenience to do so.

The Mooring Master's written permission must be obtained before such increase in revolutions.

MOORING/UNMOORING: *Method of Securing to Buoy:* This description is only intended as a guide and may be varied as to orders of lines etc. according to circumstances and weather prevailing at time of mooring.

When Mooring Master boards all mooring and hose equipment for the job on hand will be lifted from the mooring launch.

The Approach: The vessel will be brought to a position close to the buoy with vessel stopped in water with SBM fine on port bow. During approach to SBM, one mooring launch will keep hoses well clear of vessel. Under normal conditions the port side SBM rope will be the first rope taken on board. Mooring Master will advise which rope will be taken first. Actual work of mooring will be done by ship's crew with assistance from terminal work crew. Vessel will lower a mooring rope with good lashing on eye to the mooring launch which will make this fast to approach rope. The approach rope of 10 in. circumference polypropylene will be hove on board until the chafing chain is approximately centred in the fairlead.

Securing the Mooring Lines: While approach is being made, two 11 in. rope strops will be made fast one on each side to the forecastle bitts. The strop will be attached to a 50 ton shackle with pin removed. This shackle should be lying between 2 m. to 3 m. in board of fairlead.

When sufficient chafing chain has been heaved on board, the rope strops will be shackled on to the end links of the chain. The approach rope will then be slackened off and used as back up to the rope strops. The second rope is made fast in the same manner. When mooring is completed the mooring launch will be made fast by a mooring rope (200 m. long) through the centre lead aft so as to be in position to tow as long as the tanker is in the berth.

Connecting Hoses: When mooring is completed a work boat holding the hoses clear will bring the hoses alongside the port side manifold for connection.

Unmooring: To unmoor from the SBM all extra back up lines that have been secured are slipped first. The approach rope is then taken to ship's windlass/capstan and hove up, both of them together, until sufficient chain is in board to remove both shackles from the terminal strops. When the vessel is moving slowly astern the approach ropes are slackened off into the water slowly and finally slipped until allowed to float free.

LOADING:

Loading Rate: Maximum loading rate will be nearly 25,000 barrels (3,750 metric tons) per hour. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible.

Care should be taken not to overload, as there is no possibility whatever of pumping back to Terminal. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in completely light condition.

Hose Lifting Derricks – Deck Winches: Ship booms and deck winches must be capable of operating with a SWL of 5 tons for tankers to be secured to the SBM. Vessels with inadequate hose lifting equipment will be rejected. Power must be kept on deck winches in case adjustments to mooring lines are found to be necessary.

Manifold sizes: The hoses at the terminal are 12 in. in diameter.

Tanker manifolds should terminate in ASA series 150. Unless terminal is given adequate notice, tankers equipped with other sizes or ratings will be rejected.

Grades of crude oil available: There are 2 grades of Crude Oil available at Senipah Marine Terminal, namely, Bekapai Crude Oil and Handil Crude Oil. Vessels lifting Bekapai Crude are not required to heat the oil during voyage to the discharge port.

Vessels lifting Handil Crude Oil are required to be equipped with heating coils.

It is recommended, as from commencement of loading of Handil Crude, the vessel should endeavour to maintain a temperature of 105°F or at least a temperature slightly above the pour point (±85°F) until the time the vessel discharges its cargo at the unloading port.

In case a vessel has to load 2 parcels of cargo (i.e. 1 Handil and 1 Bekapai), loading must be stopped between the two parcels for line flushing with the second grade of oil.

Outward Clearance: A tanker will be considered clear to depart Senipah Terminal when the crude oil loading documents have been delivered to the Master.

Any protests by the Master concerning the quantity of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

BALLAST:

Adequate Ballast: Due to the exposed location of the crude oil SBM berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the Terminal.

Inspections During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution, whatsoever, will be cause for rejection. Similarly, any hull leaks causing pollution during loading wil! be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances.

The Customs Officer will seal the stores.

AIRPORT: Senipah Airport is near the town. Sepinggan Airport is 70 km.

TIME: GMT plus 8 hours.

SERVICES: There are no facilities of any kind at Senipah:

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.
No clinic available.

GENERAL:

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

AGENCY: *General Agent:* Pertamina Shipping Directorate, 32-34 Jalan Yos Sudarso, P.O. Box 327, Jakarta, Indonesia. Cables: Pertaminaship Jakarta. Tel: 691185, 692639, ext. 225-315-335. Telex: 49221, 49285 Jakarta.

SIBOLGA (Pulau Herek): 01.44 N. 98.45 E.

PILOTAGE: Not compulsory.

ANCHORAGE: Vessels anchor near Pulau Sarudik Beacon (red light). Position 01° 43′ N., 98° 45′ E. Depth 9.0 m.

RESTRICTIONS: Maximum draft 5.3 m. at LWS.

RADIO: Sibolga Coastal Radio Station. Call sign PKB-3. Frequencies: 474 kHz. and 500 kHz. (A1/A2).

TUGS: Privately owned tugs available.

BERTHING: A "T" shaped wharf with length 130 m. and width 10 m. The approach is 103 m. long and 15.5 m. wide. Depth alongside 5.3 m. at LWS. Maximum capacity 15 tons.

Storage: Godown space available of 900 sq.m. and open storage space of 600 sq.m.

Fork Lifts: 2 × 2 tons – 5 tons.

CRANES: Not available.

STEVEDORES: Available from labour pool.

FRESH WATER: Available when alongside wharf.

FUEL: Not available.

REPAIRS: No facilities available.

GENERAL: *Barges:* Privately owned flat-top barge available.

SORONG: 00.53 S. 131.15 E.

PILOTAGE: Compulsory. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.

ANCHORAGE: The anchorage whilst awaiting sea pilot is located in position Lat. 00° 52′ 00″ S., Long. 131° 13′ 30″ E.

RESTRICTIONS: Berthing and unberthing possible at any time day or night.

MAX. SIZE: 21,000 d.w.t. Max. LOA 175 m.

RADIO: Sorong Radio on HF, call sign PKY-41. The station is operated by Pertamina.

Vessels should contact Pertamina 72 hours, 48 hours and 24 hours prior to arrival.

BERTHING: The jetty is located in position Lat. 00° 52′ 54″ S., Long. 131° 14′ 43.8″ E. Depth alongside 11.0 m. at LWS.

Also see "Kasim Marine Terminal".

LOADING:

Cargo Handled:

Product	*Loading Rate (per hour)*	*Discharge Rate (per hour)*	*Hoses*
Crude Oil	800 bbls.		1×8 in.
Premium		100 k/l	1×6 in.
Kerosene		100 k/l	1×6 in.
HSD	40 k/l	100 k/l	1×6 in.

Shore Storage Tanks:

Oil Products	Total Safe Capacity
Crude Oil	170,000 bbls.
Premium	2,572 k/l
Kerosene	1,528 k/l
HSD	7,961 k/l
Slops	5,000 k/l

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	35 – 34
Reid Vapour Pressure at 100°F.	:	2.5 psi
Viscosity at 100°F.	:	5.9 cSt
Sulphur Content	:	0.7% wt.
Carbon Residue	:	1.0 – 2.5% wt.
B.S. & W.	:	0.05 – 0.10% vol.
Flash Point (PMCC)	:	Below 50°F.
Pour Point	:	10°F.

Loading Temperature: 86°F.

MEDICAL: Hospital and clinic available.

DENSITY: 1020 – 1025.

FRESH WATER: Available at a rate of 25 t.p.h.

FUEL: Available.

CONSULS: None.

AIRPORT: Jefman Island which is 8 miles away.

TIME: GMT plus 9 hours.

AUTHORITY: *Operator:* Pertamina, Pertamina P&T Unit, EP-V, Jl.A.Yani, Sorong, Irian Jaya, Indonesia. *Tel:* (0951) 21743. *Telex:* 77110. *FAX:* (0951) 21729.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E.

(See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles.
2 Stores Lists.

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 10 hours before arrival and 8 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The Sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position Lat. 6° 55′ 43″ S., Long. 112° 43′ 46″ E. Upon arrival at the pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green lig over a white light means: Pilot will board your vessel by row-boat as motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at th entrance by means of a pilot barge dispatched from Tg. Perak Pi Station at the Harbour Master's Office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbo Pilot takes over.

Request for Pilot: Request for Pilot is made by the ship's Agent 10 hou prior to the entry of vessel in port. At least, 6 hours prior to departu request for Pilot must also be submitted.

This request is submitted to Pilot Division on telephone numbe 293157, 291354.

For information regarding the arrival of a vessel, the Master of th vessel can send a cable to Tanjung Perak Port Administration by wa of VHF radio telephone on Channel 12, which is available round the cloc

The Master of the vessel can also send the cable through "PKD", se "Radio".

ANCHORAGE: Waiting anchorage for Pilot within:

Lat. 6° 51′ S., Long. 112° 45′ E.; Lat. 6° 51′ S., Long. 112° 47′ E Lat. 6° 52.5′ S., Long. 112° 47′ E.; Lat. 6° 52.5′ S., Long. 112° 45′ E Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Easte Channels.

Western Channel: Used for deep draft vessels with depth of 9.0 m. LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depth through this channel is 2.5 m. – 5 at LWS. Distance to Tg. Perak is about 22.5 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration w board the vessel at the Inner Roads (anchorage).

MAX. SIZE: The max. draft for vessels entering the access channel the port is 9.5 m. with a max. LOA of 210 m. without escort by tug.

If vessel's draft is over 9.5 m. and up to 10.2 m., it must be escorte by a tug through the access channel, and will only enter on high tide

RADIO: Coastal Radio Station call sign PKD.

Frequencies: 430, 500, 550, 8730 and 8754.4 kHz.

Pilot Station Karang Jamuang is also reachable through radio call sig PKW: frequency 500 kHz. This station can also be contacted by VH Channels 12, 16.

VHF: Pilot boats: Channels 16, 14, 12 and 10.

Pilot Station: Channels 12 and 14.
Harbour Master: Channel 16.
Tugs: Channels 12, 14 and 10.

TUGS: For poor steering vessels and those with deep drafts, tug assistance is indispensable from light buoy No. 5 till light buoy No is passed.

The tug service is provided by the Port Administration for which th Port Administration has 8 tugs (800 h.p. – 1,700 h.p.). 2 mooring boa also available.

BERTHING: The total length of effective quay in Tanjung Perak Po is 5,205 m.

Quay	*Length*	*Depth at LWS*
Jamrud Utara	1,117 m.	9.5 m.
Jamrud Selatan	800 m.	9.5 m.
Jamrud Barat	203 m.	9.5 m.
Berlian Barat	735 m.	9.5 m.
Berlian Timur	780 m.	9.5 m.
Berlian Utara	140 m.	9.5 m.
Nilam Timur	930 m.	9.5 m.
Perak	140 m.	9.5 m.
Mirah	755 m.	7.0 m.
Bogasari (wheat)	300 m.	9.5 m.

Tanker Terminal:

Government Petroleum Pier	Depth alongside at LWS is	9 m.
Semampir East	,,	12 m.
Semampir West	,,	10 m.

Coal Wharf: Situated at the Southern end of Tambatan Nilam, equippe with 1 transporter and 2 bunker barges with steam operated grippe owned by P.N. Tunda Bara.

PORT EQUIPMENT:

MEDICAL: Hospital and Port Health Centre.

TANKERS: See "Berthing".

STEVEDORES: Working hours: Monday-Thursday 0700 – 1200, 1300 – 1500 hrs. Friday 0700 – 1100, 1300 – 1500 hrs. Saturday 0700 – 1200 hrs. Overtime: Monday-Friday 1500 – 1700 hrs. Sundays, holidays 0700 – 1200, 1300 – 1500 hrs. Night work allowed after permission from the Port Authority.

Average for bulk cargo 20 t.p.h. per gang
Average for bagged cargo 27 t.p.h. per gang
Average for general cargo 20 t.p.h. per gang
Average for machinery/iron 8 t.p.h. per gang

FRESH WATER: Supply is handled by the Harbour Board to the berths and by 5 water barges. Present capacity about 1,100 tons per day for the whole harbour. Priority is for passenger vessels and application required 48 hours prior to ship's arrival.

FUEL: Fuel can be obtained via pipelines to all berths or by barge.

CONSULS: U.S.A., U.S.S.R., Japan, Great Britain, Belgium, Australia, India, Pakistan, Philippines, France and Netherlands.

REPAIRS: Dry-docking and all kinds of repairs are carried out by the State-owned P.N. Dock. There are floating docks, capable of lifting 15,500, 3,500 and 4,000 tons. There are several slipways for coasters.

Electronic Repair Shop: All kinds of electronic repairs such as radar, echo-sounder, etc., can be repaired by private contractors.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agents about local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

BANKS: Bank Negara 1946, Bank Bumi Daya and Bank Rakyat Indonesia.

DEVELOPMENTS: *Developments of the Short Term (1981-85):*

Supply of facilities for inter-state vessels: 8 quays length 640 m., 4 Godowns (area 13,700 sq.m.), 7 stacking areas (area 15,573 sq.m.).

Supply of facilities for container ships by changing part of the berths which are available, so that there is a facility for loading and unloading the containers: 4 quays length 1,200 m., stacking area 66,800 sq.m.

Build CFS (Container Freight Station) at the former Perak Airfield of an area 42,695 sq.m. To have available loading and unloading equipment: 2 multi-purpose mobile cranes, 12 head trucks, 27×40 ft./20 ft. chassis, 12×25 ton top loaders. 2×40 ton transtainers.

Developments of the Medium Term (1986-90):

Supply of facilities for inter-state vessels: 16 quays length 1,280 m., 8 Godowns (area 25,600 sq.m.), 8 stacking areas (area 30,000 sq.m.).

Supply of the facilities for container ships: 2 quays length 500 m., CFS near the quay 20,000 sq.m.

At the former Perak Airfield 200,000 sq.m. To have available loading and unloading equipment: 4 container gantry cranes, 18 head trucks, 32×40 ft./20 ft. chassis, 12×25 ton top loaders and 6×40 ton transtainers.

Developments Long Term (1991-2000):

At this stage a new basin at the West side of the Naval Academy is planned.

In this stage will be prepared: Facilities for inter-state vessels: 40 quays. Facilities for ocean-going vessels: 14 non-container quays, 2 container quays.

A container quay with length 500 m. and depth 10.5 m. will be completed September 1990.

AUTHORITY: Port Administration Tanjung Perak, Jalan Kalimas Baru No. 194, Tanjung Perak. *Tel:* 291194, 291364. *Contact:* The Harbour Master.

AGENT: See "Jakarta".

SUNGAI PAKNING: 01.20 N. 102.09 E.

PILOTAGE: Compulsory. Pilot requires 6 hours notice of arrival and 3 hours notice of departure.

ANCHORAGE: The anchorage whilst awaiting sea pilot is located in position Lat. 01° 56′ 30″ N., Long. 101° 50′ 30″ E.

The anchorage whilst awaiting berth is located in position Lat. 01° 23′ 00″ N., Long. 102° 10′ 00″ E.

RESTRICTIONS: Berthing during daylight hours only. Unberthing any time, day or night.

MAX. SIZE: 61,000 d.w.t. Max. LOA 220 m.

RADIO: Dumai Radio on HF, call sign PKP. This station is operated by Ditjenla.

(a) GENERAL CARGO
(b) TANKERS

(a) GENERAL CARGO

DOCUMENTS: See "Jakarta".
PILOTAGE: Compulsory pilotage consisting of Sea and Harbour Pilots. Ships requiring pilot service should notify the Harbour Master at least 24 hours before arriving at outer buoy. Tide: Semi-diurnal.

Pilots do not normally work at night. The approach buoys and leading lights are frequently extinguished and vessels arriving at night are recommended to anchor at No. 1. Buoy and await a Pilot in daylight.
ANCHORAGE: Lat. 03° 14′ 40″ N., Long. 117° 43′ 45″ E.
HEALTH: Vessels arriving from abroad direct in one of the 2nd Class Ports have to apply well in advance to the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad from the 2nd Class Port concerned.
RADIO: Tarakan Coastal Radio Station. Call sign: PKO. Class A1. This station also has VHF Maritime Bands working on the same hours as the Short Wave Transmissions.
VHF: Pilot Station on Channel 16. Harbour Master on Channel 12.
TUGS: None.
BERTHING: The anchorage will hold many ships but very little cargo is worked from the anchorage as most vessels calling are timber ships waiting to load. The very occasional ocean cargo ship usually unloads on to a barge but very occasionally goes alongside the Commercial Jetty.

The Commercial Jetty has a least depth of 5.5 m. and a length of about 100 m. There is a crane capable of lifting 2 tons on the inside berth. This jetty is very old and dilapidated and normally handles only small craft of local inter-island character.
STEVEDORES: Working hours: 7 hours on normal working days. Overtime can be arranged.
FRESH WATER: Limited supply available by barge.
FUEL: Not available.
GENERAL: Port doctor available.

Carrying a camera ashore or even on deck of a ship for photography is strictly prohibited.

There is a small hospital. No stores, water, or fuel oil are available. There are no repair facilities at all. Pertamina operates a small hospital and a clinic. There is air communication to other parts of Indonesia through Balikpapan.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

(B) TANKERS.

PILOTAGE: Compulsory. Pilot requires 12 hours notice of arrival and 10 hours notice of departure.
ANCHORAGE: The anchorage whilst awaiting the Sea Pilot is 5 miles East of Tg. Batu.

The anchorage when awaiting a berth is Lat. 03° 15′ 30″ N., Long. 117° 36′ 30″ E.
RESTRICTIONS: Berthing and unberthing during daylight hours only.
MAX. SIZE: *CBM:* 55,000 d.w.t. Max. LOA 200 m. Depth of water 15.0 m.

Jetty: 6,000 d.w.t. Max. LOA 120 m. Depth of water 10.5 m.
RADIO: Tarakan Radio (PKO) on HF and operated by Ditjenla.
VHF: Tarakan Radio (PKO-2) operated by Pertamina.
TUGS: Available.
BERTHING: *CBM:* Vessels moor to a 6 buoy sea berth located in position Lat. 03° 17′ 05″ N., Long. 117° 35′ 07″ E. Crude oil loading is at a rate of 4,000 bbls.p.h. through 2×10 in. hoses.
Jetty: The jetty is located in position Lat. 03° 17′ 11.5″ N., Long. 117° 35′ 25″ E. Premium, Kerosene, Avtur and HSO are discharged at the jetty at a rate of 200 – 250 k/l.p.h. through 1×8 in. hose.

– *Shore Storage Tanks:*

Oil Products	Total Safe Capacity
Crude oil	389,100 bbls.
Avtur	1,060 k/l
Premium	1,045 k/l
Kerosene	1,050 k/l
HSD	3,560 k/l

Physical Characteristics of Crude Oil:

API Gravity at 60°F.	:	21.5 – 19.5
Sulphur Content	:	0.13% wt.
B.S. & W.	:	Less than 0.5% vol.
Flash Point (PMCC)	:	35°C.
Pour Point	:	No higher than 5°C.

MEDICAL: First-aid clinic available.
DENSITY: 1020 – 1025.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None.
AIRPORT: There is an airport at Tarakan.
TIME: GMT plus 8 hours.
AGENCY: See "General" before first port.
OPERATOR: Tesoro Indonesia Pet. Co., Wisma Gunung Sewu, 5 6th Floor, Jl. Jend. Gatot Subroto, Jakarta, Indonesia. *Tel:* 5105 *Telex:* 46178 Tesoro-Ia.

TEGAL, Java: 06.52 S. 109.10 E.

DOCUMENTS: Upon arrival, vessels have to produce the follow Certificates and Documents, which will remain in the Harbour Maste custody until cleared:

Nationality (Registry) Certificates.
Seaworthiness Certificate.
Tonnage Certificate.
Derat (Exemption) Certificate.
International Loadline.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio-telegraphy Certificate.
Vaccination List.
5 Crew Lists.
2 Stores Lists.
2 Crew Baggage's Declaration.
Last Port Clearance.
Health Book.
Custom Clearance and Custom Documents.
Cargo Manifest and Bills of Lading.

When vessels arrive direct from foreign port, Customs and Harbo Police Officials board for search.
PILOTAGE: None.
ANCHORAGES: Lat. 06° 49′ S., Long. 109° 08′ 07″ E.
RESTRICTIONS: No restriction on night entry, but work is done day (after 0800 hrs.).
MAX. SIZE: Max. draft for entering the port is 9 ft.
HEALTH: Maritime Declaration of Health needed from Master, if vess coming direct from abroad. If vessel comes from other Indonesian po automatic Free Pratique.
RADIO:
I. Fixed Station:
Call sign 8AC on freq. 5315 kHz at 0100 – 0130 GMT
0230 – 0300
freq. 5165 kHz at 0430 – 0500 GMT
1000 – 1015
II. Tegal Coast Radio Station:
Call sign PKD 21 on freq. 2182/2690 kHz at 0030 – 0100 GMT
0400 – 0430
III. Open every day except on holidays.
VHF: Tegal Coastal Radio Station on Channel 16.
TUGS: Only used for towing lighters to vessels on the roads.
BERTHING: None. Anchorage only.
STEVEDORES: Ordered by Agent. If possible before arrival of vess some information mainly concerned with requirements of the Shipmas advises Agents to arrange gangs and available space for Tegal ca
MEDICAL: Normally medical attention for crew to be arranged by Ag at order of Master.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None available locally.
REPAIRS: Slipways and berths for small vessels, LOA 25 m. and draft
GANGWAY/DECK WATCHMEN: Services of watchmen if necessary ordered by Master.
OPENING/CLOSING HATCHES: Carried out by crew – sometimes stevedores.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits not allowed taken ashore.
REPATRIATION: Agents arrange necessary repatriation of crew.
TIME: Indonesian Western Time, GMT plus 7 hours.
HOLIDAYS: Only Moslem holidays: Id el Fitr. For 2 days no cargo can be arranged.
POLICE/AMBULANCE/FIRE: Accident, Police, Tel: 10; First Ai Ambulance (Texin Hospital), Tel: 387; Fire Departments (Texin), 17.
TELEPHONES: No facilities for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore from 0800 2100 hrs. every day. Not allowed to spend night on shore.
IDENTIFICATION CARDS: Necessary.

REGULATIONS: Crew members not allowed to bring cameras and/or foreign money ashore.
AUTHORITY: Tegal Port Directorate, Syahbandar, Jl. Kesatrian No. 6, Tegal, Indonesia. *Tel:* 61038, 41107.

TELOK AYER: 00.44 S. 109.05 E.

SHIPMASTER'S REPORT: March 1982.

PILOTAGE: Pilot Station in position: Lat. 00° 39′ S., Long. 109° 05′ E. Pilot comes from inner anchorage by small boat, journey time 5 hours.
ANCHORAGE: Vessels approaching Telok Ayer (Telok Airport) drop anchor 5 cables West of Fairway Buoy in position: Lat. 00° 39.5′ S., Long. 109° 05.5′ E.
RADIO: 24 hours notice to Agent to arrange Pilot.
VHF: Call "Padang Tikar Pilot" on VHF Channel 16.
CARGO HANDLING: Depth at loading point is 6 fathoms. Maximum depth in entrance to Padang Tikar River is 7.2 m. at HW. Vessels load plywood and sawn timber.
GENERAL: There are no alongside facilities for ships.

Stevedores, Shippers, Immigration and Customs Officers take full meals and accommodation onboard, during the loading operation, as the nearest town (Pontianak) is 12 hours away by speedboat.

TELUK BAYUR (Padang): 00.58 S. 100.20 E.

(See Plan)

FLAGS: *Flags to be Shown by Incoming Vessels:*
Nationality of vessel and Indonesian flag.
Call sign.
"Q" when the vessel comes from an infected port or when calling for a Port Health Officer.
"G" when Pilot is required.
"N" when vessel from abroad carrying Passengers. (Request for Immigration).
"H" when Pilot is on board.
"Y" when mail on board.
"B" when carrying dangerous cargo.
Flag to be Shown when Vessel Leaving Port:
Nationality of vessel and Indonesian flag.
Call Sign.
"H" Flag when Pilot is on board.
DOCUMENTS:
a) The Master must have in readiness for the Harbour Master Officials:
Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Radio Safety Certificate.
Derat Certificate.
Safety Equipment Certificate.
Last Port Clearance.
Health Book (Indonesian Health Book) to be used in Indonesian waters only.
Crew List.
Stores List.
Personal Effects List.
Free Pratique.
Light Dues Bill from Port of Call (last Port).
b) Cargo Documents required by the Agent to clear the Vessel through Customs:
Customs Cargo Clearance.
Manifest.
Customs Document (outward cargo AVI and model E3).
Customs Document (inward cargo – AA).
Customs Document of transhipment cargo (model HH).
Authorities boarding the vessel on arrival:
Port Health Doctor (Quarantine Officer):
1. All vessels entering Port of Teluk Bayur from abroad should obtain Free Pratique. Vessel must wait until the Quarantine Officers board the ship before entering.
2. Documents to be shown to the Port Health Doctor:
Indonesian Health Book.
Crew List.
Passenger List.
Vaccination List.
International Vaccination Certificate.
Derat Exemption Certificate.
Customs:
1. It is prohibited during vessel's stay to sell any goods belonging to crew.
2. Foreign vessel, if carrying local cargo must have coasting permit.
3. Documents to be shown to Customs:
Cargo Manifest.
Provisions/Stores List.
Crew List.
Crew Personal Effects Declaration.
Last Port Clearance/Custom clearances.
Immigration:
1. All vessels coming from abroad (Indonesian vessels as well as foreign vessels) are to use crew passes.
2. Foreign crew to be repatriated must be accompanied by an Immigration Officer, except if their pass is a visa.
All expenses (ticket and travelling expenses) are for owner's account.
3. All foreign transit passengers have to fill in an embarkation/debarkation card.
4. Vessels arriving from abroad carrying passengers; The Master is also obliged to provide the Immigration Officers with a List of the Passengers on board.
5. Documents to be shown to the Immigration Officers:
Crew List.
Passenger List.
Crew Passports/Passengers' Passports.
Last Port Clearance/Immigration Clearances.
6. Foreign passengers landing at Teluk Bayur Port without visa, *must pay for Immigration Fee.*
Harbour Master:
1. If vessel intends to use their own life/motorboat for rowing exercise, permission should first be obtained from Harbour Master and Coast Guard.
2. Documents to be shown to the Harbour Master:
Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Vessel and Passenger Safety Certificate.
Radio Safety Certificate.
Master Roll.
Crew List.
Passenger List.
Cargo Documents:
Cargo Manifest covering Teluk Bayur cargo – 7 copies.
Cargo Manifest covering cargo for other Port – 7 copies.
Stores List – 7 copies.
Crew Personal Effects List – 7 copies.
Crew List – 10 copies.

The above apply for a single call. In the event of a vessel arriving from a out-port for re-checking at Teluk Bayur, another set of copies of the Stores List and Personal Effects List must be re-submitted.
PILOTAGE: Compulsory harbour pilotage. Ships have to wait for Pilot inside the roads limits.(See "Anchorage").
Pilot is available each day from 0000 – 2400 hrs. ETA required 6 hours before arrival. ETD required 3 hours before departure.
ANCHORAGE: Vessels should anchor outside the breakwater until Pilot comes on board at Position: Lat. 1° 00′ 50″ S., Long. 100° 22′ 20″ E. Distance from anchorage to the quay/jetty is about 2 miles.

Approaching the anchorage is not recommended during darkness due to fishing vessels and narrow channel.
HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port. The provisional Free Pratique is only valid for the port and the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.
RADIO: Padang Coastal Radio Station: Call sign PKP 2.
Frequencies: 500, 6355, 2182, 6218 and 6215.5 kHz.
Arrival Advice: Required before ship's arrival (to be telegraphed 48 hours prior to ship's arrival, however not less than 24 hours via Radio Station).
a. Name of vessel.
b. ETA at the Roads.
c. Draft.
d. Quantity of cargo to be discharged (in tons).
e. Number of passengers disembarking, also dangerous cargo (if any).
f. Ship's requirement (quantity required).
g. Any other information.
VHF: Pilot Station on Channel 12. Port Operations on Channel 16.
TUGS: *Selat Siberut* of 1,700 h.p. and *Selat Riau* of 1,200 h.p. are stationed at Teluk Bayur, the use of which is compulsory for incoming and outgoing ocean-going ships. Mooring boat available.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
1st wharf	108	10.0 (under repair)
2nd wharf	108	10.0 (under repair)
3rd wharf	96	10.0 (under repair)
4th wharf – I	150	10.0

T.S.B.	150	10.0
Coal Terminal	225	7.5

CRANES: 1 mobile crane 25 ton capacity, operated by Perum Pelabuhan II Teluk Bayur.
Forklifts: Capacity 10 tons (one), capacity 5 tons (two), capacity 3.5 tons (two), capacity 2.5 tons (three).
P.T. Trikors Lloyd: capacity 3 tons (two), capacity 5 tons (one).
P.T. Samudera Indonesia: capacity 2.5 tons (one).
P.T. Djakarta Lloyd: capacity 2.5 tons (four).
P.T. Rintis Prasetya Stevedoring: capacity 3.5 tons (one).
P.T. Bomala: capacity 2.5 ton (two).
P.T. Karya Nasional: capacity 2.5 ton (one).
P.T. Setia Jaya: capacity 3.5 ton (one).
FRESH WATER: Available at wharf, officially at a rate of 15 cu.m. per hour, unlimited quantity during the wet season (September-April). During the dry season with a maximum request of 150 cu.m. and a capacity of 4 – 6 cu.m.p.h. Water should be boiled or chemically treated before consumption.

STEVEDORES: *Working Hours:*
Monday-Thursday: 0800 – 1200; 1300 – 1600; 1800 – 2400; 0100 – 0400 hrs.
Friday: 0800 – 1100; 1330 – 1600; 0000 – 0100; 0100 – 0400 hrs.
Saturday: 0800 – 1200; 1300 – 1600; 1800 – 2400; 0100 – 0400 hrs.

Overtime can be worked at request of the ship on normal days and Sunday/Holidays, are counted as overtime from 0800 – 2400 hrs. and from 0000 – 0600 hrs.

Rest hours (meal time): Monday till Thursday: 1200 – 1300; 0000 – 0100 hrs. Friday: 1100 – 1330; 0000 – 0100 hrs.
Day overtime: 1600 – 1800 hrs.
Night overtime: 0000 – 0100; 0400 – 0600 hrs.

Discharging/Loading Rate:
Average speed for:
Discharging: General cargo 12 – 15 tons per gang hour. Bagged cargo 18 – 20 tons per gang hour.
Loading: General cargo 12 – 15 tons per gang hour. Bagged cargo 18 – 22 tons per gang hour.

Number of Men per Gang: Ships gang 15 men. Wharf gang 20 men.

FUEL: High speed diesel and MFO available at Wharf No. 1 and Beton No. 1.

REPAIRS: Dry dock available for ships up to 500 d.w.t. Machine-workshops for minor repairs available.

SURVEYORS: Available.

MEDICAL: Teluk Bayur has harbour clinic for emergency cases. Hospitals at Padang.

AIRPORT: At Tabing, distance 15 km.

DEVELOPMENTS: Padang Cement have a new bagging terminal in operation.

AUTHORITY: Port Administration of Teluk Bayur/Padang, Jalan Tg. Priok, Teluk Bayur/Padang, Sumatra, Indonesia. *Tel:* 21836, 27282, 21066. *Telex:* 55151 Adpel Pd. *Contact:* V. Sima Da Silva, Port Administrator.

TELUK SEMANGKA (Semangka Bay): 05.34 S. 104.37 E.

PORT LIMITS:
Limit of Anchorage:
(a) Lat. 05° 32′ S., Long. 104° 36′ E.
(b) Lat. 05° 32′ S., Long. 104° 39′ E.
(c) Lat. 05° 36′ S., Long. 104° 39′ E.
(d) Lat. 05° 36′ S., Long. 104° 36′ E.

LOCATION: There are 2 storage tankers located in positions Lat. 05° 34′ 15″ S., Long. 104° 36′ 45″ E. and Lat. 05° 33′ 10″ S., Long. 104° 35′ 00″ E.

DOCUMENTS:
11 Crew Lists.
11 Passenger Lists.
7 Stores Lists.
7 Slop Chest Lists.
3 Customs Declaration Forms.
1 Clearance from Last Port.
2 Cargo Manifests.
2 Crew Personal Effects Lists.
1 Health Declaration.
1 Master's Declaration provided by Agent on arrival.

PILOTAGE: Pilot and Mooring Master board at the anchorage.

ANCHORAGE: In same area as floating storage vessels in about 30 fathoms of water. There is a gap in the fish traps with Tg. Balang Besi bearing 093° × 6.9 miles. This is about 9 cables from storage vessels.

The anchorage when awaiting the Sea Pilot is in position Lat. 05° 28′ 55″ S., Long. 105° 17′ 20″ E.

RESTRICTIONS: Berthing during daylight hours only. Unberthing at any time.

MAX. SIZE: 235,000 d.w.t. Depth of water 59 m. Max. LOA 325 m.

HEALTH: "Q" flag must be flown until Officials have been on board.
Port Officials come from Panjang.

RADIO/VHF: ETA etc. to be sent to Pertamina Jakarta.

Agung Radio, which is situated at Kota Agung at the head of the bay, may be contacted on VHF Channels 16 or 9 during office hours.

Panjang Radio (PKC-6) operated by Pertamina, may also be contacted on VHF.

TUGS: 2 tugs used for berthing/unberthing.

BERTHING: Vessels berth alongside Floating Storage Tankers with Yokohama fenders on starboard side. They are anchored in positions between 2 miles and 4 miles from the head of the bay.

Vessels berth port side alongside. Access is provided by floating storage vessel.

Hose connection amidships. Storage tankers mooring gang connect hoses. Ship's crane/derrick required for hose support. 2×12 in. hoses used, 1 per grade.

MEDICAL: Hospital clinic available.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: No facilities available.

AIRPORT: Baranti Airport at Bandar Lampung.

TIME: GMT plus 7 hours.

GENERAL: It must be ensured that the STS operation is carried ou accordance with the ICS/OCIMF STS transfer guide and ISGO recommendations.

There are approximately 100 moored floating fish traps in the a They are met with from about 7 miles from the head of the bay. At nig they are well lit with powerful fishing lights and they tend to lie in li which, with care, allows access to the Anchorage Area.

Accommodation may be needed for Pilot and Mooring Master.
Numerous jellyfish may cause problems with intakes.

AGENCY: See "General" before first port.

SHIPMASTER'S REPORT: January 1983.
Documents: Advisable to have at least 12 copies of Crew List. Harb Master takes all certificates ashore and returns same prior to sailin
Pilotage: No Pilots available for anchoring. Mooring Master ber unberths vessel alongside storage tanker.
Anchorage: Good anchorage in depths of 15 fathoms – 50 fathoms water in the Northern part of the bay.
Radio: PKI 1 and PKI 2 (Jakarta).
VHF: "Kota Agung Radio" keeps continuous watch on Channel 9.
Pertamina, local Agent, Mooring Master and storage tankers can contacted on Channel 9.
Tugs: Two harbour tugs available for berthing/unberthing.
Tankers: No berths. 2 storage tankers of about 235,000 d.w.t. handl gas oil and kerosene. 4 Yokohama fenders on the starboard side storage tankers. 12 in. hoses used for cargo transfer.
Fuel: Gas oil available.
Consuls: British Consul stationed in Jakarta (Tel: 330904).
Repairs: Minor repairs possible.
Surveyors: Lloyd's and Indonesian Government Radio Surveyors h to come from Jakarta to carry out vessels Safety Equipment and Saf Radio Telegraphy Surveys.
Airport: Nearest airport at Tanjung Karang, 100 km. away. Several flig to Jakarta daily.
Time: GMT plus 7 hours throughout the year.
Services: Limited stocks of fresh fruits, vegetables and meat availa locally.
Shore Leave: Pertamina operates 3 service boats daily for crew to ashore.
Identification Cards: Not necessary.
Delays: About 7 days – 10 days for discharging gas oil.

TERNATE: 00.46 N. 127.22 E. (See Pla

DOCUMENTS: The following documents must be ready upon vesse arrival:
14 copies Crew List.
12 copies Passenger List.
5 copies Stores List.
8 copies Cargo Manifest.
Bills of Lading
8 copies General Information.
5 copies Personal Effects List.
5 copies Vaccination List.
5 copies Firearms and Ammunition List.
Harbour Report.
Last Port Clearance.
Completed Declaration of Health.
Valid Derat Certificate.
Passports.

PILOTAGE: Compulsory. Notice of ETA and request for a Pilot m be made at least 6 hours in advance to Pilotage Authority throu Ternate Radio (Coastal Station) on VHF Channel 16 or direct to Tern Pilot Station on VHF Channel 12.

Pilotage service address: Dinas Kepanduan Perum Pelabuhan Cabang Ternate. Tel: 21574.

ANCHORAGE: Safe anchorage in harbour but better anchorage ab 3 cables to the East of wharf in a depth of about 65 m.

MAX. SIZE: Max. draft alongside 9.5 m.

HEALTH: Pratique is normally given by Pilot Station. Any advice health matters obtainable from pilot service.

RADIO: Ternate Coastal Station, call sign "PKE" on VHF Channel Pilot Station on VHF Channel 12 (Every day during working hours: 0 – 1500).

TUGS: As required by Pilots, ship's line normally used.

BERTHING: Berth No. 1: Wharf length 248 m. Depth at LWS 10 m

CRANES: 1 × 25 tonne mobile heavy lift crane.

STEVEDORES: Stevedoring arranged by labour union via Agent.

MEDICAL: Hospital facilities available.

DENSITY: 1025.

TANKERS: Oil Jetty (Pertamina Depot): Located 9 miles Sout Ternate. Max. size alongside is 7,000 d.w.t.

FRESH WATER: Available from berth, rate 40 t.p.h.

FUEL: Oil delivered by tank trucks.

CONSUL: None.

DRY DOCKS: No facilities.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

OPENING/CLOSING HATCHES: By stevedores or ship's c Whichever to ship's advantage.

REPATRIATION: Crew changes and repatriation can be arranged

AIRPORT: Distance about 5 miles, served by Bourag Air Lines Merpati Nusantara Airlines.

TIME: GMT plus 9 hours.

POLICE: Tel: 21164.

EMERGENCY CO-ORDINATION CENTRE: Ternate Coastguard Tel: 21143.
SHORE LEAVE: No restrictions.

CERTIFICATES: Register, Tonnage and usual Certificates.
GENERAL: *Ship's Inspection Team:* This team consists of the Port Health Officer, Customs Officers, Harbour Master/Immigration Officer. The vessel having been granted Free Pratique, the Immigration Officer starts checking Passports, Seamen's Books and Crew Lists and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Ternate Port.

The ship's radio transmitter may not be used whilst vessel alongside.
Chart: Indonesian Chart No. 385.
AUTHORITY: The Port Administrator, JL. Jend. A. Yani No. 1, Ternate. *Tel:* 21129, 21206, 21574.
Harbour Master, JL. Jend. A. Yani No. 1, Ternate. *Tel:* 21572.

TUBANG: 01.45 S. 125.06 E. (See Plan)

SHIP'S OFFICER'S REPORT: August 1989.

LOCATION: Port of Tubang is situated on the Northern side of Taliabu Island, in the Molucca Sea. Built-up areas consist mainly of Tubang Sawmill and scattered houses for the labourers.
PILOTAGE: A Singaporean supercargo who assists the Master in anchoring, boards in position Lat. 01° 44′ S., Long. 125° 4′ 30″ E.
ANCHORAGE: The anchorage, which also serves as loading position, is in position Lat. 01° 45′ 16″ S., Long. 125° 05′ 37″ E. The depth of water is 18.0 m., with muddy bottom. This vessel (19,000 g.r.t.) used 5 shackles of chain. The Southerly wind reached a maximum 15 knots.
RESTRICTIONS: Vessel waited until daylight before entering as no chart available (BA. Chart No. 3241 was of little use). Later, the Agent supplied us with Indonesian Chart No. 274, which we used when leaving.
RADIO: Ambon Coast Radio. Call Sign PKE.
MEDICAL: First Aid available.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
OPENING/CLOSING HATCHES: By ship's crew.
STEVEDORES: Work throughout 24 hours.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of wine/spirits per person.
TIME: GMT plus 9 hours. No alteration of clocks during the year.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not necessary.
GENERAL: Pratique granted on arrival at the anchorage. Agent and Port Authorities are from Ambon. They boarded the ship together with the stevedores, who are from the adjacent island of Mangoli. After formalities had been completed, the Agent and 2 Customs Officers remained on board. Food and accommodation must be provided by the ship. As for the stevedores, fresh water and a makeshift "toilet" should be provided, as they cooked and stayed on board during loading operation.

On departure, the stevedores disembarked, but the Agent and Customs stayed with the ship until the next loading port of Waisarisa, Seram Island. They disembarked after completion of loading.

The Singaporean supercargo also stayed on board and disembarked while receiving fuel and stores in Singapore.
Provisions: Small quantity of provisions and stores can be obtained.

UDANG NATUNA: 04.02 N. 106.29 E.

LOCATION: The SBM and storage tanker "Udang Natuna" are located in position Lat. 04° 02′ 14″ N., Long. 106° 28′ 53″ E., in a depth of 19 m.
DOCUMENTS:
6 copies Crew List.
6 copies Passenger List.
1 copy Cargo Manifest.
1 copy Ship's Stores List.
1 copy Personnel Effects List.
Maritime Declaration of Health.
Clearance from Last Port.
ANCHORAGE: The anchorage whilst waiting for berth is at Lat. 04° 04′ N., Long. 106° 25′ E.
RESTRICTIONS: Berthing and unberthing in daylight hours only.
MAX. SIZE: 93,000 d.w.t. Max. LOA 260 m.
RADIO: Vessels use Jakarta Coastal Radio Station, call sign PKI-2, which is operated by Pertamina.
VHF: Vessels should make contact through Merak Radio, call sign PKQ. This station is also operated by Pertamina.
BERTHING: Vessels moor alongside the storage tanker, port side to. Crude oil is loaded at a rate of 25,000 Bbls.p.h. through 2×12 in. hoses.
Physical Characteristics of Crude Oil:
API Gravity at 60°F. : 39.6
Reid Vapour Pressure at 100°F. : 2-5 psi
Sulphur Content : 0.03 % wt.
Flash Point (PMCC) : Below 50°F.
Pour Point : 100°F.
AIRPORT: Nearest airport at Ranai.
TIME: GMT plus 7 hours.
AGENCY: See "General" before first port.
AUTHORITY: Continental Oil Co. of Indonesia, Sacna Graha Lana Building, 1st-5th Floor, Jl. H.R. Rasuna Said, P.O.Box 367, Jakarta, Indonesia. *Tel:* 792051. *Telex:* 47265 Conoco-Ia, 47275 Conoco-Ia.

WAISARISA: 03.13 S. 128.16 E. (See Plan)

SHIP'S OFFICER'S REPORT: August 1989.

LOCATION: Teluk Piru, Seram Island. B.A. Charts No. 3241 and 3242 used.
ANCHORAGE: The anchorage, which also serves as loading position, is in position Lat. 03° 12′ 54″ S., Long. 128° 15′ 39″ E. Depth of water is 80 m. – 85 m. Bottom is sand and mud. At times fresh breeze prevails from S.E. to S.W. and creates swell. At these times barges should always be alongside the vessel's port side.
RADIO: See "Ambon".
MEDICAL: A doctor is available.
DENSITY: 1025.
STEVEDORES: Work 3 shifts.
TIME: GMT plus 9 hours.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not necessary.
AIRPORT: See "Ambon". Reachable from Waisarisa by speedboat ferry which leaves Waisarisa every morning.
GENERAL: Private port. There is a pier, but used mainly by tugs. Salvage work is in progress on a wreck a few metres from the pier.

Three to 4 ships can be accommodated at the anchorage.
Provision: Vegetables and some stores available.

WAMSASI: 03.33 S. 126.09 E.

Log loading port on the West coast of Buru Island in position: Lat. 03° 33.5′ S., Long 126° 09.5′ E.

Vessels anchor 600 m. (approximately) off-shore in depth of 15 m.

NOTES

Please also advise Shipping Guides Ltd.

Iran

GENERAL

Note: Movements of all types of general cargo, bulk cargo, refrigerated cargo, containers, steel products, machinery, cars, etc., are expected to increase considerably.

Dry cargo ports which are operational are Bandar Abbas, Bushire, Bandar Khomeini and Chah Bahar.

The ports of Abadan and Khorramshahr are not expected to be operational for some time.

Until further notice, all vessels calling at Iranian dry cargo ports must be self-sustaining.

There is a "Note" at the beginning of each port stating the latest position.

Money/Liquor: Ship's personnel travelling to and from Iran should be warned of the inadvisability of carrying liquor and/or large sums of money, both of which are liable to be confiscated.

Flag: Vessels to fly the flag of the Islamic Republic of Iran (flag is green, white and red with a red emblem in the centre).

NOTICES:

B.A. Notice to Mariners No. 34/83:

The Government of Iran has made the following announcements:

1. Vessels proceeding into the Gulf after passing through the Strait of Hormuz should pass at least 12 miles South of the following; Jazirat Bu Musa (Lat. 25° 52′ N., Long. 55° 02′ E.), Jazirat Sirri (Lat. 25° 54′ N., Long. 54° 32′ E.), Cable Bank (Lat. 26° 46′ N., Long. 52° 32′ E.) and thence 12 miles S.W. of Jazirat Farsi (Lat. 27° 59′ N., Long. 50° 11′ E.).

2. After passing Jazirat Farsi vessels should keep West and South of lines joining the following positions:
(a) Lat. 27° 55′ N., Long. 49° 53′ E.
(b) Lat. 29° 10′ N., Long. 49° 12′ E.
(c) Lat. 29° 10′ N., Long. 48° 40′ E.

After passing position (c) vessels may proceed North to Kuwait Harbour.

3. All vessels heading for Iranian ports should report to Bandar Abbas Port Control on passing Ras al Kuh (Lat. 25° 48′ N., Long. 57° 17′ E.) stating their ETA at the Strait of Hormuz and destination. If clearance is not received before passing Bandar Abbas (Lat. 27° 11′ N., Long. 56° 17′ E.) vessels should proceed to the anchorage off that port.

4. Deep draft tankers, loaded and not inward bound for Iranian ports, intending to enter the restricted zone North of a line joining the positions in (1) should request clearance from the Iranian Ports and Shipping Organisation (Telex 212271 BNDR IR) 48 hours before departure giving the following information:
(a) Last loading port
(b) Destination
(c) Route
(d) Speed
(e) Time of departure
(f) Visual identification

Procedures for vessels approaching Iranian Ports: The following information on procedures are necessary.

Masters should:

Contact Bandar Abbas Port Radio on the following frequencies:
HF 8469 kHz
MF 500 kHz
MF 464 kHz

and state:

1. Ship's name.
2. Flag.
3. Kind of vessel.
4. Loading or discharging port(s).
5. ETA Sirri Island (for tankers).
6. Expected time and date of passing Hormuz.
7. Ship's speed.
8. Reason for call/cargo for discharge or to load prior to arrival, and take instructions.

As per instructions issued by Iranian Port Authorities, the words "Persian Gulf" should follow the name of Iranian ports in the Persian Gulf in all messages, example: "Kharg Island Persian Gulf".

Tankers should anchor at Sirri Island after passing Bandar Abbas for proper turn when loading at Kharg Island, unless instructed to proceed towards Kharg Island directly.

Upon anchoring Sirri Island vessels should communicate with Sirri Marine on VHF for further instructions.

Masters should send all messages and ETA notices for NIOC Kharg Island, Lavan Island, Sirri Island and other oil loading ports, also for NIOC head office at Tehran, should be sent via Bandar Abbas Port Radio, with copy to Agents.

Arrival Notice – Tankers:

Please instruct all tankers to advise NIOC 72 hours prior to arrival to Kharg Island (P.G.) otherwise Marketing and Export Operation Department has no responsibility, so kindly advise urgently the following information:

1. Ship's deadweight.
2. Arrival loaded displacement.
3. Cargo bunker requirement.
4. Deballasting time.
5. Height of manifold when vessel ready to load.
6. Maximum arrival and sailing draft.
7. Vessel's dimensions.

Please furnish the Harbour Master at Kharg Terminal with above information from now on. Meanwhile it would be much appreciated if you follow the same procedure for other terminals (i.e. Sirri and Lavan) if the vessels are intended to load there.

ABADAN: 30.20 N. 48.16 E.

Note: The port was extensively damaged during the conflict and is expected to be operational in the near future.

LOCATION: The Port of Abadan situated on right bank of the Shatt-Arab, about 47 miles up river from Rooka Buoy.

DOCUMENTS: See "Khorramshahr".

PILOTAGE: Compulsory. Pilot available 24 hours.

ANCHORAGES: On arrival of pilot boat vessel can anchor with no de restriction. On entering the Shatt-al-Arab the following are recognised anchorages: Kasba Anchorage position about 2 miles abo Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchora position about 2 miles above Abadan with a max. depth of 31 ft. in fre water. Vessels which are too deep to pass out of the river on one ti will be required to anchor at Kasba.

RESTRICTIONS: The Port is open for day and night navigation w arrival and sailing being controlled by the tide. Vessels normally en the Bar at 4 hours before high water at the Bar or at 2 hours after hi water at the Bar. Those entering 4 hours before, arrive at Bawar anchorage generally during flood tide, so must anchor for 6 hou awaiting ebb. Those entering 2 hours after high water, arrive Bawar during ebb tide and berth on arrival, providing berth available, weath conditions permit and outward movements do not delay. Vessels alwa berth starboard side to stem the ebb tide and without using tugs a leaving Abadan 4 to 6 hours before high water at Bar.

MAX. SIZE: Max. length 600 ft. Max. draft in the Shatt-al-Arab, Abad and other river ports is 28 ft. 06 in.

HEALTH: Inward clearance is affected on board after receiving Fr Pratique. Also see "Khorramshahr" – "Documents".

RADIO: The National Iranian Oil Company Coastal Radio Station c sign EQZ. The station listens for various calls on the normal Internation Marine Calling frequencies. When close to may be contacted on 500 k transferring to 428 kHz for exchange of traffic. Traffic list se at 5 minutes past odd hours.

VHF: Abadan Port Radio on Channels 16, 13, 18 and 35 througho 24 hours.

TUGS: Not available.

BERTHING: The number of jetties on the Abadan riverside have be reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintain and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be ke taut at all times to prevent surging on the jetties thereby breaking lin and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of tak bunkers are:

Jetty No. 3	Draft alongside	31 ft.
Jetty No. 9	" "	28 ft.
Jetty No. 22	" "	25 ft.
Jetty No. 16	" "	28 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo ar

Jetty No. 7A	Draft alongside between 28 ft. – 31 ft.
Jetty No. 7B	
Jetty No. 7C	
Jetty No. 7D	

MEDICAL: Emergency cases: An ambulance will be dispatched demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arran transportation of patients, and advise Masters regarding necess medical attention forms. If patient does not speak English he should accompanied by an interpreter. Only in exceptional cases will a medi officer visit a patient on board.

TANKERS: Deliveries of the refined oil products of Abadan Refinery a effected to ocean-going tankers at Bandar Mahshahr since t inauguration of the products terminal of the National Iranian Oil Compa at that port, therefore such shipments are not taking place from Abad any more.

DENSITY: Fresh water.

FRESH WATER: Available at all jetties and at the anchorage by bar

FUEL: Ships' bunkers are available; however not all types are availa at all jetties, therefore, ship's Master should advise by radio the ex quantity and kind of bunkers required. Bunkers are delivered concurr with loading unless otherwise requested by Master. Due to hea bunkering commitments it is mandatory that vessels take their bunk when convenient for the terminal, any delay incurred by a vessel tak bunkers after loading is the responsibility of the Master.

AUTHORITY: National Iranian Oil Co. Abadan Refinery.

AGENT: Gulf Agency Co. (Iran) Ltd.

All enquiries, telexes, cables, letters concerning Ship's Agency Iranian Ports should be directed to G.A.C. Shipping (U.K.) Ltd.

BANDAR ABBAS: 27.08 N. 56.12 E. (See Pl

Note: This port has been in full use during the conflict and will con to be used extensively. All types of cargo can be discharged.

Old Port of Bandar Abbas now called Bandar Shid Bahonar. New is called Bandar Shahid Rajaee

DOCUMENTS: See "Bandar Imam Khomeini".

PILOTAGE: Application for Pilot to be made well in advance of vess arrival off Bandar Abbas, through Bandar Abbas Port Radio EQI. Ag may also arrange pilotage but should be advised of ETA well in adva

ANCHORAGE: Approx. position Lat. 27° 04′ N., Long. 56° 14′ E. Depth 36 ft. The distance from the Outer Anchorage at Buoy No. 1 to the port entrance is about 2 miles.

Also see "Notice".

RESTRICTIONS: *Old Port:* Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.

MAX. SIZE: *Old Port:* Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.

Max. draft alongside: Jetty Nos. 1, 2 and 3 – 33 ft.; Nos. 4 & 5 – 31 ft.; No. 6 – 30 ft.

New Port: Max. draft 33 ft. – 36 ft. Max. LOA 660 ft.

RADIO: Bandar Abbas Port Radio EQI – 500 kHz. 24 hour service. Port Telex No. 0362815 BDBA IR.

Radio Officer's Report: December 1984.

Following schedule for opening and working hours has been brought to our attention by the operator of Bandar Abbas Radio.

Quote:

Notice to all ships' Masters in effect from 25th November 1984: Abbas Radio/EQI will work on the following calling frequencies, GMT time and traffic lists.

From 0330 hrs. to 0830 hrs., Tx 8469 kHz, Rx 8 MHz (Channel 5/6). Traffic List at 0335 hrs – 0535 hrs. – 0735 hrs. GMT.

From 0730 hrs. to 1230 hrs., Tx 12700 kHz, Rx 12 MHz (Channel 5) and 16 MHz (Channel 5).
Traffic List at 0835 hrs – 1035 hrs. GMT.

From 1230 hrs. to 1430 hrs., Tx 6362 kHz, Rx 6 MHz (Channel 5) and 4 MHz (Channel 5).
Traffic List at 1235 hrs GMT.

From 1430 hrs. to 0330 hrs., Tx 4252 kHz, Rx 4 MHz (Channel 5) and 6 MHz (Channel 5).
Traffic List at 1435 hrs – 1635 hrs. – 1835 hrs. – 2035 hrs. – 2235 hrs. – 0035 hrs. GMT.

Please observe the above table for your messages.
Unquote.

It has come to our attention, however, that contrary to the ITU "List of Coast Stations" the call sign instead of "EQI" is

EQI 2 for 4 MHz.
EQI 4 for 6 MHz.
EQI 6 for 8 MHz.
EQI 8 for 12 MHz.

Further deviation from the official published information is that the station works in the 8 MHz band on 3 frequencies. Its "CQ" tape runs on the indicated 8469 kHz, however, if a calling ship is heard the answer is given on a less powerful transmitter on 8469.5 kHz. Once contact is established on the ship's working frequency the station shifts to 8463 kHz. If long messages are held for the ship, this has been put on a tape and the ship will be instructed to listen on 8469 kHz again, to receive its traffic.

VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio". Tugs on Channels 13 and 16.

TUGS: 3×2,400 h.p., 5×1,200 h.p. and 1×3,500 h.p.

BERTHING: *Old Port:* Berthing and unberthing possible throughout 24 hours.

Quay is 1,050 m. long, 35 m. wide and capable of accommodating 6 vessels each of 175 m. LOA.

The Barge Jetty with a depth of 24 ft. can accommodate one vessel for alongside discharge.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Shahid Rajaee: Located about 15 km. West of Old Port. Originally designed for 40 berths, but work was suspended after completion of 24th berth. Oil handling installation is near Berth No. 1, moreover, Berth No. 1 is normally used for discharging vegetable oil. Berths No. 7 and No. 8 are used for containers. All 24 berths are operating at present with 4,873 m. of berthing space and depth up to 36 ft. 3×40 ton transtainers and 2×40 ton top lift trucks for container handling.

General cargo equipment includes 21 mobile cranes with capacity 6 tons – 90 tons.

Also see "Shipmaster's Reports".

STEVEDORES: Working hours at the New Port are 0600 – 2200 hrs.

CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment: Equipment available ashore is as follows:

1 mobile crane of 60 tons; 1 mobile crane of 25 tons; 6 mobile cranes of 10 tons; 7 mobile cranes of 6 tons; 10 forklifts of 2 tons; 10 forklifts of 3 tons; 2 forklifts of 5 tons; 15 tractors, 15 trailers of 30 tons; 19 trailers of 20 tons; 11 trailers of 10 tons.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per Article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.

FRESH WATER: Available in port from road tankers and at anchorage by barge. Requests for water must be made well in advance.

FUEL: Fuel oil, gas oil and marine diesel oil are available at all berths ex-pipeline excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.

CONSULS: None.

REPAIRS: Minor repairs available at private workshops.

WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in Winter, and seldom exceeds 40 degrees centigrade in Summer.

CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged. Contact through Agent.

SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

NOTICES:

Notice to Mariners No. 16/64

UNMARKED SHIPS IN BANDAR ABBAS AREA

There are some unlit and unmanned dead ships in Bandar Abbas anchorage area and its vicinity, ships navigating in the area should take special care and are recommended to have local Pilots on board.

GENERAL: *Hotels:* The Gameron is a modern hotel equipped with air-conditioning, swimming pool and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about four in number are also available.

Provisions: There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.

Transport: Distance between port and the town of Bandar Abbas is about 15 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.

Laundry: Subject to time available, can be arranged by ship's Agent.

SHIPMASTER'S REPORT: January 1986.

New port of Shahid Rejaie is now in operation. 24 hours day working except reefer vessels which work from 0700/1100 and 1400/2300 hrs. depending on truck and heat situation.

The new port is over 30 km. from city of Bandar Abbas. Repatriation is possible as there are now direct flights from Bandar Abbas to Zurich/Frankfurt and Dubai. Agents require 72 hours notice of incoming and outgoing crew changes in order to arrange visas and formalities. Shore leave normally possible by application day before and only permitted between 1000 hrs.-1600 hrs. No telephones placed onboard so have to go to Agent's office in city of Bandar Abbas. Limited supplies of fruit, vegetables, etc., at moderate prices, obtainable via Agent. Also numerous boats with fish, vegetables, etc., at outer anchorage. Fresh water available from tanker trucks.

Boarding party arrives at anchorage and conducts search of all crew and officers cabins and accommodation areas. No alcohol permitted in anyones possession also strict Islamic laws re calendars, magazines, etc. Papers required – as per "Guide to Port Entry" plus lists of all foreign currency in each crew member's possession.

A further search similar to that on arrival is made prior to departure. Essential to advise Coast Guard prior to entering Bandar Abbas approaches via VHF, also Harbour Authorities via W/T Bandar Abbas Radio 24 hours prior to arrival. Bonded store and main W/T transmitter sealed.

SHIPMASTER'S REPORT: January 1987.

Max. Size: Port can accommodate cargo/bulk vessels of 200 m. length with a maximum draft of 36 ft.

VHF: Channel 16 for Port, call "Port Control". Bandar Abbas Radio listens on Channel 25 and can be used for local calls.

Tugs: 5 tugs, 2,500 h.p. each for harbour duties and berthing.

Berthing: Bandar Abbas harbour has two ports.

Old Port: As mentioned in the "Guide", but now mainly used by dhows and barges. Only very rarely do general cargo ships discharge there. Ore jetty, bunker berth and a ferry berth still in use and will remain so. The remainder of the port will only be used by Iranian Navy, barges, dhows, etc.

New Port: No proper chart has yet been prepared for this area. It is located about 15 km. West of Old Port. Main channel from breakwater to anchorage (South of Old Port) is buoyed in the direction of 104°–284°.

Originally the port was being constructed for 40 berths but work has been suspended after completion of 24 berths. Oil handling installation is near No. 1 Berth.

Berth No. 1 is normally used for discharging vegetable oil, Berths No. 7 and 8 for containers, but in absence of appropriate vessels any ship can be berthed there. All 24 berths are now in use, and plans still exist for completion of up to 40 berths but it is not known when the work will restart.

No silos provided for bulk cargoes, hence it is discharged into lorries. Discharge rate can be up to 5,000 t.p.h. depending upon availability of transport.

Fresh Water: At anchorage available by barge and in port by road tankers. It is advisable that road tanker water is tested prior to receiving, as it is often a mixture of sea water and fresh water. Water is also expensive, hence vessels are advised to arrive with maximum water and if required to take water in Bandar Abbas it must be requested well in advance.

Fuel: Good quality fuel is available by barges and the request must be made to Shipping Co., Bandar Abbas if chartered to them.

Repairs: Private workshops can carry out minor repair work. But it must be checked properly.

Shipyard is now in operation 5 km. West of New Port but so far has only been used by Iranian ships. Except in emergency it is not available for other ships.

Telephones: Only available ashore for international calls. No telephones placed aboard vessels.

SHIPMASTER'S REPORT: February 1989.

Port: Bandar Abbas (Shahid Rejaie).

Arrival: On arrival at the anchorage, contact Port Control on VHF Channel 16 and give arrival information. Port Control are of little assistance with regard to berthing information. The agent is the best person to supply this advice. The State Shipping Agents "ShippingCo" maintain a watch on VHF Channel 16.

The vessel may also be contacted by the Iranian Coast Guard on entering the outer anchorage.

Boarding Party: The boarding party of Customs and Immigration Officers boarded at the anchorage 24 hours after arrival. Normal paperwork is required.

All cabins were searched for alcohol, etc. and the bond was sealed.

The vessel is also searched for stowaways prior to departure by Customs Officials.

Communications: The radio room is sealed. VHF telephone calls can be made via Bandar Abbas Radio or Muscat Radio,

Berthing: The vessel berthed at Shahid Rejaie which is about 1 hour from the outer anchorage. There is no suitable Admiralty Chart for this area.

Shahid Rejaie is a large, modern and well planned port with about 30 berths. The maximum draft is probably in excess of 12.0 m.

This vessel discharged barley in bulk at a rate of approximately 3,400 tonnes per day, utilising evacuators and lorries ashore. The ship's cranes are required for suspending the suction hose.

There are no shore cranes or grabs for discharge of bulk cargoes. Container vessels use small mobile cranes.

Fresh Water: Available.

Fuel: Available.

Repairs: Mechanical, radar and navigation equipment repairs are possible. However, no spares are available.

Repatriation: Possible.

Shore Leave: Not allowed.

General: Mail: It is possible to send mail. The vessel received courier mail from overseas.

Spares: It is not advisable to receive spares, due to delays at Customs and paper work, etc.

Supplies: Fresh provisions available but quality was poor and they were very expensive.

Fumigation: Hatches with grain cargoes require fumigation. Crew have to stay on board. If only a few hatches require fumigation they are sealed and stevedores continue to work on other hatches.

AUTHORITY: Port Director.

AGENT: See "Abadan".

BANDAR IMAM KHOMEINI: 30.25 N. 49.05 E.

(See Plan)

Note: Jetties and port facilities are operational. Already, several Iranian flag vessels have berthed and discharged. It has been reported that for the time being only Iranian flag vessels are allowed to call at Bandar Imam Khomeini.

The railway line to Tehran is already open and in use. Similarly, the roads to Tehran and other cities are open and in use.

DOCUMENTS: Documents requested from Master on arrival.

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).
Stores List (2 copies).

Port Authority

Crew List (1 copy).
Ship's Certificates: (One photocopy of each of the following):
Safety Telephony.
Safety Telegraphy.
Certificate of Machinery.
Load Line Certificate.
Ship's Register.
Classification Certificate.
Ship's Cargo Gear and Safety Equipment Certificate.
Derat Certificate.

Agents

Crew List (2 copies).

Cargo Documents: The following documents must be sent to Agents far in advance of vessel's arrival as possible, by Owners or Load Ports:

Cargo Manifest (8 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies).
Stowage Plan (2 copies).

All cargo shown on manifests must be landed at the port, and therefore essential that short-shipments, cancellations, diversions, e (if any) be reported as early as possible and manifest should corrected before submission to Port Authorities to avoid paymen fines. Stowage plans and hatch lists should also be sent ahead, giv ample time to be studied by Cargo Supervisor for unload arrangements.

The names of consignees must be inserted on the manifest at port of origin. This is due to the fact that names have not been inser as this is a necessary requirement, as per Iranian Customs authori requirements.

In view of the above, Owners are kindly requested to make sure manifests for Bandar Imam Khomeini are properly made out at load port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance of vesse arrival at Khor Musa Bar Pilot Station, through Bandar Imam Khome Port Radio – EQN – 500 kHz. If Agents required to arrange Pilot th should be informed well in advance.

Pilotage operated by Bandar Imam Khomeini Port Authority from Kh Musa Bar up to Bandar Imam Khomeini Anchorage. Pilot vessel usually positioned about 1 mile, 135° from Khor Musa Approaches Bu No. 12. Approach within 2.5 cables of pilot vessel. During adver weather pilot vessel may proceed above Bar, in such cases, Maste should not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with light beacons a buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal West shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ approximately 1.75 miles West of Khor Musa Approaches Buoy No. and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa Light Float, position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a cou should be set along marked channel for Buoy No. 12 in position L 29° 56′ 03″ N., Long. 49° 34′ 47″ E., bearing 308° 45′ from Khor Mu Light Float.

MAX. SIZE: LOA 780 ft. and draft 36 ft. (S.W.). Vessels of 32 ft. d may enter port at any time. Higher drafts depending on state of ti Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Bandar Imam Khomeini. Subj no infectious diseases reported on board during voyage, Medical Offic will grant Pratique.

RADIO: Bandar Imam Khomeini Port Radio EQN 500 kHz. Tele 0612051 Bdho Ir.

Continuous watch on 500 kHz is to be maintained at all times wh navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. 24 hours service.

TUGS: Tugs for berthing and unberthing on Berthing Master's advic 9 tugs: 1,000 h.p. – 2,500 h.p.

BERTHING: 33 berths, total length 5,872 m. with depth up to 36 ft.

Eastern Jetty, Berths 1 to 5 – 34 ft.
Western Jetty, Berths 6 to 8 – 34 ft.
Berths 9 to 10 – 34 ft.
Berths 11 to 20 – 34 ft.

1 berth is allocated for grain discharge only. This is done by gr vacuvators.

Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capac about 2,000 tons per day. The loading installation consists of 2 powe moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-shap containers with a capacity of 30 tons each and a 600 m. long conve belt with a capacity of 175 t.p.h.

Sulphur: Sulphur is loaded at the Petrochemical Berth. The shiploa travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loa maximum clearance. Radio aerials, and fore and back stays to removed.

Due to high temperatures, every precaution must be taken to com risk of fire.

Grain: All berths are available for grain discharge. Grain is bagge holds and discharged in slings using ship's gear. At only one bert discharge possible by vacuvators. All discharges into railway wag and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepare handle discharge with own gear.

EQUIPMENT:

Type	*No.*	*Capacity* (tons)	*Manufacturer*
Gantry cranes	2	40	Hitachi
Transtainers	2	40	Peiner (rubber tyres)
Top lift trucks	2	35	Kalmar (rubber tyres)
Mobile cranes	1	90	Link
	1	40	Jones
	6	35	Jones
	8	15	Jones
	2	10	Jones
	11	6	Jones
	5	15	Nelson
	2	10	Rail mounted

Type	No.	Capacity (tons)	Manufacturer
Lift trucks	3	13/5	T.C.M. (Japan)
	4	7	T.C.M.
	2	15	Komatsu
	7	10	Komatsu
	3	3	Komatsu
	13	3	Sahan (Iran)
Trailers	125	10 – 25	
Tractors	140		Inc. 1×60 tons

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply at Jetty Nos. 1 – 8, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the Inner Anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside. Therefore it is advisable to arrive with ample water on board.

FUEL: Diesel oil and gas oil available by barge at 2–3 days notice.

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At Bandar Imam Khomeini minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

HATCHES: Opening and closing by ship's crew.

WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or ½ oz. tobacco.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

DEVELOPMENTS: Depths alongside new jetties when completed will be 13.0 m. – 15.8 m.

Description	No. of Berths	Wharf Length (m.)	Completion Date
Extension of the 4-berth jetty (Container terminal)	4	771	2 cranes in use
Extension of the 10-berth jetty	5	1,051.5	Completed
Extension of the 10-berth general cargo jetty	5	911.2	Completed
Construction of the 14-berth jetty	14	2,552	
Construction of the lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	
Construction of the ore-loading facilities	1	250	Completed
Ro/Ro berth	1	—	

The container stacking area is about 200,000 sq.m. and equipment ready for use is as follows:

2 gantry cranes, for discharge of containers ex-vessels and 5 transtainers in container area, can accommodate about 12,800 TEU's as well as 630 TEU's of refrigerated containers.

SHIPMASTER'S REPORT:

Congestion: In the event of the port being congested vessels anchor initially in the vicinity of Buoy No. 12. Masters should then cable "Harbourmaster Bandar Imam Khomeini" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Azadeh" keeps watch on 2182 kHz and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Imam Khomeini Jetties to await turn.

No water or stores can be obtained at Outer Anchorage.

At Inner Anchorage water and stores can be obtained by launch but with some difficulty.

SHIPMASTER'S REPORT: March 1988.

Since Iraq/Iran conflict started, many vessels have been hit by missiles in the buoyed channel leading to Khor Musa Bar from Khor Musa light vessel. A majority of wrecks which were clearly visible earlier have now sunk and are well submerged and no-one has exact information regarding their location. Vessels proceeding to this port are advised of wrecks by Bushire Harbour Master, but I have found his information misleading. Moreover, the draft in the dredged channel is no more than 10.0 m. at chart datum. No information has ever been reported and the area has not been surveyed since 1976. Pilot boarded the vessel between Beacons No. 13 and 20, and from this position all beacons are correctly marked; but before these beacons up to the light vessels, all buoys are damaged and mostly missing and none are numbered. Masters have to take the vessel up to the Bar on their own between unknown sunken wrecks and improper channel marking.

I have been up and down this channel through my own chosen route with 34 ft. draft.

AGENT: See "Abadan".

BANDAR MAHSHAHR: 30.27 N. 49.20 E. (See Plan)

Refined Products Loading Terminal of the National Iranian Oil Company.

FLAG: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Stores Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of the Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E. At end of approaches channel, near Buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Imam Khomeini, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers: Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel: Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Imam Khomeini Port Authorities up to Bandar Imam Khomeini, and by Oil Company between Bandar Imam Khomeini and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Imam Khomeini is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot Station. If for any reason a vessel is required to wait at any time at Bandar Imam Khomeini, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Imam Khomeini, will arrange for Berthing Master to board vessel at Bandar Imam Khomeini anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers: Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar: Lat. 29° 59′ N., Long. 49° 04′ E. and Inner Khor Musa Bar Lat. 30° 02′ N., Long. 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan: A rocky shoal, in Lat. 30° 12′ N., Long. 48° 58′ E. approximately 10 miles North of Inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18: Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar: Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel: After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Bandar Imam Khomeini.

Bandar Imam Khomeini: All inward bound ships required to anchor on arrival off Bandar Imam Khomeini, where Pilot disembarks and a Government Medical Officer comes on board to grant Pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Iran

GENERAL

Note: Movements of all types of general cargo, bulk cargo, refrigerated cargo, containers, steel products, machinery, cars, etc., are expected to increase considerably.

Dry cargo ports which are operational are Bandar Abbas, Bushire, Bandar Khomeini and Chah Bahar.

The ports of Abadan and Khorramshahr are not expected to be operational for some time.

Until further notice, all vessels calling at Iranian dry cargo ports must be self-sustaining.

There is a "Note" at the beginning of each port stating the latest position.

Money/Liquor: Ship's personnel travelling to and from Iran should be warned of the inadvisability of carrying liquor and/or large sums of money, both of which are liable to be confiscated.

Flag: Vessels to fly the flag of the Islamic Republic of Iran (flag is green, white and red with a red emblem in the centre).

NOTICES:

B.A. Notice to Mariners No. 34/83:

The Government of Iran has made the following announcements:

1. Vessels proceeding into the Gulf after passing through the Strait of Hormuz should pass at least 12 miles South of the following; Jazirat Bu Musa (Lat. 25° 52′ N., Long. 55° 02′ E.), Jazirat Sirri (Lat. 25° 54′ N., Long. 54° 32′ E.), Cable Bank (Lat. 26° 46′ N., Long. 52° 32′ E.) and thence 12 miles S.W. of Jazirat Farsi (Lat. 27° 59′ N., Long. 50° 11′ E.).

2. After passing Jazirat Farsi vessels should keep West and South of lines joining the following positions:

(a) Lat. 27° 55′ N., Long. 49° 53′ E.
(b) Lat. 29° 10′ N., Long. 49° 12′ E.
(c) Lat. 29° 10′ N., Long. 48° 40′ E.

After passing position (c) vessels may proceed North to Kuwait Harbour.

3. All vessels heading for Iranian ports should report to Bandar Abbas Port Control on passing Ras al Kuh (Lat. 25° 48′ N., Long. 57° 17′ E.) stating their ETA at the Strait of Hormuz and destination. If clearance is not received before passing Bandar Abbas (Lat. 27° 11′ N., Long. 56° 17′ E.) vessels should proceed to the anchorage off that port.

4. Deep draft tankers, loaded and not inward bound for Iranian ports, intending to enter the restricted zone North of a line joining the positions in (1) should request clearance from the Iranian Ports and Shipping Organisation (Telex 212271 BNDR IR) 48 hours before departure giving the following information:

(a) Last loading port
(b) Destination
(c) Route
(d) Speed
(e) Time of departure
(f) Visual identification

Procedures for vessels approaching Iranian Ports: The following information on procedures are necessary.

Masters should:

Contact Bandar Abbas Port Radio on the following frequencies:

HF 8469 kHz
MF 500 kHz
MF 464 kHz

and state:

1. Ship's name.
2. Flag.
3. Kind of vessel.
4. Loading or discharging port(s).
5. ETA Sirri Island (for tankers).
6. Expected time and date of passing Hormuz.
7. Ship's speed.
8. Reason for call/cargo for discharge or to load prior to arrival, and take instructions.

As per instructions issued by Iranian Port Authorities, the words "Persian Gulf" should follow the name of Iranian ports in the Persian Gulf in all messages, example: "Kharg Island Persian Gulf".

Tankers should anchor at Sirri Island after passing Bandar Abbas for proper turn when loading at Kharg Island, unless instructed to proceed towards Kharg Island directly.

Upon anchoring Sirri Island vessels should communicate with Sirri Marine on VHF for further instructions.

Masters should send all messages and ETA notices for NIOC Kharg Island, Lavan Island, Sirri Island and other oil loading ports, also for NIOC head office at Tehran, should be sent via Bandar Abbas Port Radio, with copy to Agents.

Arrival Notice – Tankers:

Please instruct all tankers to advise NIOC 72 hours prior to arrival to Kharg Island (P.G.) otherwise Marketing and Export Operation Department has no responsibility, so kindly advise urgently the following information:

1. Ship's deadweight.
2. Arrival loaded displacement.
3. Cargo bunker requirement.
4. Deballasting time.
5. Height of manifold when vessel ready to load.
6. Maximum arrival and sailing draft.
7. Vessel's dimensions.

Please furnish the Harbour Master at Kharg Terminal with above information from now on. Meanwhile it would be much appreciated if you follow the same procedure for other terminals (i.e. Sirri and Lavan) if the vessels are intended to load there.

ABADAN: 30.20 N. 48.16 E.

Note: The port was extensively damaged during the conflict and i expected to be operational in the near future.

LOCATION: The Port of Abadan situated on right bank of the Shat Arab, about 47 miles up river from Rooka Buoy.

DOCUMENTS: See "Khorramshahr".

PILOTAGE: Compulsory. Pilot available 24 hours.

ANCHORAGES: On arrival of pilot boat vessel can anchor with no de restriction. On entering the Shatt-al-Arab the following are recognised anchorages: Kasba Anchorage position about 2 miles ab Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchor position about 2 miles above Abadan with a max. depth of 31 ft. in fr water. Vessels which are too deep to pass out of the river on one will be required to anchor at Kasba.

RESTRICTIONS: The Port is open for day and night navigation arrival and sailing being controlled by the tide. Vessels normally e the Bar at 4 hours before high water at the Bar or at 2 hours after water at the Bar. Those entering 4 hours before, arrive at Bawa anchorage generally during flood tide, so must anchor for 6 ho awaiting ebb. Those entering 2 hours after high water, arrive Bawa during ebb tide and berth on arrival, providing berth available, weat conditions permit and outward movements do not delay. Vessels alwa berth starboard side to stem the ebb tide and without using tugs leaving Abadan 4 to 6 hours before high water at Bar.

MAX. SIZE: Max. length 600 ft. Max. draft in the Shatt-al-Arab, Abad and other river ports is 28 ft. 06 in.

HEALTH: Inward clearance is affected on board after receiving Fr Pratique. Also see "Khorramshahr" – "Documents".

RADIO: The National Iranian Oil Company Coastal Radio Station sign EQZ. The station listens for various calls on the normal Internatio Marine Calling frequencies. When close to may be contacted on 500 k transferring to 428 kHz for exchange of traffic. Traffic list at 5 minutes past odd hours.

VHF: Abadan Port Radio on Channels 16, 13, 18 and 35 through 24 hours.

TUGS: Not available.

BERTHING: The number of jetties on the Abadan riverside have be reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintain and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be k taut at all times to prevent surging on the jetties thereby breaking lin and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of tak bunkers are:

Jetty No. 3	Draft alongside	31 ft.
Jetty No. 9	" "	28 ft.
Jetty No. 22	" "	25 ft.
Jetty No. 16	" "	28 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo ar

Jetty No. 7A	Draft alongside between 28 ft. – 31 ft.
Jetty No. 7B	
Jetty No. 7C	
Jetty No. 7D	

MEDICAL: Emergency cases: An ambulance will be dispatched demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arran transportation of patients, and advise Masters regarding necess medical attention forms. If patient does not speak English he should accompanied by an interpreter. Only in exceptional cases will a medi officer visit a patient on board.

TANKERS: Deliveries of the refined oil products of Abadan Refinery effected to ocean-going tankers at Bandar Mahshahr since inauguration of the products terminal of the National Iranian Oil Compa at that port, therefore such shipments are not taking place from Abad any more.

DENSITY: Fresh water.

FRESH WATER: Available at all jetties and at the anchorage by bar

FUEL: Ships' bunkers are available; however not all types are availa at all jetties, therefore, ship's Master should advise by radio the ex quantity and kind of bunkers required. Bunkers are delivered concurr with loading unless otherwise requested by Master. Due to hea bunkering commitments it is mandatory that vessels take their bunke when convenient for the terminal, any delay incurred by a vessel tak bunkers after loading is the responsibility of the Master.

AUTHORITY: National Iranian Oil Co. Abadan Refinery.

AGENT: Gulf Agency Co. (Iran) Ltd.

All enquiries, telexes, cables, letters concerning Ship's Agency Iranian Ports should be directed to G.A.C. Shipping (U.K.) Ltd.

G.A.C. Shipping (U.K.) Ltd., No.1 Charlwood Court, County Oak W Crawley, West Sussex RH11 7XA, England. Tel: (0293) 615 (5 lines). Telex: 87561 GAC UK G (4 lines). Fax: (0293) 615 Cables: GACSHIP Crawley UK.

BANDAR ABBAS: 27.08 N. 56.12 E. (See Pla

Note: This port has been in full use during the conflict and will con to be used extensively. All types of cargo can be discharged.

Old Port of Bandar Abbas now called Bandar Shid Bahonar. New is called Bandar Shahid Rajaee

DOCUMENTS: See "Bandar Imam Khomeini".

PILOTAGE: Application for Pilot to be made well in advance of vess arrival off Bandar Abbas, through Bandar Abbas Port Radio EQI. Ag may also arrange pilotage but should be advised of ETA well in adva

ANCHORAGE: Approx. position Lat. 27° 04′ N., Long. 56° 14′ E. Depth 36 ft. The distance from the Outer Anchorage at Buoy No. 1 to the port entrance is about 2 miles.

Also see "Notice".

RESTRICTIONS: *Old Port:* Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.

MAX. SIZE: *Old Port:* Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.

Max. draft alongside: Jetty Nos. 1, 2 and 3 – 33 ft.; Nos. 4 & 5 – 31 ft.; No. 6 – 30 ft.

New Port: Max. draft 33 ft. – 36 ft. Max. LOA 660 ft.

RADIO: Bandar Abbas Port Radio EQI – 500 kHz. 24 hour service. Port Telex No. 0362815 BDBA IR.

Radio Officer's Report: December 1984.

Following schedule for opening and working hours has been brought to our attention by the operator of Bandar Abbas Radio.

Quote:

Notice to all ships' Masters in effect from 25th November 1984: Abbas Radio/EQI will work on the following calling frequencies, GMT time and traffic lists.

From 0330 hrs. to 0830 hrs., Tx 8469 kHz, Rx 8 MHz (Channel 5/6).
Traffic List at 0335 hrs – 0535 hrs. – 0735 hrs. GMT.

From 0730 hrs. to 1230 hrs., Tx 12700 kHz, Rx 12 MHz (Channel 5) and 16 MHz (Channel 5).
Traffic List at 0835 hrs – 1035 hrs. GMT.

From 1230 hrs. to 1430 hrs., Tx 6362 kHz, Rx 6 MHz (Channel 5) and 4 MHz (Channel 5).
Traffic List at 1235 hrs GMT.

From 1430 hrs. to 0330 hrs., Tx 4252 kHz, Rx 4 MHz (Channel 5) and 6 MHz (Channel 5).
Traffic List at 1435 hrs – 1635 hrs. – 1835 hrs. – 2035 hrs. – 2235 hrs. - 0035 hrs. GMT.

Please observe the above table for your messages.

Unquote.

It has come to our attention, however, that contrary to the ITU "List of Coast Stations" the call sign instead of "EQI" is

EQI 2 for 4 MHz.
EQI 4 for 6 MHz.
EQI 6 for 8 MHz.
EQI 8 for 12 MHz.

Further deviation from the official published information is that the station works in the 8 MHz band on 3 frequencies. Its "CQ" tape runs on the indicated 8469 kHz, however, if a calling ship is heard the answer is given on a less powerful transmitter on 8469.5 kHz. Once contact is established on the ship's working frequency the station shifts to 8463 kHz. If long messages are held for the ship, this has been put on a tape and the ship will be instructed to listen on 8469 kHz again, to receive its traffic.

VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio". Tugs on Channels 13 and 16.

TUGS: 3×2,400 h.p., 5×1,200 h.p. and 1×3,500 h.p.

BERTHING: *Old Port:* Berthing and unberthing possible throughout 24 hours.

Quay is 1,050 m. long, 35 m. wide and capable of accommodating 6 vessels each of 175 m. LOA.

The Barge Jetty with a depth of 24 ft. can accommodate one vessel for alongside discharge.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Shahid Rajaee: Located about 15 km. West of Old Port. Originally designed for 40 berths, but work was suspended after completion of 24th berth. Oil handling installation is near Berth No. 1, moreover, Berth No. 1 is normally used for discharging vegetable oil. Berths No. 7 and No. 8 are used for containers. All 24 berths are operating at present with 4,873 m. of berthing space and depth up to 36 ft. 3×40 ton transtainers and 2×40 ton top lift trucks for container handling.

General cargo equipment includes 21 mobile cranes with capacity 6 tons – 90 tons.

Also see "Shipmaster's Reports".

STEVEDORES: Working hours at the New Port are 0600 – 2200 hrs.

CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment: Equipment available ashore is as follows:

1 mobile crane of 60 tons; 1 mobile crane of 25 tons; 6 mobile cranes of 10 tons; 7 mobile cranes of 6 tons; 10 forklifts of 2 tons; 10 forklifts of 3 tons; 2 forklifts of 5 tons; 15 tractors, 15 trailers of 30 tons; 19 trailers of 20 tons; 11 trailers of 10 tons.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per Article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.

FRESH WATER: Available in port from road tankers and at anchorage by barge. Requests for water must be made well in advance.

FUEL: Fuel oil, gas oil and marine diesel oil are available at all berths ex-pipeline excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.

CONSULS: None.

REPAIRS: Minor repairs available at private workshops.

WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in Winter, and seldom exceeds 40 degrees centigrade in Summer.

CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged. Contact through Agent.

SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

NOTICES:

Notice to Mariners No. 16/64

UNMARKED SHIPS IN BANDAR ABBAS AREA

There are some unlit and unmanned dead ships in Bandar Abbas anchorage area and its vicinity, ships navigating in the area should take special care and are recommended to have local Pilots on board.

GENERAL: *Hotels:* The Gameron is a modern hotel equipped with air-conditioning, swimming pool and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about four in number are also available.

Provisions: There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.

Transport: Distance between port and the town of Bandar Abbas is about 15 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.

Laundry: Subject to time available, can be arranged by ship's Agent.

SHIPMASTER'S REPORT: January 1986.

New port of Shahid Rejaie is now in operation. 24 hours day working except reefer vessels which work from 0700/1100 and 1400/2300 hrs. depending on truck and heat situation.

The new port is over 30 km. from city of Bandar Abbas. Repatriation is possible as there are now direct flights from Bandar Abbas to Zurich/Frankfurt and Dubai. Agents require 72 hours notice of incoming and outgoing crew changes in order to arrange visas and formalities. Shore leave normally possible by application day before and only permitted between 1000 hrs.-1600 hrs. No telephones placed onboard so have to go to Agent's office in city of Bandar Abbas. Limited supplies of fruit, vegetables, etc., at moderate prices, obtainable via Agent. Also numerous boats with fish, vegetables, etc., at outer anchorage. Fresh water available from tanker trucks.

Boarding party arrives at anchorage and conducts search of all crew and officers cabins and accommodation areas. No alcohol permitted in anyones possession also strict Islamic laws re calendars, magazines, etc. Papers required – as per "Guide to Port Entry" plus lists of all foreign currency in each crew member's possession.

A further search similar to that on arrival is made prior to departure. Essential to advise Coast Guard prior to entering Bandar Abbas approaches via VHF, also Harbour Authorities via W/T Bandar Abbas Radio 24 hours prior to arrival. Bonded store and main W/T transmitter sealed.

SHIPMASTER'S REPORT: January 1987.

Max. Size: Port can accommodate cargo/bulk vessels of 200 m. length with a maximum draft of 36 ft.

VHF: Channel 16 for Port, call "Port Control". Bandar Abbas Radio listens on Channel 25 and can be used for local calls.

Tugs: 5 tugs, 2,500 h.p. each for harbour duties and berthing.

Berthing: Bandar Abbas harbour has two ports.

Old Port: As mentioned in the "Guide", but now mainly used by dhows and barges. Only very rarely do general cargo ships discharge there. Ore jetty, bunker berth and a ferry berth still in use and will remain so. The remainder of the port will only be used by Iranian Navy, barges, dhows, etc.

New Port: No proper chart has yet been prepared for this area. It is located about 15 km. West of Old Port. Main channel from breakwater to anchorage (South of Old Port) is buoyed in the direction of 104°–284°.

Originally the port was being constructed for 40 berths but work has been suspended after completion of 24 berths. Oil handling installation is near No. 1 Berth.

Berth No. 1 is normally used for discharging vegetable oil, Berths No. 7 and 8 for containers, but in absence of appropriate vessels any ship can be berthed there. All 24 berths are now in use, and plans still exist for completion of up to 40 berths but it is not known when the work will restart.

No silos provided for bulk cargoes, hence it is discharged into lorries. Discharge rate can be up to 5,000 t.p.h. depending upon availability of transport.

Fresh Water: At anchorage available by barge and in port by road tankers. It is advisable that road tanker water is tested prior to receiving, as it is often a mixture of sea water and fresh water. Water is also expensive, hence vessels are advised to arrive with maximum water and if required to take water in Bandar Abbas it must be requested well in advance.

Fuel: Good quality fuel is available by barges and the request must be made to Shipping Co., Bandar Abbas if chartered to them.

Repairs: Private workshops can carry out minor repair work. But it must be checked properly.

Shipyard is now in operation 5 km. West of New Port but so far has only been used by Iranian ships. Except in emergency it is not available for other ships.

Telephones: Only available ashore for international calls. No telephones placed aboard vessels.

SHIPMASTER'S REPORT: February 1989.

Port: Bandar Abbas (Shahid Rejaie).

Arrival: On arrival at the anchorage, contact Port Control on VHF Channel 16 and give arrival information. Port Control are of little assistance with regard to berthing information. The agent is the best person to supply this advice. The State Shipping Agents "ShippingCo" maintain a watch on VHF Channel 16.

The vessel may also be contacted by the Iranian Coast Guard on entering the outer anchorage.

Boarding Party: The boarding party of Customs and Immigration Officers boarded at the anchorage 24 hours after arrival. Normal paperwork is required.

All cabins were searched for alcohol, etc. and the bond was sealed.

The vessel is also searched for stowaways prior to departure by Customs Officials.

Communications: The radio room is sealed. VHF telephone calls can be made via Bandar Abbas Radio or Muscat Radio,

Berthing: The vessel berthed at Shahid Rejaie which is about 1 hour from the outer anchorage. There is no suitable Admiralty Chart for this area.

Shahid Rejaie is a large, modern and well planned port with about 30 berths. The maximum draft is probably in excess of 12.0 m.

This vessel discharged barley in bulk at a rate of approximately 3,400 tonnes per day, utilising evacuators and lorries ashore. The ship's cranes are required for suspending the suction hose.

There are no shore cranes or grabs for discharge of bulk cargoes. Container vessels use small mobile cranes.

Fresh Water: Available.

Fuel: Available.

Repairs: Mechanical, radar and navigation equipment repairs are possible. However, no spares are available.

Repatriation: Possible.

Shore Leave: Not allowed.

General: Mail: It is possible to send mail. The vessel received courier mail from overseas.

Spares: It is not advisable to receive spares, due to delays at Customs and paper work, etc.

Supplies: Fresh provisions available but quality was poor and they were very expensive.

Fumigation: Hatches with grain cargoes require fumigation. Crew have to stay on board. If only a few hatches require fumigation they are sealed and stevedores continue to work on other hatches.

AUTHORITY: Port Director.

AGENT: See "Abadan".

BANDAR IMAM KHOMEINI: 30.25 N. 49.05 E.

(See Plan)

Note: Jetties and port facilities are operational. Already, several Iranian flag vessels have berthed and discharged. It has been reported that for the time being only Iranian flag vessels are allowed to call at Bandar Imam Khomeini.

The railway line to Tehran is already open and in use. Similarly, the roads to Tehran and other cities are open and in use.

DOCUMENTS: Documents requested from Master on arrival.

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).

Stores List (2 copies).

Port Authority

Crew List (1 copy).

Ship's Certificates: (One photocopy of each of the following):

Safety Telephony.

Safety Telegraphy.

Certificate of Machinery.

Load Line Certificate.

Ship's Register.

Classification Certificate.

Ship's Cargo Gear and Safety Equipment Certificate.

Derat Certificate.

Agents

Crew List (2 copies).

Cargo Documents: The following documents must be sent to Agen far in advance of vessel's arrival as possible, by Owners or Loa Ports:

Cargo Manifest (8 copies).

Freight Manifest (2 copies).

B/L Copies (2 copies).

Stowage Plan (2 copies).

All cargo shown on manifests must be landed at the port, and therefore essential that short-shipments, cancellations, diversions, (if any) be reported as early as possible and manifest shoul corrected before submission to Port Authorities to avoid paymen fines. Stowage plans and hatch lists should also be sent ahead, g ample time to be studied by Cargo Supervisor for unload arrangements.

The names of consignees must be inserted on the manifest at port of origin. This is due to the fact that names have not been inser as this is a necessary requirement, as per Iranian Customs author requirements.

In view of the above, Owners are kindly requested to make sure manifests for Bandar Imam Khomeini are properly made out at load port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance of vess arrival at Khor Musa Bar Pilot Station, through Bandar Imam Khom Port Radio – EQN – 500 kHz. If Agents required to arrange Pilot should be informed well in advance.

Pilotage operated by Bandar Imam Khomeini Port Authority from K Musa Bar up to Bandar Imam Khomeini Anchorage. Pilot vesse usually positioned about 1 mile, 135° from Khor Musa Approaches B No. 12. Approach within 2.5 cables of pilot vessel. During adve weather pilot vessel may proceed above Bar, in such cases, Mast should not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with light beacons buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal Wes shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ approximately 1.75 miles West of Khor Musa Approaches Buoy No and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa Light Float position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a cou should be set along marked channel for Buoy No. 12 in position 29° 56′ 03″ N., Long. 49° 34′ 47″ E., bearing 308° 45′ from Khor M Light Float.

MAX. SIZE: LOA 780 ft. and draft 36 ft. (S.W.). Vessels of 32 ft. may enter port at any time. Higher drafts depending on state of Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Bandar Imam Khomeini. Sub no infectious diseases reported on board during voyage, Medical Off will grant Pratique.

RADIO: Bandar Imam Khomeini Port Radio EQN 500 kHz. Te 0612051 Bdho Ir.

Continuous watch on 500 kHz is to be maintained at all times w navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. 24 hours service.

TUGS: Tugs for berthing and unberthing on Berthing Master's adv 9 tugs: 1,000 h.p. – 2,500 h.p.

BERTHING: 33 berths, total length 5,872 m. with depth up to 36 ft.

Eastern Jetty, Berths 1 to 5 – 34 ft.
Western Jetty, Berths 6 to 8 – 34 ft.
Berths 9 to 10 – 34 ft.
Berths 11 to 20 – 34 ft.

1 berth is allocated for grain discharge only. This is done by g vacuvators.

Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capa about 2,000 tons per day. The loading installation consists of 2 powe moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-sha containers with a capacity of 30 tons each and a 600 m. long conve belt with a capacity of 175 t.p.h.

Sulphur: Sulphur is loaded at the Petrochemical Berth. The shiploa travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loa maximum clearance. Radio aerials, and fore and back stays to removed.

Due to high temperatures, every precaution must be taken to com risk of fire.

Grain: All berths are available for grain discharge. Grain is bagge holds and discharged in slings using ship's gear. At only one ber discharge possible by vacuvators. All discharges into railway wag and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepare handle discharge with own gear.

EQUIPMENT:

Type	*No.*	*Capacity* (tons)	*Manufacturer*
Gantry cranes	2	40	Hitachi
Transtainers	2	40	Peiner (rubber tyres)
Top lift trucks	2	35	Kalmar (rubber tyres)
Mobile cranes	1	90	Link
	1	40	Jones
	6	35	Jones
	8	15	Jones
	2	10	Jones
	11	6	Jones
	5	15	Nelson
	2	10	Rail mounted

Type	*No.*	*Capacity (tons)*	*Manufacturer*
Lift trucks	3	13/5	T.C.M. (Japan)
	4	7	T.C.M.
	2	15	Komatsu
	7	10	Komatsu
	3	3	Komatsu
	13	3	Sahan (Iran)
Trailers	125	10 – 25	
Tractors	140		Inc. 1×60 tons

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply at Jetty Nos. 1 – 8, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the Inner Anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside. Therefore it is advisable to arrive with ample water on board.

FUEL: Diesel oil and gas oil available by barge at 2–3 days notice.

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At Bandar Imam Khomeini minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

HATCHES: Opening and closing by ship's crew.

WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

DEVELOPMENTS: Depths alongside new jetties when completed will be 13.0 m. – 15.8 m.

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	2 cranes in use
Extension of the 10-berth jetty	5	1,051.5	Completed
Extension of the 10-berth general cargo jetty	5	911.2	Completed
Construction of the 14-berth jetty	14	2,552	
Construction of the lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	
Construction of the ore-loading facilities	1	250	Completed
Ro/Ro berth	1	—	

The container stacking area is about 200,000 sq.m. and equipment ready for use is as follows:

2 gantry cranes, for discharge of containers ex-vessels and 5 transtainers in container area, can accommodate about 12,800 TEU's as well as 630 TEU's of refrigerated containers.

SHIPMASTER'S REPORT:

Congestion: In the event of the port being congested vessels anchor initially in the vicinity of Buoy No. 12. Masters should then cable "Harbourmaster Bandar Imam Khomeini" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Azadeh" keeps watch on 2182 kHz and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Imam Khomeini Jetties to await turn.

No water or stores can be obtained at Outer Anchorage.

At Inner Anchorage water and stores can be obtained by launch but with some difficulty.

SHIPMASTER'S REPORT: March 1988.

Since Iraq/Iran conflict started, many vessels have been hit by missiles in the buoyed channel leading to Khor Musa Bar from Khor Musa light vessel. A majority of wrecks which were clearly visible earlier have now sunk and are well submerged and no-one has exact information regarding their location. Vessels proceeding to this port are advised of wrecks by Bushire Harbour Master, but I have found his information misleading. Moreover, the draft in the dredged channel is no more than 10.0 m. at chart datum. No information has ever been reported and the area has not been surveyed since 1976. Pilot boarded the vessel between Beacons No. 13 and 20, and from this position all beacons are correctly marked; but before these beacons up to the light vessels, all buoys are damaged and mostly missing and none are numbered. Masters have to take the vessel up to the Bar on their own between unknown sunken wrecks and improper channel marking.

I have been up and down this channel through my own chosen route with 34 ft. draft.

AGENT: See "Abadan".

BANDAR MAHSHAHR: 30.27 N. 49.20 E. (See Plan)

Refined Products Loading Terminal of the National Iranian Oil Company.

FLAG: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Stores Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of the Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E. At end of approaches channel, near Buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Imam Khomeini, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers: Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel: Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Imam Khomeini Port Authorities up to Bandar Imam Khomeini, and by Oil Company between Bandar Imam Khomeini and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Imam Khomeini is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot Station. If for any reason a vessel is required to wait at any time at Bandar Imam Khomeini, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Imam Khomeini, will arrange for Berthing Master to board vessel at Bandar Imam Khomeini anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers: Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar: Lat. 29° 59′ N., Long. 49° 04′ E. and Inner Khor Musa Bar Lat. 30° 02′ N., Long. 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan: A rocky shoal, in Lat. 30° 12′ N., Long. 48° 58′ E. approximately 10 miles North of Inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18: Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar: Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel: After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Bandar Imam Khomeini.

Bandar Imam Khomeini: All inward bound ships required to anchor on arrival off Bandar Imam Khomeini, where Pilot disembarks and a Government Medical Officer comes on board to grant Pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Berth No. 1 is normally used for discharging vegetable oil, Berths No. 7 and 8 for containers, but in absence of appropriate vessels any ship can be berthed there. All 24 berths are now in use, and plans still exist for completion of up to 40 berths but it is not known when the work will restart.

No silos provided for bulk cargoes, hence it is discharged into lorries. Discharge rate can be up to 5,000 t.p.h. depending upon availability of transport.

Fresh Water: At anchorage available by barge and in port by road tankers. It is advisable that road tanker water is tested prior to receiving, as it is often a mixture of sea water and fresh water. Water is also expensive, hence vessels are advised to arrive with maximum water and if required to take water in Bandar Abbas it must be requested well in advance.

Fuel: Good quality fuel is available by barges and the request must be made to Shipping Co., Bandar Abbas if chartered to them.

Repairs: Private workshops can carry out minor repair work. But it must be checked properly.

Shipyard is now in operation 5 km. West of New Port but so far has only been used by Iranian ships. Except in emergency it is not available for other ships.

Telephones: Only available ashore for international calls. No telephones placed aboard vessels.

SHIPMASTER'S REPORT: February 1989.

Port: Bandar Abbas (Shahid Rejaie).

Arrival: On arrival at the anchorage, contact Port Control on VHF Channel 16 and give arrival information. Port Control are of little assistance with regard to berthing information. The agent is the best person to supply this advice. The State Shipping Agents "ShippingCo" maintain a watch on VHF Channel 16.

The vessel may also be contacted by the Iranian Coast Guard on entering the outer anchorage.

Boarding Party: The boarding party of Customs and Immigration Officers boarded at the anchorage 24 hours after arrival. Normal paperwork is required.

All cabins were searched for alcohol, etc. and the bond was sealed. The vessel is also searched for stowaways prior to departure by Customs Officials.

Communications: The radio room is sealed. VHF telephone calls can be made via Bandar Abbas Radio or Muscat Radio.

Berthing: The vessel berthed at Shahid Rejaie which is about 1 hour from the outer anchorage. There is no suitable Admiralty Chart for this area.

Shahid Rejaie is a large, modern and well planned port with about 30 berths. The maximum draft is probably in excess of 12.0 m.

This vessel discharged barley in bulk at a rate of approximately 3,400 tonnes per day, utilising evacuators and lorries ashore. The ship's cranes are required for suspending the suction hose.

There are no shore cranes or grabs for discharge of bulk cargoes. Container vessels use small mobile cranes.

Fresh Water: Available.

Fuel: Available.

Repairs: Mechanical, radar and navigation equipment repairs are possible. However, no spares are available.

Repatriation: Possible.

Shore Leave: Not allowed.

General: Mail: It is possible to send mail. The vessel received courier mail from overseas.

Spares: It is not advisable to receive spares, due to delays at Customs and paper work, etc.

Supplies: Fresh provisions available but quality was poor and they were very expensive.

Fumigation: Hatches with grain cargoes require fumigation. Crew have to stay on board. If only a few hatches require fumigation they are sealed and stevedores continue to work on other hatches.

AUTHORITY: Port Director.

AGENT: See "Abadan".

BANDAR IMAM KHOMEINI: 30.25 N. 49.05 E.

(See Plan)

Note: Jetties and port facilities are operational. Already, several Iranian flag vessels have berthed and discharged. It has been reported that for the time being only Iranian flag vessels are allowed to call at Bandar Imam Khomeini.

The railway line to Tehran is already open and in use. Similarly, the roads to Tehran and other cities are open and in use.

DOCUMENTS: Documents requested from Master on arrival.

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).

Stores List (2 copies).

Port Authority

Crew List (1 copy).

Ship's Certificates: (One photocopy of each of the following):

Safety Telephony.

Safety Telegraphy.

Certificate of Machinery.

Load Line Certificate.

Ship's Register.

Classification Certificate.

Ship's Cargo Gear and Safety Equipment Certificate.

Derat Certificate.

Agents

Crew List (2 copies).

Cargo Documents: The following documents must be sent to Agen far in advance of vessel's arrival as possible, by Owners or Loa Ports:

Cargo Manifest (8 copies).

Freight Manifest (2 copies).

B/L Copies (2 copies).

Stowage Plan (2 copies).

All cargo shown on manifests must be landed at the port, and therefore essential that short-shipments, cancellations, diversions, (if any) be reported as early as possible and manifest shoul corrected before submission to Port Authorities to avoid paymen fines. Stowage plans and hatch lists should also be sent ahead, g ample time to be studied by Cargo Supervisor for unloa arrangements.

The names of consignees must be inserted on the manifest a port of origin. This is due to the fact that names have not been inser as this is a necessary requirement, as per Iranian Customs author requirements.

In view of the above, Owners are kindly requested to make sure manifests for Bandar Imam Khomeini are properly made out at loa port with correct names of consignees.

PILOTAGE: Application for Pilot to be made well in advance of vess arrival at Khor Musa Bar Pilot Station, through Bandar Imam Khom Port Radio – EQN – 500 kHz. If Agents required to arrange Pilot should be informed well in advance.

Pilotage operated by Bandar Imam Khomeini Port Authority from K Musa Bar up to Bandar Imam Khomeini Anchorage. Pilot vesse usually positioned about 1 mile, 135° from Khor Musa Approaches B No. 12. Approach within 2.5 cables of pilot vessel. During adve weather pilot vessel may proceed above Bar, in such cases, Mas should not attempt proceed inward without Pilot.

APPROACHES: Shipping channels well marked with light beacons buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal Wes shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ approximately 1.75 miles West of Khor Musa Approaches Buoy No and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa Light Float position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a cou should be set along marked channel for Buoy No. 12 in position 29° 56′ 03″ N., Long. 49° 34′ 47″ E., bearing 308° 45′ from Khor M Light Float.

MAX. SIZE: LOA 780 ft. and draft 36 ft. (S.W.). Vessels of 32 ft. may enter port at any time. Higher drafts depending on state of Normal rise of tide about 11 ft. Entry permitted day or night.

HEALTH: Medical Officer boards at Bandar Imam Khomeini. Sub no infectious diseases reported on board during voyage, Medical Off will grant Pratique.

RADIO: Bandar Imam Khomeini Port Radio EQN 500 kHz. Te 0612051 Bdho Ir.

Continuous watch on 500 kHz is to be maintained at all times w navigating in Khor Musa Waterway.

VHF: Channels 13, 16, 18 and 25. 24 hours service.

TUGS: Tugs for berthing and unberthing on Berthing Master's adv 9 tugs: 1,000 h.p. – 2,500 h.p.

BERTHING: 33 berths, total length 5,872 m. with depth up to 36 ft.

Eastern Jetty, Berths 1 to 5 – 34 ft.
Western Jetty, Berths 6 to 8 – 34 ft.
Berths 9 to 10 – 34 ft.
Berths 11 to 20 – 34 ft.

1 berth is allocated for grain discharge only. This is done by g vacuvators.

Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capa about 2,000 tons per day. The loading installation consists of 2 pow moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-sha containers with a capacity of 30 tons each and a 600 m. long conve belt with a capacity of 175 t.p.h.

Sulphur: Sulphur is loaded at the Petrochemical Berth. The shiplo travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loa maximum clearance. Radio aerials, and fore and back stays to removed.

Due to high temperatures, every precaution must be taken to co risk of fire.

Grain: All berths are available for grain discharge. Grain is bagg holds and discharged in slings using ship's gear. At only one ber discharge possible by vacuvators. All discharges into railway wag and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepar handle discharge with own gear.

EQUIPMENT:

Type	*No.*	*Capacity* (tons)	*Manufacturer*

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply at Jetty Nos. 1 – 8, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the Inner Anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside. Therefore it is advisable to arrive with ample water on board.

FUEL: Diesel oil and gas oil available by barge at 2–3 days notice.

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At Bandar Imam Khomeini minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

HATCHES: Opening and closing by ship's crew.

WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

DEVELOPMENTS: Depths alongside new jetties when completed will be 13.0 m. – 15.8 m.

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	2 cranes in use
Extension of the 10-berth jetty	5	1,051.5	Completed
Extension of the 10-berth general cargo jetty	5	911.2	Completed
Construction of the 14-berth jetty	14	2,552	
Construction of the lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	
Construction of the ore-loading facilities	1	250	Completed
Ro/Ro berth	1	—	

The container stacking area is about 200,000 sq.m. and equipment ready for use is as follows:

2 gantry cranes, for discharge of containers ex-vessels and 5 transtainers in container area, can accommodate about 12,800 TEU's as well as 630 TEU's of refrigerated containers.

SHIPMASTER'S REPORT:

Congestion: In the event of the port being congested vessels anchor initially in the vicinity of Buoy No. 12. Masters should then cable "Harbourmaster Bandar Imam Khomeini" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Azadeh" keeps watch on 2182 kHz and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Imam Khomeini Jetties to await turn.

No water or stores can be obtained at Outer Anchorage.

At Inner Anchorage water and stores can be obtained by launch but with some difficulty.

SHIPMASTER'S REPORT: March 1988.

Since Iraq/Iran conflict started, many vessels have been hit by missiles in the buoyed channel leading to Khor Musa Bar from Khor Musa light vessel. A majority of wrecks which were clearly visible earlier have now sunk and are well submerged and no-one has exact information regarding their location. Vessels proceeding to this port are advised of wrecks by Bushire Harbour Master, but I have found his information misleading. Moreover, the draft in the dredged channel is no more than 10.0 m. at chart datum. No information has ever been reported and the area has not been surveyed since 1976. Pilot boarded the vessel between Beacons No. 13 and 20, and from this position all beacons are correctly marked; but before these beacons up to the light vessels, all buoys are damaged and mostly missing and none are numbered. Masters have to take the vessel up to the Bar on their own between unknown sunken wrecks and improper channel marking.

I have been up and down this channel through my own chosen route with 34 ft. draft.

AGENT: See "Abadan".

BANDAR MAHSHAHR: 30.27 N. 49.20 E. (See Plan)

Refined Products Loading Terminal of the National Iranian Oil Company.

FLAG: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Stores Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of the Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E. At end of approaches channel, near Buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Imam Khomeini, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers: Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel: Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Imam Khomeini Port Authorities up to Bandar Imam Khomeini, and by Oil Company between Bandar Imam Khomeini and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Imam Khomeini is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot Station. If for any reason a vessel is required to wait at any time at Bandar Imam Khomeini, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Imam Khomeini, will arrange for Berthing Master to board vessel at Bandar Imam Khomeini anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers: Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar: Lat. 29° 59′ N., Long. 49° 04′ E. and Inner Khor Musa Bar Lat. 30° 02′ N., Long. 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan: A rocky shoal, in Lat. 30° 12′ N., Long. 48° 58′ E. approximately 10 miles North of Inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18: Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar: Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel: After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Bandar Imam Khomeini.

Bandar Imam Khomeini: All inward bound ships required to anchor on arrival off Bandar Imam Khomeini, where Pilot disembarks and a Government Medical Officer comes on board to grant Pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Bandar Mahshahr Roadstead: Shortly after leaving Bandar Imam Khomeini, the channel to Bandar Mahshahr is entered between the starboard hand Beacon No. 1 (flashing white) and the port hand Beacon No. 2 (temporarily removed). Channel well marked by light beacons to entrance of Bandar Mahshahr, at Beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Imam Khomeini Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.

ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa Channel, West of Bandar Imam Khomeini, and await arrival of Oil Company Berthing Master.

WIND AND TIDE:

Khor Musa Bar: Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, MHHW has rise of 11.6 ft. and MLHW has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.

Khor Musa: Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near Inner Khor Musa Beacon No. 18.

At Ports of Imam Khomeini and Mahshahr: Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. MHHW has rise of 17.0 ft., and MLHW rise of 14.6 ft. above Mahshahr chart datum.

Mahshahr Terminal: N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E., and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.

MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at Berth No. 4 up to 43.5 ft. at Berth No. 6.

Vessel up to 740 ft. LOA can be berthed day or night at any stage of the tide. Vessels lengths 741 ft. – 780 ft. can only be berthed during daylight hours flood tide and unberthed on flood tide day or night.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. Medical Officer boards at Imam Khomeini Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant Pratique.

RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.

Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot Vessel Station.

Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10 in. loading arms, 6 in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosenes	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10 in. loading arms connected to 6 in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.

LPG LOADING: Propane and butane gas is loaded at No. 6 Jetty a rate of 1,500 t.p.h. Propane and butane cannot be loa simultaneously.

As 16 in. fixed Chicksan liquid and vapour return arms are used loading, certain ships are limited to one-side berthing only. To av delay of vessels, it is advisable to have vapour return connections both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adapte

Loading temperature of propane is about minus 48°F., and butane about minus 23°F.

BALLAST: Tankers may discharge ballast ashore at Jetty Nos. 1, 2 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at ra of 200 t.p.h.

MEDICAL: No medical facilities at terminal. Agents may arrange medic attention through Oil Company clinic in Abadan. In event hosp treatment required, patient would be taken to Abadan.

FIRE PRECAUTIONS: On arrival Imam Khomeini Anchorage, Mas is given 6 copies of Fire and Safety Regulations. Fire Station a Emergency tel. 4111.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobac for consumption in port may be issued prior sealing store rooms. St supervision imposed by Customs and prohibited items, particula tobacco and cigarettes, should not be taken ashore in excess 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Imam Khomeini. emergency, the Oil Company may be able to undertake minor repai No main engine repairs whilst alongside loading jetties witho permission from Terminal Superintendent.

TIME: GMT plus 3.5 hours.

TELEPHONES: Available at each jetty. If requested, telephone may placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation cent opposite No. 2 Jetty.

CURRENCY: The unit of currency is the Iranian Rial. It is illegal to u any other than Iranian currency ashore and heavy fines have be imposed for infringement of this regulation. Masters are requested bring this matter to the individual notice of their officers and cre Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.

AGENT: See "Abadan".

BUSHIRE: 28.59 N. 50.50 E. (See Pla

Note: Jetties and port facilites are operational and no major damage h been caused to the port facilities.

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the follow documents must be sent by all loading port Agents to Bushire Age (via Khorramshahr) as far in advance of vessel's arrival as possible

Cargo Manifest (8 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it therefore essential that short-shipments, cancellations, diversions, e (if any) be reported as early as possible and manifest should corrected before submission to Port Authorities to avoid payment fines. Stowage plans and hatch lists should also be sent ahead, giv ample time to be studied by Cargo Supervisor for unloadi arrangements.

PILOTAGE: Compulsory. Application for Pilot to be made wel advance through Bushire Port Radio EQM, 500 kHz. Agents may al arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: In outer port in (approx.) position Lat. 28° 58′ 30″ Long. 50° 44′ 50″ E.

RESTRICTIONS: Entry and departure day or night. Depth in ou channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 35 at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.

MAX. SIZE: LOA 600 ft. Max. draft 27 ft.

RADIO: Bushire Port Radio EQM, 500 kHz. Telex number of p 0332108 BDBU IR.

VHF: VHF radio, operating on International VHF Marine Channels 16 and 25. MF call sign EQM available at following zone times: 050 0800 hrs. and 1200 to 1500 hrs.

TUGS: Normally not used. In event of bad weather tug will as berthing. 2 tugs up to 250 h.p., 2 tugs of 1,200 h.p.

BERTHING: Jetty 360 m. long.
Max. draft No. 1 Jetty – 26.5 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.

MEDICAL: 24 hours advance notice of medical requirements to passed to Agents. Doctor available for vaccinations and inoculation

FRESH WATER: Available at berths ex-pipe-line.
FUEL: Not available.
HATCHES: To be opened and closed by shore labour.
CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.
CARGO GEAR: *Equipment*

2 cranes up to 5 tons
6 cranes up to 5/10 tons
3 cranes up to 10/15 tons
1 crane up to 20/30 tons
2 cranes over 50 tons (max. 60 tons).
5 forklifts 2/3 tons
7 forklifts 3/4 tons

CONSULS: None.
REPAIRS: Minor repairs possible by local workshops.
AIRPORT: 7 km. from port. Regular flights.
TIME: GMT plus 3.5 hours.
TELEPHONES: May be connected on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.
DELAYS: Occasional delays awaiting berth turn.
CIRCULAR: Issued by Ports and Shipping Organisation – Bushire Directorate.

To: Master of MV/MT ....

We would like to draw your kind attention that polluting Iranian territorial waters with garbage or wastes is prohibited (same as other pollutants), therefore reception facilities will be available to collect all waste and garbage from all vessels as follows:

1. Collecting garbage will be carried out 3 times per week.
2. Reception facilities will be available at more than above mentioned times, upon Master or Ships Agencies request.
3. Collected waste and garbage shall be handed to Bushire Port Officials who approach your vessel.
4. Use of said facilities will be compulsory.
5. Related expenses will be charged to all vessels (used/not used) according to Bushire Port Directorate tariff.

The Master shall be responsible for following the provision of this Circular.

Penalty will be charged against those violating this Circular in accordance with Iran's existing legal regulations.

SHIPMASTER'S REPORT: 1976.
Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 tons and 20 tons capacity). Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.
Fuel: Bunker fuels and lubricating oils not available.
Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.
Identification Cards: Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

SHIPMASTER'S REPORT: 1977.
Vessel discharged 726 metric tonnes of crane parts in 2 days (4 hatches).
ETA: To be given at least 7 days in advance through Bahrain Radio as telegrams take 2 days. From the outer anchorage the following Telegram must be sent to "Port Director Bushire" via Bushire Radio EQM 500 KHz: Anchor time, Draft, Length, Breadth, Cargo, Last Port.
Outer anchorage: Buoy No. 2 of fairway bearing 130° and 250° to the prohibited area in 10 m. to 20 m. water. The anchorage is not protected, but the holding ground is good, even in bad weather.
Pilots: The Pilot comes by a fast blue boat to the outer anchorage. There is 1 Pilot, also assistant and 1 docking master with 1 assistant, they only come out in daytime and good weather.
Tugs: There are 2 small and 1 large tugboat, which are used for turning the ship.
Pier: The 360 m. long pier has good wooden and rubber fenders and sufficient bollards. Ships always berth port side alongside. The starboard anchor is used for turning.
Clearance: The following documents are necessary:

5 Crew Lists.
1 Health Clearance.
1 Vaccination List (cholera).
1 Stores List.
1 Crew Effects List.

The stores and the radio-room are sealed, beer is not sealed.
Immigration: The immigration officials do not come aboard, the Agent takes all seamen's books ashore and exchanges them for shore passes which are valid from 0600 hrs. until 2200 hrs. while the ship is in port. Before leaving the seamen's books will be returned in exchange for the shore-passes.
Provisions: Fruit and fish can be obtained, good quality and low prices at the local market.
Water: Water from the pier in any quantity and good quality. The pipe-line – pressure is only enough for heights of about 3 m. to 4 m., so that some "tricks" must be used by larger ships.
Doctor: 24 hour's advance notice required.
Sea Protest: Notary public available, no consulates.
Bunkers: Not available.
Repairs: Were urgently required by the vessel and confirmed by Agent's, but nobody came on board.
Photographs: Taking of pictures not allowed, as Bushire is Military Base.
Crew-change: Very easy and can be done even on the outer anchorage when the ship has no clearance. The crew coming without delay directly from the airport to the ship in a launch (4 hours).

AUTHORITY: Port Director.

AGENT: See "Abadan".

CHAH-BAHAR: 25.17 N. 60.37 E. (See Plan)

Note: 2 jack-up jetties available. It has been reported that the port can accommodate ships up to 20,000 d.w.t.

ANCHORAGE:

Latitude: 25° 22′ N.	Longitude: 60° 30′ E.
Latitude: 25° 22′ N.	Longitude: 60° 33′ E.
Latitude: 25° 18′ N.	Longitude: 60° 30′ E.
Latitude: 25° 18′ N.	Longitude: 60° 33′ E.

MAX. SIZE: Max. size 10,000 d.w.t. – 28,000 d.w.t. Max. draft 28 ft. at HHW.
VHF: All ships destinated to the Chah-Bahar Port are requested to call Chah-Bahar on VHF Channel 16 between 0700 to 1900 hrs. local time.
DEVELOPMENTS: Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

SHIP'S OFFICER'S REPORT: May 1983.
Approaches: The approaches to Char-Bahar from the East, West and South are straightforward, as far as the Outer Anchorage Areas, where a Pilot will embark. There is a buoy in position Lat. 25° 14.8′ N., Long. 60° 29.6′ E., and marks a 16 m. obstruction to the North of it.

There is a Fl. 10s. 16M. light on Damagheh ye Chah-Bahar Point, this is at the present time unlit, and the Racon on the point has not been observed either.

The light on Damagheh ye Puzim is Fl. (1) 15s. 30m. 10M., and working at present.

The coastline also offers a good radar target, on both sides of the bay.
Pilotage: Pilotage is compulsory (to the best of my knowledge), the Pilot boards the vessel at anchor to the South of Damagheh ye Chah-Bahar Point, and takes the vessels to the anchorage within the bay (see Admiralty Chart No. 145).

The pilot boat is merely an open boat. International code flag "G" has to be flown by vessels requiring a Pilot.
Anchorages: The anchorage where vessels have been discharging, is bounded by the following positions: Lat. 25° 22′ N., Long. 60° 30′ E.; Lat. 25° 22′ N., Long. 60° 33′ E.; Lat. 25° 18′ N., Long. 60° 30′ E.; Lat. 25° 18′ N., Long. 60° 33′ E.

The bottom is soft mud, and the minimum charted depth is 10.3 m.
VHF: There is a Port Control Office situated in Konarak, the details are:

Frequency: VHF Channel 16, Channel 14.
Hours: 0600-1330 hrs., 1430-1830 hrs. local time.
Call: Konarak Port Control.

Tugs: There are 2 tugs at the port, however, they appear to be involved in the port construction. No further information is known about size, horsepower, etc.
Berthing: There is extensive work being carried out at Char-Bahar, however at present there are no berths open to vessels, 4 berths are due to be completed within the space of 4 months approximately. When these berths are open the main cargoes to be handled are bagged grain and fertiliser, for distribution within this Southern area of Iran. Vessels are however being discharged at anchor into barges and their contents being taken to Konarak.
Medical: There is a hospital, with limited facilities, at Char-Bahar.
Fresh Water: Not available.
Fuel: Not available.
Repairs: Not available.
Cargo Gear: Ship's gear used at anchorage.
Repatriation: Possible from Char-Bahar and Konarak, however, trouble can be experienced as personnel have to fly to Tehran.

It is, at present, due to the unrest within the country, very difficult for ship's personnel to join a vessel in Iran in general.
Airport: The airport is at Konarak, and has 5 flights to Tehran per week, but not on Sundays and Tuesdays. Flights from Tehran are still daily.
Time: GMT plus 3.5 hours.
Holidays: No work is carried out on Fridays.
Shore Leave: Shore leave is not permitted, any person visiting the vessel, e.g. doctor, has to accompanied by the vessel's Agent.
Regulations: Vessels are not permitted to leave Char-Bahar without clearance papers from the Harbour Master.
Delays: With most Iranian ports now at a standstill, delays of varying lengths can be expected.

Bandar Mahshahr Roadstead: Shortly after leaving Bandar Imam Khomeini, the channel to Bandar Mahshahr is entered between the starboard hand Beacon No. 1 (flashing white) and the port hand Beacon No. 2 (temporarily removed). Channel well marked by light beacons to entrance of Bandar Mahshahr, at Beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Imam Khomeini Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.

ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa Channel, West of Bandar Imam Khomeini, and await arrival of Oil Company Berthing Master.

WIND AND TIDE:

Khor Musa Bar: Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, MHHW has rise of 11.6 ft. and MLHW has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.

Khor Musa: Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near Inner Khor Musa Beacon No. 18.

At Ports of Imam Khomeini and Mahshahr: Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. MHHW has rise of 17.0 ft., and MLHW rise of 14.6 ft. above Mahshahr chart datum.

Mahshahr Terminal: N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E., and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.

MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at Berth No. 4 up to 43.5 ft. at Berth No. 6.

Vessel up to 740 ft. LOA can be berthed day or night at any stage of the tide. Vessels lengths 741 ft. – 780 ft. can only be berthed during daylight hours flood tide and unberthed on flood tide day or night.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. Medical Officer boards at Imam Khomeini Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant Pratique.

RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.

Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot Vessel Station.

Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.

VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.

TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.

BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10 in. loading arms, 6 in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosenes	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.

FUEL: Fuel and diesel oil available each jetty. 10 in. loading arms connected to 6 in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.

LPG LOADING: Propane and butane gas is loaded at No. 6 Jetty rate of 1,500 t.p.h. Propane and butane cannot be loa simultaneously.

As 16 in. fixed Chicksan liquid and vapour return arms are used loading, certain ships are limited to one-side berthing only. To a delay of vessels, it is advisable to have vapour return connections both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adap

Loading temperature of propane is about minus 48°F., and butan about minus 23°F.

BALLAST: Tankers may discharge ballast ashore at Jetty Nos. 1, 2 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at of 200 t.p.h.

MEDICAL: No medical facilities at terminal. Agents may arrange med attention through Oil Company clinic in Abadan. In event hosp treatment required, patient would be taken to Abadan.

FIRE PRECAUTIONS: On arrival Imam Khomeini Anchorage, Mas is given 6 copies of Fire and Safety Regulations. Fire Station a Emergency tel. 4111.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobac for consumption in port may be issued prior sealing store rooms. St supervision imposed by Customs and prohibited items, particula tobacco and cigarettes, should not be taken ashore in excess 50 cigarettes, or cigars, or 1 oz. tobacco.

CONSULS: Consulates situated in Khorramshahr.

REPAIRS: No repair facilities at Mahshahr or Imam Khomeini. emergency, the Oil Company may be able to undertake minor repai No main engine repairs whilst alongside loading jetties witho permission from Terminal Superintendent.

TIME: GMT plus 3.5 hours.

TELEPHONES: Available at each jetty. If requested, telephone may placed aboard.

SHORE LEAVE: Restricted to foreshore area only. Recreation cen opposite No. 2 Jetty.

CURRENCY: The unit of currency is the Iranian Rial. It is illegal to u any other than Iranian currency ashore and heavy fines have be imposed for infringement of this regulation. Masters are requested bring this matter to the individual notice of their officers and cre Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.

AGENT: See "Abadan".

BUSHIRE: 28.59 N. 50.50 E. (See Pla

Note: Jetties and port facilites are operational and no major damage h been caused to the port facilities.

DOCUMENTS:

Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the follow documents must be sent by all loading port Agents to Bushire Age (via Khorramshahr) as far in advance of vessel's arrival as possible

Cargo Manifest (8 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and i therefore essential that short-shipments, cancellations, diversions, e (if any) be reported as early as possible and manifest should corrected before submission to Port Authorities to avoid paymen fines. Stowage plans and hatch lists should also be sent ahead, gi ample time to be studied by Cargo Supervisor for unload arrangements.

PILOTAGE: Compulsory. Application for Pilot to be made wel advance through Bushire Port Radio EQM, 500 kHz. Agents may a arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: In outer port in (approx.) position Lat. 28° 58′ 30″ Long. 50° 44′ 50″ E.

RESTRICTIONS: Entry and departure day or night. Depth in o channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 3 at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.

MAX. SIZE: LOA 600 ft. Max. draft 27 ft.

RADIO: Bushire Port Radio EQM, 500 kHz. Telex number of 0332108 BDBU IR.

VHF: VHF radio, operating on International VHF Marine Channels 16 and 25. MF call sign EQM available at following zone times: 050 0800 hrs. and 1200 to 1500 hrs.

TUGS: Normally not used. In event of bad weather tug will as berthing. 2 tugs up to 250 h.p., 2 tugs of 1,200 h.p.

BERTHING: Jetty 360 m. long.

Max. draft No. 1 Jetty – 26.5 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.

MEDICAL: 24 hours advance notice of medical requirements t passed to Agents. Doctor available for vaccinations and inoculatio

FRESH WATER: Available at berths ex-pipe-line.
FUEL: Not available.
HATCHES: To be opened and closed by shore labour.
CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.
CARGO GEAR: *Equipment*

2 cranes up to 5 tons
6 cranes up to 5/10 tons
3 cranes up to 10/15 tons
1 crane up to 20/30 tons
2 cranes over 50 tons (max. 60 tons).
5 forklifts 2/3 tons
7 forklifts 3/4 tons

CONSULS: None.
REPAIRS: Minor repairs possible by local workshops.
AIRPORT: 7 km. from port. Regular flights.
TIME: GMT plus 3.5 hours.
TELEPHONES: May be connected on board.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.
DELAYS: Occasional delays awaiting berth turn.
CIRCULAR: Issued by Ports and Shipping Organisation – Bushire Directorate.

To: Master of MV/MT ....

We would like to draw your kind attention that polluting Iranian territorial waters with garbage or wastes is prohibited (same as other pollutants), therefore reception facilities will be available to collect all waste and garbage from all vessels as follows:

1. Collecting garbage will be carried out 3 times per week.
2. Reception facilities will be available at more than above mentioned times, upon Master or Ships Agencies request.
3. Collected waste and garbage shall be handed to Bushire Port Officials who approach your vessel.
4. Use of said facilities will be compulsory.
5. Related expenses will be charged to all vessels (used/not used) according to Bushire Port Directorate tariff.

The Master shall be responsible for following the provision of this Circular.

Penalty will be charged against those violating this Circular in accordance with Iran's existing legal regulations.

SHIPMASTER'S REPORT: 1976.
Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 tons and 20 tons capacity). Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.
Fuel: Bunker fuels and lubricating oils not available.
Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.
Identification Cards: Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

SHIPMASTER'S REPORT: 1977.
Vessel discharged 726 metric tonnes of crane parts in 2 days (4 hatches).
ETA: To be given at least 7 days in advance through Bahrain Radio as telegrams take 2 days. From the outer anchorage the following Telegram must be sent to "Port Director Bushire" via Bushire Radio EQM 500 KHz: Anchor time, Draft, Length, Breadth, Cargo, Last Port.
Outer anchorage: Buoy No. 2 of fairway bearing 130° and 250° to the prohibited area in 10 m. to 20 m. water. The anchorage is not protected, but the holding ground is good, even in bad weather.
Pilots: The Pilot comes by a fast blue boat to the outer anchorage. There is 1 Pilot, also assistant and 1 docking master with 1 assistant, they only come out in daytime and good weather.
Tugs: There are 2 small and 1 large tugboat, which are used for turning the ship.
Pier: The 360 m. long pier has good wooden and rubber fenders and sufficient bollards. Ships always berth port side alongside. The starboard anchor is used for turning.
Clearance: The following documents are necessary:

5 Crew Lists.
1 Health Clearance.
1 Vaccination List (cholera).
1 Stores List.
1 Crew Effects List.

The stores and the radio-room are sealed, beer is not sealed.
Immigration: The immigration officials do not come aboard, the Agent takes all seamen's books ashore and exchanges them for shore passes which are valid from 0600 hrs. until 2200 hrs. while the ship is in port. Before leaving the seamen's books will be returned in exchange for the shore-passes.
Provisions: Fruit and fish can be obtained, good quality and low prices at the local market.
Water: Water from the pier in any quantity and good quality. The pipe-line – pressure is only enough for heights of about 3 m. to 4 m., so that some "tricks" must be used by larger ships.
Doctor: 24 hour's advance notice required.
Sea Protest: Notary public available, no consulates.
Bunkers: Not available.
Repairs: Were urgently required by the vessel and confirmed by Agent's, but nobody came on board.
Photographs: Taking of pictures not allowed, as Bushire is Military Base.
Crew-change: Very easy and can be done even on the outer anchorage when the ship has no clearance. The crew coming without delay directly from the airport to the ship in a launch (4 hours).

AUTHORITY: Port Director.
AGENT: See "Abadan".

CHAH-BAHAR: 25.17 N. 60.37 E. (See Plan)

Note: 2 jack-up jetties available. It has been reported that the port can accommodate ships up to 20,000 d.w.t.

ANCHORAGE:

Latitude	Longitude
Latitude: 25° 22′ N.	Longitude: 60° 30′ E.
Latitude: 25° 22′ N.	Longitude: 60° 33′ E.
Latitude: 25° 18′ N.	Longitude: 60° 30′ E.
Latitude: 25° 18′ N.	Longitude: 60° 33′ E.

MAX. SIZE: Max. size 10,000 d.w.t. – 28,000 d.w.t. Max. draft 28 ft. at HHW.
VHF: All ships destinated to the Chah-Bahar Port are requested to call Chah-Bahar on VHF Channel 16 between 0700 to 1900 hrs. local time.
DEVELOPMENTS: Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

SHIP'S OFFICER'S REPORT: May 1983.
Approaches: The approaches to Char-Bahar from the East, West and South are straightforward, as far as the Outer Anchorage Areas, where a Pilot will embark. There is a buoy in position Lat. 25° 14.8′ N., Long. 60° 29.6′ E., and marks a 16 m. obstruction to the North of it.

There is a Fl. 10s. 16M. light on Damagheh ye Chah-Bahar Point, this is at the present time unlit, and the Racon on the point has not been observed either.

The light on Damagheh ye Puzim is Fl. (1) 15s. 30m. 10M., and working at present.

The coastline also offers a good radar target, on both sides of the bay.
Pilotage: Pilotage is compulsory (to the best of my knowledge), the Pilot boards the vessel at anchor to the South of Damagheh ye Chah-Bahar Point, and takes the vessels to the anchorage within the bay (see Admiralty Chart No. 145).

The pilot boat is merely an open boat. International code flag "G" has to be flown by vessels requiring a Pilot.
Anchorages: The anchorage where vessels have been discharging, is bounded by the following positions: Lat. 25° 22′ N., Long. 60° 30′ E.; Lat. 25° 22′ N., Long. 60° 33′ E.; Lat. 25° 18′ N., Long. 60° 30′ E.; Lat. 25° 18′ N., Long. 60° 33′ E.

The bottom is soft mud, and the minimum charted depth is 10.3 m.
VHF: There is a Port Control Office situated in Konarak, the details are:
Frequency: VHF Channel 16, Channel 14.
Hours: 0600-1330 hrs., 1430-1830 hrs. local time.
Call: Konarak Port Control.
Tugs: There are 2 tugs at the port, however, they appear to be involved in the port construction. No further information is known about size, horsepower, etc.
Berthing: There is extensive work being carried out at Char-Bahar, however at present there are no berths open to vessels, 4 berths are due to be completed within the space of 4 months approximately. When these berths are open the main cargoes to be handled are bagged grain and fertiliser, for distribution within this Southern area of Iran. Vessels are however being discharged at anchor into barges and their contents being taken to Konarak.
Medical: There is a hospital, with limited facilities, at Char-Bahar.
Fresh Water: Not available.
Fuel: Not available.
Repairs: Not available.
Cargo Gear: Ship's gear used at anchorage.
Repatriation: Possible from Char-Bahar and Konarak, however, trouble can be experienced as personnel have to fly to Tehran.

It is, at present, due to the unrest within the country, very difficult for ship's personnel to join a vessel in Iran in general.
Airport: The airport is at Konarak, and has 5 flights to Tehran per week, but not on Sundays and Tuesdays. Flights from Tehran are still daily.
Time: GMT plus 3.5 hours.
Holidays: No work is carried out on Fridays.
Shore Leave: Shore leave is not permitted, any person visiting the vessel, e.g. doctor, has to accompanied by the vessel's Agent.
Regulations: Vessels are not permitted to leave Char-Bahar without clearance papers from the Harbour Master.
Delays: With most Iranian ports now at a standstill, delays of varying lengths can be expected.

General: From approximately mid June all facilities are closed down at Char-Bahar due to the S.W. Monsoon, as the working anchorage is affected by the S'ly swell that develops. Ships waiting here to proceed to Bandar Abbas, will also be despatched as the Agents, etc. also close down, and the whole port set-up is then non-operational.

Ship's stores are not available at Char-Bahar.

Authority: The main Port Administration takes place at Konarak, where there is a Harbour Master's Office and radio station.

Agent: The main Agents at Char-Bahar appear to be Shipping Co., Tehran. There are no telex facilities ashore, however there are no restrictions placed on vessels who wish to use their own radio equipment.

SHIPMASTER'S REPORT: January 1984.

Anchoring: 3 nautical miles East of the buoy at about Lat. 25° 15.5′ N., Long. 60° 29.5′ E. off Ras Pusim.

Port: Unsheltered Port (Port Facilities under development). No bad weather docking. Max. draft 31 ft. Max. length 200 m. Density 1026.0.

Pilot: Pilotage compulsory, will be advised by Port Control and meets vessel at the anchorage. Pilot comes out by tug.

VHF: Char-Bahar Port Control on Channels 16 and 12.

Tugs: 1 tug of 2,500 hp ("Ramassan"). Tug lines available, no line charges.

Documents: 7 Crew Lists, 7 Passenger Lists, 7 Stores Lists, 7 Vaccination Lists (Cards for inspection, Cholera obligatory), 7 Cargo manifests, last draft survey from loading port for bulk carrier, Ship's Safety Certificates for inspection (Rats, Cargo, etc.).

Health: From other Iranian ports no clearance formalities necessary. From sea clearance is effected before coming alongside and arrival.

Radio: Via Radio Bandar Abbas EQI.

Discharging: Only by ship's gear. Port Authorities have to be informed about cargo gear type (Cranes or derricks). No shore facilities. In case of emergency 1 crane of 75 tons lifting capacity available. Bulk cargo discharging rate about 2,000 tons per day, will be carried away by lorry. Stevedore chief has to be accommodated and fed.

Medical: Facilities available (Doctor, Ambulance). Emergency cases are sent to Tehran (Inform Port Authorities).

Jetty: Consists of two pontoons on legs, connected by a bridge. Size of pontoons 150 m. by 30 m., bridge length 90 m. 8 bollards on pontoon ship's side.

Fresh water: Will be delivered by truck, rate about 30 tons max. per day. (Line under construction).

Fuel: Diesel oil by truck. Prices above international rate to keep supply low until Line and Stores are ready (now under construction).

Consul: None.

Repairs: Not possible.

Gangway/Deck watchmen: Supplied by Shore. Rate about 4,000 Rials per day.

Hatches: Opening and closing carried out by crew.

Customs Allowances: Customs Officer will seal all store rooms. Reasonable ships requirements (Cigarettes) should be taken out before sealing. 200 Cigarettes Allowance per week per crew member.

Repatriation: Can be arranged by agent.

Airport: Konarak Airbase. Daily flight from Bandar Abbas and Tehran and back. Konarak lies about 70 km. from Char-Bahar.

Time: Iranian Time 3.5 hours minus UTC.

Telephone: Under construction.

Services: Provisions from local market at reasonable prices. Garbage removal available.

Shore Leave: By shore passes (photograph to be included).

Authorities: Port and Shipping Organisation. J. Khalaj (Port Director).

SHIPMASTER'S REPORT: January 1987.

The following is an update of the "Shipmaster's Report – dated January 1984". Items not remarked upon are the same.

Port: Drafts at berths are different, no dredging has been done for years. Maximum depth is no more than 9.0 m. In any case a vessel must not arrive here with d.w.t. of more than 25,000 tonnes, otherwise vessel will be directed to other Iranian ports for lightening.

Tugs: 2×2,500 h.p.

Discharging: Most cargo discharged here is on direct delivery basis and there are severe problems regarding lorries. Rate of discharge varies between 300 tons to 1,000 tons depending upon how many ships are in port.

Fresh Water: Should be tested before filling ship's tanks.

Fuel: Twice the price of current market price.

Telephones: Telephone exchange ashore provides international calls. There is no delay to Europe and U.S.A.

Regulations: Strict Islamic Regulations to be adhered to especially for wives onboard. They must not be seen outside the accommodation without proper Islamic cover.

AGENT: See "Abadan".

CYRUS TERMINAL: 29.01 N. 49.28 E. (See Plan)

LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N., Long. 49° 28′ 51″ E. Storage barge *(Pazargad).* Lat. 29° 01′ 57″ N., Long. 49° 29′ 30″ E.

APPROACHES:

Obstructions: In addition to submarine export mooring and storage vessel *Pazargad,* various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38.7″ N.	49° 27′ 23.1″ E.
C–4	29° 00′ 15″ N.	49° 32′ 00″ E.
C–5	29° 02′ 52″ N.	49° 31′ 34″ E.
C–6	29° 03′ 57″ N.	49° 29′ 57″ E.
C–7	29° 03′ 31.2″ N.	49° 29′ 05.6″ E.
C–8	29° 03′ 31.2″ N.	49° 30′ 48″ E.
C–9	29° 02′ 15″ N.	49° 29′ 57″ E.
C–10	29° 03′ 33″ N.	49° 27′ 22.5″ E.
C–11	29° 04′ 51″ N.	49° 26′ 31″ E.
C–12	29° 03′ 33″ N.	49° 23′ 56.5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39.5″ E.

Safest and most desirable direction of approach to Cyrus Terminal from S.E. Due to numerous obstructions noted above any approa should be made with extreme caution.

Navigational Aids. All structures located within Cyrus Terminal ar display interrupted quick flashing white lights and sound a fog horn. Th storage barge *Pazargad* displays, as required, those day and nig signals as prescribed by articles 27 (b) and 30 (a) of International Rule The 6 mooring buoys for the Cyrus Terminal are not lighted.

DOCUMENTS:

Bill of Health.

Health Declaration (International Health Form to be filled out by Mast on arrival).

Manifest (if with cargo certified by Iranian Consulate. If vessel is ballast, no legalisation dues).

Clearance (from last port).

Register.

5 Crew Lists.

Passenger Manifest (if any passengers are on board).

5 Store Lists.

Bonded Store List.

PILOTAGE: Vessels will be boarded by Mooring Master of IPAC with 2 miles, approximately 180° true from *Pazargad*. Mooring Master w advise Master on approaches to berth, mooring and unmoorin connecting and disconnecting submarine hose and all other operatio within berthing area. All manoeuvring within loading berth area shall b done only in accordance with advice of an IPAC Mooring Master, subje to understanding that Master shall remain solely responsible for safe and proper manoeuvring. Master or qualified deck officer must be o bridge at all times while ship manoeuvring.

Vessels requested to have pilot ladder safely and securely rigge ready for immediate use, and long enough to reach Mooring Maste launch. If at night, adequate lighting must be rigged overside for Moorin Master to approach side of ship and climb ladder safely. Adequa searchlights should also be rigged on both wings of bridge when moorin at night, to assist in running lines to buoys.

ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. betwe meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms

Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and Ea of Long. 49° 31′ 00″ as there are numerous flow lines on sea be connecting various structures, storage tanker and submarine termina During Winter months, November through March, severe South-easte storms often encountered with little or no indication of impending storm Vessels at anchor, and loading in submarine terminal, must hav engines ready with full power for immediate use. Masters cautioned t use adequate scope of chain while anchored awaiting berth.

RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days week. Ships moored, loaded and unmoored at any hour, weather an other circumstances permitting. Terminal will never be closed due t religious holidays.

MAX. SIZE: Ship loaded by means of submarine pipe-line and 1 hos at 1 loading berth, located in approximately 140 ft. of water. Moorin buoys numbered 1, 2, 3, 4, 5 and 6. Starting with No. 1 East of moorin and numbered consecutively in clockwise direction. Max. capaci 70,000 d.w.t., max. length 950 ft.

HEALTH: The rules governing quarantine are the same as found i other ports of the world. Owners should check with Agent respecti any recent imposition of anti-epidemic regulations and requirements t additional injections for crew members.

RADIO: *Advice of Arrival:* Incoming tankers must send incoming ET at least 3 days before arrival. The radio station at Abadan will hand IPAC's radio traffic, pre-arrival messages, etc., for vessels calling Cyr Terminal. The station call sign is EQZ. Messages for IPAC should b to NIOC Kharg, prefixed "for IPAC" with copy to Agent. Further ET messages should be sent when vessel 24 and 12 hours distant fro Cyrus Terminal and at any other time any appreciable change occu in original ETA or those subsequent thereto. The 12 hours ETA shou include a positive statement regarding "ship's readiness to load" arrival and the number of hours that will be required to discharge clea ballast after ship is berthed in mooring.

Radio Watches: While at the anchorage off Cyrus Terminal, vesse should maintain normal listening watches on both HF and WT.

VHF: Cyrus Terminal base *(Pazargad)* is equipped with VHF rad telephone and maintains a radio watch. Vessels arriving at Cyr Terminal may communicate with the *Pazargad* on Channel 6.

TUGS: A charge for each tug movement will be made in accorda with rates established by IPAC. When tug/tugs are standing-by vess mooring/unmooring, for use if required, the full fee will be charged. IPA maintains launches to assist in mooring and unmooring.

LOADING: Maximum crude oil loading rates for a tanker using one 12 deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p Requested that ships receive oil as fast as it can be delivered, with d regard for safety, also that any fittings on manifold such as "Y strainers, or mud boxes, which tend to restrict flow of crude oil into t ships, be removed before arrival at terminal. Preferable that connecti be provided so that a 12 in. deck hose can be used.

BERTHING: (Also see "Max. Size"). Tankers to have ready: *(a)* Windlass and deck winches fore and aft. *(b)* 12 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5.5 tons. *(d)* 1 bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. *(e)* Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of 6 steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a 2 heading basis, using 12 mooring ropes (4 bow, 4 beam, and 4 quarter).

MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.

DENSITY: Salinity approximately 20% more than normal sea water.

TIDE/CURRENT: Tidal range between 6 ft. and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.

FRESH WATER: No fresh water available.

FUEL: No bunkers or lubricants available.

FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

REPATRIATION: No facilities.

TIME: GMT plus 3.5 hours.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS: Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

GOVERNMENT OFFICIALS: Iranian officials, such as the Customs Officers, Immigration Officer and Quarantine Officer, are available on the barge *Pazargad*. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials. All vessels calling at Cyrus Terminal must provide an accommodation ladder, rigged for Iranian Officials.

AUTHORITY: Iran Pan American Oil Co.

AGENT: See "Abadan".

KHARG ISLAND: 29.14 N. 50.19 E. (See Plan)

Note: Jetties No. 3, 5, 9, 10, 12 and 15 operational. Jetty No. 8 under repair.

A. DARIUS TERMINAL (DOROOD TERMINAL). Oil-loading terminal of Iranian Offshore Oil Company. (I.O.O.C.).

B. KHARG TERMINAL. Oil-loading terminal of the National Iranian Oil Company. Including Sea Island Terminal.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate at port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).
Clearance (from last port).
Register.
Crew List.
Passenger Manifest (if any passengers are on board).
Stores List.
Bonded Stores List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Kharg Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall: 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, 1 or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers: Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about 0.25 miles seawards along whole coast line. To S.W. of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon: Lat. 29° 12′ 46″ N., Long. 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 215° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon: Lat. 20° 15′ 02″ N., Long. 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon: Lat. 29° 20′ 20″ N., Long. 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Kharg Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon: Lat. 29° 35′ 20″ N., Long. 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles N.W. of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, 1 flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-East Buoy: Lat. 29° 11′ 29″ N., Long. 50° 19′ 51″ E. Red can buoy, white light, 1 flash every 2 seconds. Near edge of reef, S.E. Kharg Island in 54 ft. of water.

North-East Buoy: Lat. 29° 14′ 51″ N., Long. 50° 20′ 10″ E. Red conical buoy, white light, 1 flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy: Lat. 29° 16′ 12″ N., Long. 50° 20′ 27″ E. Red conical buoy, white light, 1 flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts: At South end of Kharg Island a high radio mast painted red and white positioned at Lat. 29° 12′ 47″ N., Long. 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at Lat. 29° 14′ 10″ N., Long. 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb: On highest point of Kharg Island, Lat. 29° 14′ 57″ N., Long. 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb: On N.E. part of Kharg Island at Lat. 29° 15′ 10″ N., Long. 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees: On Khargu Island at Lat. 29° 18′ 45″ N., Long. 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards: On North, S.E. coast and S.W. of Khargu Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area: The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of oil loading jetty, and await arrival of Berthing Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages: 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines: Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms: Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(c) Harbour Area (East): The area surrounding the "T" jetty and extending approximately 2.5 km. offshore from the East coast has been declared as a Harbour Area.

(d) Harbour Area (West): The area surrounding the sea island and extending to a distance of approximately 4 km. offshore has been declared as a Harbour Area. The Harbour Area is used by vessels manoeuvring to and from the oil loading jetty. No vessel is allowed to enter or anchor within these areas unless a Berthing Master is on board.

Cautions: *(a)* Unlit mooring buoys at S.E. of Kharg Island (see Darius Terminal). *(b)* Oil Platforms to S.W. of Kharg Island. *(c)* Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

HEALTH: Tankers calling at Kharg Island and requiring Radio Pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 MHz. Other channels, available after contact has been established are: Nos. 4, 12, 14 and 20. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

RADIO: Vessels bound for Kharg Terminal should prefix messages with "NIOC Kharg", and vessels bound Darius Terminal should prefix with "NIOC for I.O.O.C. Kharg", in both cases with copy to Agents. Terminal on Telex No. 212770.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

Arrival Information:

We quote below text of the letter dated October 24th 1988, received by Gulf Agency Co. (Iran) Ltd., Tehran, from NIOC, Crude and Product Operation Division, Tehran.

"Further to our previous instructions, please note all the vessels under that agency which are intended to load at Kharg Island have to give information below, 36 hours before their arrival to the Area Manager of Kharg Island. Otherwise we shall not be responsible for any delay and demurrage or any other costs and expenses occurred to those vessels in this respect.

Required information:

1. Cargo requirements and supplier.
2. Deballasting time.
3. Loading rate.
4. ETA Kharg Anchorage.
5. Arrival and departure drafts.
6. Radio Free Pratique by quarantine message addressed to Port Health, Kharg, Iran.

Please also note the following:

(a) There are oil pollution patrols by launch around Kharg, ensure clean ballast and pipelines. No oily discharge from any source allowed.
(b) All cargo tank openings must be closed while tugs alongside.
(c) Port safety regulations rigorously enforced.
(d) After anchoring telex/cable anchoring time and position.
(e) If loading two grades of oil, indicate which necessary to load first.
(f) Note that diesel bunkers are not available at Kharg Island.
(g) Early Departure Procedure is available.
(h) Vessels using EDP to telex/cable ship's figures within 12 hours of sailing.
(i) Ensure that all exhausts and uptakes are clean before berthing to prevent funnel sparking alongside.
(j) Propeller turning alongside berth to be kept to minimum and must be strictly watched.
(k) Intership VHF traffic to be kept clear of Channels 16, 12, 10 and 77 while in Kharg Anchorage and alongside."

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97°F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights		*Tidal streams*			
L.A.T.	= +10.4 ft.	Slack water	10.75 hrs.	before	HHW
MLLW	= +1.8 ft.	Ebb (full)	7.75 hrs.	before	HHW
MHLW	= +3.6 ft.	Slack water	4.50 hrs.	before	HHW
MSL	= +4.1 ft.	Flood (full)	1.50 hrs.	before	HHW
LLHW	= +4.7 ft.	Slack water	1.00 hr.	after	HHW
MHHW	= +6.5 ft.	Ebb (max.)	3.75 hrs.	after	HHW
H.A.T.	= +8.2 ft.	Slack water	6.50 hrs.	after	HHW
Heights in feet above Chart Datum		Flood (max.)	9.50 hrs.	after	HHW
		Times are approximate only			

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

CUSTOMS ALLOWANCES: Present regulations allow each seaman retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. T balance of all smoking items must be collected and carefully listed p to arrival. This list will be checked by Customs before sealing locker any discrepancies, vessel subject to fine.

AIRPORT: Small airport used by Oil Company aircraft and Iran Air flig to and from Abadan. Due security arrangements movement of crew m be programmed through Agent.

TIME: GMT plus 3.5 hours.

IDENTIFICATION CARDS: Each seaman will be issued with a pa which will be punched when crossing the jetty limits going out and and may be used once only. In addition to this pass, seamen sho carry an Identification Card or Vaccination Certificate, bearing t owner's photograph.

A. **DARIUS TERMINAL** (Dorood Terminal). (Additional requiremen and details).

Terminal operates 24 hours per day, 7 days a week. Ships moore loaded and unmoored at any hour, weather and other circumstanc permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Isla Lat. 29° 12′ 40″ N., Long. 50° 20′ 40″ E.

LANDMARKS: *Jetty:* Approximately 0.5 miles North of the mooring a "T" shaped wharf for the berthing of supertankers.

Khemco Jetty: Approximately 0.25 miles West of the terminal is a dolph type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuo gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg Sou Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous g flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flar burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distanc However, on occasions, 1 or more or all of the flares may not be burnin

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio conta with I.O.O.C. when 3 days distant from Kharg Island and maintain th contact until just prior to arrival at the Terminal. All ships should se a 72 hour ETA message to I.O.O.C., giving the best estimate of ship arrival time at the Terminal. This first ETA message should also inclu a definite statement of the details of any equipment required from sho for connecting submarine hoses to ship's manifold. Further ET messages should be sent to I.O.O.C. when the vessel is 24 hours a 12 hours distant from Kharg island and at any other time when appreciable change occurs in the original ETA or those subseque thereto. The 12 hour ETA should include a positive statement regardi "ship's readiness to load" on arrival, and the number of hours that w be required to discharge clean ballast after ship is berthed in moorin

Ship-to-Shore Communication: Kharg Terminal is equipped with VH radio-telephone, using international frequencies. A continuous watch kept on the international calling and emergency Channel 16, frequen 156.80 MHz. Masters are recommended to use this facility when with range, particularly when approaching the port. In poor visibility, when vessel's approach may not be observed from the shore, VH communication may be the means of avoiding delay in mooring. Wh a ship is in mooring, communication will be by portable VH radiotelephone units. The Mooring Master will advise Masters a Officers regarding the emergency whistle signals set up for use in eve VHF radiotelephone units becoming inoperative. The use of the ship radio station and/or battery charging equipment is prohibited dur cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels shou maintain normal listening watches on W/T and VHF.

MOORING: Vessel requested to have pilot ladder safely and secur rigged, ready for immediate use, and long enough to reach Moor Master's launch. Mooring Master will board 2 miles seaward of t Terminal sea-buoy. Adequate searchlights should be rigged on bo wings of bridge, when mooring at night, to assist in running lines buoys.

Raising, connecting, disconnecting and lowering of submarine hos will be performed by IPAC line handling crew as advised by Moor Master, who will remain on board while ship in moorings. A capa winchman to be provided by ship.

Mooring buoys for Darius Terminal (Darood Terminal) not ligh Permanent moorings in berth consist of 5 steel cylindrical buoys ea fitted with quick release hook, to which ship's mooring lines are attach by I.O.O.C's mooring launches. The berth is laid out on the one head basis, using both ship's bower anchors with 9 mooring ropes (4 bea 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Star with No. 1. East of the mooring and numbers running consecutively a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, ea with not less than 120 fathoms of chain. *(b)* 9 good manila or synth mooring lines, each not less than 120 fathoms in length, with effic stoppers for each line. *(c)* On port side opposite ship's manif equipment capable of lifting submarine hose safely and expeditiou Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hos at 1 loading berth, located approximately 1 mile offshore in over 6 of water. Crude oil loading hoses lifted on port side. Maximum cru loading rate for tanker using two 12 in. deck hoses and 20 p.s.i. at sh rail is approximately 5,000 t.p.h.

In order to save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12 in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (· – –) on blinker light. To attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from I.O.O.C. launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at main jetty having obtained nomination through NIOC Tehran (Export and Marketing). Tankers loading crude oil at "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. **KHARG TERMINAL** (Additional requirements and details).

RESTRICTIONS: If arriving with a part cargo vessels will be refused loading by N.I.O.C. if the maximum displacement exceeds 250,000 tons.

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 ft. to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	*Depth of water (m.)*	*Maximum capacity (d.w.t.)**	*Loading and bunker arms†*	*Height limits ship's manifold in metres above chart datum*
1	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
2	19.8	38,000	4×12 in.	3.4 to 18.9
3	21.3	250,000	3×12 in. (flexible)	4.3 to 23.8
4	20.1	65,000	5×12 in.	3.4 to 18.9
5	21.3	250,000	3×16 in.	5.8 to 25.3

7	18.3	175,000	3×16 in. 2×12 in.	4.3 to 23.8
8	19.2	45,000	5×12 in.	3.4 to 18.7
9	17.4	140,000	3×16 in.	4.3 to 23.8
10	17.7	90,000	5×12 in.	3.4 to 18.7

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

†12 in. Bunker arms at all berths. All Chicksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berth Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 4 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in Lat. 29° 13′ 29″ N., Long. 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	*Depth of water (m.)*	*Maximum capacity (d.w.t.)*	*Loading and bunker arms*	*Height limits ship's manifold in metres above chart datum*
11	32.0	500,000	4×24 in. 2×16 in.	6.1 to 33.5
12	29.5	300,000	3×16 in.	6.1 to 28.3

The Sea Island has been extended to the Northward to create two new berths, 14 and 15.

Berth	*Depth of water (m.)*	*Maximum capacity (d.w.t.)*	*Loading and bunker arms*	*Height limits ship's manifold in metres above chart datum*
14	25.9	300,000	2×16 in. 4×16 in.	6.1 to 28.3
15	27.4	500,000	4×16 in.	6.1 to 33.5

Loading Arms: Luceat – quick coupling.

Effective Loading Rate: Berth No. 14 – 16,000 t.p.h. Berth No. 15 – 30,000 t.p.h.

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chicksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System: Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations: Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position: No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chicksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chicksan loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of sand, by gravity flow through 4×48 in. diameter pipe-lines and to the Sea Island by 2×78 in. shorelines and 2×56 in. sealines. Loading rates of up to 15,000 t.p.h. to one berth can be achieved at Kharg Terminal. Up to 60,000 t.p.h. can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. 2 grades available, marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 t.p.h., and bunkering will normally commence before loading cargo. Only fuel oil available at Sea Island berths.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. 5 additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or Elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SAFETY:

Amendment to Safety Regulations and Safety Inspections:

To keep Safety Regulations and Safety Inspections in line with current world-wide practice, the following new Rules will be put in force immediately.

1. At least 50% of the crew including sufficient senior officers shall be available on board at all times to deal with emergencies.
2. Two dry powder extinguishers plus 1 fire hose to be available at the manifold at all times.
   Note: This is especially important before connecting lines.
3. Present funnel deck hoses, now only required at inside berths, are now required on all berths including Sea Island.

C. **KHEMCO TERMINAL:** (Additional requirements and details)
OPERATOR: Kharg Chemical Company, Ltd. (Khemco), Tehran, Iran. Cable Address: "Chemkharg" Tehran. Telex: 2402 Khemco Tn.
LOCATION: Khemco Terminal dolphin jetty is located at the S.E. corner of Kharg Island Lat. 29° 12′ 45″ N., Long. 50° 20′ 05″ E.
APPROACHES: Vessels entering Kharg Island Roads must not approach or anchor West of Long. 50° 21′ 30″ E. (being approximately 1 mile East of Khemco Terminal), unless a Company Berthing Master is on board.
PILOTAGE: I.O.O.C. pilots will board vessels outside the port area and will pilot and berth the vessel alongside Khemco Jetty. The pilots will also carry out the duties of safety officer.

Vessels with the pilots on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured on the leeside of the ship for the pilots. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the pilots, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.
NOTICE OF READINESS: Notice of Readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.
RESTRICTIONS: Vessels can be berthed day or night in 2 directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.
MAX. SIZE: Length of pier is 1,180 ft. with maximum of 42 ft. water alongside at MLLW.
RADIO: Messages for Khemco should be prefixed with "NIOC for Khemco Kharg", with copy to Agent.

Advice of Arrival: It is important that ships establish radio contact with Khemco, when 3 days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, Agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.
TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by I.O.O.C. Normally 2 tugs are used for berthing and 1 for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.
MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. 4 powerful mooring launches are provided by I.O.O.C. and normally 1 is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during Winter periods, some additional 4 lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of 1 main and 8 smaller dolphins. 4 on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.
BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by an I.O.O.C. Pilot at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take 2 tugs (1 to the bow and 1 to the stern), alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide a efficient gangway with a net rigged underneath. During the hours darkness, they shall install adequate safe lighting for the gangwa These lights are in addition to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hook fitted on all dolphins and under normal conditions 1 tug is used on th hook at the bow of the vessel in order to clear her off the berth. Usua the documents are signed before departure, unless the berth is neede for another ship.
BALLAST: A. Rules and Regulations. Vessels arriving at Kharg shou maintain a reasonable draft fore and aft for safe manoeuvring an berthing. When conditions permit, the Berthing Master will advise th Master to commence discharging ballast. It is the Master's responsibi to see that dirty ballast, whatsoever, is not pumped or spilled overboar Only clean ballast or bilge water may be discharged within 50 miles the coast-line. In the event of contaminated ballast or bilge water, th vessel will be required to divert this material to a ship's slop tan Otherwise, the vessel may be unberthed and returned to a point not les than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipe-line sea suctions, strainers and pumps. Ships will not be accepted for loadin if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore discharge dirty ballast, or for any similar reason, automatically nullifie any "Notice of Readiness" already tendered and loses any priority he for loading. The vessel will be entered for loading at the time of secon arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitte to load cargo and discharge clean ballast at the same time provided a safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pie Ships will be allowed to draw sea water ballast while alongside.
LOADING: A. Ship's Gear. Although the jetty is equipped with a boo to handle loading hoses, ships are requested to rig jetty side boom a proper and safe manner for possible use. Masters will be responsib for ensuring that the ships gear or fittings are in good working order an will not in any way interfere with or hamper the working of the facilitie

B. Inspection. After the vessel has been berthed and all formalitie carried out the vessel will be boarded by the loading Master. A joi inspection will be made by an authorised ship's officer and the loadin Master after the exchange of information and documents. If the ship tanks, piping or equipment are in such condition that a potential haza exists, the ships will be refused permission to load until such hazard are corrected. In any case, the Owners or Charterers of the ship will b notified of any delay or refusal to load because of hazardous conditio and any expense due to such delay or refusal to load will be borne b Owners.

If the ship does not arrive with tanks and/or piping sufficiently coole to permit loading, the time required to cool down shall not be counte as lay time. Any expenses, including LPG furnished by compan demurrage, etc., involved with the cool-down period and operation sha be borne by the Owners or Charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in t tanks, after purging from a previous cargo of ammonia or other gas t prevent contamination of shore lines and facilities, the inert gas shou be vented if possible before ship is moored. If the ship's tanks to b loaded previously contained a product different from what is to b loaded, the Master shall verify that the tanks are clean and ready t receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loadin will begin until the ship is safely moored with fibre mooring lines gangway lowered and secured, the ship grounded and ground tested ship's and shore emergency fire hose pressurised and ready for use fire wire in place, and ship/shore communications tested and in goo working order.

All loading personnel will wear fibreglass hard hats, leather-palme gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks and sandals or shoes that do not have spark-generating material, suc as steel nails, cleats, toe or heel plates. Non-sparking tools will be use in making hose and ground connections. Silk clothing or headgear w not be permitted due to its affinity for collecting static electricity. Ship grounds will be tested for continuity to shore before product or vapou pass through hoses.

Since the LPG may not contain an odorant, particular care shall b taken that the atmosphere does not become explosive. If there is no movement, explosimeter readings will be taken hourly, and if explosive atmosphere exists, loading shall stop until conditions chang Prior to loading the main cargo a small quantity of propane and/or butan will be loaded or circulated initially for cooling down purposes. Th amount set aside for cooling down will depend on whether the cool dow is for the ship's lines or ship's tanks. Generally, the ship's lines will b cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained the bottoms of the ship's cargo tank during the trip to Kharg Island, th tank vapour space and tank walls are warmer. For a period of about hour while low temperature circulation of the shore lines continues small amount of propane may be taken by the ship from cargo hol and sprayed into ship's tanks. This method cools the upper parts of th ship's tanks and vapour spaces. If propane is taken from shore line this is replaced from shore tankage as the circulating pump suction "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkhea should be frequently monitored by ship's personnel for cargo leakag

The measures for dealing with any leakage to prevent the temperat of the hull structure from falling below a safe level depends upon ship's design. The Master shall have standing orders for dealing w any leakage observed on the ship and shall so inform the Loa Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses; propane 8 in. (with 8 in. ASA 150 flanges); butane 8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 p.s.i. at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (2 lines)	10,900 barrels per hour
Butane (2 lines)	7,800 ,, ,, ,,
Propane (1 line, pumping)	7,000 ,, ,, ,,
Butane (1 line gravitating)	3,900 ,, ,, ,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The Company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24 hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipe-lines/vent system and/or liquification system shall be manifolded so that only those pipe-lines connected to the ship's tank being loaded will be open. All other pipe-lines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Packaged goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while re-aligning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.

(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.

(c) The hose valves and ship's manifold valves must be shut.

(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.

(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.

(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the Owners or Charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The Company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contain residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 t.p.h. via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore com- munications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that 1 line could be used to pull a man out of a hatch. For each man working in the hold 1 man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower down-spout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimise this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24 hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-Summer are extremely warm and humid with the temperature reaching 117°F. (47°C.) and a relative humidity ranging from 10% to 98%. The Winter months, from November to March, are pleasant with a minimum temperature of about 39°F. (4°C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87°F.
Mean minimum temperature	66°F.
Extreme maximum temperature	117°F.
Extreme minimum temperature	39°F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the N.E. through S.E. The prevailing wind for most of the year is from the N.W., but during the Winter period strong S.E. storms occur with very little warning. The Khemco jetty is sheltered from the N.W. winds.

D. Tides. The tidal range is between 7 ft. and 8 ft., with a maximum rate of about 1.5 knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63°F. to 97°F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all port's safety rules and regulations.

GENERAL: *(a)* Shore Leave. Shore leave at the terminal must be arranged between Master and ship's Agent. Sufficient personnel must be on board at all times for emergencies.

(b) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(c) Light Dues. A charge of half a Rial per g.r.t. is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East Navigation Service. The Company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(d) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(e) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(f) Repairs. No workshops or other facilities for repairs at Kharg Island.

(g) Customs. There are Customs and other official offices on the Island. Vessel will normally be boarded by a Custom Director, Immigration Officer and Director of Ports and Shipping.

(h) Consulates. No consulates on Kharg Island.

(i) Marine Surveyor. No marine surveyor on the Island, but can be available at 48 hours' notice through ship's Agent.

(j) Recreation Centre closed.

(k) Supplies. Provisions can be supplied if sufficient notice given. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(l) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

SHIPMASTER'S REPORT: June 1979 (with further updates in March 1980).

Approaches: Generally not a great deal of traffic. The D/F at the airport is operational and useful. Decca Navigator Chain 5C. Ships anchor at S.E. and S.W. of island.

2 buoys at Southern end of island:

Red Pillar Buoy Gp. Fl. (2) 6 sec. (29° 11′ N., 50° 20′ 24″ E.);

Green Wreck Buoy, conical (29° 12′ 06″ N., 50° 19′ 39″ E.), marks position of tug.

Anchorage: The Eastern anchorage is very exposed to Southerly winds (use Western anchorage if waiting for a long time in Winter). At the present time there are many tankers waiting which means small tankers and LPG vessels either have to anchor themselves in amongst VLCC's or anchor well out – generally about 4 miles East of the "T" jetty (less shipping waiting in March 1980). This seems to be quite acceptable to the Authorities and is more satisfactory as far as engine maintenance and winds are concerned.

Berth: South of "T" jetty owned by Khemco – Kharg Chemical Co. Approximate max. size of vessel 250 m. long; water depth LW 13.6 m. and about 60,000 d.w.t.

Consists of jetty stretching over about 150 m. connected to shore by pier. On the jetty there is a manifold for flexible LPG lines, line derrick with powered winch, sulphur gantry and chute connected by conveyor belt to stockpile ashore.

On either side of jetty there are 2 dolphins with quick release moor hooks. The jetty and near set of dolphins are faced by shock absorbi fenders.

March 1980: With strong Southerly winds the berth is a hazard. W experienced a force 6 S.E. wind one night which fetched the swell and caused the vessel to work heavily on the jetty, one release ho gave way (the securing pin snapped), luckily it was on a dolphin th had a catwalk so we were able to change the moorings. As we we port side too facing North into the "T" jetty we had to sit tight and p out extra moorings.

Fenders were very good (about the best that I have seen with lar timber faces)

Depth by lead line. After (Southerly dolphin with catwalk) 12 m. at L forward dolphin 13 m. at LW.

VHF: Call 'Ipac Marine' on Channel 16, works on Channel 6, on operates office hours and when berthing.

Vessel can call 'Kharg Pilots' 24 hours on Channel 16, workin Channel 12, who will try to pass message for you. 'Kharg Pilots' ha nothing to do with 'Khemco' jetty.

Pilots: 2 Iranian 'Ipac' Marine Pilots solely for 'Khemco' jetty. They boa 2 to 3 miles East of "T" jetty from tug (will use hoist).

Berthing: Generally only in daylight. Will unberth at night. Max. berthin winds Northerly 45 knots, Southerly 10 knots. Visibility 0.5 miles.

We actually ended up with visibility at about 2 cables in a sand stor when approaching the berth. But as all the preparations had been mad and little wind, continued on Radar with no problems.

Vessels berth either side alongside (head into tide).

Current: From readings taken off ships log which accurate, current spee corresponds to position "B" on "T" jetty, BA Chart 11.

Tugs: 2 used for berthing and 1 on departure. Tugs lines.

At present 2 hired from Bahrain, one of 3,000 h.p. and 1 of 1,000 h The small one is very manoeuvrable but inadequate pushing, especia in a wind.

Lines: 3 headlines, 2 breast lines and 2 springs each end. 3 headline to outer dolphins, 2 as breasts to inner dolphins, 2 as springs to jet ends.

There are quick release hooks but they are jammed up. 1 line bo only who goes backwards and forwards both ends, try to send 3 line together (Tie up is slow, about 2 to 3 hours).

An exact line up with ends of flexible pipes on jetty with ship's manifo is required because the flexible pipes are not very flexible.

Gangway: Cannot be turned out and landed and must be brought i until before and after connection/disconnection.

It has to be turned through 130° if it is aft facing, or use fixed lengt If vessel port side to, it is much easier to use in the conventional fashio

Manifold: Most particular that manifold is lined up with hoses on qua Liquid: 2×8 in. 150 ASA. Vapour return: 2×6 in. 150 ASA. Ship reducers, shore derrick, ship's chain blocks supporting hoses fro manifold gantry. Shore personnel connect.

Cargo: Propane and butane only by gravity feed. Max. rate each produ 300 t.p.h., generally around 150 t.p.h. when shore tank near the botto there is insufficient pressure to even gravitate. Vapour return line available for both.

Cargo Temperatures:

At manifold, Butane – 6°C (B.P. 0.2 bars)
At manifold, Propane – 42°C (B.P. 0.7 bars)

The shore have no thermometers on their lines. Pockets jammed wi old probes, all measurement is on pressure.

On my visit to the plant I ascertained the propane to be −43°C an butane −5°C.

Vapour Return Line: 1 flare for each product about half way up jetty o spur jetty, which normally just alight, so when you open up they ca immediately see. If used in moderation no difficulties encountered.

No charge directly, but it is the practice to measure shore and sh tanks and check the difference. On our visit this did not happen as sho tanks had not been taken on departure due to being virtually empty.

At the start the vapour return lines were closed so the valve had t be sought.

Loading Master: There is always one on the jetty, tries to be helpful an speaks reasonable English. Best to telephone 441, 442, the manage – very helpful, or telephone Control Room 412 for shift supervisor wh will give you tank tonnages in barrels.

Stopping Propane: 1 hour's notice required to ready the pump f stopping and 5 minutes before completion. When you tell them to st a little more liquid will run down the line by gravity. It was not possib to top off by gravity alone as by this time the shore tanks were very lo

Stopping butane was no problem as they ran out and we were at th end taking it as they were making it until that process came to a hal

Specific Gravity: Propane: 0.505 60/60.
Butane: 0.574 60/60.

Surveyor: No outside surveyors. Plant chemist does the survey, agre with Chief Officer. Ship figure on Bill of Lading.

Draft Reading: Difficult to read after draft, best to use binoculars a Aldis Lamp at night.

Tanks on Arrival: Up to Master whether the ship is capable of loadin If loading propane into butane atmosphere or I.G. or vice versa, Khem require statement to this effect from Master.

The line is normally circulated for 8 to 12 hours before arrival b small quantity of liquid being bled through to the VRL. Nevertheless, t first "Slug" is warm due to exposed quay section of line.

The lines (flexible) to ship are purged with Nitrogen after connec by a bleed in at the manifold connection. Nitrogen bottles on jetty.

Documentation:

8 copies Crew Lists.
2 copies Vaccination List.
1 copy Stores List.
2 copies Crew Declaration.
2 copies Maritime Declaration of Health.

The Agent, Port Authority Representative, Port Health and Cust board arrival berth. Numerous forms have to be completed. A formalities take 45 minutes Clearance is given to Master on arriva

On departure the 'Khemco' shift manager comes down with all the cargo papers – Manifest, Bill of Lading, Spec., etc., and signed onboard.

We finished cargo at 0900 hrs., and papers came aboard at 1145 hrs. This is normal.

The Agent is always on about E.D.P., it is not the practice on this berth and in any case for the sake of a few hours its best to have all the papers correct and note protest if necessary.

Pratique: Granted at berth.

Notice of Readiness: Generally will only be accepted when first line ashore (not at anchorage).

Note of Protest to be given with all force and Khemco may back down and accept on anchoring if port is not closed due to wind.

Communications: Cable "Chem Kharg" Tehran. Telex 2402 Kemco TN.

All telexes have to be routed via Tehran for international acceptance. Telephone poor, can hardly get through to mainland.

It became necessary for me to telephone UK so managed at night to get through to 'Kuwait Maritime' about 120 miles away. 24 hour watch not restricted as ALRS. Call Channel 16, generally works Channel 26. After contact vessel can wait about 30 minutes on Channel 16 before operator calls back. Channel 26 very clear.

March 1980. Not possible to contact 'Kuwait Maritime' in Winter months. It is possible to telephone UK from Kharg and from the jetty. A long wait is usual from the jetty and the line very weak, but it can be done with perseverance.

A better method is to get the Plant Manager to take you to the Central Exchange in the township and UK can be contacted via STD, it took about 40 minutes of constantly ringing to get connected and then you run the risk of disconnection, but again communication is possible and reasonably clear.

Telex via the Agent takes about 26 hours to get a reply due having to be telephoned through to Khorramshahr and then telexed to London via Tehran and vice versa.

Alcohol: We arrived with everything sealed. The Customs allowed us to have 6 cans of beer per man per day, no spirits (it depends on the Customs and Master).

Do not drink outside or give Iranians alcohol, the punishment is severe.

Radio Room: The Port Authority wanted to seal this but persuaded them to seal the antenna switchboard only (with chart paper and glue).

Fresh Water: Fresh water main runs to ship's side with meter. We obtained about 40 tonnes. Water is distilled and slightly brown.

Plant: At present about 300 tonnes per day of butane and 500 tonnes per day of propane are being produced which is about 60% of capacity.

Sulphur production is just resuming and is normally about 200 tonnes per day.

Feedstock is taken from IPAC (Iran Pan American Oil Co.) which is, or used to be, 50% AMOCO owned.

Feedstock is in the form of third stage refined well gas taken from 3 local wells, 2 on the island and the Darius field on the S.W. coast. Most of the 'Sour Crude Gas' is extracted before acceptance, what's left is used for making sulphur.

The plant is completely self contained apart from initial feedstock and covers about 1 sq. mile. It is fully automated and staffed by six operators on a shift system.

The gas which comes in H.P. and L.P. form depending on the wells, is fed through in 2 streams which are crossed to accept different Hydrocarbons thereby achieving a no waste system.

The gas is fed through Glycol towers for water absorbtion then heat exchangers to separate the different molecules.

After basic separation vertical separators are employed to further refine the product. This is then led to 3 stage compressors for reliquefaction then to chillers.

After processing the liquid is fed to receiving tanks for settling purposes then to 2 large atmospheric holding tanks.

The tanks are heavily lagged with bitumen glass wool compound and any boil off being re-liquefied.

The approximate amounts capable of being stored are 120,000 bbls. butane (11,000 tonnes), and 250,000 bbls. propane (20,000 tonnes) which under the original Japanese shipment meant about one 30,000 tonne shipment per month.

Power requirements for the electric motor drives are provided by two 4 MegaWatt Mitsubishi compound turbo generators, 1 being on auto stand by at any one time, supplied with steam from the 2 boilers that also produce sulphur.

Cooling water for the various systems is provided by salt and fresh depending on the plant. Salt by two 3,000 M3 electric pumps situated about two thirds the way down the jetty, these are backed up by a diesel driven auto start pump.

Fresh water is distilled at the rate of 700 tonnes per day by a steam separator and stored in two 1,000 tonne tanks.

A new Glycol plant was commissioned in March 1978 and a new distillation plant supplied last year but not erected. At present it is in polythene sheeting awaiting engineers.

Generally the plant is in a good state of repair and all instruments seemed to be working in the very comprehensive control room. The staff were most helpful but a camera was not allowed.

A product specification can be obtained. One is always given on completion, but with a lot of pressing can be obtained about 12 hours after commencement of loading.

Sulphur loading is slow and by a conveyor belt to a directional chute. The ship has to shift to load individual holds.

Kharg Crew Facilities:

Films: No Walport exchange.

Travel: The Agent said in emergency it could be possible for repatriation to be arranged.

Iran Air have restarted their 737 flights to Abadan, Bushire and Tehran once a day in each direction. Leaves for Abadan about 1000 hrs.

Khemco/IPAC have a flight from Tehran twice a week for their own personnel by Fokker Friendship. I was told it would be possible to get a seat or two on this on a one-off basis, arrangements would have to be made direct to these 2 companies in Tehran.

General (March 1980): Approximately 2 million barrels crude oil per day being exported. About 2 to 3, at maximum, tankers using the "T" jetty at any one time. About 2 tankers per week using the Western Sea Island.

The airport is functioning with regular 737 flights to Abadan, Bushire and Tehran.

The Cyrus field about 40 miles W.S.W. of Kharg has ceased production and the Darius Terminal has about 1 ship per month.

The Khemco berth handles 1 sulphur ship per month mainly for African countries and 1 LPG ship every 6 weeks for Japan.

AGENT: See "Abadan".

KHORRAMSHAHR: 30.26 N. 48.10 E.

Note: The port was extensively damaged in the conflict and is not expected to be operational in the near future.

LOCATION: Khorramshahr lies at confluence of Karoon and Shatt-al-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(a) *Iraqi Quarantine Officer:* Vessels arriving Outer Bar (Shatt-al-Arab Pilot Station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours' prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of Crew List and crew vaccination certificates for presentation to Quarantine Officer.

(b) *Iranian Quarantine Officer:* Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires 1 copy Crew List, and all vaccination cards should be available for inspection.

(c) *Customs Officer:* Customs Officer boards ship at anchorage or alongside Khorramshahr Jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).

Stores List (2 copies).

(d) *Port Authorities:*

Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled in and returned to the port Berthing Master.

(e) *Agents:*

Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (8 copies).

Freight Manifest (2 copies).

B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-al-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by River Pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-al-Arab boarded by River Pilot from pilot vessel situated in proximity of Rooka Buoy (Lat. 29° 49′ N., Long. 48° 47′ E.), showing a white flash every 6 seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by River Pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-al-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a max. depth of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. Max. draft for crossing Karun Bar and also at Khorramshahr (Failieth) Anchorage is 28 ft. 6 in., fresh water. Max. draft at Karun Bar in December 1976 was 26 ft. so it is advisable to check before vessel proceeds to the port. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos. 8 and 9 is 29 ft.

SPEED RESTRICTIONS: Engine speed must be reduced well in advance so that the vessel's speed when passing jetties at Khorramshahr and Abadan will not exceed 3.5 knots for vessels with more than 20 ft. draft, and 5 knots for all other vessels of over 100 g.r.t.

The same speed restrictions will apply in the Shatt-al-Arab when passing ships at anchor with barges or other vessels moored alongside, tugs with barges or other vessels in tow, and vessels engaged in dredging or other salvage work.

SHIP'S REGISTRATION: Ships have to register upon arrival at outer bar by sending telegram to Port Director Khorramshahr via EQK Khorramshahr Port Radio. At present the vessel, after registering her turn should wait at outer bar. If vessel proceeds to another port for discharging, her registration will not be valid. Vessel after registration of berthing turn for Khorramshahr can however call at Abadan Port during waiting period without losing her turn subject to permission from Harbour Master.

For registration Masters must answer a 14 point registration cable and also advise anchoring time (GMT).

HEALTH: See "Documents". Inward clearance is effected on board after receiving Free Pratique.

RADIO: Khorramshahr Port Radio, call sign EQK, 500 kHz, 2182 kHz.

Khorramshahr Harbour Master can be contacted on VHF Channels 13 and 16, 18 and 25.

Vessels destined for Khorramshahr should send a radio message to the Port Director Khorramshahr and to the ship's Agent 24 hours prior arrival at the Shatt-al-Arab Pilot Station (Outer Bar). Times should be quoted in GMT. Also see "Ship's Registration".

TUGS: The Port Organisation of Khorramshahr owns 2 tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment of tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive 9 ocean-going vessels at a time.

CARGO HANDLING: *(a) Jetty.* All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are shore cranes and floating cranes available for the purpose of discharging cargo as follows: 2 floating cranes (50 ton and 100 ton); 2 mobile cranes (80 ton); 3 mobile cranes (50 ton); also additional mobile cranes of 25 tons capacity or less.

The port yard is equipped with 3 cranes (90 ton, 50 ton and 40 ton). All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(b) Barges. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also employ watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees.

(c) Cranes. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

There is 1 electric crane permanently installed at Failieh Creek with lifting capacity said to be 100/120 tons. This crane can be used for discharging cargo from barges at Failieh barge jetty.

(d) Storage. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(e) Wagons/Trailers. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24 hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in Summer and of 9/11 hours in Winter is unavoidable.

(f) Delivery of cargo discharged at jetty. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's Agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily, under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to P Authorities and an official Process-verbal will be drawn by respec warehouse-keeper corresponding to remarks noted at the time. T arrangement is to prevent any delay to operations of the vessel.

(g) Overtime Costs. Wages of port staff on board for official hours a borne by port Authorities but overtime and food allowance are paid b carriers.

(h) Port Working Hours. Dayshift: 0700 – 1300 hrs. and 1500 2100 hrs. There is no night shift.

24 hour discharging at jetty is compulsory. The only stoppages a for lunch and dinner, 1 hour each. In Summer season, however, due heat, discharging at jetty is stopped from 1400 hrs. to 1700 hrs.

(i) Liquid Cargo. Due to non availability of tank barges as well a storage area at Bandar Imam Khomeini, vessels carrying liquid car are bound to call at Khorramshahr, where consignees have their ow tank-barges and storage tanks. This being the case, the Port Authoriti do not divert vessels carrying liquid cargo, to Bandar Imam Khomei

In the Port of Khorramshahr, importers of vegetable oil and other liqu commodities, have arranged their own storage area outside Custo yard, and liquid consignments will be received directly ex-vessel in consignees' barges without any expenses to carrier. (Discharg performed at anchorage.)

Vessels carrying part-liquid cargo can discharge their cargo wh awaiting a berth or alongside jetty, whilst unloading other cargo on th pier.

Further to above, whenever Port Authorities divert any vessel t Bandar Imam Khomeini, in the diversion order they indicate "Subject t liquid cargo on board", as vessels with liquid cargo will have to b accepted in the port of Khorramshahr.

Notice of Readiness for vessels carrying liquid cargo, has to b tendered after vessel has anchored at Khorramshahr anchorage (with Khorramshahr port limits). If, due to congestion, there is no space a Khorramshahr anchorage, vessels may have to remain at Shatt-al-Ara Pilot station for 1 or 2 days before entering the river.

(j) *Dangerous Cargo.* Dangerous cargoes are divided in tw categories:

1. Acid and flammable cargoes.
2. Explosives such as dynamite, etc.

Vessels carrying acid and flammable cargoes are accepted alongsid Khorramshahr berths to unload their general cargo plus dangerou cargo, and Port Authorities unload the dangerous cargo in a yard a Failieh, which yard is mainly used for storing iron joists, but a part i allocated for dangerous cargo.

Vessels carrying explosives are not allowed to berth at Khorramshah Recently the Port Authorities have stopped accepting any vessel wi explosive cargo on board into the port of Khorramshahr, and thos vessels have to proceed directly to Bandar Imam Khomeini before callin Khorramshahr for discharging general cargo, if any. The main port fo discharging explosive and special cargoes consigned to Iranian Arm is Bandar Imam Khomeini, where the Army have an agreement with th Port Authorities for 1 berth out of the 6 berths. Berth No. 3 is allocate for vessels carrying cargo consigned to Iranian Army, and wheneve such vessel arrives at Bandar Imam Khomeini it will be berthe immediately, even if the port is congested; in other words, vessels wi Army cargo have priority for berthing.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran fo any export cargo loaded at any Iranian port. Per article 90 of Tax La freight tax is payable at the rate of 5 per cent on gross freight, regardles of whether freight is collected in Iran or elsewhere. There is no tax o import cargo freight regardless of where the freight is paid. In othe words, for cargo discharged in Iranian ports, even if freight is payab at destination to be collected in Iran, there is no tax applicable.

MEDICAL: Private doctors and hospitals located in the town for medic and dental treatment and hospitalisation. Arrangements for patient visits to the doctors, dentists and hospital will be made by Agents upo request. In case of emergency special medical attendance on board ca also be arranged. X-Rays, radiographies, blood and urine tests can als be conducted by equipped hospitals existing in Khorramshahr and Abada

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pip lines and at anchorage by barges, capacity 100 tons.

FUEL: Bunkers are not available at Khorramshahr Jetty, howeve bunkers (diesel oil and gas oil) can be supplied by barge. All classes o bunkers are supplied at Abadan jetties only. Bunkers could be obtaine from Abadan provided arrangement for supply has been mad beforehand with NIOC.

CUSTOMS ALLOWANCES: After receipt of documents, the Custo Officer will seal the store room. All liquor and cigarette stocks will b sealed and reasonable ship's requirements while in port should be take from store before sealing. This amount recommended to be assess and be ready for removal from the stores prior to the vessel's arrival port. During the stay at the port, and upon request and giving prior notic to the Agents' supervisor on board, arrangements may be made to hav the Customs officials open the stores to issue further quantities of stor for crew consumption.

REPAIRS: Minor repairs can be carried out to a limited extent by priva workshops existing at Khorramshahr. However due to lack of skil workers the workshops in question do not undertake any responsibi or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc. as well as refrigerator a air condition service there are a few engineering groups at Khorramsh as well as Abadan, and technicians of these groups will attend to t repairs on board both at Khorramshahr and Abadan jetties or anchorage, upon request.

Ships moored to the jetty are not permitted to disable main pow plants for repairs without prior approval of Marine Department. A p tug will be assigned to stand by alongside ship with tow line attac during entire period while plant is disabled.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norske Veritas; Bureau Veritas American Bureau of Shipping; Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

AIRPORT: Abadan International Airport about 10 minutes by car.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be placed on board.

SHORE LEAVE: See "Identification Cards".

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's Books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

PROVISIONS: Fresh provisions in limited quantity can be obtained but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24 hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

AUTHORITY: Ports and Shipping Organisation, Tehran.

LAVAN ISLAND: 26.47 N. 53.20 E. (See Plan)

Note: Production has been resumed.

LOCATION: Lavan Island is 13 miles long and about 2.5 miles wide. It is situated on the S.E. coastline of Iran in Lat. 26° 48′ N., Long. 53° 16′ E. (Island centre). The Island lies roughly East – West.

PORT LIMITS: Port area limits which are under the control of IOOC, extend between the following points:

Lat. 26° 47.5′ N.,	Long. 53° 22.0′ E.
Lat. 26° 46.4′ N.,	Long. 53° 22.0′ E.
Lat. 26° 47.5′ N.,	Long. 53° 19.4′ E.
Lat. 26° 46.8′ N.,	Long. 53° 19.4′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

DOCUMENTS:

5 Crew and Passenger Lists.
2 Stores Lists.
2 Bonded Stores Lists.
Clear Bill of Health from last port.
4 Bills of Lading.
8 Manifests.

In Iran, an additional copy of the Bill of Lading is required for all exports from the country. This must be signed by the Master and forwarded to the Customs Authorities, Lavan Island by the ship's Agent.

EARLY SAILING PROCEDURE:

Notice to Masters – Early Sailing Procedure:

In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing System is now in force.

The following documents are prepared in advance, *except for cargo figures*, and presented by the ship's Agent to the Master for his signature upon the ship's arrival at the loading dock.

(A) Nos...... Originals & Nos...... Copies IOOC Bill of Lading.
(B) Nos...... Originals & Nos...... Copies IOOC Certificate of Origin and Cargo Manifest.
(C) Nos...... Originals & Nos...... Copies IOOC Tanker Time and Loading Report.
(D) Nos...... Originals & Nos...... Copies IOOC Report of Cargo and Ship's Ullages.
(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the 'Bill of Lading' and 'Certificate of Origin' forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In cases of disagreement on cargo figures, the Master may,

(1) 'Note Protest' by cable or telex.
(2) Authorise the ship's Agent to 'Note Protest' on his behalf.
(3) Pass a written 'Note of Protest' to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(a) Landfall. There are 5 gas flare towers and 1 ground flare. The most conspicuous flare is in position Lat. 26° 47′ 34″ N., Long. 53° 20′ 39″ E. situated in the vicinity of Port Area. This flare onshore, when burning, makes a conspicuous landfall for Lavan Island, but at night from a distance tends to obliterate the various navigational lights.

The other flares are in position,

Lat. 26° 47′ 41″ N.,	Long. 53° 20′ 19″ E.
Lat. 26° 48′ 25″ N.,	Long. 53° 20′ 03″ E.

(group of 3 flares).

All tanks in the IOOC Tank Farm are painted white.

The two front tanks have the word IOOC painted in black on the South side. Tank No. 2 is in position Lat. 26° 47′ 57″ N., Long. 53° 20′ 24″ E. A 1,000,000 bbls. tank has recently been constructed and added to the Tank Farm capacity. It is sited at the rear of the former 6×500,000 bbls. tanks.

(b) Navigational Dangers. South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

(c) Charts covering the operational areas of IOOC are:

USHO 3647, 3648, 3650, 3660.
BA 2837, 2847, 2858, 2887, 2888, 3517, 3707.

PILOTAGE/NOTICE OF READINESS: Vessels must not enter the Port Limits without a Berthing Master on board.

Vessels should wait for the Berthing Master approximately 2 miles S.E. of the loading dock.

The Terminal operates a pilot launch and mooring launch for rope handling by messenger lines.

Pilot Room to be available and ready for the Loading Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.
(b) IOOC "Notice of Readiness" form.
(c) Combined Tug, Pilot, Berthing/Unberthing charge form.
(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affects cargoworthiness or seaworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the IOOC Marine Superintendent will be final.

NAVIGATIONAL AIDS: *Warning:* The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Lavan Island Terminal Beacon: Located in Lat. 26° 48.1′ N., Long. 53° 21.3′ E. Fitted on top of a steel lattice tower 182 ft. above MLWIS. Light exhibited is Gp.Fl. (3) ev. 12 sec. vis. 15 miles.

Terminal Sea Buoy: Located in Lat. 26° 46.5′ N., Long. 53° 22.1′ E. A white can buoy with lattice tower and radar reflector. Light exhibited is Fl. ev. 5 sec. vis. 3 miles.

Salman Pipe-line Marker Buoy: Located in Lat. 26° 46.8′ N., Long. 53° 20.5′ E. A red can buoy with lattice tower and radar reflector. Light exhibited is Fl.R. ev. sec. vis. 3 miles.

Salman Pipe-line Rear Beacon (Onshore): Located in Lat. 26° 48.0′ N., Long. 53° 20.2′ E. Fitted on top of a steel lattice tower 192 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

Salman Pipe-line Front Beacon (Onshore): Located in Lat. 26° 47.6′ N., Long. 53° 20.1′ E. Fitted on top of a steel lattice tower 115 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

The Salman Pipe-line lights in transit signify a vessel is over the Salman pipe-line. Anchorage is prohibited within the area covered by the vector outline of the range lights, 10° apart.

Reshadat Radio Mast: Located in Lat. 26° 48.2′ N., Long. 53° 19.2′ E. A steel lattice tower, painted red, 408 ft. above MLWIS. Light exhibited is Occ. R. ev. sec. visible 20 miles.

Decca Mast – Station "Green South": Located in Lat. 26° 47.5′ N., Long. 53° 22.4′ E. A steel lattice tower, painted red and white bands, 336 ft. above MLWIS. Light exhibited is Fl.R. vis. 20 miles. Not in Operation.

Flares: The following flares are highly conspicuous and tend to obstruct the other navigational aids:

Salman – Located in Lat. 26° 47.6′ N., Long. 53° 20.6′ E.
Reshadat – Located in Lat. 26° 48.4′ N., Long. 53° 20.0′ E.
LDC – Located in Lat. 26° 47.7′ N., Long. 53° 21.0′ E.

Radio Beacons: The following radio beacons belonging to IOOC are situated onshore and offshore at the Company's Salman Oil Field:

Signal LD transmitted on 310 kHz. Located in Lat. 26° 47.6′ N., Long. 53° 23.0′ E.

Signal LA transmitted on 397 kHz. Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of Long. 53° 22′ 00″ E., and in suitable depths of water wait for IOOC Berthing Master. The sea bottom is good holding ground. Depth about 40 m.

RESTRICTED AREAS: Salman's Production Facility (Offshore): Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

The above platform complex, approximately 76 nautical miles South of Lavan Island, is situated in the centre of the Salman Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil is delivered to Lavan Island from offshore oil fields by submarine pipe-line.

From the Salman production complex in Lat. 25° 32.0′ N., Long. 53° 09.1′ E. A 22 in. pipe-line running approximately 008° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.1′ E. From the Reshadat production complex in Lat. 25° 45.5′ N., Long. 52° 54.5′ E. An 18 in. pipe-line running approximately 023° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.0′ E.

In addition to the above, a 14 in. submarine pipe-line has been laid from the Balal Oil Field (undeveloped) to Lavan Island. The pipe-line runs approximately 056° T from an offshore location in Lat. 26° 18.8′ N., Long. 52° 32.8′ E., to a shore location on Lavan Island at Lat. 26° 47.6′ N., Long. 53° 19.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

MAX. SIZE: Water depths, adjacent to the dock, at LW are:

Berth No. 1: 68 ft. 4 in. (20.83 m.)
Berth No. 2: 65 ft. 0 in. (19.82 m.)

Keel clearance required by the Terminal is 3 ft. 0 in. at all times.

Tonnage capacity of the loading dock is:

Berth No. 1: 200,000 d.w.t.*
Berth No. 2: 75,000 d.w.t.**

*Vessels in the range 200,000 d.w.t. – 225,000 d.w.t. may be accepted subject to prior approval from IOOC Management which is based on answers to a 14 point questionnaire.

**Vessels are accepted for Berth No. 2 based on tonnage, overall length (maximum 850 ft. = 259 m.), position of the manifold in relation to the bow, and always subject to a maximum loaded draft of 43 ft. 6 in. (13.26 m.). Vessels over 65,000 d.w.t. should always be cleared by IOOC prior to firming up a nomination.

Following is a table of maximum loads that different size tankers can have on board on arrival, and remain acceptable for berthing:

(a) The maximum size vessel that is acceptable for berthing in a fully loaded condition is 100,000 d.w.t. This refers to vessels nominated for bunkers only.

(b) The maximum acceptable arrival load for tankers in the range 101,000 d.w.t. – 120,000 d.w.t. is 90,000 tons (675MB±).

(c) The maximum acceptable arrival load for tankers in the range 121,000 d.w.t. – 170,000 d.w.t. is 85,000 tons (638MB±).

(d) The maximum acceptable arrival load for tankers in the range 171,000 d.w.t. – 225,000 d.w.t. is 70,000 tons.

This schedule to be used in conjunction with the standard 14 point questionnaire for very large crude carriers.

CLEARANCE: *(Arrival)*: After Berthing Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. *(a)* Condition of use of Port of Lavan Island, *(b)* Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection form. After Pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. 5 copies of the Crew List and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.*

The Terminal operates an Early Sailing System covering all cargo documentation. The following documents will be prepared in advance, *except for cargo figures*, and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(a) B/L. (b) Certificate of Origin and Cargo Manifest. (c) Tanker Time and Loading Report. (d) Report of Cargo and Ships Ullages. (e) Master's receipt for documents.

Official cargo figures will be passed to the Master within 1 hour of his departure for insertion by the Master on the Bill of Lading and Certificate of Origin and Cargo Manifest.

In cases of disagreement over cargo figures the Terminal will accept the Masters "Note of Protest" by telex, by the authorised ship's Agent, or by written note handed to the Berthing Master.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and Pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at masthead; by night: red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

There are occasional outbreaks of cholera. International Certificates of Inoculation/Vaccination are essential.

See Radio, "Free Pratique".

RADIO: Vessels nominated to load at Lavan Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bandar Abbas Radio (EQI) or Lavan Radio (EQV).

IOOC Tehran. Telex: 212598 – 212346 – 212707 "Attn. Marsupt. Lavan".

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Lavan in GMT and last port.
CC Cargo(s) required and Bunker(s) required.
DD Deballast time.
EE Size and number of connections for cargo/bunker.

If bunker connection only one side of manifold, state location.

Lavan Radio Station, is operating on 500 kHz, call sign EQV, from 0530 hrs. – 1330 hrs. GMT.

IOOC tugs maintain a listening watch on 2182 kHz. Vessels shou commence calling "Kosar I and II" when passing Quoin Island. Whe contact has been made, switch to working frequency 2638 kHz.

Radio Free Pratique: Vessels requesting Free Pratique by radio a required to transmit the following message through the same Channe as their ETA advice.

AA Name of vessel and ETA Lavan Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Cholera.
DD Number of deaths or cases of serious illness in the last 3 days.
EE Name of all ports called at during the last 30 days.
FF Master's Name.

14 Point Questionnaire:

A 14 point questionnaire has to be completed and sent to NIOC b principals prior to appointment of a vessel for loading cargo at Lava Island as follows:

1. Overall length of vessel.
2. Moulded depth of vessel.
3. Mean draft in light condition, ready to load (i.e. with only permanen ballast on board).
4. Can vessel discharge permanent ballast concurrent with carg loading?
5. If any clean ballast is carried in the cargo tanks, can this b segregated and discharged concurrent with cargo loading?
6. If answer to (5) above is "Yes" what will be the mean draft wi permanent ballast and clean cargo tank ballast on board?
7. What will be the maximum loading draft? Is this Summer or Tropica mark?
8. What is required "Owners Clearance" under keel in loade condition?
9. Height of loading valve manifold connections above the deck.
10. Distance of loading valve manifold centre from the bow.
11. What is spacing (on centres) between loading valve manifo connections and how many connections are available for th loading?
12. Distance of loading valve connection from side of ship.
13. Advise if Lavan Island is first or second loading port.
14. If second loading port, how much cargo will be on board on arriva and what will be the arrival draft, fore and aft?

VHF: Lavan Terminal maintains a listening watch 24 hours on VH Channels 16 and 12.

Vessels should commence calling "Lavan Island" 4 hours prior t arrival, on Channel 16. When contact has been made, switch to workin frequency Channel 12.

TUGS: Two modern diesel tugs of 3,120 b.h.p. fitted with controllab pitch propellers and a bollard pull of 42 tons are stationed at the loadin dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fightin capability, foam, dispersant and fire wires.

Both tugs are on instant readiness throughout the entire time that a vessel is alongside the loading dock. The tugs will answer emergen signals, or can be called on VHF Channel 12, or by telephone (Tel. N 355).

BERTHING: Vessels should have the following equipment ready for us upon their arrival at the port:

a) Anchors, port and starboard, ready for letting go.
b) Ropes or wires, eight each end, not on automatic tension.
c) Derricks rigged if shore reducers or flexible hoses are required.
d) Manifold blanks removed and reducers fitted ready to connect 16 i series 150 ASA loading arm flanges.
e) Accommodation ladder lowered together with the pilot hoist or pil ladder.

Note: Berthing Masters will not board any vessel which does not presen a clean safe means of access.

f) Ballast tank lids opened to allow the Berthing Master to inspe ballast water.

The tanker loading dock is constructed of a loading platform in th centre of 4 two-sided jacket piled breasting dolphins, and 4 outlying two sided jacket piled mooring dolphins.

The dock is 1,240 ft. (378 m.) long, and is connected to the shore b a trestle 1,764 ft. (538 m.) long.

The platform deck is 31 ft. 4 in. (9.55 m.) above Chart Datu (MLWIS).

Maximum reach of the loading arms above Chart Datum is:

Distance Manifold to Ship's Side	*Elevation*
10 ft. (3.05 m.)	76 ft. 6 in. (23.32 m.)
12 ft. (3.66 m.)	75 ft. 9 in. (23.09 m.)
14 ft. (4.27 m.)	75 ft. 0 in. (22.85 m.)
16 ft. (4.88 m.)	74 ft. 0 in. (22.56 m.)
18 ft. (5.49 m.)	72 ft. 9 in. (22.18 m.)

Rigid "Chicksan" hydraulically operated loading arms are situated o both sides of the loading platform.

Berth No. 1	4×16 in. for crude oil loading.
Berth No. 1	1×12 in. for product loading – (fuel & gas oil).
Berth No. 2	2×16 in. for crude oil loading.
Berth No. 2	*1×16 in. for naphtha loading.
Berth No. 2	1× 8 in. for product loading (fuel & gas oil).

* Gas oil can also be loaded through this arm.

All loading arms are fitted with a series 150 ASA American Standa outer flange with quick connection coupler.

The Terminal carries a full range of aluminium reducing spool piec and flexible hoses (15 ft.×8 in.) for crude and product/bunk connections.

Shore gangways are provided for both berths, with a safety net t each gangway.

Fire wires must be rigged forward and aft, of sufficient strength to tow the vessel away from the berth in an emergency. The "eye" of the fire wire must be lowered to within 6 ft. of the water and maintained at this level at all times. The IOOC tugs are equipped with their own towing wires which will be shackled onto the vessel's fire wire.

Rat Guards: All ships berthed alongside must provide rat guards for the ship's moorings.

LOADING: Tankers are loaded at Lavan Island alongside an "L" shape 2 berth jetty, approximately 2,000 ft. offshore. The loading platform is fitted with rigid hydraulic loading arms which have quick connection/release couplers attached to the end flange.

There are 4×16 in. arms on the South Berth (No. 1) for crude loading, and 2×16 in. arms on the North Berth (No. 2) for crude loading.

Crude oil is delivered to the loading platform by gravity through 2×36 in. lines from a 4,000,000 barrel tank farm (Salman), and from a 1,500,000 barrel tank farm (Reshadat).

Flow rates under normal conditions, with only 1 vessel loading, are approximately, Berth No. 1 (4 arms) 52,000 bbls./hr., Berth No. 2 (2 arms) 32,000 bbls./hr.

Flow rates with a vessel loading at each berth are approximately, Berth No. 1 (4 arms) 40,000 bbls./hr., Berth No. 2 (2 arms) 24,000 bbls./hr.

The minimum flow rate is 15,000 bbls./hr. All vessels accepting nominations to load at Lavan Island must be capable of loading crude at rates above this figure.

The API of Salman Crude Oil is 34 and the API of Reshadat Crude Oil is 35.

The temperature of Salman Crude Oil varies between 91°F and 78°F (Summer/Winter), and the temperature of Reshadat Crude Oil varies between 85°F and 66°F (Summer/Winter).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the Consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal provided the Master issues a written request to the Loading Master upon arrival at the loading dock. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Masters should note that in cases of overloading the excess cargo cannot be returned to the shore line.

Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-Top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Salman or Rostam crude oil, provided agreement has been obtained from the Consignor.

Slops should be segregated in a special "slop tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the loading dock and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge en route to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

BALLAST: The Terminal does not have any reception facility for disposal of dirty or contaminated ballast.

TIDE: The mean range of tide is 3 ft. 9 in. (1.14 m.)

The extreme range of tide is 5 ft. 6 in. (1.68 m.)

The highest tide recorded is 7 ft. 3 in. (2.21 m.) above MLWIS.

The lowest tide recorded is 0 ft. 5 in. (0.13 m.) above MLWIS.

A chart reading automatic tide gauge is fitted on the loading dock.

WEATHER: In Summer time from May to September temperature reaching 110°F. (43°C.) and humidity ranging from 10% to 100%. The Winter (November to March) mild and pleasant with minimum temperature approximately 48°F. (9°C.). The wind for most of year from N.W., but sometimes particularly during Winter strong S.E. storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from N.W. winds, but exposed to winds from South.

During Winter storms, waves of 8 ft. to 10 ft. often occur. A max. wave height of 15 ft. has been recorded at the Southern end of the Island.

FUEL: Bunkers are now available at Lavan Island and can be loaded at both berths of the tanker loading dock through rigid hydraulic operated Chiksan loading arms.

These bunker products are provided by the Lavan Distillation Complex (LDC) which is operated by the National Iranian Oil Company (NIOC). Available bunker products are fuel oil and gas oil.

The plant also produces naphtha.

Bunker Requests:

Requests for information on bunkering should not be directed to IOOC. All questions relating to the bunker facility at Lavan Island will be handled by NIOC Marketing & Exports Division.

The address is:

Marketing & Exports,
National Iranian Oil Company,
P.O. Box 1863,
Tehran, Iran.
Cable Address: Naftmelli Tehran
Telex: 21-2514, 21-2613 and 21-2182
Telephone: 6151 – ask for Marketing.

LDC Tank Capacity is:
Naphtha 53,000 cu.m. (333,360 bbls.)
Fuel Oil 38,400 cu.m. (241,530 bbls.)
Gas Oil 30,800 cu.m. (193,730 bbls.)

LDC loading rates, by pump are:
Naphtha 1,500 t.p.h.
Fuel Oil 500 t.p.h.
Gas Oil 500 t.p.h.

LDC loading arms at the tanker dock are:
Berth No. 1: 1×12 in. supplying both fuel and gas oil.
Berth No. 2: 1×8 in. supplying both fuel and gas oil.
Berth No. 2: 1×16 in. supplying both naphtha and gas oil.

LDC product specifications are:
Naphtha SG at 60°=0.7205 (API at 60° 64.9)
Fuel Oil SG at 60°=0.9560 (API at 60° 16.5)
Viscosity Redwood at 100°=1,440 seconds.
Gas Oil SG at 60°=0.8450 (API at 60° 35.9)

DENSITY: The temperature of sea water alongside the Loading Dock varies from 71°F. in January to 93°F. in August. The density of sea water alongside the Loading Dock varies between 1023 and 1026.

MEDICAL: IOOC operate small clinics on the Island with resident doctors. This facility will be made available for emergency cases only.

FRESH WATER: None available.

CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.

FIRE PRECAUTIONS: Vessel receives full detailed instructions from Berthing Master. Vessels must have fire-wires and engines not to be immobilised.

CONSULS: No consular representation on Lavan Island. Embassies of most nations are situated in Tehran.

REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ship's main engines must be available at all times while alongside jetty.

MARINE SURVEYS: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas.

AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.

TIME: Standard zone time for Iran is GMT plus 3.5 hours.

POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by IOOC staff in case of tankers.

SHORE LEAVE: Ships' crew not allowed to go ashore.

CREW CHANGES: Not permitted.

REGULATIONS: (Miscellaneous): *Painting and scaling.* Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.

GENERAL: *Flag:* All vessels are required to fly the Iranian Flag in Iranian territorial waters which extend 12 miles offshore.

Garbage: Dumping overside of garbage and refuse prohibited in Port Area.

Sanitation: Government Health Regulations require suitable covers to be fitted over all lavatory discharge outlets, etc., to prevent fouling of jetty or craft alongside.

Damage to Port Facilities: If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with IOOC Berthing Master as to nature and extent of such damage, and this must be confirmed by IOOC Marine Superintendent. IOOC has standard liability forms which cover both ship and shore, and are issued on every occasion.

Rat-guards: All ships berthed alongside must provide Rat-guards for Ship's Moorings.

No visitors: No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Marine Superintendent. Only persons having authorised work will be given access to port limits, dock or vessels.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbasabad Avenue, Tehran – Iran. *Tel:* 624102-5. *Telex:* 212598, 212346, 212707. *Cables:* Falatghareh, Tehran.
Mail Address: P.O.Box 1434.

AGENT: See "Abadan".

RAS BAHREGAN (Norwuz Loading Terminal): 29.43 N. 50.10 E. (See Plan)

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:

Lat. 29° 43′ N., Long. 50° 00′ E.
Lat. 29° 43′ N., Long. 50° 12′ E.
Lat. 29° 40′ N., Long. 50° 10′ E.
Lat. 29° 40′ N., Long. 50° 24′ E.

Vessels must not enter this area without permission from the port control. Anchoring in this area is prohibited.

DOCUMENTS:
5 Crew and Passenger Lists.
4 Stores Lists.
4 Bonded Stores List.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

PILOTAGE: Vessels must not enter the Port Limits without a Mooring Master on board. Vessels should wait for the Mooring Masters approximately 2 miles off the SBM.

Prior Arrival: Vessels should have the following equipment ready for use upon their arrival at the port:

(a) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.

NOTE: Berthing Masters will not board any vessel which does not present a clean safe means of access.

(b) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.

(c) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

(d) Under normal conditions vessels will be moored using 6 ship's lines. In rough weather the number of mooring lines will be increased. Therefore each ship to be moored at Bahregan SBM Terminal must be equipped with at least ten good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Two of these mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must also have at least one good messenger line ready for immediate use; anchors, chains and anchor windlass must be in good condition. Vessels must be equipped to fit flanges of floating hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackles and booms to hoist the floating hose, a 5.5 ton lift from the sea to the ship's rail, in a safe, efficient and expeditious manner. If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform the vessel's Master and in such event the vessel shall not be brought into the mooring until facilities, lines, or gear are deemed satisfactory. In this connection, lines cannot be provided by the company.

(e) Before a ship is moored at MBM Terminal, she must be equipped with at least 9 good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must have both bower anchors ready for immediate use, each with a minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of letting one chain go out on the run while heaving in on the other chain. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the submarine hoses, a 5 ton lift from the floor of the sea to the ship's rail, in a safe, efficient and expeditious manner.

If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event the vessel shall not be brought into the mooring until facilities, lines or gear are deemed satisfactory.

On Arrival: Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.

(b) IOOC "Notice of Readiness" form.

(c) Combined Tug, Pilot, Berthing/Unberthing Charge form.

(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

ANCHORAGE: The SBM is in the open sea with no surface obstructions in the vicinity. However, anchorage is prohibited in the following areas:

(a) Immediate vicinity of the SBM – within a 1.2 mile radius of the SBM.

(b) One mile on either side of 36 in. submarine pipe-line from SBM to Bahregan Oil Centre.

Suggested anchorage area is 2 miles S.W. of the SBM.

NAVIGATIONAL AIDS/PROHIBITED AREAS:

Two flares are located at:
Lat. 29° 50′ N., Long. 50° 15.8′ E.

Nowrouz production facility (Offshore) located in:
Lat. 29° 29′ 55″ N., Long. 49° 24′ 10″ E.

The above platform complex, approximately 50 nautical miles South West of Bahregan, is situated in the centre of the Nowrouz Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Bahregansar Production Facility (Offshore) located in:
Lat. 29° 56′ 23″ N., Long. 49° 50′ 58″ E.

The above platform complex, approximately 30 nautical miles West of Bahregan. This area, and 3 miles around it, is prohibited to navigation.

RESTRICTIONS: The Bahregan SBM Terminal operates 24 hours per day, 7 days a week. However, mooring or unmooring is only carried out if fair or moderate weather conditions are prevailing.

In the event that berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the terminal area on account of weather (terminal closed) should keep in contact with the terminal via radio in order to be available when weather moderates.

FLAG: All vessels are required to fly the Iranian flag on the foremast during daylight hours. Iranian territorial waters extend 12 miles seaward from the mainland and adjacent islands.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with SIRIP when 3 days distant from Bahregan Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to SIRIP giving the best estimate of ship's arrival time at the Terminal.

Further ETA messages should be sent to SIRIP when the vesse 24 and 12 hours distant from Bahregan Terminal and at any other ti any appreciable change occurs in the original ETA or those subseque thereto. The 12 hour ETA should include a positive statement regardi "ship's readiness to load" on arrival and the number of hours that w be required to discharge clean ballast after ship is berthed in moorin as well as details of the flange size of the manifold.

MAX. SIZE: Water depths at the Terminals at LW are:

SBM 79 ft. (24.0 m.)
MBM 52 ft. (15.5 m.)

Keel clearance required by the Terminal is 3.3 ft. (1 m.) at all time Tonnage capacity of the Terminals are:

SBM 250,000 d.w.t.
MBM 45,000 d.w.t.

HEALTH: Masters should obtain Free Pratique before arrival at Ra Bahregan by cabling "NIOC Kharg Port Health" via EQZ Oilco Statio or "Porthealth NIOC" Kharg.

RADIO: Vessels nominated to load at Bahregan should transmit arriv information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following addres through either Abadan Radio (EQZ) or Bandar Abbas (EQI).

IOOC, Tehran. Telex: 212598 – 212346 – 212707. "Attn. Marsup Bahregan".

Arrival messages to be in the following format:

AA	Name of ship.
BB	ETA Ras Bahregan in GMT and last port.
CC	Cargo required/cargo to discharge.
DD	Deballast time/Ballast time.
EE	Size and number of cargo connections.

Ras Bahregan Radio Station, is operating on 500 kHz, call sign BO from 0530 hrs. – 1330 hrs. GMT.

Ras Bahregan Radio maintain a listening watch on 2638 kHz. Vess should commence calling "Bahregan" when passing Kharg Island.

Free Pratique: Vessels requesting Free Pratique by radio are requir to transmit the following message through the same Channels as the ETA advice.

AA	Name of vessel and ETA Bahregan (in GMT).
BB	Number of crew and state of health.
CC	Number of vaccinations required for Cholera.
DD	Number of deaths or cases of serious illness in the la 30 days.
EE	Name all ports called at during the last 30 days.
FF	Master's Name.

VHF: Ras Bahregan Terminal maintains a listening watch 24 hours day on VHF Channels 16 and 13.

Vessels should commence calling "Bahregan" 4 hours prior to arriva on Channel 16. When contact has been made, switch to workin frequency Channel 13.

NOTICE OF READINESS: The ship's officer responsible for loading discharging should give IOOC's Mooring Master at least 30 minute Notice of Readiness to commence loading or discharging.

The Master's "Notice of Readiness" will be rejected if any of the balla is oily, or if there is any leakage of oil from the vessel during loadin or any unsatisfactory condition on board ship which affects carg worthiness or seaworthiness while under the jurisdiction of the Termina In all such situations of dispute, the decision of the IOOC Mari Superintendent will be final.

MBM: MBM Terminal is located 5 miles from coast at:
Lat. 29° 47′ 00″ N., Long. 50° 11′ 30″ E.

The MBM Terminal is connected by a 4.5 mile 18 in. diamet submarine pipe-line to Bahregan Terminal. Bahregan Terminal is locate at:
Lat. 29° 49′ 30″ N., Long. 50° 15′ 47″ E.

TUGS: Available and required. One modern diesel tug of 1,000 b.h. fitted with controllable pitch propellers is stationed at the Terminal a used for all manoeuvres.

The IOOC tug is equipped for fire fighting, using both water and foa through monitors situated on a fire fighting platform. IOOC tug is instant readiness throughout the entire time that a vessel is moored the Terminal. The tug will answer the emergency signal or by calling Channel 13 VHF.

BERTHING: The Terminal operates a mooring launch and 3 sma supply boats.

SBM: The SBM is designed to provide a safe mooring for tankers most states of weather or sea. When moored to the SBM, tankers ca load their cargo while weather-vaning about the Terminal. The moor vessel normally remains head into the wind and sea, riding at its mo comfortable position. The SBM consists of a strongly constructed ste vessel securely moored in position by 6 sets of heavy mooring chai each set is attached to a 3 pile template. The SBM is equipped wit Rotating Mooring Bollard, to which the tanker secures, a Rotating Car Manifold which carries the crude flow system from the SBM through t hoses, and a Rotating Balance Arm, which maintains the SBM on even keel. These 3 components all rotate as one unit as the tank swings with the sea or wind.

A submerged peripheral fender extending outward from the hul provided to prevent damage to the floating hoses and SBM, should t tanker ride up against it.

MBM: Permanent mooring in the berth consists of 5 steel cylindr buoys each fitted with a quick release hook to which the ship's moor lines are attached by the company's mooring launches. The berth is l out on a one heading basis, using both ship's bower anchors w 9 mooring ropes (4 beam, 4 quarter, and 1 stern).

The mooring buoys are numbered 1, 2, 3, 4 and 5 starting with N 1 East of the mooring and numbers running consecutively in a clockw direction.

PETROLEUM INSPECTORS: Services of the Saybolt Agency avail subject to at least 3 days advance notice.

Surveyors of the American Bureau of Shipping and Lloyd's stationed at Bandar Abbas.

HOSES: The Terminal carries a full range of reducing spool pieces and flexible hoses for connections.

SBM: 2×16 in. floating hoses.

After the vessel is securely moored to the SBM, the service launch will tow the end of the floating hoses to a point on the portside of the tanker immediately below the tanker's cargo manifold. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons. The hoses are fitted with 16 in. flanges, and the company will provide reduction pieces to 14 in. or 12 in. or other sizes (as well as gaskets) as required to make connections to the ship's manifold. The hose connection is normally performed by IOOC's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

MBM: 2×10 in. submerged hoses.

After the vessel is securely moored, inside the MBM, the submarine loading hose must be lifted to the rail amidships. The 10 in. hose lift is 5 tons. Hoses are lifted by ship's gear on the starboard side. Ships should have manifold fittings aboard to allow connection of the flanges.

Tankers are loaded or discharged at this berth.

LOADING: Crude oil is delivered to the SBM through a 36 in. line and to the MBM through an 18 in. line from a 2,198,000 barrel tank farm.

Flow rate under normal conditions is approximately:

SBM (two hoses) 6,000 t.p.h.
MBM (two hoses) 5,000 t.p.h.

The minimum flow rate is 15,000 bbls./p.h. All vessels accepting nominations to load at Bahregan must be capable of loading crude at rates above this figure.

The initial loading rate is normally about 1,500 t.p.h. while the Loading Master and the ship's officer satisfy themselves that all is in order with the Terminal and the ship's facilities. As soon as this is done, the loading rate is increased to maximum or other rate as requested by the ship.

The API of Bahregan Crude oil is 26.0.

The temperature of Bahregan Crude oil varies between 62°F and 78°F (Winter/Summer).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal; provided the Master issues a written request to the Loading Master upon arrival at the loading terminal. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Master should note that in cases of overloading, the excess cargo cannot be returned to the shore line. Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Bahregan Crude oil, provided agreement has been obtained from the consignor.

Slops should be segregated in a special "Slop Tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the Terminal and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the Terminal. The ballast may be retained for discharge en-route to the next port, or discharged concurrent with loading, provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur. Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "Permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the Terminal, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

MEDICAL: Depending on the availability of the Company doctor, medical assistance can be provided, although there is no hospital available. In cases of extreme emergency, IOOC will arrange transport to nearby towns at the ship's expense and responsibility.

CUSTOMS: A Customs Officer boards each vessel calling at the Terminal.

DENSITY: Salinity is approximately 20% more than normal sea water.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no consulates at the Bahregan Terminal; however, consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS: Masters of vessels loading at Bahregan Terminal are advised that this port is considered an "open roadstead" and under no circumstances may engines be shut down for repairs while their ships are moored. There are no facilities at Bahregan Terminal for making vessel repairs.

STORES: Not available.

TIME: Standard zone time for Iran is GMT plus 3.5 hours.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the Terminal is situated off-shore in the Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran – Iran. *Cables:* Falatghareh, Tehran. *Telex:* 212598 – 212346 – 212707. *Tel:* 624102-7.

Mail address: P.O.Box 1434.

AGENT: See "Abadan".

SIRRI ISLAND: 25.54 N. 54.33 E. (See Plan)

Note: Ship-to-ship transfers to be resumed in the near future.

FLAG: The Iranian flag, green side uppermost, must be flown while the vessel is within territorial waters. Iranian territorial waters extend 12 miles seaward from the mainland and offshore islands.

LOCATION: The loading station is located in the S.E. part of the island of Sirri at:

Lat. 25° 54′ N., Long. 54° 33′ 30″ E.

Landfall on the island presents no difficulty, by day or night, for vessels coming from the Strait of Hormuz or from one of the Gulf Ports. The Island gives a good radar echo at 17 miles.

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:

Lat. 25° 55.0′ N., Long. 54° 33.1′ E.
Lat. 25° 55.0′ N., Long. 54° 34.6′ E.
Lat. 25° 52.0′ N., Long. 54° 31.1′ E.
Lat. 25° 52.0′ N., Long. 54° 34.6′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

NAVIGATIONAL AIDS:

Warning: The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Sirri Island Terminal Light located in: Lat. 25° 54′ N., Long. 54° 33′ E. Light exhibited Fl. W. every 7 secs., visible 10 miles.

A lighted buoy, showing Fl. W.(3) every 12 secs. is visible 6 miles, and is located to the West of the S.E. end of the island.

The flare located in: Lat. 25° 54.1′ N., Long. 54° 31.9′ E. is highly conspicuous and tends to obstruct the other navigational aids:

Masters may find it useful to refer to the following documents:

1. French Hydrographic and Oceanographic Department Charts No. 2172 and 6051.
2. French Nautical Instructions, Series L, Volume IV.
3. British Navy Hydrographic Office Charts No. 2837, 2887, 2832 and 3781.
4. Lights and Fog Signals Book, series L.

PROHIBITED AREAS: Papa Production Facility (Offshore) located in position: Lat. 25° 42′ N., Long. 54° 17′ E.

The above platform complex, approximately 18 nautical miles S.W. of Sirri Island, is situated in the centre of the Sirri "A" oil field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil from offshore oil fields is delivered to Sirri Island by submarine pipe-line, from Papa production complex.

3 pipe-lines running approximately 182°T to a shore location on Sirri Island at: Lat. 25° 53.4′ N., Long. 54° 32.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

PILOTAGE: Vessels must not enter the Port Limits without an IOOC Berthing Master on board.

Vessels should wait for the Berthing Master approximately 2 miles off the Loading Dock.

Vessels should have the following equipment ready for use upon their arrival at the Port:

(a) Anchors, port and starboard, ready for letting go.
(b) Ropes or wires, 8 each end, not on automatic tension winches.
(c) Derricks rigged if shore reducers or flexible hoses are required.
(d) Manifold blanks removed and reducers fitted ready to connect 20 in. series 150 ASA loading arm flanges.
(e) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.
Note: Berthing Masters will not board any vessel which does not present a clean safe means of access.
(f) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.
(g) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.
(b) IOOC "Notice of Readiness" form.
(c) Combined Tug, Pilot, Berthing/Unberthing charge form.
(d) Fire and Safety Regulations and No Smoking Notices for posting in approved locations.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal Dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

Also see "Tugs".

ANCHORAGE: Vessels arriving to load at Sirri may anchor in 60 m. depth of water, 1.5 miles East of the lighthouse of Sirri Island, and take up a holding anchorage at their own initiative, providing they have not received instructions for docking upon arrival.

Prohibited Anchorage: Under no circumstances may vessels anchor in the zone surrounding the dock area, within a one-mile radius.

It is strictly forbidden to anchor in the vicinity of the S.E. end of the island (undersea pipe-lines); anchorage to the North and West of the island is considered unsafe and of poor holding qualities.

HEALTH: Following mooring and positioning of the vessel's access ladder, Iranian medical authorities or their representative will grant Pratique. Masters are advised to notify by radio any cases of infectious disease which may have broken out aboard.

RADIO/VHF:

1. Vessels nominated to load at Sirri Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bandar Abbas Radio (EOI) or Abadan Radio (EQZ).

IOOC Tehran, Telex: 212598 – 212346 – 212707.
Attn. Marsupt. Sirri.

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Sirri in GMT and last port.
CC Cargo required.
DD Deballast time.
EE Size and number of connections for cargo.

2. Sirri Island Station, is operating on 500 kHz, and 2182 kHz from 0400 – 0800 hrs. LT and from 1100 – 1400 hrs. LT.

3. Sirri Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Sirri Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

4. Sirri tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Sirri Tugs" when passing Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

5. *Radio Free Pratique:* Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Sirri Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

14 Point Questionnaire:

A 14 Point Questionnaire has to be completed and sent to NIOC by principals prior to appointment of a vessel for loading cargo at Sirri Terminal as follows:

1. Overall length of vessel.
2. Moulded depth of vessel.
3. Mean draft in light condition, ready to load (i.e. with only permanent ballast on board).
4. Can vessel discharge permanent ballast concurrent with cargo loading?
5. If any clean ballast is carried in the cargo tanks, can this be segregated and discharged concurrent with cargo loading?
6. If answer to (5) above is "Yes" what will be the mean draft with permanent ballast and clean cargo tank ballast on board?
7. What will be the maximum loading draft? Is this Summer or Tropical mark?
8. What is required "Owners Clearance" under keel in loaded condition?
9. Height of loading valve manifold connections above the deck.
10. Distance of loading valve manifold centre from the bow.
11. What is spacing (on centres) between loading valve manifold connections and how many connections are available for this loading?
12. Distance of loading valve connection from side of ship.
13. Advise if Sirri is first or second loading port.
14. If second loading port, how much cargo will be on board on arrival and what will be the arrival draft, fore and aft?

MAX. SIZE: The loading station is designed for docking and handling of vessels having a minimum length of 240 m. and a maximum length of 365 m. This normally restricts utilisation to vessels in the approximate size range of 80,000 d.w.t. to 330,000 d.w.t. The maximum authorised draft for these vessels is 24.00 m. (78 ft. 9 in.).

TUGS: 2 modern diesel tugs of 4,250 b.h.p. fitted with controllable pitch propellers and a bollard pull of 65 tons are stationed at the loading dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fighting capability, foam, dispersant and fire wires.

Launches: The Terminal operates a pilot launch and 2 mooring launches for rope handling.

NOTICE OF READINESS: The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affect cargoworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the Sirri Marine Superintendent will be final.

The vessel's Owner may bring in a Classification Surveyor, at his own expense, to conduct a survey.

BERTHING: *Port Facility – Tanker Dock:*

1. Vessels are ordinarily docked port side to the dock on a heading of 017°, at mooring piling equipped with "Yokohama" type inflatable fenders. Mooring lines are attached to 6 mooring pilings, equipped with quick-release hooks. The dock comprises a loading platform linked to land by a catwalk. All ships berthed alongside must provide rat guards for the ship's moorings.

2. Water depth, adjacent to the dock, at LW is 28 m.

3. Keel clearance required by the Terminal is 3 ft. at all times.

4. Connection and disconnection of the loading arms is performed by IOOC personnel, with the assistance of the vessel's crew. The vessel's cranes are not used unless absolutely necessary, as in the event of failure of the platform hoisting equipment. The loading arms are of 20 in. size, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges.

Vessels are advised to have their reducers attached to the loading manifold, ready for connection. Before connection is begun, the vessel will be connected to the arc system voltage equalising cable.

5. After the vessel is moored and Pratique issued, an IOOC representative responsible for loading and safety will reach agreemen with the vessel as to loading conditions, possible flow rate, and quantitie to be handled. The IOOC representative is on watch on the dock at a times. The Master of the vessel must provide him with all the informatio necessary to ensure proper completion of the loading process. Th Master shall designate an officer to be responsible for loading and safet on board, in liaison with this representative, and a crew member wh shall be permanently stationed near the manifold for direc communication with the dock. The Master shall be fully responsible fo valve operations and safe loading on board. If necessary, the vesse may at any time request a reduction in the pumping rate.

When loading is completed, tank ullages shall be taken by an office of the vessel, in the presence of the IOOC representative.

The Terminal shall furnish the vessel with samples of the crud loaded, taken by continuous sampling on the loading line. Such sample shall be numbered and sealed, and shall state the origin of the crude.

6. At the end of the loading process, the vessel shall notify th Terminal 0.5 hour, and again 10 minutes, before the planned sto loading.

LOADING: *Loading Facility:*

1. Tankers are loaded at Sirri Island alongside a 1 berth jett approximately 600 ft. offshore. The loading platform is fitted with rig hydraulic loading arms which have quick connection/release couple attached to the end flange.

Crude is loaded by 3×20 in. loading arms, 1 of which are also use for unloading dirty ballast water from the tanker.

2. The maximum loading rate is 15,000 cu.m./hr. The minimum flo rate is 15,000 bbls/hr. All vessels accepting nominations to load at Sir Island must be capable of loading crude at rates above this figure.

3. The API of Sirri Crude oil is 31.

4. The temperature of Sirri crude oil varies between 93°F and 86° (Summer/Winter).

5. The Terminal will accept cargo requests 10% above or below th official nominated quantity unless specifically requested otherwise b the Consignor.

6. A shore stop to close off the flow of crude oil to the tanker will b executed by the Terminal provided the Master issues a written reques to the Loading Master upon arrival at the loading dock. This reques must include the statement that IOOC will not be held responsible fo any error in the final quantity loaded.

Masters should note that in cases of overloading, the excess carg cannot be returned to the shore line.

Masters should also be aware that they will be held responsible fo any overflows and pollution caused by their request for a shore stop.

7. An "Early Sailing System" of tanker documentation is operated b the Terminal as standard practice for all cargoes (see "Early Sailin Procedure").

8. Most responsible ship owners have adopted a system of tan cleaning using circulatory methods of transfer of tank washing on boar ship and treating these washings with chemicals. The result is that n oil is discharged into the sea and the oil separated is collected in a Slo Tank. With the written permission of Off-Taking Companies, the Termina will "Load on Top" of such slops. To avoid pollution of the Gulf, th system is highly recommended.

9. Vessels which arrive in ballast to load part cargo, should endeavou to place the ballast in such a manner as to allow loading to commenc upon arrival at the loading dock.

The ballast may be retained for discharge enroute to the next port, o discharged concurrent with loading. Provided the vessel can sho adequate valve separation, this method is accepted by the Termina and will be finally confirmed by the Loading Master when satisfied tha no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of the ballast in "permanent ballast" tanks, should also endeavour to arrang the remaining ballast in such cargo tanks as to allow loading t commence upon arrival at the loading dock, discharge concurrent, usin segregated lines and pumps. The Terminal will accept this system o the same basis as above paragraph.

10. A 90,000 cu.m. storage reservoir enables vessels to discharg the dirty water ballast from their tanks into IOOC land installations, b means of two of the 20 in. handling arms in the dock installation.

BALLAST: *Ballast Upon Arrival:* Vessels must come in with adequa ballast and proper trim to be able to manoeuvre in satisfactory condition of safety.

Ballast must not be less that 30% of d.w.t., or 50% of loaded dra FW, bunkers and stores are not considered ballast. I.O.O.C. reserve the right to leave at anchor vessels not meeting these conditions; t resulting delay will be for account of the vessel.

The Terminal is equipped with a dirty ballast holding tank; balla unloading is performed by two 20 in. arms. Any discharge of dirty wa overboard is forbidden.

Ballast Discharge: A 90,000 cu.m. storage reservoir enables vessels t discharge the dirty water ballast from their tanks into I.O.O.C. la installations, by means of two of the 20 in. handling arms in the do installation.

Disposal of Ballast: International Law: Ship's Masters are he responsible to observe International Convention Laws concern pollution of the sea, having particular regard to the Gulf Area.

Disposal of Ballast at Sea: Ship's Masters are warned that no di ballast, or bilge water should be disposed of in the sea within 50 mil of the coast of Iran.

When so disposing of ballast, all pipe-lines, sea suctions, strain and pumps that are later to be used to discharge clean ballast, must b flushed clean, so that there will be no chance of even a small amo of sea pollution when the clean ballast is pumped out.

Master's Responsibility: It is the ship's Master's responsibility to see t no oil of any kind is pumped or spilled overboard from his ship.

Categories of Pollution: This includes oil water from bilges, crude residue from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be to ship's account.

Tank Inspection: As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

Ship Rejections: If evidence of oil appears at any of these inspections the ship will be rejected, and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, she may be rejected or refused further loading.

Ship Survey: Should the ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors of repair, is submitted.

Notice of Readiness Rejection: Any vessel rejected because of dirty ballast or sea pollution will automatically nullify his "Notice of Readiness" and lose any priority of position for loading.

On return from sea, ships' Masters should tender a new Notice of Readiness to I.O.O.C. If this is accepted by I.O.O.C. vessels will then be entered for loading at the new time of acceptance. Vessels will be rejected for dirty ballast at all times.

Ballast Quantity: A vessel must have sufficient ballast for safe handling, with due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Additional Lighting: In addition to the lights usually displayed, vessels in the berth discharging ballast or loading cargo during darkness will themselves illuminate the sea around the ship, so that any pollution will be readily noticeable.

Special Provision: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the Sirri Terminal Superintendent.

Load on Top Method: Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washing on board ship and treatment with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of Off-Taking Companies, the Terminal will "Load on Top" of such slops. To avoid pollution of the Gulf, this system is highly recommended.

EARLY SAILING PROCEDURE: Notice to Masters:

In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing system is now in force.

The following documents are prepared in advance, *except for cargo figures*, and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(A) Nos........ Originals & Nos........ Copies of IOOC Bill of Lading.
(B) Nos........ Originals & Nos........ Copies of IOOC Certificate of Origin and Cargo Manifest.
(C) Nos........ Originals & Nos........ Copies of IOOC Tanker Time and Loading Report.
(D) Nos........ Originals & Nos........ Copies of IOOC Report of Cargo and Ship's Ullages.
(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the "Bill of Lading" and "Certificate of Origin" forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In case of disagreement on Cargo figures, the Master may:

1. "Note Protest" by cable or telex.
2. Authorise the ship's Agent to "Note Protest" on his behalf.
3. Pass a written "Note of Protest" to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

POLLUTION: It is the Master's responsibility to ensure that no garbage, refuse or liquid discharge is allowed to pollute harbour waters.

Adequate covers must be placed over all sanitary and galley discharges to prevent fouling the dock structure.

Ship's Masters are obliged to observe International Convention Laws concerning pollution of the sea.

Rules and Regulations establishing procedure for the Sea of Oman and the Gulf must be strictly observed by all Masters.

IOOC monitors the entire area within their field of operation, and will fully document and report back to NIOC any case of pollution for further action.

MEDICAL: IOOC operates a small clinic on the Island with resident doctors. This facility will be made available for emergency cases only.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: The island has no repair shop. Repairs may be made at anchorage after loading, subject to approval by I.O.O.C.

REPATRIATION: I.O.O.C.'s air transport to Tehran is not available for the transport of relief crews.

AIRPORT: I.O.O.C. has an air transport service to Tehran.

TIME: Sirri Island is on Iranian Standard Time which is GMT plus 3.5 hours.

SHORE LEAVE: Crew are prohibited from going ashore, except by special authorisation issued by I.O.O.C., by agreement with the consignees and the local authorities.

Swimming alongside the vessel and the dock is prohibited.

GENERAL: *Weather:* From May to September, very hot and humid conditions prevail with temperatures reaching 47°C (117°F) and relative humidity ranging from 10% and 100%.

The Winter months, from November to March, are mild and pleasant with minimum temperatures of about 4°C (39°F). The average rainfall is approximately 200 mm. (8 in.) per annum, all of which falls during the Winter months.

Throughout the year, the dominant winds are from the W.N.W., with winds of a force greater than 20 knots from November to March. This orientation is approximately 290° at Sirri. This wind, known as the "Shomal", blows particularly in the Summer during a period of forty days (beginning of June to mid-July); in the Winter, the wind comes on abruptly and can reach 30 to 40 knots.

Note: Violent winds from the N.E. reaching 60 knots have been observed in the Winter season.

Tides: In the waters around the island of Sirri, the tides are semidiurnal with diurnal assymetry. High tide occurs approximately 9 hours after the moon passes the meridian of Greenwich. The average water level is 0.90 m. above chart datum and the average tidal range 1.50 m.

The seasonal S.W. wind from April to September causes the water level in the Gulf to rise by 0.30 m.

Sea Conditions: The swell is short and rapidly becomes steep, and it is often out of proportion to the wind force. With the Shomal, it can reach 3.50 to 4.50 m., but the maximum wave height at Sirri is in the range of 1.80 to 3.00 m. The swell subsides rapidly after the wind dies down.

Sea temperature varies from 71°F. (22°C.) in January to 93°F. (34°C.) in August.

Currents: Tidal currents are of the order of one knot, with N.N.E. and S.S.W. major components; thus currents are roughly parallel with the dock alignment.

Sanitary Report: This formality is normally performed after the vessel docks; however, vessels remaining at anchor may, through their Agents, complete customs and health examinations in the roadstead.

Publications and Charts: Masters may find it useful to refer to the following:

a. French hydrographic and oceanographic department charts No. 2172 and 6051.
b. French nautical instructions, Series L, volume IV.
c. Lights and fog signals book, Series L.
d. British Hydrographic Office chart Nos. 2837, 2887 and 2832.
e. Gulf Pilot (63).

Rat Guards: All ships berthed alongside must provide Rat Guards for the ship's moorings.

Territorial Waters: Iranian territorial waters extend 12 nautical miles from the coast and adjacent islands.

Surveyors: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas and Abadan.

Consuls: No Consular representation is available at Sirri but the Embassies of most nations are situated in Tehran.

Officials: Customs, Ports and Shipping, and Gendarmerie Officials are stationed on Sirri Island.

Maintenance: Maintenance work such as scaling and painting on deck or from the loading dock, is prohibited at all times while the vessel is alongside the loading dock.

SAFETY: *Safety Watch:* A safety watch is provided on the loading platform by I.O.O.C. personnel, under the orders of the Loading Supervisor.

Throughout the time the vessel is alongside, I.O.O.C. makes the following seagoing facilities available to the vessel:

a. Two 300 h.p. docking escort boats.
b. Two safety tugs with monitor water nozzles, foam generators and anit-pollution spray equipment.
c. Fixed dock equipment (water screens, nozzles).

The Master remains solely responsible for safety aboard his vessel. He shall maintain sufficient crew on board to be able to handle his vessel without hazard, and ensure rapid response with fire fighting equipment:

a. Keep the engines ready for use.
b. Make sure the vessel keeps its station with the dock, so that the loading arms always operate within their designed work-zone.
c. Make sure that the mooring lines provide firm mooring without abnormal strain.

An I.O.O.C. representative shall make sure that these safety provisions are in force throughout the time the vessel is alongside the loading station.

If need be, the standby tug may be called upon for correction of docking position. Loading may be halted, and the arms disconnected.

Preventative Measures: The vessel must show a red flag by day, and by night a red light visible through 360°.

The Master must post a notice at the gangway, absolutely prohibiting smoking, the use of open lights, and access to visitors.

All hull valves shall be closed, except for those handling water circulation.

All main deck scuppers shall be plugged.

Two wire rope emergency tow lines, of adequate length and strength shall be placed on the starboard side, one forward and one aft; the eyes of the tow lines shall be maintained a suitable distance above the water, so that the tugs can couple to them easily.

The access gangway shall be properly positioned on deck.

Fire Protection: Smoking, the use of open lights, and the use of tools liable to produce sparks are prohibited outside the zones where such are normally authorised on a tanker.

In zones classified as dangerous, the use of equipment other than types approved for this use by an official body is prohibited.

Further, in general, the Master is obliged to adhere to international safety regulations.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran – Iran. P.O. Box 1434. *Tel:* 624102-5 *Cable:* Falatghareh, Tehran. *Telex:* 212598-212346-212707. *Contact:* M. Kamalipour, Operations Manager.

AGENT: See "Abadan".

Iraq

TANKERS: Please note that all correspondence, cables, and telexes concerning tankers calling at Iraqi terminals are to be directed to following addresses.

Postal address: State Enterprise for Maritime Agencies. P.O. Box 3, Basrah.

Cable address: Tankers Basrah. Tankers Fao.

Telex No.: 7009.

Cables for arrival should be addressed to both "Tankers" Basrah and "Tankers" Fao.

ALBAKR TERMINAL: 29.41 N. 48.49 E. (See Plan)

LOCATION: The terminal is 31 miles S.E. of Fao in position Lat. 29° 40′ 36″ N., Long. 48° 48′ 38″ E. Depth of water 29.30 m. at MLWOST.

PILOTAGE: Pilotage is compulsory for all inward and outward tankers using the Khor al Khafja buoyed channel when the draft is over 15.85 m.

NAVIGATIONAL AIDS: 8 lighted buoys define the deep water channel at the 69 ft. (21m.) depth contours in the immediate vicinity of Albakr Terminal. The buoys are battery powered with quick flash characteristics with visibility range of 1 mile. The perimeter of Albakr Terminal is outlined with flashing marine lanterns to define a hazard to marine navigation. The lanterns are battery powered, some are white lens flash with 5 mile range and others are red lens flash with 2 mile range.

The radio tower is equipped with an aviation hazard light (red). It is also equipped with a long range marine beacon (white) located below the red hazard light.

BERTHING: The terminal consists of 2 loading platforms (A) and (B) each loading platform has 2 loading berths. Berths No. 1 and 2 of Platform "A" and Berth No. 4 of Platform "B" can accommodate tankers ranging in size from 35,000 d.w.t. to 350,000 d.w.t., Berth No. 3 of Platform "B" can accommodate tankers ranging in size between 85,000 d.w.t. and 350,000 d.w.t., Total length of structure is 975.4 m. and 106.7 m. wide at centre.

RADIO: Tankers are requested to contact Albakr Terminal through Basrah Control Radio (YIR) at least 72 hours, 48 hours and 24 hours prior to arrival giving ETA. Prior to docking the tanker must also provide the terminal operator with information required to prepare the "loading order" format, this information should include the type of crude to be loaded, loading rate in barrels, the Registry No. of vessel, nationality, name of Master. The Master will be informed of approach instructions such as location of berth, weather and sea conditions, and the communication channel to be used for vessel docking assistance.

Vessels bound for Iraqi territorial waters should also contact Fao Radio (YIS) at least 24 hours before entering territorial waters requesting free pratique from Medical Officer Fao. The request should indicate the state of health of the crew on board together with relevent information.

Name of Station: Khor al Khafja FC(10) Albakr Terminal FP
Call Sign : Albakr Radio
Service : 24 Hours

The following table shows the details for contacting the Iraqi port coast stations. The number between brackets corresponds to the notes explained below.

Frequency	*Channel*	*Emission Class*	*Power*	*Service Nature*
156.375 MHz	67	F^3	0.02	OT (2) (3) (6) (8)
156.550 MHz	12	F^3	0.02	OT (2) (3) (3) (5)
156.80 MHz	16	F^3	0.02	(1) (3) (4) (7) (8) (11)
161.80 MHz	24	F^3	0.02	

FC Coast Station
FP Port Station
OT Station open exclusively to operational traffic of the service concerned
(1) Transmits urgent Notices to Mariners
(2) Transmits meteorological bulletins (North Arabian Gulf Weather Forecast)
(3) For Navigation and harbour control services
(4) Calling and Safety frequency
(5) First priority working frequency
(6) Second priority working frequency
(7) Weather bulletins at 0630, 1430 hrs. and on request
(8) Used for marine traffic control
(10) Station under the direction of Iraq Administration
(11) Permanent watch

While in Iraqi Territorial waters, ships under way shall maintain watch on Channel 16 (156.80 MHz) and/or (461.5 kHz) to ensure immediate reception of the instructions issued by the controlling authorities.

(a) Khor Al-Khafja, Albakr Terminal Radio, maintains listening watch on Channel 16 (156.80 MHz).
(b) Pilot station (Al-Rasheed Radio YIBE maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(d) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.

Instructions:

(a) Navigation warnings are transmitted on 500 kHz by Basrah Con Radio (YIR).

(b) North Arabian Gulf weather forecast is transmitted by:
1. Basrah Control Radio on:
   440 kHz at 0530, 1330 GMT and on request.
   6493.25 kHz at 0530 GMT and on request.
   8668 kHz at 1330 GMT and on request.
2. Khor Al Khafja, Albakr Terminal Radio, on Channel 16 (156. MHz) at 0530 GMT and on request.

(c) Traffic control signal on Channel 16 (156.80 MHz) and on 500 k by Basrah Control Radio (YIR).

(d) Traffic control signal on Channel 16 (156.80 MHz) and 500 k by Fao Radio (YIS).

(e) Traffic control signal on Channel 16 (156.80 MHz) by Alba Terminal Radio.

Commercial and Public Correspondence: Call Basrah Radio (YIR) Channel 16 (156.80 MHz) 500 kHz. 4, 6, 12 and 16 MHz. bands, a after initial contact has been established change to one of the work frequencies as instructed to pass messages.

MAX. SIZE: Max. length, 366 m. Max. draft 21 m. Night berth possible.

TUGS: 3 available, 2 of 4,000 h.p. and 1 of 2,200 h.p.

LOADING: Storage and pumping facilities on shore are connected Albakr Terminal by 2×48 in. pipe-lines. The Terminal is capable loading through either one of the pipe-lines at a time or both.

Capacity of each line varies between 77,000 and 89,000 b.p. depending on type of crude (Basrah heavy or Basrah light type). W both lines in operation at the same time loading rate can be increas to max. 141,500 b.p.h. (19,000 tonnes p.h.). 2 tankers can load w different types of crude at the same time. Loading facilities can b remotely controlled from the Control Room.

Loading will be stopped if any regulations are not observed and the case of oil spillage.

Loading may be stopped in still air conditions, during severe electric storms and/or high wind and sea conditions.

Loading Arms: For each loading berth, 2 identical 24 in.×80 ft. lo Luceat DCMA loading arms, with hydraulically operated coupling fitt with adaptors to allow automatic and fast coupling to tanker manifo flanges ranging from 16 in. to 24 in. (spools for 10 in., 12 in. or 14 in. 16 in. are available at the terminal if required).

Gangway: A power operated telescopic personnel gangway is provid at each berth. These gangways can withstand 500 lb. load at mid-spa in the extended position.

Meters: 16 in. A. O. Smith positive displacement meters, 16 meters t each platform, capacity of each meter 12,500 b.p.h.

Meter Prover: One 24 in. triple "U" bi-directional mechanic displacement meter prover for each platform. The occurence of ea prover is decided bi-yearly utilising certified volume tanks.

Continuous Crude Oil Gravity Analyzer: There is a number of ARCO Anulus Model 1-F10 50X liquid gravity analyzers on each load platform capable of detecting API gravity from 45° to 15°, the outp from these analyzers are displayed on the appropriate loading forma and is recorded on charts in the Control Room.

These gravity analysers are to be checked constantly and r calibrated bi-yearly according to the manufacturer's recommendation

A responsible member of the crew must be in contact with the termin officials at all times.

READINESS: Notice of Readiness will be received by INO representative provided the vessel is ready to load. Lay time w commence 6 hours after receipt of Notice of Readiness berth or berth.

SAFETY PRECAUTIONS: On arrival at the terminal, INO Representative will discuss with the Master the "Safety Requirement letter addressed to him also the Safety Check List.

Attention is also drawn to the Tanker Safety Guide published by t International Chamber of Shipping and to the International Oil Tank Terminal Safety Guide.

SHIP DOCKING ASSISTANCE SYSTEM: 1 unit for each bert consisting of speed of approach measuring instrument with fixed w and narrow beam R.F. heads, a data processor and visual display un when the vessel is within 2 miles of Albakr Terminal. The rotatable R head which is nearest to the vessel shall be aimed at it, during t docking the system will display approaching vessel's velocity.

FRESH WATER: Can be made available by Ports Administration at 24 hours notice from tankers. Water supply is from barges or small wa tankers. Notice to be through Agent.

FUEL: May be made available after 72 hours notice through Age Supply is direct from small bunker tanker or barges. Bunkering howe not allowed while tanker is on berth and it is allowed only when tan is waiting for berth or after completion of loading and unberthing.

SHORE LEAVE: Not allowed.

LIGHT DUES: The Iraqi Ports Administration will collect any light du payable including those due to the Middle East Navigation Aid Serv

REGULATIONS:

(a) Mooring.
"All vessels after arrival, having been moored to the satisfact of the Harbour Master, shall tend their own anchor cables, rop lines and hawsers. It is important for tankers to tend their moor frequently".

(b) Ship must be ready to move under its own power.
While in berth, ships must be ready to move under their o power in the event of their breaking adrift, catching fire or other emergency. No repairs are to be carried out while in t berth, which would immobilise the ship or impair her firefight efficiency.

(c) Cleaning of boiler tubes.
Cleaning of boiler tubes alongside the Island Termina forbidden.

POLLUTION: No dirty ballast. No oily water or other refuse to be discharged overboard.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master delivered to the representative of the terminal to this effect.

Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

Vessels are subject to heavy fines and liabilities for claims arising.

AUTHORITY: All approaches to Albakr Terminal and Khor al Khafja are controlled by the Iraqi Ports Administration.

Cable MAWANI - BASRAH Telex 7008 Ports

Attention is drawn to port rules and bye laws 1942, Quarantine Regulation No. 28 of 1963 and schedules of dues and charges.

The terminal is the property of Iraq National Oil Company (INOC) and is administered and controlled by the said company to facilitate the loading of tankers with crude oil.

Cable Address INOC (Basrah) - PETROLNA BASRAH
INOC (Baghdad) - PETROLNA BAGHDAD

Telex No. INOC (Basrah) - 7003
INOC (Baghdad) - 2204/2295

The sole Agent for all vessels visiting Iraqi ports is The State Enterprise for Maritime Agencies. All requests for services to tankers should be directed to the Agent.

See "General" before first port.

BASRAH (Maqal and Umm Qasr): 30.31 N. 47.50 E.

Note: Iraqi imports are mainly made up by bulk wheat, bagged rice and sugar, but a significant increase in the import of construction equipment, consumer goods, etc. is expected.

The main Iraqi port of Basrah situated in the Shatt Al Arab waterway has been landlocked since the outbreak of the conflict. It is expected that it will take a considerable time to remove wrecks and dredge the waterway, once an agreement is reached.

DOCUMENTS: On arrival at pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at an Israeli port, all Health Certificates of Crew must be valid against cholera, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo and heavy lift list (if any).

PILOTAGE: Compulsory. Owners having vessels bound for Umm Qasr Port should instruct Masters to cable ETAs to State Enterprise for Water Transport, Basrah, cable address "Bawakhir Basrah", Telex: 207077 BWAKR IK.

The pilot boat is located usually in position Lat. 29° 45′ 15″ N., Long. 48° 50′ 45″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Maqal and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR on 500 kHz for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kHz from YIR or use VHF on Channels 14 and 12. On boarding the River Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. Master to hoist the Iraqi National Flag.

The Navigation of the Shatt-al-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

ANCHORAGES: Vessels can anchor within the following area:

(a) 29° 40.0′ N., 48° 43.0′ E.
(b) 29° 40.0′ N., 48° 45.0′ E.
(c) 29° 36.0′ N., 48° 43.0′ E.
(d) 29° 36.0′ N., 48° 45.0′ E.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet of Tide Tables each year and the movements of vessels in and out of the Shatt-al-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The max. draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Umm Qasr. Although the draft obtainable alongside the wharves is 31 ft. the max. draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

MAX. SIZE: The maximum acceptable draft for vessels calling at Umm Qasr Port is 8.0 m. No beam restrictions. Fairway draft is 12.0 m. The fairway is marked by port and starboard buoys.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kHz, call sign "YIS", requesting Free Pratique 24 hours before vessel's arrival at pilot station. All crew Vaccination Certificates should be valid and available for Medical Officer's arrival on board. He will also expect to find a valid Derat Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine. Special precautions are taken in case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the pilot station. The Iraq Government is very sensitive about the spread of cholera. Derat Certificate renewable at Basrah.

RADIO: When a vessel is 3 days away from Basrah, radio contact can be established with Basrah Radio, call sign YIR on HF 4, 6, 8, 12 and 16 MHz bands. When the vessel is within 3 days of arrival, Basrah Control Radio (YIR) can be used (transmitting on 500 kHz and receiving on 440 kHz).

List of Coast Stations (Iraq): Summary of Procedures:

1. Whilst inside Iraq territorial waters, ships under way will maintain watch on Channel 16 (156.80 MHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.
   (a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 MHz).
   (b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
   (c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
   (d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 MHz) and 461.5 kHz.
   (e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
   (f) Umm Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz. VHF Channels 12, 14, 20 and 22 available.

II. Special Instructions:
   (a) Navigational Warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
   (b) North Gulf Weather Forecast is transmitted by:
      1. Basrah Control Radio on:
      440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs. GMT and on request. 8668 kHz at 1330 hrs. GMT and on request.
      2. Khor Al-Amaya Radio on Channel 16 (156.80 MHz) at 0530, 1330 hrs. GMT and on request.
   (c) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Basrah Control Radio (YIR).
   (d) Traffic Control Signals on Channel 16 (156.80 MHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
   (e) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Fao Radio (YIS).
   (f) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Umm-Qasr Radio (YIU).
   (g) Traffic Control Signals on Channel 16 (156.80 MHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 MHz), 500 kHz, 4, 6, 8, 12 and 16 MHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answers on*	*Traffic Lists*
H24	500	440, 461.5	–
0400–0600	6265.5–6280.5	6493.25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986.5	1505
1600–1800	4177– 4187	4356.5	1705

VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

TUGS: River and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Maqal Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:

(a) Maqal – Plus 12.5 ft. above zero port datum. Port datum is 3.96 ft. above mean zero level at Fao.
(b) Umm Qasr – 24.65 ft. above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:

(a) Maqal: A daily variation of 5 ft. between tides and max. of 8 ft.
(b) Umm Qasr: An average of 12 ft. between tides, and max. of 17 ft.

Maqal (Ma'gal): Wharves have continuous frontage of 2,000 m. depth alongside 9.15 m. Max. length of vessel, 171 m., berthing for 12 vessels. Report: 1989.

Berth No.	*Length (m.)*	*Cranes (tons)*	*Use*
1	200	3× 5	General
2	200	3× 5	General
3	200	2×40	Containers
4	220		
5	200	–	Bulk, sulphur, by conveyors
6	200	–	
7	200	2× 3 1×15 1× 8	General

Umm Qasr: The port is situated at the South end of the Khor Zubair, where it joins the Khor Abdullah. The sea approach to Umm Qasr is some 103 km. in length along the Khor Abdullah, commencing in deep waters of the Gulf near the mouth of the Shatt-al-Arab.

A navigation channel, the lowest part of which is 9 m. at LLW and of ample width is well marked with beacons and light buoys from the Shatt-el-Arab entrance pilot vessel to Umm Qasr. Loaded vessels with a draft of 8.0 m. will be able to sail on 2 tides each day to and from Umm Qasr. Pilot and Harbour Master services are compulsory.

The wharves are of reinforced concrete with a continuous frontage of 640 m. and depth of 9.75 m. at LLW. They are able to accommodate 3 cargo ships at one time. Each berth is 183 m. long. The wharves are provided with a total of 10 electric shore cranes from 3-15 tons capacity. In addition there is a 100 ton floating crane, 2 sea-going tugs and an ample number of mobile cranes, forklifts, eel trucks, tractors, trailers, etc. The Umm Qasr wharves are directly connected with roads and railway lines of the Iraqi Republican Railways.

There are also 2 mooring buoys 247 m. apart.

Fresh water available directly from mains on wharves.

3 new steel jetties at Abu Flus directly North of the Fertilizer jetty have been completed. These jetties are served by 6 electric shore cranes of 5 tons capacity. Vessels up to 171 m. long and 8.84 m. draft can lie alongside.

Grain Silo: Capacity 65,000 tons, loading capacity into ship's holds, 1,050 t.p.h. jetty 213 m. long, available for berthing ships up to 183 m. long with a draft of 8.84 m. for loading and unloading of grain.

Muftiyah Jetties: One wooden jetty with limited length owned by Port Authority for distribution of oil products and for the purpose of handling crude and refined oil for local consumption, also for exporting oil products outside Iraq. Also a further new concrete jetty available for berthing vessels 175 m.

Fertilizer Wharf: A modern concrete wharf situated on the banks of Shatt-al-Arab river at Abu Flus with a total length of 100 m., width 10 m., can accept vessels with length 182 m. and draft 8.84 m. It is allocated for the exportation of fertilisers by the State Co. for Fertilisers.

Mooring Buoys: There are also 13 mooring buoys, 7 at Ashar, 4 at Sunger and 2 at Abu Al Khasib, 220 m. apart.

CRANES: The wharves are served with 60 electric shore cranes from 1.5 tons to 15 tons capacity and 1 electric shore crane of 60 tons capacity, in addition there are 2 floating cranes one of which is 100 tons capacity capable of lifting direct from ships to railway trucks on the wharves, and the other of 20 tons capacity capable of lifting cargo at a distance of 30 m. from the centre of the jib. Also about 200 pieces of various type of mechanical and electrical handling equipment.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 80 miles).

STEVEDORING: Information of the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio. The average rate of discharge of general cargo at Basrah (Maqal and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships' derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

Bulk Cargoes: Discharged by grab direct to the Dock at Umm Qasr and by suction to the silo at Basrah. The equipment at Basrah is rated at 2,500 L/tons per day discharge and 5,000 L/tons per day loading, but under favourable conditions discharge rate may exceed 3,000 L/tons per day.

MEDICAL: For a vessel in to Basrah (Maqal and Umm Qasr) no advance notice is required, in order to obtain medical attention. Hospital facilities available at the new port hospital and other local hospitals.

For arrival at Basrah it is necessary to hold valid cholera certificate.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Maqal and Umm Qasr but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker.

FUEL: Only 1 grade of fuel oil available from the Basrah Refinery, a fuel oil viscosity 200 to 210 Red. No. 1, SG 0.920. Diesel oil also available.

Fuelling is direct if taken alongside Muftiyah Refinery jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah.

(Wine and/or Spirit). Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-al-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

CONSULS:

Belgium	Tel: 3666	Portugal	Tel: 4469

Norway	" 3511	U.S.S.R.	" 5410
Pakistan	" 3598		

REPAIRS: All types of repairs except major engine repairs can be carried out.

DRY DOCKS: Floating dock available, capacity 4,000 tons. Also slipway, capacity 700 tons.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Maqal Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with International flights.

IDENTIFICATION CARDS: All crew members are required to carry them some form of identification when going on shore.

TIME: Iraq time is 3 hours ahead of GMT and there are no alteratio made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The oth holidays are: 3 days Id-el-Fitr; 4 days Id-el-Adha; Al Hijaa; Ashura; B of the Prophet Mohammad; New Year 1st January; Army Day, January; 8th February; 21st March; 1st May Labour Day; 14th July; 1 July.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to department required.

TELEPHONES: Telephone is placed on board a vessel as soon secured alongside wharf.

GENERAL: The rain season in Basrah is between November and A and during the Summer months from May to October the temperatu can be as high as 55°C. It is important that crew members keep backs of their necks covered whilst working on deck during the heat the Summer. The use of salt tablets are recommended during the h of the Summer.

SPECIAL SERVICES: There is a laundry service available.

SHORE LEAVE: There is no restriction on crew members going shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that photography takes place from the ship whilst passing naval or milit installations.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

AGENT: The business of Shipping Agencies relating to all ships cal at Iraqi Ports is entrusted solely and exclusively to State Enterprise Maritime Agencies, P.O. Box 3, Basrah.

General Cargo: Cable address: Maragent. Telex No. 7009.

Tankers: Cable address: Tankers. Telex No.: 7009.

FAO: 29.58 N. 48.29 E.

DOCUMENTS: On arrival at pilot station, vessel requires the follow

Ship's Register.

Letter from Owner confirming that vessel has not called at Israeli P

Health Certificates of Crew must be valid against cholera.

2 copies Crew List.

2 copies Provision List.

2 copies Manifest.

Dangerous Cargo List, if any.

PILOTAGE: The pilot boat is located in position Lat. 29° 46′ 45″ Long. 49° 48′ 37″ E., and on arrival vessel should contact Pilot b immediately for instruction. VHF Channels 14 and 12. Provided Mas has given Agent 48 hours' notice of vessel's ETA, Pilot will boa immediately.

ANCHORAGE: On arrival of the pilot boat, vessel can anchor with depth restriction.

MAX. SIZE: *Tankers:* 675 ft. LOA. Vessels may load to a max. draft 35 ft. (10.65 m.) depending on the tidal conditions at the time, otherw to a draft suitable to cross the bar with safety.

HEALTH: Masters are requested to call the Port Medical Officer at F on 500 kHz, call sign "YIS4", requesting Free Pratique between 8 12 hours before vessel's arrival. All crew vaccination certificates sho be valid and available for the medical officer's arrival on board. He also expect to find a valid Derat Exemption Certificate on board. Anyo boarding the vessel ahead of the Medical Officer whilst the "Q" Flag still hoisted is liable to a fine.

Special precautions are taken in the case of a vessel arriving from epidemic area and even if the crew are holding valid vaccinat certificates the vessel may be delayed at the pilot station. The Repu of Iraq is very sensitive about the spread of cholera.

RADIO: Basrah Radio, call sign "YIR" on high frequencies 4, 6, 8 and 16 bands. Fao Radio, call sign "YIS", traffic control signals Channel 16, and 500 kHz. Also see Khor-al-Amaya.

Tankers should establish contact with Iraqi National Oil Co. 48 ho before arrival. Call sign RNT. Frequency 6493 kHz.

TUGS: Available on request.

BERTHING: There are 4 loading jetties with a depth of 10.9 alongside at LWST. Each jetty has one 60 cm. crude oil delivery with four 25 cm. flexible hoses. Jetties are floodlit and fitted with monitors and four 3 ton SWL cranes. Lengths of berth, 205.75 m. ea Max. draft 10.65 m. Night berthing possible. Loading rates Nos. 2 4 jetties average 4,000 t.p.h.

FRESH WATER: Available, rate approximately 10 t.p.h.

REPAIRS: Minor repairs possible.

MEDICAL: No advance notice is required in order to obtain me attention. Medical units are present at Fao, Umm Qasr and Ma A modern hospital containing all the essential units is found at Ma Crew in need of special attention or admission may be referred to the medical units.

TIME: 3 hours ahead of GMT.

AUTHORITY: President, State Organisation of Iraqi Ports, Basra

KHOR-AL-AMAYA: 29.47 N. 48.49 E.

OPERATORS: Basrah Petroleum Company Limited.

LOCATION: Island Terminal about 17 miles out in the Gulf from the mouth of the Shatt-al-Arab River.

ADMINISTRATION: All waters of the Shatt-al-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: *(a) Lights.* One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles: candlepower 7,400.

Red lights are fitted at the 4 extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

The channel between the entrance to the Shatt-al-Arab and the Khor-al-Amaya Sea Island Oil Terminal is marked by buoys and the Shatt-al-Arab Light Vessel (refer to relevant notices issued by the Iraqi Ports Administration, M.E.N.A.S., and Admiralty Notices to Mariners).

(b) Tides. High water at the Terminal may be expected to occur about 20 minutes before high water at the Shatt-al-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed 0.75 knots.

DOCUMENTS:

Crew List (5 copies).

Store List (2 copies).

PILOTAGE: Compulsory. Masters of vessels bound for Khor-al-Amaya Terminal should contact the Pilot vessel which cruises in an area about 2 miles S.E. of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

(a) All vessels using Khor-al-Amaya buoyed channel are reminded that loaded tankers outward bound from Khor-al-Amaya Terminal have top priority in navigating the buoyed channel and all other vessels are to keep clear in all cases.

(b) All inward-bound vessels are to contact Khor-al-Amaya Harbour Master on VHF Channels 16 and 14 before entering Khor-al-Amaya channel for information regarding deeply laden tankers using the restricted channel, and for berthing and anchoring instructions.

(c) Pilotage is compulsory for all inward and outward bound tankers using the Khor-al-Amaya buoyed channel when the draft of the tanker is 15.85 m. (52 ft.) or over.

(d) Tankers arriving to load at Khor-al-Amaya with draft in excess of 15.85 m. (52 ft.) must give their ETA at Shatt-al-Arab Light-vessel at least 12 hours in advance by contacting the Pilot station or Khor-al-Amaya Terminal.

ANCHORAGES: Anchorage areas have been established bounded by lines joining the following positions:

(a) *Anchorage "A"*
- (i) Lat. 29° 32′ 08″ N., Long. 48° 58′ 59″ E.
- (ii) Lat. 29° 31′ 24″ N., Long. 48° 58′ 06″ E.
- (iii) Lat. 29° 32′ 53″ N., Long. 48° 56′ 56″ E.
- (iv) Lat. 29° 33′ 14″ N., Long. 48° 57′ 20″ E.

(b) *Anchorage "B"*
- (i) Lat. 29° 44′ 03″ N., Long. 48° 49′ 34″ E.
- (ii) Lat. 29° 43′ 52″ N., Long. 48° 49′ 12″ E.
- (iii) Lat. 29° 42′ 08″ N., Long. 48° 50′ 18″ E.
- (iv) Lat. 29° 42′ 21″ N., Long. 48° 50′ 45″ E.

(c) *Anchorage "C"*
- (i) Lat. 29° 45′ 39″ N., Long. 48° 48′ 41″ E.
- (ii) Lat. 29° 44′ 28″ N., Long. 48° 47′ 38″ E.
- (iii) Lat. 29° 44′ 06″ N., Long. 48° 49′ 31″ E.
- (iv) Lat. 29° 43′ 35″ N., Long. 48° 48′ 28″ E.

(d) *Temporary Lightering Anchorage*
- (i) Lat. 29° 46′ 00″ N., Long. 48° 48′ 28″ E.
- (ii) Lat. 29° 45′ 40″ N., Long. 48° 48′ 39″ E.
- (iii) Lat. 29° 45′ 34″ N., Long. 48° 46′ 35″ E.
- (iv) Lat. 29° 44′ 06″ N., Long. 48° 47′ 18″ E.

Note:
- (i) Anchorages "A" and "B" are for deep-draft vessels of 12.19 m. (40 ft.) and upwards.
- (ii) Anchorage "C" is to be used by tankers (laden or in ballast) whose draft does not exceed 12.19 m. (40 ft.).
- (iii) The temporary lightering anchorage is for the exclusive use of lighters. No other ships or vessels are to anchor within this area.

MAX. SIZE: 330,000 d.w.t. loading part cargo. Max. LOA: 1,200 ft. Max. draft 69 ft.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N., Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,356 – 8,374 and work on 8,374 – 8,457.5 kHz. Periods 0400 – 0430 hrs., 0800 – 0830 hrs., 1200 – 1230 hrs., 1600 – 1630 hrs. All times GMT. Services: C.V. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for Contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156.80 MHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.
- *(a)* Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 MHz).
- *(b)* Pilot station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(c)* Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(d)* Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 MHz) and 461.5 kHz.
- *(e)* Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(f)* Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.

II. Special Instructions.
- *(a)* Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
- *(b)* North Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs., GMT and on request. 8668 kHz at 1330 hrs., GMT and on request. 2. Khor-al-Amaya Radio on Channel 16 (156.80 MHz) at 0530, 1330 hrs. GMT and on request.
- *(c)* Traffic Control Signals on Channel 16 (156.80 MHz) and on 500 kHz by Basrah Control Radio (YIR).
- *(d)* Traffic Control Signals on Channel 16 (156.80 MHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
- *(e)* Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Fao radio (YIS).
- *(f)* Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Umm-Qasr Radio (YIU).
- *(g)* Traffic Control Signals on Channel 16 (156.80 MHz) by Khor-al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156.80 MHz), 500 kHz, 4, 6, 8, 12 and 16 MHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Frequencies instruction to pass messages time table 1200 – 1400 hrs. listen on 8354 – 8374 answer on 8668 traffic lists 1305.

Note: All messages are changeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: 3 tugs of 4,000 b.h.p. are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 22 m. of water, having 1 tanker berth on one side and 2 berths on the other side with suitable mooring dolphins and platforms ahead and astern which are connected by cat-walks. The orientation is 320°/140°. The max. loading rate, with only 1 berth in use, is 9,000 t.p.h.; with 2 berths in use the max. loading rate at each is 4,500 t.p.h. Fire-fighting towers are provided, also a helicopter platform. Loading by "Woodfield" flow booms offering 4×16 in. and 2 or 4, 12 in. hoses. Vessels of the order of 120,000 d.w.t. can be accepted at berths 5 and 6 and 330,000 d.w.t. max. draft 21 m. at berth No. 7.

The S.G. and A.P.I. and temperature of the crude oil will be supplied to the Master on radio request.

Berthing of tankers: MENAS NOTICE No. 114/74.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth or unberth at the existing Wharf No. 7 in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at Wharf No. 7 and in the S.E. Direction.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth at the proposed Wharf No. 8 and in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at the proposed wharf No. 8 and in the S.E. Direction.

MEDICAL: An Iraqi Ports Administration Medical Dresser will always be available to attend to quarantine matters, Derat Certificates, etc. A doctor can be made available, through vessel's Agent, upon prior request, but necessary to give 24 hours notice to arrange.

FRESH WATER: Available with 24 hours notice.

FUEL: Not available ex-wharf.

CUSTOMS ALLOWANCES: During vessel's stay at Terminal, 1 carton of cigarettes only allowed to each crew member.

SAFETY REGULATIONS: Safety regulations and fire fighting procedures will be discussed with the Master on arrival.

GANGWAYS: Ships must supply their own gangways when alongside. Accommodation ladders and other ship side ladders are not suitable.

REPAIRS: Basrah Petroleum Company has no facilities to undertake ship repair work of any description.

AGENCY: Masters of tankers should contact the Agent through Basrah Radio Station prior to arrival. Agent's representatives are not housed on the island. Ship's documents for port clearance purposes are passed by them to the Agent for action. Stores and provisions will be sent out by the Agent, given sufficient prior notice.

See "General" before first port.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

KHOR AL ZUBAIR: 30.12 N. 47.53 E. (See Plan)

PILOTAGE: Compulsory. Vessels bound for Khor al Zubair should send there ETA to State Enterprise for Water Transport, Telex No. 207077 BWAKR IK or Cable Address "Bawakhir Basrah".

Pilot boarding station is located at Lat. 29° 39′ N., Long. 48° 45′ E.

ANCHORAGE: Vessels can anchor at the new anchorage within the following co-ordinates:

(a) 29° 40.0′ N., 48° 43.0 E.
(b) 29° 40.0′ N., 48° 45.0 E.
(c) 29° 36.0′ N., 48° 43.0 E.
(d) 29° 36.0′ N., 48° 45.0 E.

RESTRICTIONS: Berthing and unberthing from sunrise to sunset. The depth in the fairway is 12.0 m.

MAX. SIZE: Max. draft 10.0 m.

TUGS: Available.

BERTHING:

Berth No.	*Length* (m.)	*Remarks*
1	240	Crude oil loaded through 16 in. hose at 750 t.p.h.
2	320	Iron ore handled with 2 grabs discharging to conveyor belt.
3	250	General cargo berths.
4	250	8 cranes × 8-15 tons capacity.
5	250	Special berths for loading bagged and bulk urea.
6	250	Shiploaders with capacity 600 t.p.h.
7	250	
8	180	General cargo.
9	180	Steel platform berths.
10	180	Cranes recently installed.

CARGO HANDLING FACILITIES: Railways connected to all berths. One floating cranes with 100 tons capacity.

No container facilities.

LPG: The terminal is located 8 miles South of Khor Zubair Port.

There are 2 jetties. Jetty No.1 will be ready by the end of April 1990, and for export by July 1990.

Jetty No.1:

Four mooring dolphins, two on each side.

Five pipelines connected to 5 loading arms.

(a) One gasoline.
(b) Two propane lines.
(c) Two butane lines.

Berth can accommodate vessels up to a maximum of 55,000 d.w.t.

Draft is expected to reach 14.0 m.

Density of water is 1009 (brackish water).

STEVEDORES: Loading and discharging in 3 shifts throughout 24 hours.

FRESH WATER: Available.

FUEL: Available.

SHIPMASTER'S REPORT: May 1990.

Location: The port lies in approximate position Lat. 30° 12.2′ N. Long. 47° 52.8′ E., on the Khor Abdullah, close to the boarder between Kuwait and Iraq, at a distance of about 60 miles from the pilot station.

Documents: Many documents are supplied by the pilot and others are supplied by the Harbour Master, Agent and/or Doctor respectively.

Usual requirements are as follows:

Arrival:	1	Arrival Certificate (Pilot).
	3	Arrival Certificates (Different to above) Agent.
	3	Pilotage Certificates (River Pilot).
	3	Harbour Master Certificates (Harbour Master).
	3	Tug use Certificates (each tug) (Harbour Master).
	1	Arrival Form (Customs).
	1	Health Declaration (Doctor).
	1	Ship's Stores List (Customs).
	1	Personal Effects Declaration.
	1	Vaccination List (Doctor).
	3	Crew Lists (Doctor, Customs, Agent).
	1	Livestock List (Customs).
	1	Passenger List (Customs).
	1	Arms and Ammunition List (Customs).
	1	List of Ports visited since last time in Iraq (Agent).
	1	Request for Garbage Removal (Agent).
Departure:	3	Sailing Reports (Agent).
	3	Tug use Certificates for each tug (Harbour Master).
	1	Departure Certificate (Harbour Master).
	3	Draft Certificates (Harbour Master).
	3	Harbour Master use Certificates (Harbour Master).
	4	Pilotage Certificates (River Pilot).

Pilotage: Pilot boarding ground is in position Lat. 29° 39.0′ N., Long. 48° 45.0′ E., about 3 miles S.W. of Al Bakr Terminal. The usual approach is to use the deepwater Khor al Khafka Channel until about 1.5 miles from Al Bakr Terminal, then proceed due West to the pilot station.

The pilots are usually stationed on cutter "Shoorook", but board vessels from a tug. They answer to "Iraqi Pilot", usually listening on VHF Channel 14.

Anchorage: Designated anchorage for vessel's awaiting river passage to Khor al Zubair or Umm Qasr is bounded by following co-ordinates, Latitudes 29° 35.9′ N. and 29° 39.9′ N. and Longitudes 48° 43.1′ E. and 48° 45.2′ E.

River Passage: The river is undergoing constant dredging by both Iraqi and foreign dredgers, not only to maintain the channel, but also as part of a major works programme to enlarge and improve the facilities at Umm Qasr, where extensive new dock works for general cargo vessels are nearing completion. Construction is also well advanced on 3 jetties for the export of liquid gas, between Umm Qasr and Khor al Zubair.

The river is mainly featureless, and the buoyage is undergo frequent change, both deliberate and accidental (buoys liable to sh Absolute reliance cannot be placed upon them, and it is necessar rely on the expertise of the pilot. Any vessel making night transit sho not hope to find that the charted characteristics will be correct, as buoy becomes defective, it is not always replaced by one with charted characteristics, if one is not available. The criteria appears be that a buoy of same colour light is used if available, and failing th green buoys may on occasion have white lights. Reds are usua replaced by red, but on occasions may be off-station until a suita replacement is available. Pilot assured us that this situation will gradua improve.

Health: In addition to the message mentioned in "Radio", on pass Umm Qasr, vessels must hoist 'Q' flag or relevant light signal until ves is cleared by quarantine doctor after berthing. This person require Crew List, a Vaccination List and Health Declaration as noted un 'Documents', and also requires to sight the ship's Derat Certificate.

Radio: This vessel communicated mainly by telex, to Oil Company a Agents, but it is necessary to request Free Pratique from Basrah Ra for passage as far as Umm Qasr, by advising where from, where bou number and state of health of crew, and requesting Free Pratique. This is usually, but not always received from Basrah Radio. Sometim pilot will board and advise that it has been received on the cutter.

Tugs: Usually at least 2 stationed at Zubair, about 3,200 b.h.p, othe of similar size also available from Umm Qasr if required (about 2 ho away). Generally 2 tugs used for berthing/unberthing, but if Harbo Master agreeable, vessels with bow thrusters can sometimes permitted to use only one tug.

Berthing: The berths used by tankers are the 3 most northerly in port, (No's. 9,10 & 11). All are alongside continuous quay. Berth N and Berth No.10 have small diameter rubber fenders slung in loops protect concrete face. Berth No. 11, has 'buffer' type fenders. Be No.11 is also used by barges unloading iron ore pellets by means large moving gantries with grabbling arrangements. At present th grades of product, and occasionally crude oil, are handled, all grad being available at all berths, but usually Berth No.10 is occupied b 35,000 ton Iraqi tanker on a semi-permanent basis, as a depot ship fuel oil. Vessels berth outside of her (she is equipped with 4 Yokoha Fenders) to load fuel oil. This is also loaded at Berth No.9. We w chartered to carry Naphtha, which is always loaded at Berth No.9 Berth No. 11. Gas oil is apparently usually loaded from Berth No.9, it is not certain from which berth crude is lifted. Local information is this is now infrequent. Naphtha is loaded from 2 × 4 in. lines, rate v slow, average 230 cu.m.p.h., which equates to about 160 tonnes hour. This vessel usually takes 6.25 days to load a full cargo. Fue and gas oil are faster, but no rates know at present.

Vessels are usually berthed port side to, as arrival is arranged authorities to be before L.W., in order to still be stemming the tide. occasions, there are unforeseen delays, in which case vessels swung before berthing starboard side to. Mooring for this vessel and far as has been seen, for other tankers, are 3 head/stern lines, 2 bre lines and 2 springs.

June 1990:

It has recently been noticed that the Oil Company also, on occasio uses a vessel on Berth No. 9 as a transshipment vessel for the load of gas oil. Bunkers are also supplied ex-barge, both to tankers and ca ships in the port. One of the gas jetties between Khor al Zubair Umm Qasr is nearly complete, and the second one is scheduled to finished before the end of the year. Local information was that inauguration is to take place in late July 1990.

Density: About 1019.

Fresh Water: Fresh water is available, but cannot be recommend except in cases of emergency. Rate very slow and supply intermitte It should be alright for boiler use, but any vessel which is forced to it, should take every possible precaution before using. It should be no that the local people took water from us in preference to using it.

Fuel: MFO bunkers of good quality are available ex-wharf at tan berths and ex-barge at other berths from IOTC, Basrah. Bunkers sho be arranged and paid for by Owners or Charterers in sufficient ti (minimum 3 days, not counting local weekend or hoildays). The load rate experienced by this vessel was about 30 cu.m.p.h., which exceptionally slow.

Consuls: At Baghdad.

Customs Allowances: 200 Cigarettes per man. If stay prolong Customs Officer will release further supplies on request.

Repatriation: Agent advises that this is possible via Baghdad. As th are British, Dutch and Belgian dredgers working in the river, and make crew changes, it would not seem that there are any g difficulties.

Time: Iraqi Standard Time is GMT plus 3 hours, but Summertime usu kept between April and September (check exact dates with Authori Summertime is GMT plus 4 hours.

Shore Leave: Nearest town is Basrah. Agent advises that there sho be no problem in going there.

General: This port, and Umm Qasr, about 16 miles downriver, become of increasing importance as the present developments completed and other planned developments take place. information is that a number of dedicated products jetties are constructed at Umm Qasr, and that a depth of 15.0 m. at low wat the planned depth at both these and LPG jetties in due course.

Provisions: Provisions of uncertain quantity and quality are availab

Republic of Ireland

BANTRY BAY: 51.41 N. 09.27 W. (See Plan)

DOCUMENTS:
1 Crew List.
1 Stores List.
1 Crew Declaration.
1 Maritime Health Declaration.
Ship's Register (tonnage).
British Light Dues (receipts).
Clearance from Last Port.

APPROACHES: The approaches to the Bay are marked by the Sheep Head Light, visible 18 miles, Roancarrig More Light, visible 12 miles, and Whiddy Island Light, visible 3 miles.

Buoy No. 9 is now the only buoy on station.

PILOTAGE: Pilotage compulsory for tankers. Not compulsory for other vessels. Pilot launch available for tankers through VHF at Oil Terminal Control. Pilot launch available for other vessels if requested through Valentia Radio to their local agents at Bantry. First time users of the port are advised to use a Pilot or at least not to attempt a night entrance without one. Pilots disembark when and where requested. Contact with Pilot launch is through VHF radio. Tankers using the Oil Terminal should send ETAs to their appointed agents and also to the Oil Terminal, Bantry. Cargo vessels using Bantry Inner Harbour/Pier should send ETAs to their local Agents.

Request for Pilots may be made to Murphy and O'Connor. Ltd. Tel: 027-50001. Telex: 75870. Fax: 027-50024.

ANCHORAGE: For smaller vessels, the East end of Whiddy Island (10 fathoms) and Bantry Harbour (25 ft. depth).

MAX. SIZE:
(a) Bantry Harbour – draft not more than 25 ft.
(b) Bantry Pier – 150 ft. length with draft 12 ft.
(c) Oil Terminal – Operations suspended pending repairs.

HEALTH: All vessels must exhibit quarantine signals until quarantine formalities completed or Free Pratique granted. By day, International Code Flag "Q"; by night, red light over white light.

No person other than Pilot is allowed to board any vessel either alongside jetty or at anchorage until pratique has been granted. Pilot to be informed when any suspected disease or fever on board.

RADIO: Messages and ETAs through Valentia Radio, Land's End or any UK station.

VHF: A 24-hour VHF service is maintained at Oil Terminal Control, operating on Channels 16, 14 and 11. This service is normally for use by tankers using the Oil jetty, but may also be used by ships using Bantry Inner Harbour and Pier.

Note: The Oil jetty is out of commission as the result of an explosion in January 1979.

BERTHING: Berthing at Bantry Pier depends on size of vessel and state of tide.

Ascon Jetty: Located on South side of Oil Terminal, this berth can accommodate small vessels up to 200 ft. in length and a max. draft of 17 ft.

A 6 in. manifold loading/discharge is situated midway along this jetty for small diesel tankers and mobile cranes can be provided for small vessels discharging cargo for the Terminal.

OIL TERMINAL: (The Terminal was damaged by a disaster in January 1979 – it is non-operational at the moment, the only navigational buoy still on station is, the West Ground, No. 9). The sea island is still standing and is 1,600 ft. in length and situated approx. 1,300 ft. offshore. The island jetty is comprised of a centre platform and mooring dolphins.

STEVEDORES: Available; 24 hour advance notice to Agent required.

Stevedores: Murphy and O'Connor Ltd., Bantry. Tel: 027-50001. Telex: 75870.

MEDICAL: Medical attention is available on arrival and in an emergency on a 24 hour basis. Vessels should give instructions regarding medical attention through Agents who will make the necessary arrangements for emergency medical attention either on board or at Bantry Pier.

DENSITY: 1025.

FRESH WATER: Available at Bantry Pier.

FUEL: Gas oil and fuel available at Bantry Pier in road tenders of 20 tons.

CONSULS: Spanish Consul (Murphy and O'Connor Ltd.). Tel: 027-50001.

REPAIRS: Local repair firms can undertake limited repairs, but nearest dockyard available for major repairs is at Cork.

SURVEYORS: Ship's surveyors available subject to 24 hours notice through Agent.

CUSTOMS ALLOWANCES: Tobacco: Depending on stay in port. Approximately 80 to 100 cigarettes per man for 2 to 3 days. Wine and/or Spirits: half litre per man.

REPATRIATION: There are facilities for crew repatriation.

AIRPORT: Situated 48 miles away at Cork. Frequent International flights.

TIME: GMT plus 1 hour during Summer months. GMT from October to March.

HOLIDAYS: Cargo work can be carried out on most holidays, except Christmas.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: Marine Co-Ordination Service Shannon Airport – Tel: 061-61969 and 61219.

TELEPHONES: No arrangements for placing telephones on board.

SERVICES: Vessels requiring any of the following services should advise Agent prior to arrival, giving fullest possible details.

Divers: Services of divers available to vessels for inspection and freeing fouled propellers.

Provisions: Normal supplies of most categories available. Ample time should be given to ship chandler.

Laundry: Large amounts sent to Cork (24 hrs. return service), but rather expensive.

Storing: Vessels can be stored by truck at Bantry Bay.

BANKS: Allied Irish Bank. Tel: 027-50008.
Bank of Ireland. Tel: 027-50377.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required.

GENERAL: All vessels required to fly Irish Ensign on foremast during daylight hours. Irish territorial waters extend 12 miles seaward from mainland.

DEVELOPMENTS: Two SBM's may be installed to facilitate the re-opening of the oil terminal.

AUTHORITY: Bantry Bay Harbour Commissioners, c/o Cork County Council, Wolfe Tone Square, Bantry, Co. Cork. *Tel:* 027-50058. *Contact:* Hon. Secretary.

CASTLETOWNBERE: 51.41 N. 09.54 W. (See Plan)

LOCATION: See Admiralty Chart No. 1840 (plan insert) "Bantry Bay Blackballhead/Shot Head".

Castletownbere is a Fishery Harbour Centre. Owned and controlled by the Department of Marine (Fisheries Division – Harbours).

DOCUMENTS: Health Certificate, Crew List, List of Bonded Stores, Vessel's Register, Logbook, Crew Passports.

Also valid Load Line Certificate. Safety Equipment Certificate, Radio Safety Certificate, Safety Construction Certificate, Cargo Gear Book.

PILOTAGE: Not compulsory. If Pilot required, contact Harbour Master for local Pilot.

ANCHORAGES: Bearhaven Sound. (See Admiralty Chart No. 1840), a large well sheltered anchorage adjacent to port.

MAX. SIZE: Always afloat. Dinish Island Wharf. 17 ft. MLWS. Length 305 ft.

Mainland Wharf East. 12 ft. MLWS. Length 426 ft.
Mainland Wharf West. 12 ft. MLWS. Length 557 ft.
All berths are accessible for wagons/containers, etc.

HEALTH: Customs grant pratique if vessel is clear, if not Doctor will be notified.

VHF: Harbour Master's Office on Channel 16.

TUGS: None.

BERTHING: In accordance with Harbour Master's instructions. Berthing day or night.

STEVEDORES: None. Local labour available if required.

MEDICAL: No advance notice necessary. Hospital facilities available.

FRESH WATER: Available at all berths.

FUEL: Available at all berths, no notice required (diesel only) and all berths accessible to tanker wagons. Also available at Dinish Island Wharf where there are 3 lines at the West end of the wharf.

REPAIRS: Syncrolift for vessels with max. weight 300 tons and 100 ft. LOA. Carriages and bays for 3 vessels.

Local machine shops/engineers for repair work available. Electronics engineer available.

GANGWAY/DECK WATCHMAN: Not required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: As per current regulations.

AIRPORT: Cork Airport 80 miles, served by regular airlines.

TIME: GMT plus 1 hour, reverting to GMT from October to March.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Tel: Police 70002. Ambulance 70004. Fire station 70049.

TELEPHONES: Not available for placing onboard.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

BANKS: Allied Irish Bank Ltd., Castletownbere. Tel: 027-70025.

GENERAL: Castletownbere is designated as a fishery harbour centre, for the import/export of fish, fish products and processed fish, from local plants. Also for landing of fish from local fishing fleets. The mainland wharf has an ice making plant, for supply of ice to fishing vessels and an auction hall.

Stores/Provisions: Available locally.

Bonded Stores: Available from Cork.

Customs and Excise: Office in harbour office building. Tel: 027-70102.

AUTHORITY: Department of The Marine, Harbour Office, Castletownbere, Co. Cork. *Tel:* 027-70220. *FAX:* 027-70329. *Contact:* Captain W. H. Jones, Harbour Master. Tel: (after hours) 027-70128.

CORK (including Cobh, Whitegate): 51.50 N. 08.17 W. (See Plan)

PORT LIMITS: Line joining Cork Head and Power Head.

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Health Declaration.
3 Customs Manifests.

For Shore Formalities
Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Light Dues Certificates.
Derat Certificate.

PILOTAGE. Minimum 24 hours notice of ETA and draft to Agent. Accurate ETA's are vital as Pilots only go afloat on this basis. When within VHF range, contact should be established through "Cork Harbour Radio" (see "Radio"). This station combines Port Operations and Information service and co-ordinates the piltotage service. The pilot launches are also fitted with VHF Channels 6, 12 and 16.

For large deep-drafted vessels, Pilot usually boards up to 2 or 3 miles South of Roches Point. Compulsory river pilotage area extends upstream from Spit Bank Light.

ANCHORAGES: Safe deep-water anchorages as arranged with Pilots.

RESTRICTIONS: Navigation by night and day. Ships of 5.0 m. draft can make passage of river to Cork at any stage of tide.

Bridges: Near Albert Quay and Andersons Quay.

MAX. SIZE: *Cork:* Max. length 152 m. Draft fresh water on Spring tides 8.7 m. on Neap tides 7.8 m.

Whitegate: Tankers up to 275 m. length. 11.6 m. draft. Max. draft 12 m. at highest tides.

Ringaskiddy: Max. size 60,000 d.w.t. Max. draft 13.0 m.

HEALTH: Health Declaration form is presented to Customs Officer or Port Health Inspector and Pratique issued without delay. In cases of disease on board notify Agents who inform Health Authorities.

RADIO: Coast Station – Valentia Radio. W/T and R/T. R/T link call facilities available. Telex fitted. In U.K., Coast Stations also relay messages direct to Agents.

VHF: Harbour Radio: VHF Channels 12, 14 and 16, 24 hour watch maintained. Call sign "Cork Harbour Radio". A Port Operations and Information Service is provided and it is through this organisation that the requirements of the Harbour Master will be made known.

Vessels underway are required to maintain a VHF watch on Channel 12 or 14 as instructed.

RADAR: No Port Control Radar. Pilot boats equipped with radar.

BERTHING: The quays at Cork afford good accommodation for vessels up to 152 m. LOA, on fresh water drafts of 7.8 m. on Mean Neap tides and 8.7 m. on Mean Spring tides with 8.8 m. alongside quay. The Deep Water Quay at Cobh is 189 m. long and vessels of 6.0 m. draft can berth with safety. The deep water berth at Ringaskiddy can accommodate vessels up to 60,000 d.w.t. with max. draft 13.0 m.

SPECIAL CARGO FACILITIES:

Grain: 1 mobile suction discharge plant at South Jetties, discharge rate up to 120 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tide. Storage capacity 80,000 tons.

1 suction unit×150 tonnes per hour. Silo capacity 7,000 tons at South Deepwater Quay.

Deepwater berth equipped with 2 high output grab cranes and dust controlled hoppers.

Containers: 1×30 ton travelling transporter container crane backed up by 3×30 tonne straddle carriers. Length of berth 122 m. Depth at chart datum 6.9 m.

Roll-on/Roll-off Berth "Tivoli": Max. height of link span 9.0 m. above chart datum. Min. height of link span 3.3 m. above chart datum. Max. loading 65 tons. Distance from side of berth to centre line of link span 11.4 m. Max. ship size 137 m. LOA. Berth dredged to 5.0 m. above chart datum.

Roll-on/Roll-off Berth Ringaskiddy: Length of linkspan 42.1 m., width of linkspan 7.2 m. spadehead at outer end 14 m.×14 m. Max. LOA permissible 158.5 m. Berth dredged to 9.2 m. above chart datum.

Livestock loading Ramp and Lairage: Max. ship size 106.7 m. LOA. Berth dredged to 5.1 m. above chart datum.

Pfizer Jetty: Length between dolphins 259.2 m. Max. draft 9.6 m. on all tides.

Molasses discharge rate, 1,000 t.p.h.
Fuel Oil discharge rate, 600 t.p.h.
Sulphuric Acid discharge rate, 200 t.p.h.

Bananas: Automatic banana discharge equipment at Ringaskiddy Deepwater berth.

TUGS: Deep draft vessels take tug assistance from Horse Head to Co and vice versa. Tug's lines are used. Tankers use two to three tugs berthing at Whitegate Terminal.

STEVEDORES: Labour hiring times. Week-days 0800, 1000 a 1130 hrs. Gangs for week-end working must be hired at 1700 hrs. Fridays. ETA advice could include number of gangs workable.

MEDICAL: All medical and hospital services available at short notic

TANKERS: Irish Refining Co. Terminal at Whitegate is situated on Ea side of Lower Harbour. Two deep water berths for tankers. Max. siz 55,000 d.w.t. or 90,000 d.w.t. partly laden. Slop reception facilit available.

Length between dolphins, 366 m.
Crude discharge rate up to 4,000 t.p.h.
HFO loading rate up to 1,700 t.p.h.
Gas Oil loading rate up to 700 t.p.h.
Petrol loading rate up to 600 t.p.h.
LPG loading rate up to 20 t.p.h.

Diameter of Hoses:
Berth No. 1: Crude and Black Oils 10 in. ASA.
Clean Products 8 in. ASA.
Berth No. 2: All Products 6 in. ASA.

I.F.I. (Irish Fertiliser Industries): At Marino Point. Overall length dolph to dolphin 375 m. Dredged to 10.0 m. above chart datum accommodate Ammonia tankers of up to 15,000 d.w.t. and bulk general cargo vessels of up to 25,000 d.w.t. (Partly loaded). Vessels up to 186 m. LOA and 9.5 m. draft will be acceptable.

DENSITY: Average density of water in river 1008.

FRESH WATER: Available at all quays ex-hydrants – delivery ra 25 t.p.h.

FUEL: Major grades of bunker fuel and diesel as well as mar lubricants can be obtained through suppliers. Delivery by road or riv tanker.

WATCHMEN: Recommended but not compulsory.

OPENING/CLOSING HATCHES: Crew must perform this work dockers decline to do it.

CUSTOMS ALLOWANCES: 200 cigarettes per man, and 1 bottle spir per man.

CARGO GEAR: No special local requirements. Regulations similar British Board of Trade safe working requirements. 1×30 ton contain crane is provided by Cork Harbour Commissioners. A number of mob cranes up to 100 tonnes capacity are available from local plant hire fir and stevedoring firms.

CONSULS: *Norway:* B. J. Foley, c/o Marine Transport Services, Atlan Quay, Cobh. Tel: 811485. *Belgium:* G. Jones, c/o Celtic Coasters, St. Patricks Quay, Cork. Tel. 504018. *Italy:* P. REPAIRS: All types of deck and engine repair facilities available.

DRY DOCK: Verolme Cork Dockyard main dry dock can take vesse up to 158.5 m. in length. Floating docks of 2,000 and 10,800 tonne lifting capacity, also 4×40 tonne cranes. Able to carry out repairs ships afloat of any tonnage using the port.

SURVEYORS: None.

REPATRIATION: Can be carried out without difficulty.

AIRPORT: 5 miles from city. High frequency scheduled flights to Iris British and continental airports.

TIME: GMT from 0200 hrs. on Sunday following 3rd Saturday in Octob to 0200 hrs. on Sunday following 3rd Saturday in March (unless lat is Easter Saturday, in which case to 0200 hrs. on Sunday following 2 Saturday in March).

One hour ahead of GMT (i.e. Standard European time) for remaind of year.

HOLIDAYS: New Years Day, St. Patrick's Day (March 17th); Go Friday; Easter Monday; First Monday in June; First Monday in Augu Last Monday in October; Christmas Day (December 25th); St. Stephe Day (December 26th).

POLICE/AMBULANCE/FIRE: 999 is emergency number for all servic Actual: Police 273161; Fire 966333; Ambulance 966333.

EMERGENCY CO-ORDINATION CENTRE: Port Operations a Information Station will provide this service and will raise the alarm the event of a major marine emergency. Tel: (021) 811380, V Channels 12 and 16. Outside the port area, emergency services will co-ordinated by Shannon Marine Rescue Co-ordination Centre, T (061) 61219, 61969, 61509 or 61233 Ext. 251 or 252 or through C Air Traffic Control during opening hours (021) 965326.

BANKS:

Allied Irish Banks Ltd., 66 South Mall, Cork. Tel: 276811.
Bank of Ireland Ltd., 32 South Mall, Cork. Tel: 276712.
Northern Bank Ltd. 89 South Mall, Cork. Tel: 508422.
Ulster Bank Ltd. 54 South Mall, Cork. Tel: 274381.

STORING: See "Prelims".

1. Vessels can be stored by truck.
2. No restrictions on storing. Barge storing not applicable.
3. Trucks may proceed alongside for storing.
4. Fork lifts may be used for storing.
5. Bonded stores authorised by Collector of Customs, Governm Buildings, Sullivans Quay, Cork.
6. Local riggers may be employed to assist with storing.

SERVICES: All tanker services available at Whitegate. Otherw various general services required by ships available at Cork.

SHORE LEAVE: No restrictions on shore leave.

IDENTIFICATION CARDS: Not required.

DELAYS: Except waiting for tide there are very few occasions on which entry to or departure from the port is subject to delay.

DEVELOPMENTS: The deepwater berth at Ringaskiddy became operational in August 1986, thus concluding the first phase of the creation of the largest deepwater industrial complex in Ireland.

Ringaskiddy has a fully serviced 1,000 acre area owned by the Industrial Development Authority. Cork Harbour Commissioners have reclaimed a further 155 acres for use as operational and storage areas.

Ringaskiddy is serviced by the Cork City and Harbour Water Supply Scheme which provides 30 million gallons of water per day. The Irish Government has enacted legislation to set up a freeport at Ringaskiddy which will enhance the attractiveness of Cork Harbour.

Work will commence in Autumn 1990 on construction of an extension to the Ringaskiddy Deepwater Berth, which will be completed towards the end of 1991.

The Kinsale Gas Field 30 miles due South of Cork Harbour serves industry in the harbour area and is linked to the national natural gas grid. The gas is used by I.F.I. at Marino Point in their ammonia/urea plant.

Cork Harbour Commissioners have decided to invest £3 million at the Tivoli Container Terminal. The development programme will extend and upgrade the container terminal and provide new container handling equipment.

AUTHORITY: Cork Harbour Commissioners, P.O.Box 53, Custom House Street, Cork, Ireland. *Tel:* (021) 273125-9. *Telex:* 75848. *FAX:* (021) 276484. *Contact:* P. Keenan, General Manager. B. O'Sullivan, Harbour Engineer. Captain P. Farnan, Harbour Master. S. J. Geary, Marketing Manager. A. C. Feehely, Secretary. F. A. Cunnane, Finance Controller and Collector of Rates.

DUBLIN: 53.21 N. 06.16 W. (See Plan)

PORT LIMITS: Port of Dublin includes all water between Rory O'More Bridge (over River Liffey) and imaginary line drawn from Martello Tower at Sutton on North side of Dublin Bay to Sorrento Point at Dalkey on South side, but excluding Dun Laoghaire Harbour.

DOCUMENTS:

Forms C. 1 or C. 2 Customs report form (actually a copy of Manifest).

Form CU. 35 Victualling Bill (note covering Bonded Stores to be loaded Dublin).

Form CU. 7 Entry Outwards in ballast (for vessels sailing light).

Form CU. 10 Entry Outwards with cargo.

Form CU. 25 Entry Outwards (details of previous and forthcoming voyages).

Health Form.

"Jerque" Note (list of bonded stores on board on arrival).

Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).

PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:

(1) Ships trading coastwise of not more than 200 tons gross tonnage.

(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

All vessels carrying passengers, tankers carrying petroleum, gas or chemicals, and vessels carrying explosives as cargo are required to take a pilot.

Incoming Vessels: Pilotage service is based on a Pilot shore station situated on Eastern Breakwater and operated by direct boarding cutters, each about 15.0 m. long. Harbour Office, Pilot Shore Station and Pilot Cutters are equipped with VHF Channels 16, 12 and 6.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Channel 12; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office Tel: 748771 or Telex: 32508 during office hours (0900 – 1700 hrs.); and Tel: 748779 outside office hours. Following details should be given: name and situation of vessel, destination, draft, time of departure. It must be stressed that such orders must be made in sufficient time making due allowance, particularly at night, for accessibility of vessel. A minimum of 1 hour's notice is necessary for inward or outward Pilot.

ANCHORAGES: Scotch Bay – S.E. Dublin Bay and just East of Dun Laoghaire 10 m. LAT – 12 m. LAT.

RESTRICTIONS: Draft restrictions: 10.0 m. HW Neap Tides; 10.2 m. HW Normal Tides; 10.5 m. HW Spring Tides. Vessels drawing 6.5 m. or less can enter at any state of tide.

Maximum speed in river in vicinity of berths is 4 knots.

ENTRANCE: Approach well lighted and easy of access. Inner Channel of Harbour, formed by almost straight channel of River Liffey from entrance at Poolbeg Lighthouse to Alexandra Basin, is 215 m. wide for greater part of length and maintained at depth of 7.8 m. LW. From Alexandra Basin entrance, River is quayed for a distance of nearly 3.0 km. to Matt Talbot Memorial Bridge in centre of City.

MAX. SIZE: State of tide governing max. draft, no breadth restriction, overall length restriction of approx. 200 m.

HEALTH: Pratique automatic for movements Ireland/U.K. area. Maritime Declaration of Health indicates requirements. This declaration must be submitted on arrival by Master of ship coming from foreign port. This requirement does not now normally apply to vessels trading *solely* between Ireland and ports in Germany, Belgium and Netherlands, Atlantic and Mediterranean coast of France, Italy and Greece. Other requirements mentioned on Maritime Declaration of Health form still apply to such ships.

"Foreign Port" is port situated elsewhere than Ireland and UK.

Master of foreign-going ship may be asked to produce valid Derat Certificate or Derat Exemption Certificate in respect of vessel. Travellers (passengers and crew) may be requested to produce valid certificates of vaccination. Ships may be subjected to sanitary inspection by inspectors of Port Health Service.

Swill must not be landed from vessels which trade outside Ireland.

Granting of Pratique by radio not practised at Dublin, But is under consideration at present.

RADIO: Valentia Radio, Ireland. Portishead Radio, U.K. Anglesea Radio, U.K.

TUGS: Normally meet vessels at North Bank Lighthouse (roughly half-way mark of main channel) 1 mile West of Poolbeg Lighthouse.

BERTHING: The following berthage is available to shipping using the port.

North Side of the River, from Talbot Memorial Bridge to North Wall Light, available as berthage, 2,244 m., depth 4.6 m. – 6.5 m. LAT. Cranes: 1×6 tonnes and 4×4 tonnes.

Alexandra Basin, South and East sides: Length of berthage 520 m., depth 7.1 m. – 7.7 m. LAT. Cranes: 1×6 tonnes, 4×4 tonnes.

Alexandra Quay West (North side of Alexandra Basin): Length of berthage 375 m. depth 9.8 m. – 10.3 m. LAT. Cranes 1×6 tonnes, 6×4 tonnes.

Alexandra Quay East: Length of berthage 360 m., depth 10.3 m. LAT. Cranes: 5×4 tonnes.

Ocean Pier West (East end of Alexandra Basin): Length of berthage 418 m., depth 9.7 m. LAT. Cranes: 1×10 tonnes, 7×4 tonnes, 1×35 tonne derrick.

Ocean Pier South: Length of berthage 142 m. depth 9.5 m. LAT.

Ocean Pier East: Length of berthage 244 m., depth 10.3 m. LAT. Cranes: 4×4 tonnes.

South side of the River, from Talbot Memorial Bridge to Ringsend Gut, available as berthage 1,598 m., depth 4.6 m. – 6.5 m. LAT. Cranes: 5×4 tonnes.

South Bank Quay: Length of berthage 205 m., depth 8.5 m. LAT.

Container Handling Berths:

B+I Terminal: Length of berth 229 m., depth 5.9 m. LAT (incorporates No. 4 Ro/Ro). 1×30 tonne transporter crane.

Sealink Terminal: Length of berth 145 m. depth 5.9 m. LAT. 2×30 tonne transporter cranes and 2×30 tonne Goliath cranes.

Southside Terminal: Length of berth 567 m., depth 7.7 m. LAT (incorporates No. 3 Ro/Ro). 2×30 tonne transporter cranes, 1×32 tonne derrick crane and 1×10 tonne portal crane.

Ocean Pier West: Length of berth 183 m., depth 9.5 m. LAT. 1×35 tonne derrick crane.

Roll-On/Roll-Off Facilities:

North Side: No. 1 Ramp – Length of berth 140 m., depth 5.9 m LAT.
No. 2 Ramp – Length of berth 242 m., depth 10.3 m. LAT.
No. 4 Ramp – Length of berth 200 m., depth 5.9 m. LAT.
No. 5 Ramp – Length of berth 215 m., depth 11.0 m. LAT.
South Side: No. 3 Ramp – Length of berth up to 520 m., depth 7.7 m. LAT.

BULK HANDLING FACILITIES:

Dry Bulk Jetty in Alexandra Basin: Length of jetty 247 m. depth 9.45 m. (North side) and 10.5 m. (South side). This jetty is equipped with a bulk ore conveyor and ship loading system for export of ore concentrates. 2×10 tonne grabbing cranes. It is also equipped with pipe-lines for liquid sulphur, ammonia and molasses. The jetty is also used for coal imports with a separate conveyor system linking the jetty with a back area coal storage site.

Coal/Dry Bulk Quay, South Side: Length of quay 358 m., depth 11.0 m. LAT. This quay, with storage areas, hoppers, conveyor belts, 2×4 tonne and 2×10 tonne grabbing cranes is one of the most sophisticated bulk handling berths in Western Europe.

STEVEDORES: ETA required by Stevedores before 1500 hrs. Monday to Thursday for work the following day, and by 1500 hrs. Friday for work Saturday, Sunday or Monday.

Average discharge rates: *Grain:* 3,000 tons per day. *Timber:* 120 standards packaged per gang/day. *General:* Bagged cargo and fast general, including paper, 250 tons per gang/day. *Other Generals:* 90 tons per gang/day.

Stevedores for deep-sea section: Dublin Cargo Handling Ltd., East Wall Road, Dublin 1. Tel: 745023. Telex: 30903.

TANKERS: No slop residue discharge facilities.

Tanker Berths	*Max. Draft*	*Length*
No. 1, West Oil Jetty, West Side	10.4 m.*	226 m.
No. 2, West Oil Jetty, East Side	10.7 m.*	235 m.
No. 3, East Oil Jetty, West Side	10.1 m.*	207 m.
No. 5, East Oil Jetty, East Side	6.5 m.	110 m.
South Bank Quay (E.S.B.)	8.5 m.*	213 m.
South Bank Quay (Poolbeg)	11.3 m.*	198 m.

*Time suitable for navigation in approaches – 1 hour before High Water for deepest draft.

Common User Oil Pipe-line System: This system provides 21 pipe-lines to Eastern Oil Jetty and 15 pipe-lines to Western Oil Jetty. Cargoes of tankers berthed at these jetties can be discharged to storage installations of any of the oil companies.

E.S.B. (Electricity Supply Board): At Poolbeg Jetty (formerly known as "Pigeon House 'B' Jetty"). Max. size 35,000 d.w.t. with the aid of tugs. Present depth sufficient for vessels of this size.

DENSITY: 1025 at all stages of tide.

FRESH WATER: Available at all berths by 2.5 in. hose line – 8/10,000 g.p.h. per hydrant.

FUEL:

Grades of Fuel Oil	*Viscosities*
Heavy Fuel Oil	3,500 sec. max.
Inter. Fuel Oil	1,500 sec. max.
Medium Fuel Oil	950 sec. max.
Light Fuel Oil	200 sec max.

Advance Notice required. Bunkering by pipe-line depends on availability of Oil Berth. Bunkering by Oil Barge normally a.m. notice on day required. Bunkering by Road Tanker – 24 hours notice.

FIRE PRECAUTIONS: Port By-Laws; Harbour Master's orders/Letters to Masters. Ref.: International Maritime Dangerous Goods Code.

Packed Petroleum: IMO Recommendations on the safe transport, handling and storage of dangerous substances in port areas.

Fibrous Cargoes: See Directives No. 2 and 3 to Masters. Jute, hemp and sisal must be removed ex-ship from port area.

Cotton, cocoa fibre, kapok, etc., must be removed ex-ship to Hazardous Goods Shed.

General: Harbour Police-Watch obligatory during handling of all hazardous or inflamable cargoes, and on tankers during vessels' stay in port. No smoking permitted in Oil Zone, sheds, etc.

GANGWAY/DECK WATCHMEN: If no watchmen from crew, then shore watchman is recommended.

OPENING/CLOSING HATCHES: Patent hatches by crew; other hatches with some assistance from dockers.

CERTIFICATES:

Certificate of Registry.
Radio Safety Certificate.
Load Line Certificate.
Current Trinity House light bills.
Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco per 8 days: 200 cigarettes – Master; 150 cigarettes – Officers; 100 cigarettes – Crew. Wine and/or Spirits: quarter pint per day per man.

GALWAY: 53.16 N. 09.03 W. (See Plan)

DOCUMENTS:

[1] Crew List (official form).
[1] Passenger List (official form).
[1] List of Articles (dutiable) in Possession of Crew (official form).
[1] Stores List (to include bonded surplus stores for seal, firearms, ammunition, animals, radio transmitting and receiving sets) (unofficial form).
Maritime Declaration of Health (official form).
Documents, etc., required by Agent for Customs Purposes:
Ship's Register.
Load Line and Safety Certificates, etc.
Receipt for previous payments of light dues if any.

PILOTAGE: Compulsory. Pilots board incoming vessels only at "tide times" (approx. 2.5 hours before HW until HW); vessels arriving at times outside this period should anchor and await Pilot. Safe anchorages at Inner Roadstead or near Margaretta Buoy according to tonnage and draft, Pilot will board at either. Application for Pilot should be to Agent with notice of ETA. International light and sound signals may be used. Pilots. Tel: Galway (091) 61874/623-29.
ANCHORAGES: During S.W. gales safest anchorage is at Black Head.
RESTRICTIONS: Entry from 2 hours before HW until HW only.
MAX. SIZE: Governed by depth on sill of 28 ft. at springs and 24 ft. at neaps: width of dock gates, 65 ft. and length of turning area 480 ft.
HEALTH: Master of ship arriving from foreign port must deliver Maritime Declaration of Health in order to obtain Pratique. An oral declaration will suffice for ships trading solely between Republic of Ireland and Belgium, Holland and European France. Pratique will be granted or withheld depending on answers given to questions put in Health Declaration.

In event of a suspected disease or fever on board, vessel is detained pending arrival of Medical Officers of Health. No unauthorised person is allowed to leave ship without authority of Chief Medical Officer.

Pratique is automatic when vessel arrives from ports in Great Britain, Isle of Man, Northern Ireland and Channel Islands or another port within Eire.

RADIO: ETA cables to Agents, etc., through Valentia Radio if approaching from South or Malin Head if from North. Valentia has telephone link service.
VHF: Port Office watch Channel 16 from 0900 hrs. – 1700 hrs., Monday to Friday and from 2 hours before high water until high water at each tide.
TUGS: No tugs available. Nearest tugs are on River Shannon which is 10 hours steaming.
BERTHING:

Berth	Length (m.)
Mulvoy Quay	209
Breatnach Quay	176
Dun Aengus Dock – North	164
Dun Aengus Dock – South	161
New Pier	134

CARGO HANDLING FACILITIES: Grain, coal, bulk fertilisers, etc. are all handled by grabs, discharge rates 1,500 t.p.d. per crane.

4×25 tonne cranes for grab discharge.

STEVEDORES: Agents arrange after receipt of ETA.
MEDICAL: No special port medical requirements. Ships medical requirements should be included in ETA signal.
TANKERS: 2 berths. No special requirements.
DENSITY: 1012 (average).
FRESH WATER: Available by hose in unlimited quantities. Rate up to 50 t.p.h.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Open quays – watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Wine, Spirits and Tobacco: Members of a crew who remain out on a vessel during her stay in port are allowed to retain in their own possession, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days)	*Spirits in any form* (to cover 4 days)	*Wine* (to cover 4 days)
The Master 8 oz.	1 pint	1 gallon
Officers (i.e., Mates, Engineers, Wireless Operators, Ship's Surgeons, Pursers, Chief Stewards or Serangs) 6 oz.	1 pint	1 gallon
Other Crew members 4 oz.	1 pint

LOCATION: Electricity Supply Board power station and Jetty located on N.W. shore of Tarbert Island (with road access from the mainland) 52.35 N., 09.21 W. Berth 48 ft. draft LWOST, overall length including outer mooring dolphins 1,050 ft. with berthing face of 300 ft.
DOCUMENTS: See "Limerick".
PILOTAGE: Compulsory from Scattery Island to Tarbert for all vessels but for vessels over 3,000 n.r.t. it is compulsory from Kilcredaun (otherwise as Limerick). Harbour Master advises vessels over 13.0 m. draft to embark Pilot West of Kilclogher.
ANCHORAGES: Vessels normally wait 2.5 miles West of Scattery for daylight flood tide for berthing.
RESTRICTIONS: None for vessels up to 50,000 d.w.t. on suitable draft, berthing daylight flood tide, departure on flood tide in daylight or darkness (subject good weather). Vessels in excess of 50,000 d.w.t. may be required to keep a tug on standby throughout stay.
MAX. SIZE: The berth has 48 ft. alongside at low water.
HEALTH:
RADIO: "See Limerick"
VHF:
TUGS: Available. One tug usually used at this berth.
MEDICAL: No facilities. Nearest doctor at Glin, Co. Limerick (6 miles), See "Limerick".
TANKERS: 2 Marine Arms – 10 in. PCD 14.15/16 in. Outer diam. 16 in., inner diam. 11 in. Holes, 12 of 0.75 in. diam.
DENSITY: 1025, except in very exceptional conditions.
FRESH WATER: Available.
FUEL: None available. Jetty head approached from shore by footway (4.5 ft. wide × 650 ft. long), therefore no direct access to berth from shore for road transport.
REPAIRS: None locally. Nearest Limerick 40 miles distant or Foynes, 7 miles distant. Difficulty of access should be noted.
SURVEYORS: See "Limerick".
WATCHMEN: Watchmen from crew.
CUSTOMS ALLOWANCES: See "Limerick".
REPATRIATION: See "Limerick".
TIME: See "Limerick".
EMERGENCY CO-ORDINATION CENTRE: See "Limerick".
STORING: A narrow viaduct 650 ft. long makes storing impossible from trucks alongside. Small four wheeled hand trolleys are used.
SHORE LEAVE: No restrictions.
TELEPHONES: At jetty head.
AUTHORITY: Limerick Harbour Commissioners. (See "Limerick").

(d) *MONEY POINT GENERATING STATION:*

LOCATION: On North shore, 3 miles East of Scattery Island. 52° 36′ N. 9° 25′ W.
DOCUMENTS: See "Limerick".
PILOTAGE: Compulsory from Scattery. Vessels over 3,000 n.r.t. are required to take a Pilot from Kilcredaun.
ANCHORAGES: Vessels normally anchor 2.5 miles – 3.0 miles West of Scattery when conditions allow. Vessels over 13.0 m. draft may be required to remain West of Loop Head in very bad weather. For these large vessels Pilots will normally board inside Loop Head.
RESTRICTIONS: Contact Port Control. Vessels in excess of 13.0 m. draft normally cross Kilclogher/Ballybunnion Bar before high water and berth port side alongside on first of ebb.
MAX. SIZE: 180,000 d.w.t. Max. draft 17 m.
RADIO/VHF/HEALTH: See "Limerick".
TUGS: Available. Number and size as directed by Harbour Master.
BERTHING: Length of berth 380 m. Depth alongside 25 m.
CARGO GEAR: 2×40 tonne ship unloaders will give a coal discharge rate of 1,500 t.p.h. 1 H.F.O. Marine Arm.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Available from road tanker.
REPAIRS: Limited repair facilities.
CUSTOMS ALLOWANCES: See "Limerick".
REPATRIATION: See "Limerick".
TIME: See "Limerick".
EMERGENCY CO-ORDINATION: See "Limerick".
TELEPHONE: At jetty.
BANKS: See "Limerick".
STORING: No restrictions provided adequate notice is given to E.S.B. Money Point.
SURVEYORS: See "Limerick".
SHORE LEAVE: No restriction.
AUTHORITY: Limerick Harbour Commissioners (See "Limerick").

(e) *AUGHINISH ISLAND ALUMINA PLANT:*

LOCATION: On South side of estuary, 2 miles N.E. of Foynes Island. 52° 38′ N. 9° 03′ W.

"L" Shaped Jetty with outer and inner berths. Outer berth: 12 m. draft LWOST, length of jetty head 275 m., plus 68 m. to dolphin.

Inner berth: 11 m. draft LWOST. Berth 230 m. long. Inner berth worked only on flood tide.
DOCUMENTS: See "Limerick".
ANCHORAGES: Vessels normally anchor 2.5 – 3 miles West of Scattery.

Anchorage also at Cahircon opposite Foynes Island if awaiting tide.
PILOTAGE: Compulsory from Scattery. Vessels over 13.0 m. draft are advised to embark Pilot West of Kilclogher.
RESTRICTIONS: Contact Port Control. Jetty owner's place own handbook onboard on arrival.
MAX. SIZE: Outer berth 70,000 d.w.t. Inner berth 30,000 d.w.t.
RADIO/VHF/HEALTH: See "Limerick".
TUGS: Available. Number and size as directed by Harbour Master.
CARGO GEAR: *Outer Berth:* 1 Bauxite Unloader (Krupp) 18,000 tons per 24 hr. day. 1 Alumina Loader (Claudius Peters) 24,000 tons per 24hr. day.
Inner Berth: 1 HFO Marine Arm 12 in. connection to 18 in. shore line and 1 Caustic Marine Arm 10 in. to 12 in. shore line.
DENSITY: Average 1013 – varies with tidal and seasonal conditions.
FRESH WATER: Available.
FUEL: Not available in bulk.
REPAIRS: Limited repair facilities.
SURVEYORS: See "Limerick".
CUSTOMS ALLOWANCES: See "Limerick".
REPATRIATION: See "Limerick".
TIME: See "Limerick".
EMERGENCY CO-ORDINATION CENTRE: See "Limerick".
TELEPHONE: At jetty.
BANKS: See "Limerick".
STORING: No restrictions provided adequate notice is given by Chandler to Aughinish Alumina (Tel: 061-49488).
SHORE LEAVE: No restriction other than company security controls.
AUTHORITY: Limerick Harbour Commissioners (See "Limerick").

SLIGO: 54.16 N. 08.28 W.

DOCUMENTS:
Crew List.
Aliens List for other than Irish and British Ships.
Customs Clearance from previous port.
Health Declaration.
Manifest.
Surveys 109 Deck Cargo and 107 for Grain.

NOTES

Please also advise Shipping Guides Ltd.

Israel

GENERAL:

All vessels bound for the ports of Haifa, Ashdod and Ashkelon have to send a position report when they arrive at a distance of 50 miles from the Israeli coast. Such position reports shall be sent to "SVC IMOT" and shall contain the following information: (a) Date and time; (b) Ship's name; (c) Position; (d) Course; (e) Speed; (f) Destination.

ASHDOD (Inc. Ashkelon): 31.49 N. 34.39 E. (See Plan)

DOCUMENTS:
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.
Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 72 and 48 hours before arrival holds workable and gangs required also draft forward and aft on arrival.

PILOTAGE: ETA through Haifa Radio 4XO addressed to Agent at least 12 hours before arrival. Pilot station and boat equipped VHF Channel 14 and 16 contact station for instructions. Pilot boards about 0.5 miles off port entrance between W. to N.W. from breakwater head (green light).

In bad weather, when boarding impossible, vessel is guided into harbour by VHF or tugboat waiting at entrance, at Master's consent.

Pilot ladder as per Safety of Life at Sea. Vessel should head about 4 points off the wind. Recommended 2 life-lines running along ladder, 1 each side, ropes 2.5 in. – 3 in. circumference.

ANCHORAGE: All area open sea, no recommended safe anchorage, but vessel should avoid anchorage near fairway and too close to oil installation buoys.

Masters are advised to keep the decks well lit in view of the strong lights ashore which may cause the anchor lights to be seen with difficulty by approaching vessels.

Vessels moored to the breakwaters shall have their anchor lights burning.

RESTRICTIONS: Pilotage available 24 hours. Enter according arrival time or berths available. Vessels at anchorage awaiting berth keep watch Channels 14 and 16.

MAX. SIZE: Draft limitations at Bulk Pier: Summer, 12.50 m. Winter, 12.00 m. Draft limitations at other piers: 9.8 m. No limits length or breadth. Also see "Tankers".

HEALTH: Free pratique is requested via Haifa, address, "Quarantine Haifa".

RADIO: Haifa Radio 4XO, also see "Haifa".

TUGS: 1 of 1,500 h.p., 1 of 1,000 h.p. and 1 of 2,800 h.p. Each charge included in pilotage charge for normal berthing attendance. Tugs wait at port entrance and act on Pilot's instructions. Vessel's lines are requested.

BERTHING: Container terminal with 2 gantry cranes.

TANKERS: Terminal situated at Ashkelon where tankers load crude oil by under-water pipe-lines. Size of vessel is unlimited due to the depth of water. The loading rate is about 30,000 tons in 12 hours. All services such as supply of bunkers, provisions, water, crew changes, must be carried out at Ashdod roadstead where health and immigration officials board. Vessels not requiring any services at Ashdod may call directly at Ashkelon, only paying light dues and anchorage dues.

FRESH WATER: Fresh water supplied by hydrants at 220 t.p.h.

FUEL: Supplied by trucks, or supplied by special barges. 24 hours advance notice required.

CONSULS: All Consulates in Tel-Aviv approx. 40 km. Available by telephone.

REPAIRS: No dock, but minor repairs effected.

GANGWAY/DECK WATCHMEN: Private companies supply gangway watchmen, obtainable through Agent.

OPENING/CLOSING HATCHES: Performed by stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits per person.

TIME: Local standard time is 2 hours ahead of GMT. GMT plus 3 hours from Saturday 24th March until Saturday 25th August in 1990.

AIRPORT: Lod Airport, served by regular airlines, distance 35 km.

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; The 2 days of the Jewish New Year (Rosh Hashana); The Day of Atonement (Yom Kippur); The first and the last day of the Feast of Tabernacles (Sucot); The first and the last day of Passover (Pesah); Pentecost (Shavuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire Services, telephone 22222.

IDENTITY CARDS: Issued by port police on arrival.

REGULATIONS:
Stand-by for Moving Vessels: The Master or person for the time be having charge of a vessel shall ensure that adequate officers and cr are available and that the main propelling machinery of the vesse maintained for moving the vessel at 1 hour's notice.

No vessel may drop steam, dismantle engine or otherwise interfe with the propelling power of the vessel, nor may the vessel be unattended by responsible officers and crew unless permission to do is first obtained in writing from the Harbour Master.

Photography: Photography in the Port Area is strictly forbidden witho a written permit issued by the Security Officer of the Port.

Swimming: Swimming in Ashdod Harbour is strictly forbidden a Masters should instruct their crews accordingly.

Use of Ship's Boats: The use of ship's boats is forbidden in Ashdo Port. Launch service is available for the convenience of ship's personn

Shore Leave: Shore leave passes are obtainable at the Frontier Cont Section of the Port Police Station. Applications for the passes shall filed with the Boarding Officer, Port Police.

All breakwaters are out of bounds to crews of merchant vessels.

SHIPMASTER'S REPORT: 1978.
Pilotage: Compulsory. Pilot boards off the breakwater. Pilot requi 1 hours notice of vessels arrival.
Anchorage: Outside breakwater.
Restrictions: Vessels able to berth and unberth at any stage of the ti day or night.
Health: Radio pratique possible. Quarantine officials require 12 hou and 24 hours notice of vessel's arrival.
Radio: Haifa Radio.
VHF: Channels 16, 12 and 14. Pilot and Port Authority use Channel 1
Tugs: Tugs available and are used depending on berth.
Berthing: Vessel berthed at Berth No. 4/190. Exact location is No North pier. Conditions at the berth poor due to swell and undercurre Nature of the bottom sand/mud. Bulk handling facilities for handli phosphate available in the port. There are 30 quay cranes availab Ro/Ro facilities available. There is ample mechanical equipment handling of palletised cargoes. There is also adequate storage spa for breakbulk and palletised cargoes. There are 3 gantry cranes availab for handling containers, also ample storage space for containe Accommodation ladder required.
Density: 1025.
Identification Cards: Crew members to have passport photograph landing pass (this is best carried out at previous port).
Services Available: Fresh water, fresh provisions, repair faciliti machine shop, Lloyd's Surveyor, Salvage Surveyor, laundry service bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, grocer and meats.

SHIPMASTER'S REPORT: 1979.
Documents:
1 Police Condition Slip
1 Customs Condition Slip
3 Crew Lists
1 List Ship's Stores and Bond
Pilotage: Compulsory. Pilot boards 0.5 miles from breakwater.
Restrictions: Vessels may berth and unberth at any stage of the ti day or night.
Health: 24 hours before arrival request radio pratique from "Quarant Haifa".
Radio: Haifa 4X0.
VHF: Pilot and Port Authority on Channels 16 and 14.
Tugs: 3 tugs available 1×3,000 h.p., 1×1,500 h.p., 1×1,000 h.p. Th use of tugs depends on which berth used and also which direction vessel will be heading.
Berthing: North Quay: Berths 101, 102, 103: berths located just insi the breakwater, max. draft permitted 10 m., density alongside 102 Accommodation ladder required.
Bulk Handling Facilities: Phosphate loading facilities available.
Cranes: 9×30 tons at 15 m. (15 tons at 25 m.).
9× 8 tons at 15 m. (4 tons at 25 m.).
Ample mobile cranes available.
Special Cargo Handling Facilities: Ro/Ro facilities available. 3 contai gantries available. Ample storage space for breakbulk cargo palletised cargoes and containers.
Stevedores: Labour normally refuses to rig derricks or handle hatch
Working Hours:
Sunday to Thursday (inclusive):
First Shift 0630 and 1400 hrs.
Second Shift 1500 and 2145 hrs.
Friday:
First Shift 0630 to 1300 hrs.
Second Shift 1300 to 1530 hrs.
Saturday — No work.
Services Available: Fresh water, fresh provisions, repair facili machine shop, Lloyd's Surveyor (from Haifa), Salvage Surveyor (fr Haifa), laundry services, bunker fuel oil, diesel oil, lubricating oil, doc and hospital, groceries and meats. Nearest airport is at Tel-Aviv.

AUTHORITY: Israel Ports Authority, Port of Ashdod, P.O.Box 90 Ashdod, 77191 Israel. *Tel:* 5528280, 5521106. *Telex:* 371 *FAX:* 5524956. *Cables:* Ashnam – Ashdod. *Contact:* Harbour Mas

AGENT: Carmel Shipping Ltd., Port Area, Block 9, P.O.Box 40 Ashdod, Israel. Tel: 08-524811, 08-521334, 08-531022. Telex: 381 Cisas IL. Fax: 08-522719. Cables: "Carmelship Haifa".

EILAT (Elath): 29.32 N. 34.57 E. (See Plan)

DOCUMENTS:
For Customs:
Customs Questionnaire, Crew Customs Declaration, Stores List, Crew List, Passengers List, Foreign Currency List, Narcotics List, Arms List, Import Cargo Manifest, Transit Cargo Manifest.
For Quarantine:
International Quarantine message may be sent, addressed "Quarantine Haifa" via Haifa Radio (4XO), to obtain Free Pratique. Maritime Declaration of Health.
For Border Control (Immigration):
1 Police Questionnaire, 2 Crew Lists, 2 Passenger Lists, Seamen's Books and travelling documents of passengers.

PILOTAGE: Compulsory, ordered through Agent. When unable to contact Agent, Pilot can be ordered by contacting Harbour Master by Haifa Radio, or by VHF Channel 14. Vessel due to berth awaits opposite oil installations located approximately 2.5 cables South of the main jetty. Vessels requesting Pilot for anchoring stop opposite the North end of the main jetty. Tankers waiting Pilot for oil installations to stop 0.5 miles South of oil installations. Pilot motor launch, red hull, buff superstructure amidships stationed at North end of main jetty. Pilot ladder complying with all safety regulations and properly lighted during dark hours is necessary. Vessels awaiting Pilot should anchor only in designated area.

ANCHORAGES: Boundaries of area marked by lines connecting following positions;

(A)	Lat. 29° 32′ 51″ N.,	Long. 34° 57′ 19″ E.
(B)	Lat. 29° 32′ 26″ N.,	Long. 34° 58′ 34″ E.
(C)	Lat. 29° 31′ 40″ N.,	Long. 34° 58′ 27″ E.
(D)	Lat. 29° 32′ 31″ N.,	Long. 34° 57′ 06″ E.

Average depth 25 fathoms. If arriving at port for first time, do not try anchoring anywhere outside anchoring area.

Anchorage positions will be alloted by Port Control – call sign "Yamit" on VHF Channel 14.

Anchorage Positions:

(1)	Lat. 29° 32.62′ N.,	Long. 34° 57.37′ E.
(2)	Lat. 29° 32.49′ N.,	Long. 34° 57.64′ E.
(3)	Lat. 29° 32.37′ N.,	Long. 34° 57.97′ E.
(4)	Lat. 29° 32.25′ N.,	Long. 34° 58.31′ E.
(5)	Lat. 29° 32.37′ N.,	Long. 34° 57.34′ E.
(6)	Lat. 29° 32.17′ N.,	Long. 34° 57.70′ E.
(7)	Lat. 29° 32.06′ N.,	Long. 34° 58.04′ E.
(8)	Lat. 29° 31.96′ N.,	Long. 34° 58.37′ E.
(9)	Lat. 29° 32.22′ N.,	Long. 34° 57.02′ E.
(10)	Lat. 29° 32.02′ N.,	Long. 34° 57.29′ E.
(11)	Lat. 29° 31.82′ N.,	Long. 34° 57.65′ E.
(12)	Lat. 29° 31.69′ N.,	Long. 34° 58.06′ E.

MAX. SIZE: For berthing alongside main cargo jetty, length 528 m., max. draft up to 11.9 m. Vessels are allowed to load to 12.1 m. draft and sail on high tide.

Additional cargo jetty length 170 m., max. draft up to 6.1 m.

North Oil Jetty accommodates tankers up to 125,000 d.w.t. with draft of 17.1 m.

South Oil Jetty can accommodate tankers up to 500,000 d.w.t. Depth of water alongside 28.6 m.

HEALTH: Free Pratique may be requested by cable via Haifa Radio from Quarantine Authorities. If suspected disease or fever on board immediately advise Quarantine Eilat with all details.

RADIO: Communication via Haifa Radio 4XO. Full details working hours and frequencies found in "Admiralty List Radio Signals" and similar publications. Good radio connection with Eilat can be obtained also via Haifa Radio, call sign 4XO, operating continuously.

TUGS: Tugs meet vessel off quay. Lines not usually used as tugs usually push. When needed, ship's lines used. 1 tug 2,750 h.p., 1 tug 960 h.p., 1 tug 280 h.p. and 2 boats 220 h.p. each.

BERTHING: No difficulty except at times of strong Southerly winds when small vessels may have to leave quay and proceed to anchorage or sea, due to strong swell.

BULK HANDLING FACILITIES: Bulk elevator for bulk loading (Phosphate & Potash) capacity 800 m.t.p.h.
Storage Area:
Sheds – 17,000 sq.m.
Open storage – 55,000 sq.m.
Cold storage warehouse – 500 tons.
Bulk potash shed – 80,000 tons.
Phosphate bulk shed – 35,000 tons (3,300 sq.m.)

CRANES: 1 electric driven crane S.W.L. 50 tonnes. 1 electric driven crane S.W.L. 35 tonnes. 4 electric driven cranes S.W.L. 25 tonnes, when coupled S.W.L. 48 tonnes per couple. 1 diesel/electric driven crane S.W.L. 15 tonnes. 1 diesel driven crane S.W.L. 60 – 80 tonnes. 6 diesel driven cranes S.W.L. 7 – 13 tonnes.

Port is fully equipped for container handling. Container traffic exceeds 39,500 TEU's.

STEVEDORES: Booked by ship's Agent. All details of cargo distribution and storage to be cabled in advance to Agent.
Port Working Hours:
Summer: (May 16th – October 15th)
Sunday – Thursday 0530 – 1330 and 1600 – 2300 hrs.
Friday 0530 – 1230 and 1400 – 2000 hrs.
Winter: (October 16th – May 15th)
Sunday – Thursday 0600 – 1400 and 1530 – 2230 hrs.
Friday 0630 – 1300 and 1400 – 2000 hrs.

MEDICAL: Hospital facilities available.

DENSITY: 1028 (Winter), 1030 (Summer).

FRESH WATER: Available in unlimited quantities and supplied at all jetties. No facilities for supplying fresh water at anchorage.

FUEL: All grades supplied by road tankers.

CONSULS: Denmark, France, Germany (F.R.), Netherlands, Norway, Sweden, United Kingdom.

REPAIRS: All afloat deck and engine repairs can be performed by local workshops.

DRY DOCKS: Syncrolift with lifting capacity of 1,200 tons.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Every Crew member is permitted to keep 200 cigarettes or equivalent amount of other tobacco, out of bond. Every crew member is permitted to keep 1 bottle of spirits and 1 bottle of wine, out of bond.

REPATRIATION: There are facilities for arranging repatriation or crew changes.

AIRPORT: Eilat Airport is used at present for internal traffic only. There are 8 flights daily from Eilat to Tel-Aviv except on Saturdays. From Tel-Aviv there is good transportation to Lod International Airport.

TIME: Local time is GMT plus 2 hours. GMT plus 3 hours from Saturday 24th March until Saturday 25th August in 1990.

HOLIDAYS: No cargo work is usually performed during official holidays or Saturdays. The official holidays are: Passover (2 days during April); Independence Day (1 day end April/beginning May); First Harvest Day (1 day end May/beginning June); Jewish New Year (2 days, September); Day of Atonement (1 day end September); Feast of Tabernacles (2 days, October). No cargo work is usually performed during 1st of May although it is not an official holiday.

TELEPHONES: At present there are no facilities to arrange telephones on board ships.

TELEPHONE NUMBERS:

Eilat Port Management	059-72191/8
Harbour Master	059-71319 (office) 059-76868 (after office)
Oil Pipe-line	059-76171
Immigration	059-72590
Hospital	059-73151

SHORE LEAVE: Crew members are granted shore leave.

IDENTIFICATION CARDS: Every crew member going ashore should have a shore leave pass. Shore leave passes will be received from the border control officer after the vessel is cleared.

DELAYS: Normally vessels arriving after midnight are berthed only at daybreak, before the beginning of the morning shift.

REGULATIONS: Booklet containing port regulations placed onboard all vessels on first arrival and must be adhered to.

GENERAL: Meteorological: Weather warnings if any are issued and delivered to vessels upon receipt.

AUTHORITY: Israel Ports and Railways Authority, Port of Eilat, P.O.Box 37, Eilat 88100, Israel. *Tel:* 059-58333. *FAX:* 059-58300. *Cables:* Namsuf Eilat. *Contact:* Captain I. Beery, Harbour Master.

AGENT: Carmel Shipping Ltd., P.O.Box 1015, Haifa 31009, Israel. Tel: 04-530041-2, 04-523293. Telex: 46550 Carml IL, 46821 Carml IL. Fax: 515886. Cables: "Carmelship Haifa".

HADERA: 32.28 N. 34.53 E. (See Plan)

LOCATION: About half-way between Haifa and Tel-Aviv. The terminal is used for the importation of coal for the adjacent power station.

PILOTAGE: Compulsory. Also see "General".

ANCHORAGE: See "General".

APPROACHES: *Lights and Shore Features:* The 2 Power Station Buildings which are about 80 m. high, the twin chimneys which are 254 m. high and the pier with its 2 gantry cranes are very outstanding features on the otherwise rather flat coast. The pier is a very conspicuous radar target.

A vessel approaching in darkness will be able to distinguish the port by the set of red and white lights on the chimneys, and a fixed red light at the Western extremity of the pier. The Mount Carmel Light and Mikhomoret Light will also be in sight.

There are red and green flashing lights at the entrance to the cooling-water basin, and a flashing white light on the North-Westerly buoy of the multi-buoy installation.

VHF: VHF radio installed to communicate with ships, tugs and other craft on matters relating to the port's operation.

TUGS: 2 tugs, about 40 tons pull each, with fire-fighting equipment 2 boats function as mooring, passenger and pilot boats.

BERTHING: The port's installations consist of:

1. An off-shore coal unloading terminal consisting of a pier (300 m.×24 m.) which is constructed 1.8 km. from the Shore Line. It is connected to the shore by an approach jetty on piles.

Minimum water depth at the pier – 20 m. It is designed for ships of up to 180,000 d.w.t.

The height of the pier above MSL is 14 m. There are 11 breasting and mooring dolphins along its North side, their height above the sea is 4.5 m. Quick-release hooks installed where applicable.

Ships are moored to the North side of the pier with their bow to seaward.

Discharging the ship's cargo is done by 2×35 ton gantry cranes.

2. A cooling water basin for the supply of sea water to the station condensers is also used by the port's craft. The water's depth in the navigable area is 5 m.

MEDICAL: First aid is given at the Regional Hospital at Hadera.

TANKERS: There is a fuel oil unloading terminal, about 1.5 km. North of the coal pier, where tankers are made fast to a multi-buoy system and fuel is pumped ashore through a 32 in. submarine pipe-line. Water depth is 18 m. and ships of 70,000 d.w.t. can be accommodated.

FRESH WATER: Available to the pier.

FUEL: Arranged by Agent.

REPAIRS: Arranged by Agent.

TIME: Local standard time is 2 hours ahead of GMT. GMT plus 3 hours from Saturday 24th March until Saturday 25th August in 1990.
STORES: Arranged by Agent.
GENERAL: *Instructions to Ships' Masters:*

1. Please keep the port informed of your ETA, any changes in your original notice should be communicated to your Agent.

2. Your VHF Channels 16 and 10 should be used for radio contact with the port when approaching and when your ship is anchored.

3. The Pilot will prefer to board your vessel when in a position 1 mile North of the jetty, and bow Southward; the same position is also the best for anchoring if your ship does not berth on arrival.

4. Your pilot ladder should be as directed by IMO Regulations, properly cleaned and secured.

5. Due to the exposed position of the berth, constant and thorough attention to the mooring lines should be carried out. Generally the moorings will consist of:

A. Forward:
  4 Head Lines.
  2 Breast Lines.
  2 Springs.
B. Aft:
  4 Stern Lines.
  2 Breast Lines.
  2 Springs.

All head and stern lines must be fibre ropes-polypropylene or others. Breast lines and springs, if not made of fibre must have fibre tails, 15 m. – 20 m. long. Starboard anchor with about 8 shackles will also be used.

6. When the ship is moored to the jetty.

(a) Main engines, steering, windlasses etc., should be in working order. Any fault or damage to be repaired immediately and the port to be informed.
(b) The ship shall always have sufficient officers and crew onboard so as to be able to leave the jetty in an emergency.
(c) Mooring lines should be continuously checked for wear, load distribution, etc., and any irregularity tended to.
(d) All ballast tanks, including holds designed for water ballast, to be filled as soon as possible.
  Cargo holds into which water ballast will be pumped should be the first to be emptied of cargo.
(e) The vessel to keep herself informed on expected weather conditions.
(f) Constant – tension winches should not be in operation for head and stern leading lines simultaneously.
(g) Do not change your mooring lines nor re-arrange them, unless the Duty Pilot is consulted.

7. Oily water should not be pumped, nor garbage be thrown overboard.

For ships that have to pump out oily water of any source, there is a reception tank and a separator on the jetty.

Ship's garbage should be put in plastic bags and loaded into a supplied container.

8. You have to get permission before doing:
(a) Welding work, anywhere on the ship.
(b) Diving work at the ship's hull.
(c) Lifeboat exercises.

9. The ship has to inform the Port immediately about any accident, fire, explosion, leakage etc. on or near the ship.

10. The above instruction to Masters are based on the Ports' Ordinance and Regulations, issued by the Israeli Ministry of Transport.

SHIPMASTER'S REPORT: December 1982 (Updated 1986).
Documents: See "Haifa".
Pilotage: Compulsory. Pilot joins vessel approximately 1 mile off jetty.
Anchorage: Recommended approximately 1 mile 345° of end of jetty.
Max. Size: 200,000 d.w.t. Least depth of water alongside 20.0 m.
Radio: See "Haifa".
VHF: Continuous watch on Channels 16 and 10, working on Channel 10.
Health: See "Haifa".
Tugs: Two available, 4,000 h.p. (approx.).
Berthing: Ships moor port side alongside, head out to sea.
Bulk Handling: Coal: 2 large overhead gantry cranes with grabs of approximately 20 tonnes capacity having an outreach of approximately 40 m. and at present discharge coal by endless conveyor belt system, rate approximately 28,000 tons per day. During 1985, 3 million tons were discharged from 22 vessels.
Tankers: There is a tanker mooring consisting of six buoys and an underwater pick up/discharge point close North of the jetty.
Density: 1030.
Medical: Facilities available, via Tel Aviv or Haifa.
Fresh Water: Laid onto jetty. Ship to supply own connections and hoses.
Fuel: Available via lighter from Haifa. Small quantities can be delivered by truck.
Repairs: Limited, via Haifa.
Surveyors: Cargo inspectors and surveyors of most associations available, arrangements via Agent.
Stevedores: 24 hours per day except Saturdays and holidays.
Gangway Watchmen: Not required. Very strict watch kept at installation gates.
Opening/Closing Hatches: Mechanical hatches by crew.
Customs: See "Haifa".
Identity Cards: See "Haifa".
Airport: Tel Aviv Airport approximately 50 km.
Holidays: Same as "Haifa".
Shore Leave: See "Haifa".
General: All ships proceeding to Israeli ports report as per "Admiralty List of Radio Signals" Vol. 6, Part II, Page 320 and "Guide to Port Entry".

Documents, etc. as for Haifa, from which Port Immigration/Customs/Police etc. cover Hadera. Vessel will be cleared at anchor on arrival if berth is already occupied.

Hadera is a new port constructed to serve a new power statio position Lat. 32° 28′ 08″ N., Long. 34° 53′ 10″ E. Two conspicuous g cement chimneys, with red lights at night together with the power stati and a jetty extending a mile out to sea make the place easy to ident No difficulties in the approaches. The port has been in operation sin April 1982. First vessels being discharged at anchor by derrick bar but since September has been accepting vessels alongside the n jetty extending 1 mile out to sea into deep water. There is a new sm boat harbour on the North side at the root of the jetty, equipped w quay and cranes.

Berthing, approach jetty from the North, letting go starboard anch when approximately 1 cable off to assist in swinging and for heaving when sailing. Two tugs used for berthing, they are based in the sm boat harbour, only one used when sailing. Use tug's ropes.

Working part of jetty is 300 m. long and is 14 m. above sea level on two levels. Lower level (Skeleton) is for moorings, which are adequa and fitted with remote control quick release gears in case of bad weat in Winter as jetty is very exposed. (Vessel before this vessel had vacate berth for 40 hours, due to swell.) Good fendering.

No pedestrians allowed along jetty. Transport is arranged with Agen Power Station Authorities.

Shore gangway provided.

Stores/Laundry can be taken/delivered by a truck via jetty.

Hatch "cleaning" is by contract labour. If started early enough th make a reasonable job to re-deliver 'shovel clean'. Notice of Readine accepted as of the time vessel anchored awaiting berth.

Crew change facilities exist via Tel Aviv Airport. Incoming report Haifa Immigration Control and deposit passports for passes. Hom going members have to be in possession of air tickets before leav vessel.

SHIPMASTER'S REPORT: October 1985.

1. Agents, Harbour Master and Pilots are very co-operative.
2. There is always 1 Pilot and 1 tug on duty in case of rough weath
3. Master receives a weather report twice daily from Harbour Mast
4. A "Supervisor" of National Coal stays on board to ass discharging when office is closed.
5. Agent (National Coal), Harbour Master (Hadera Port), Pilot (Hade Pilot) and boat service (Solmar) all listen to VHF Channel 10 (call sig in brackets). If necessary at night Solmar will telephone the Agent at h home, and he will then call vessel on Channel 10.
6. Due to deck arrangements of our vessel the shore gangway cou not be used. Vessel's gangway used and landed on fender.
7. The final trimming of cargo is poor and leaves lots of clean remaining for vessel's crew.
8. Due to distance to jetty (good fenders) it is not possible to use t transverse crane of the vessel for storing.
9. National Coal employs 4 time-chartered bulkers of 120,000 160,000 tons to supply the power station of Hadera with coal. The stati consumes about 10,000 tons daily. About 5 more shiploads are need yearly. Mostly panamax bulkers from U.K.

AUTHORITY: Port of Hadera, P.O.Box 314, Hadera, Israel. *Tel:* (0 332976, 332250. *Telex:* 471772 Nph II. *FAX:* (06) 343034. *Conta* Mr. B. Nativ, Port Manager or Captain Y. Braker, Harbour Master.

HAIFA: 32.49 N. 35.00 E. (See Pla

DOCUMENTS:
1 Photograph of each member of the crew.
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – camer binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.

Stowage Plan and Manifest to be mailed in advance, prefera Master to cable 72 and 48 hours before arrival holds workable and ga required, also draft forward and aft on arrival.
PILOTAGE: Compulsory for all merchant and foreign naval vess Pilotage service is rendered round the clock. Vessels are boarded Pilot seaward of the main breakwater.
ANCHORAGE: Vessels shall not anchor within the prohibited areas must keep clear of the fairways of the main harbour and Kishon Zo
MAX. SIZE: The width of the entrance channel to the main port, betw the main and lee breakwaters, is 183 m. The depth of the entranc 12 m. The width of the entrance to the Kishon Harbour is 80 m., wi min. depth of 8.50 m. Vessels of max. draft 35 ft. can be sa accommodated in the main port.

In the Kishon Harbour, accommodation is limited to vessels of 9.5 draft. Depth in both harbours are maintained by dredging at reg intervals.
Tankers: Up to 50 ft. draft at buoy moorings.
RADIO: Radio-telephone service from ship-to-shore and vice versa Haifa Radio, call sign 4XO. Ships in port may also be connected to Israeli telephone system.

The port has a signal station equipped with a modern 60 kw installation, working on Channels 12, 14 and 16. The station is licen for port operation only and is in continuous service. For all other to-shore communication contact Haifa Radio, call sign 4XO.

The Israeli Meteorological Service broadcasts twice daily the wea forecast in English for East Mediterranean area over Haifa Radio.

Vessels approaching the coast of Israel shall report their position to the Israeli Authorities in accordance with the following procedure:

(a) Every foreign vessel bound for the ports of Haifa, Ashdod or Ashkelon shall send a position report to the Israeli Ministry of Transport (IMOT) via Haifa Radio (4XO). Such position report should be sent in the form of a free of charge service cable when the vessel arrives at a distance of 50 miles from the coast and it shall contain vessel's name, position, course, speed and destination.

(b) In addition to the report, in *(a)* above and according to the Ports' Regulations, every vessel (foreign or Israeli) entering the Israeli territorial waters shall send a position report which shall contain vessel's name, position, course, speed and destination and which shall be sent at the time the vessel enters territorial waters (6 miles) to:

(1) The nearest Port Operation Services, by means of VHF;

or

(2) The IMOT via Haifa Radio (free of charge service cable) in cases where VHF communication with the nearest port cannot be established.

HEALTH: Free Pratique by radio is granted on request by the International Quarantine Message to the Quarantine Station round the clock (including holidays) via Haifa Radio, call sign 4XO on 500 kHz.

Medical advice by radio for all ships may be obtained through Haifa Radio 4XO free of charge. Call "Medico Haifa".

There is no special quarantine anchorage.

TUGS: Vessels obtain tug assistance, if required, for entering or leaving the harbour and for shifting. 2×3,200 h.p. (30 tons B.P.) and 1×1,500 h.p. (16 tons B.P.).

BERTHING: Ships moor normally to wharves and jetties, and to a lesser extent stern to the main breakwater and alongside dolphins.

Main Harbour

The main harbour is situated on the Southern shore of Haifa Bay at Lat. 32° 48′ N., Long. 35° 01′ E. It is protected by 2 breakwaters: the main breakwater, 2,826 m. long, in the Northwest, and the lee breakwater, 765 m. long, in the East.

The harbour basin covers an area of 1,066,000 sq.m. The main port's land area amounts to 1,000,000 sq.m.

Kishon Auxiliary Harbour

To the East of the main port, around the lower reaches of the Kishon rivulet, lies the Kishon Auxiliary Harbour. It consists of an outer harbour basin that is protected by 2 breakwaters of 600 m. and 350 m. length respectively, and a main channel of 1,045 m. length, of which the first stretch of 700 m., measured from the entrance to the outer harbour basin, has a depth of 8 m. while the second stretch of 345 m. has a depth of 6.50 m. A side channel, 213 m. long and 4 m. deep, which branches off the main channel toward the East, serves as a fishing dock. Another side channel 350 m. long and 8 m. deep serves as holding basin of the shipyard and the Chemicals Terminal.

Location	*Length* (m.)	*Depth* (m.)	*Remarks*
Main Harbour			
Wharves 1 - 4	497	4.6 – 10.0	General cargo
Wharves 5 - 6	259	10.0 – 11.0	Passenger ships and general cargo
Wharf 7	158	10.5	Bulk and general cargo
Wharves 8 - 9	232	13.5	Grain (automatic discharge)
Wharves 10 - 11	396	8.5 – 10.5	Western Container Terminal
Wharves 12 - 13	224	8.0	Ro/Ro
Service wharf	110	4.5	
Oil jetties	800	9.7 – 11.3	
Cargo, passengers and service wharves	560	5.5 – 9.7	
Dolphins	296	10.2 – 10.8	
Eastern Wharf	650	11.5 – 13.5	Containers and bulk
Kishon Zone			
Wharves 1 - 4	625	9.0 – 9.5	General cargo
Chemicals Terminal (North)	340	4.5 – 9.0	Liquid chemicals
Chemicals Terminal (South)	60	8.5	Liquid chemicals
Fishery Dock	325	4.0	

BULK HANDLING FACILITIES: *Coal:* Coal imports are usually handled by grabs fixed to shore cranes.

Grain: 3 mobile elevators on main wharf (depth 13.8 m.) with combined unloading capacity of 1,800 t.p.h. Silo capacity 100,000 tons.

Chemicals: Northern Terminal: Situated in the Northern part of the Kishon Zone.

The terminal can handle 3 ships at a time; two of up to 100 m. in length each drawing a maximum of 9 m. and a third ship of 80 m. length and 5 m. draft.

Terminal facilities: An ethylene handling and storage installation with a direct pipeline link to the factory.

An ammonia handling and storage installation with direct pipeline link to the factory.

A BTX handling installation with 3 pipes to the factory.

A methanol and MTBE handling installation with direct pipeline to the factory.

34 storage tanks in the "Gadot Terminals" tank farm for storage of various materials; total capacity 15,000 cu.m.

"Miluot" tank farm.

The terminal is protected by a sophisticated fire-fighting system. Various services are available, including: Steam generator, water supply, bilge water tank, communications, weighbridge, air compressor, etc.

Southern Terminal: Situated at the tip of the general cargo wharf in the Kishon Harbour. The terminal has 70 atmospheric storage tanks of different capacities for chemicals with flash-points above 30° C; acids and basic chemicals. The tanks are connected by pipeline to dolphins with mooring for one ship. The Southern Terminal is operated by Gadot Terminals Ltd.

CRANES:

	No.	*Capacity* (Tons)	*Radius* (m.)
Floating Derrick	1	100	—
Portal Cranes	4	35	—
	11	5	25
	3	15	30
	6	25	30
Mobile Cranes	4	13	—
	1	32	—
	1	50	—
Fork Lift Trucks	95	—	—

CONTAINER HANDLING EQUIPMENT:

New Eastern Wharf:

2 container gantry cranes; lifting capacity 35 tons under spreader, 65 tons heavy lift; hoisting height 30.7 m. above sea level, 11.3 m. below sea level; outreach 33 m.

5 stacking cranes; lifting capacity 35 tons under spreader. Number of stacking rows 18 (14 between legs, 4 under cantilever).

2 portal cranes, lifting capacity 32 tons.

Planned: 2 more gantry cranes and a sixth stacking crane.

Western Wharf:

1 gantry crane; lifting capacity 35 tons under spreader; hoisting height 28.5 m. above sea level, 7.5 m. below sea level.

1 container gantry crane; lifting capacity 35 tons under spreader; hoisting height 25 m. above sea level, 8 m. below sea level.

4 mobile stacking cranes, lifting capacity 40 tons.

2 portal cranes, lifting capacity 25 tons.

STEVEDORES: Enable Agent order gangs, important obtain 48 hours advance accurate ETA from vessel. Failure give precise ETA may result in ship losing 12/24 hours, also cost gang waiting time. No work on official holidays.

Working Hours: Work is usually carried on in 2 shifts: the first shift is from 0630 to 1430 hrs., on ordinary working days, or from 0630 to 1330 hrs. on the eve of Saturdays and holidays. The second shift is from 1530 to 2230 hrs. on ordinary working days and from 1330 to 2030 hrs. on the eve of Saturdays and holidays. Occasionally, in order to complete work on a ship or for special cargoes, a third shift is worked.

TANKERS: *Oil Jetty:* Up to 4 oil tankers can be accommodated at one time, one on each side (draft 9.7 m. – 10.4 m.).

In the Roadstead.

There is 1 submarine oil loading and unloading berth, connected to a submerged pipe-line.

Berth No.	*Situation in relation to harb. entrance*	*Diameter*	*Extension from shore*	*Direction*	*Depth under water*
3	0.50 m. N.E.	32 in.	10,000 ft.	319°	58 ft.

The signal station ashore opposite Berth No. 3 has 2 signal masts. Vessels moor with their own 2 anchors ahead and mooring lines to 2 buoys astern. The oil company's Mooring Master supervises the connecting and loading or discharging, remaining aboard until sailing time.

Throughput Rates:

Vessels load or unload up to 1,000 t.p.h. through 10 in./12 in. pipelines on the Oil Jetty and up to 2,000 t.p.h. at the 32 in. pipeline submarine berth.

Oil Storage Facilities: 26 tanks with a total capacity of 3,800,000 bbls. of crude oil in the Bayside tank farm of the oil refineries.

In the port, 16 tanks with a capacity of 900,000 bbls. for storage of light and heavy fuel oil, gas oil, kerosene and benzene.

MEDICAL: Hospital facilities available. Agent will board vessel with company doctor if so required by the Master.

FRESH WATER: Drinking water is plentiful and of satisfactory quality; no treatment is needed as water is frequently examined and chlorinated when required. The water is supplied by hydrants from shore or by water-barge at a delivery rate of 30–50 t.p.h. Boiler water not available.

FUEL: The following grades of oil are available for supply as bunkers:

Heavy Fuel Oil	1,500 secs. Red. 1 at 100°F.
Light Fuel Oil	450 secs. Red. 1 at 100°F.
Marine Diesel Oil	Standard Grade

The oil is supplied direct from Oil Dock or from barges. Bunkers are normally supplied between 0700 and 1515 hrs. on working days; at any other time by special arrangement. Delivery rate from Oil Dock is up to 500 t.p.h. (3,500 bbls.) and from barges up to 150 t.p.h. (1,000 bbls.)

CONSULS:

Austria
Belgium
Denmark

REPAIRS: Israel Shipyards Ltd. run a modern shipyard, situated in the Kishon Zone, capable of building ships of up to 18,000 d.w.t. and to handle hull repairs, conversions, engine repairs and repairs of electric equipment.

The yard operates 3 floating docks with a lifting capacity of 20,000 tons, 7,500 tons and 1,100 tons respectively.

Vessels which need no dry docking can be repaired at the shipyard's quay, totalling 400 m. length with 9 m. – 10 m. depth.

Ogen Ltd. also undertake ship repairs.

GANGWAY/DECK WATCHMEN: Not compulsory. Port guard keeps gangway watch.

OPENING/CLOSING HATCHES: Performed by Stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, and 1 open bottle of spirits per person.
TIME: Local standard time is 2 hours ahead of GMT. GMT plus 3 hours from Saturday 24th March until Saturday 25th August in 1990.
AIRPORT: International air connection from Ben Gurion Airport, 105 km. from Haifa.
HOLIDAYS: Port business is suspended on the following holidays: Saturdays; the 2 days of the Jewish New Year (Rosh Hashana); the Day of Atonement (Yom Kippur); the first and the last day of the Feast of Tabernacles (Succot); the first and the last day of Passover (Pesach); Pentecost (Shavuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.
SHORE LEAVE: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police. All shore leave passes must be surrendered to the Boarding Officer before departure of the vessel.
IDENTITY CARDS: Issued by port police on arrival.
GENERAL:
Persons Boarding Vessels: No person shall be allowed on board any vessel unless he is in possession of a boarding pass which must be shown on demand to the police officer at the gangway.

Passes for boarding cargo vessels on business are issued by the Port Management; passes for boarding cargo vessels for any other purpose and passes for boarding passenger vessels are issued by the Frontier Control Section of the Port Police.
Swimming: Swimming in Haifa Harbour is strictly forbidden and Masters should instruct their crews accordingly.
Use of Ship's Boats: The use of ship's boats is forbidden in Haifa Port. A public motor-launch service is available for the convenience of ship's personnel. Call the motor-launch by day and night on VHF Channel 18.
Photography: Photography in the port area is strictly forbidden without a written permit issued by the Commander of the Port Guard.
AUTHORITY: Ports and Railway Authority, Haifa Port, P.O.Box 33539, Haifa. *Tel:* 04-518111. *Telex:* 46659. *FAX:* 04-674853. *Cables:* Malhof. *Contact:* Ian Orr, Port Manager. Captain I. Ben-Menachem, Harbour Master.

AGENT: Carmel Shipping Ltd., P.O.Box 1015, Haifa 31009, Israel. Tel: 04-530041-2, 04-523293. Telex: 46550 Carml IL, 46821 Carml IL. Cables: "Carmelship Haifa". Fax: 04-515886.

NOTES

Please also advise Shipping Guides Ltd.

Italy

GENERAL:

WEAPONS AND ARMS: In July 1988, the Italian Government passed a law that all vessels carrying arms, including personal or ship's equipment, must declare them in order to obtain a Ministerial permission, before entering Italian territorial waters, only valid for one call.

Vessels calling at Italian ports with arms as described above have to declare them to the Agent at least 4 days before entering territorial waters with indications of full type/brand, serial number, calibre/gauge of each weapon kept onboard as well as the quantity of ammunition held.

All weapons should be in Master's care and declared on the Stores/Provisions List on arrival.

If undeclared weapons are found onboard, same will be confiscated and the Master will be subject to court trial.

Further to the above, the Ministry concerned has decided that for vessels calling at various Italian ports, a licence to carry firearms on board can, on application through the Agent at the first port of call, be obtained and this will also be valid for all other ports of call.

The application must specify names of all ports and dates of call.

HEALTH: *Shipmaster's Report:* March 1983: Radio Pratique granted 12 hours prior to arrival.

If vessel applies 24 hours prior to arrival she will be requested to re-apply 12 hours prior to arrival.

TANKERS: All tankers of more than 1,600 g.r.t. carrying crude oil and petroleum products as well as gas carriers, chemical carriers, full or partly loaded, empty but not in gas-free condition, and which, prior to entrance to territorial waters of any Italian port, shall advise the port authorities of the following details:

(a) Vessel's name and international call sign,
(b) Vessel's nationality,
(c) Vessel's LOA and draft,
(d) Port of destination and accurate ETA,
(e) Quality/quantity of cargo and
(f) IMO Certificate if carrying dangerous chemical cargo in bulk.

Furthermore, the Master should hand over to the Pilot a detailed list concerning all vessel's data, Safety Equipment, Safety Class and other Certificates, together with Crew List, etc.

Also SOLAS/MARPOL 73/78 and annexes applied.

For Italian ships, Italy has implemented the A.R.E.S. (Automazione Ricerca e Soccorso) as application of S.A.R. Convention, Hamburg 1979. The system is mandatory for all Italian vessels of over 1,600 g.r.t., except for those vessels making national voyages of less than 24 hours' duration, and international voyages of less than 12 hours. Non-Italian vessels in the Mediterranean are encouraged to participate in the system. The A.R.E.S. Manual (Italian and English version) may be obtained at Port Authority's Offices. Also see Admiralty List Radio Signals, Vol. 1 (Ship Reporting Systems).

Also see "Augusta" – "Agent's Report".

Tankers over 1,600 gross tons, entering or leaving Italian ports or carrying, or with uncleaned tanks which last carried petroleum, gas or chemical products, are required to make a comprehensive report to the appropriate Port Captain. See *Admiralty List of Radio Signals, Vol. 6*.

Such tankers must establish and maintain radio contact, preferably by VHF R/T, with the Port Captain, advising him immediately of any incidents or defects which may affect the safety of navigation or cause pollution. Pilots should be employed outside the areas of compulsory pilotage whenever the nature of the cargo or navigational conditions, including reduced visibility, require.

CREW CHANGES: In Italian ports, signing on of crew on to ships whose flag is not the flag of the citizenship of said crew (for instance of a Norwegian crew member signing on a Liberian vessel, a Danish crew member signing on a Swedish vessel, etc.) should be aware that from now on Italian Port Authorities will strictly require copy of the contract showing that the crew member was engaged out of Italy. It is also required that the contract be signed and stamped by the Consul (of the flag of the ship) of the place where the crew member is engaged. If Consulate is not available, by the National Authorities of the place. In no instance will the signature of the engaging company be accepted as substitute of the signature and stamp of Consul or Authorities.

STRAIT OF MESSINA:

Regulations:

1. Passage of the Strait is prohibited to vessels of 50,000 tonnes deadweight or over carrying pollutants.

2. Pilotage is compulsory for vessels of:
(a) 15,000 tonnes deadweight and above;
(b) 6,000 tonnes deadweight and above if carrying pollutants.

3. Vessels in (2) should pass the following information at least 12 hours in advance via Messina Radio:
Name.
Nationality.
Call Sign.
Deadweight tonnage.
Type and quantity of pollutant carried.
ETA at Capo Peloro or Punta San Raineri.
ETA should be confirmed at least 1 hour in advance.
Vessels other than those in (2) should pass the same information by VHF Channel 16 at least 2 hours in advance.

4. Vessels passing through the strait should keep to starboard of a line joining:
(a) Lat. 38° 16.5′ N., Long. 15° 43.5′ E.
(b) Lat. 38° 14.0′ N., Long. 15° 36.6′ E.
(c) Lat. 38° 10.8′ N., Long. 15° 36.0′ E.

5. Vessels on passage through the strait should keep engines ready for immediate manoeuvring and should maintain constant watch on VHF Channel 16.

Pilotage: Pilots for vessels on passage through the strait embark 3 miles North of Capo Peloro or 2.5 miles S.E. of Punta San Raineri.

Pilots for vessels entering Port of Messina embark 1.25 miles North of Punta San Raineri.

NOTE: Tankers with no cargo on board from 6,000 up to 14,999 g.r.t can pass Messina Strait without Pilot. Tankers over 50,000 g.r.t. with no cargo on board can pass Messina Strait (pilotage compulsory).

ANCONA: 43.37 N. 13.32 E. (See Plan)

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the Roads 1 mile from the red light located at the end of Mole and also when, in the case of a vessel of large tonnage she anchors a further mile out and communicates her time of arrival.

DOCUMENTS: Immediately after arrival and shortly prior to departure, the Master must complete the arrival and departure forms supplied and send them to the Maritime Authority.

When the Pilot is on board, the Master must submit to the other authorities, Customs, Police and Health the following further documents:
4 Copies Crew List.
1 Copy Provisions List.
1 Copy B/L for every set.
1 General Cargo Manifest.
3 Copies of Crew Dutiable Articles.
5 Copies Passenger List (in transit or otherwise).

PILOTAGE: The Ancona Port Pilots listen 24 hours a day on VHF Channel 12. Telegraphic address: Piloti – Ancona. Telephone: 071/54297. Pilotage, compulsory for all tankers and all vessels over 500 g.r.t. Pilotage starts within a radius of 1 mile from the port entrance.

There are 4 pilot cutters operated by the Pilots' Association. Vessels waiting for a Pilot must hoist the "G" flag of the International Code of Signals and await him in the roads.

The pilots' station is in a building located near the angle between Berths 1 and 2. There are 4 Pilots available.

ANCHORAGE: In the Roads at the Master's discretion. The advice of the Pilots may be sought via VHF. Anchorage in the roads is safe with winds coming from the 2nd and 3rd quadrants.

RESTRICTIONS: Vessels may enter and leave port day or night. The entry and departure of vessels of large tonnage and draft is governed by the tide which has an approximate range of 2 ft.

Normally, tankers carrying petrol or vessels carrying hazardous goods in category "A" are not allowed to enter port.

MAX. SIZE: In the port of Ancona, the entry of vessels up to 250 m. length is permitted. At the oil installations located outside the port, tankers over 300,000 d.w.t. can berth in water depth 33 m. At the oil installations located closer to the coast, tankers of 27 ft. to 40 ft. draft can berth. (See "Tankers").

HEALTH: There is a maritime health station in the port. Free Pratique may be granted to an anchored vessel by radio (by calling up "Sanimare Ancona" 12 to 6 hours prior to arrival) for vessels coming from countries not affected by health strictures. If fever is suspected aboard a vessel, she must anchor in the roads, hoisting the appropriate International Code of Signals flag, and waiting for the port doctor to come on board.

RADIO: Ancona Radio "ICA" uses calling frequency 500 kHz and a working frequency of 489 kHz. Radio telephone: Ancona Radio P.T. "ICA" on 2182 kHz. VHF: calling up Channel 16 and working Channels 25, 26 and 27. Station maintains 24 hours watch.

RADAR: There is no radar station in the port.

VHF: Port Authority on VHF Channel 16 from 0800 hrs. – 2200 hrs.

TUGS: Use of tugs in port is not compulsory but may be requested by Pilot or ordered by the Port Authority if necessary. From 0700 to 1700 hrs., there are always 4 tugs available, and from 1700 hrs. there is 1 tug available.

Requests for additional tugs can be made via the ship's Agent a few hours prior to the vessel's entry in port, this order to be made to Corima Soc. Coop. R.L. Tel: 71-202002. Telex: 560553 corimai. Fax: 71-50045. Tugs wait for vessel 1 mile from the port entrance and work on VHF Channel 12.

SPECIAL CARGO HANDLING FACILITIES: Berth No. 15 has a multi-purpose electro-hydraulic crane particularly suited for containers up to 40 ft. and for lifting conventional cargo up to 42 tons. The quay space behind is currently used as a container terminal.

A new handling area at Berths Nos. 23, 24 and 25 will come into operation with an area of 15 hectares and whose berths will have cranes particularly suited to container handling.

Adjacent to the port, in the Ancona Port Industrial Zone, there is a private area with Customs sheds for retention and movement of containers. This area covers 16,000 sq.m.

For Ro-Ro traffic there is no special equipment, but this type of traffic can be handled at almost all the berths.

STEVEDORES: The Compagnia Lavoratori Portuali operates in the port. Telephone: 071/28095. Telegraphic address: Compagnia Lavoratori Portuali Ancona. Requests for labour are made via the ship's Agent at least 24 hours prior to commencement of operations.

BERTHING:

24	Nuova Darsena	150		10.80 m.	10,000	Containers, Timber, General	Mobile cranes 5 – 20 tons
25	Nuova Darsena	258.5		10.80 m.	75,000	Containers, Timber, General	1×20/35 ton crane

CARGO HANDLING FACILITIES: Normal working times for mechanical equipment is from 0800 to 1200 hrs. and from 1330 to 1730 hrs.

Mechanical handling equipment on the quays consists of:

1 multi-purpose Paceco crane, of 42 tons capacity for containers and various goods.

4 De Bartolomeis 20 ton electric cranes with retractable jib.

6 electrical cranes of 6 tons capacity, with retractable jib.

2 electrical unloading platforms of 8 tons capacity.

1 electrical unloading platform of 10/12 tons capacity.

3 automatic De Bartolomeis of 20 tons capacity.

1×5 ton automatic.

It is possible to attach electro-hydraulic grabs to the quay cranes for the discharge of scrap iron.

BRIDGES: None have to be negotiated when entering the port.

MEDICAL: There is an Italian Naval hospital in the port area close to Berth No. 10. It is reserved for personnel of the Italian Navy. Telephone number (M.M. exchange) 201392. There is a permanent service available.

Apart from this, there are in the town a main hospital "Umberto 1" with 1,000 beds, a 400-bed pediatric hospital, a cardio-rheumatological hospital, 2 geriatric hospitals, a neuropsychiatric provincial hospital, and a hospital specialising in tumours. There are also two private clinics with medical and surgical facilities.

TANKERS: *SFIR Mooring:* Mooring dolphins for tankers up 10,000 g.r.t. Products handled: Refined products.

API – Island Terminal: Berth Position: Lat. 43° 40′ 03.7″ N., Long. 13° 2 21.6″ E. It is a single berth for tankers up to 90,000 d.w.t. with draft exceeding 40 ft. Ship moored with her port side alongside the be Mooring manoeuvres permitted in daylight only. Unmooring manoeu permitted anytime.

Fittings for Loading/Unloading: 3 loading arms. 10 in. qu connections. 7 sea-lines (1×8 in., 1×12 in., 2×14 in., 2×16 1×24 in.) for loading/unloading various grades of oil products and cru oil. The 24 in. sea-line is electrically heated (skin effect) for fuel oil a high viscosity crude oil.

Water Ballast: Water ballast to be discharged ashore by sea-li Vessels on arrival for loading, when notifying their first ETA to Falcona must communicate to the refinery the quantity of ballast to be pum ashore. Actual ballast capacity in normal circumstances does not exce 5,500 cu.m.

Bunker and Water Supply: All grades of bunkers and undrinkable fr water are available by pipes. Bunker loading to be performed befor after cargo operations.

Main Engine and Auxiliaries: Should the main engine and/or auxilia be temporarily out of use, the discharging operations will immedia be stopped, and vessel unmoored, until everything is once aga order. In such a case all expenses, delays and/or all arising dama will be to the account of the vessel and/or her Owner.

API Buoy Field: The buoy field that was positioned about 600 m. Westward of the Island Terminal for unloading crude oil, has been dismantled.

API Jetty: It is a pier of 1,308 m. in length with 4 berths: 3 for loading/unloading tankers and the other, closer to shore, for service boats.

Berths:

Head Jetty: (Position: Lat. 43° 38′ 52.2″ N., Long. 13° 23′ 38.4″ E.) For tankers with draft not exceeding 27.5 ft.

Berth No. 1: For tankers with draft not exceeding 18 ft.

Berth No. 2: For tankers with draft not exceeding 16 ft.

Landing Stage: For service boats – water depth 10 ft.

Tankers are moored with the stern to the jetty and two anchors. Therefore ships must be fitted with cargo stern-line.

Fittings for Loading/Unloading: One derrick for each berth for connecting flexible hoses (4 in., 6 in., 8 in., 10 in.). Seven pipe-lines (3×8 in., 2×10 in., 2×12 in.) for loading/unloading various grades of oil products and crude oil.

Water Ballast: Water ballast to be discharged ashore by pipe-line. Vessel on arrival for loading, when notifying their first ETA to Falconara, must communicate to the refinery the quantity of ballast to be pumped ashore. Actual ballast capacity in normal circumstances does not exceed 5,500 cu.m.

Bunker and Water Supply: All grades of bunker and undrinkable fresh water are available by pipes. Bunker loading to be performed before or after cargo operations.

API Sea Terminal

The API Sea Terminal consisting of a single steel platform mooring for vessels up to 300,000 d.w.t. and is located off Ancona Harbour in position: Lat. 43° 44′ 37″ N., Long. 13° 31′ 20″ E.

It has a minimum depth of water of 98 ft. at LWS. The platform, fixed on 6 steel piles sunk into the sea bottom is connected to the shore tanks by an underwater sea line 40 in. diameter.

On the platform there is a Cardan joint from which 1 floating hose of 20 in. diameter departs (average discharging rate 7,000 cu.m.p.h.), at the top of which are connected 2 lines of 16 in. diameter that end with 2 conic hoses 16 in./12 in. diameter (Tanker MS-GI) for connection to the ship.

Each tail hose is fitted with a quick closing valve to prevent risk of pollution.

The platform has a diameter of 82 ft. and is fitted with special rubber fenders.

Platform Light:

Light: White – Code Letter: "U" – Height a.s.l.: 39 ft. Period: 15 sec.

Light Characteristics:

(1) Light:	0.5 sec.	(4) Eclipse:	1 sec.
(2) Eclipse:	1 sec.	(5) Light:	2 sec.
(3) Light:	0.5 sec.	(6) Eclipse:	10 sec.

Range: 6 miles

Foghorn: Code Letter "U" – Range: 3 miles.

Characteristics:

(1) Blast:	1 sec.	(4) Silence:	2 sec.
(2) Silence:	2 sec.	(5) Blast:	2 sec.
(3) Blast:	1 sec.	(6) Silence:	22 sec.

The platform is equipped with radar reflector.

Weather and Currents:

Weather is generally good from May to the end of September. During the Winter time bad weather prevails from N.E.

The N.E. wind commonly named "Bora" is the strongest and the most frequent. The Easterly sea, which does not occur often, is generally strong. The Westerly winds generally cause fog or mists which, particularly in Winter, is very thick.

For approximately 8 to 9 months of the year the current sets in a S.E. direction whilst for the rest of the year, it is running in opposite direction.

The strength of the S.E. current is variable from 2 to 3 knots, therefore, in consideration of these facts neither engine repairs nor engine maintenance are permitted during the time the vessel is secured to the API platform and the main engine must be on permanent standby and ready for manoeuvring.

Radio/VHF:

Vessels bound for Falconara must send their ETA to Apioil – Falconara 72, 48 and 24 hours before their arrival.

In the last message the following information must be reported:

(1) Maximum lifting capacity (S.W.L.) of derricks
(2) Distance between bow and manifolds.
(3) Diameter and type of manifolds flanges.
(4) Whether the cargo tanks are equipped with inert gas system.
(5) No. of lifeboats and capacity. No. of persons for which lifebelts are available on board. Total number of actual crew on board, including passengers and technicians.

5/6 hours before arrival VHF contact can be established with the refinery maritime office on Channel 12.

Anchoring:

Vessels waiting for berth may anchor in a position approximately 1.5 miles Eastward off the platform. Ideal position for anchorage is: Lat. 43° 45′ 00″ N., Long. 13° 33′ 00″ E. or as otherwise instructed. Vessels are warned to anchor only in the recommended position because of the existence of submarine pipe-lines in other areas.

On Arrival:

The refinery operator, together with a gang of 4 skilled workers, will board the vessel before berthing to coordinate the discharging operations and they leave after completion of unmooring. Masters are therefore kindly requested to arrange for food and accommodation for the whole period of their stay aboard.

Mooring Operations:

Mooring operations will be undertaken with favourable weather conditions. The vessel shall proceed at a reasonable speed to the platform and generally shall start mooring by heading into the sea current or wind or swell.

As soon as the vessel is a proper distance from the platform she will run out 2 mooring ropes (1 on each side) which will be secured to the platform ropes by mooring crew. These ropes will then be heaved on board in order to pull up the platform ropes which will be secured on the bitts of the forecastle. The platform mooring ropes comprised of nylon rope, chain and polypropylene rope and pelican hooks will be used as stoppers for the chains. If the vessel is equipped with appropriate chain stoppers on the bow, the two mooring chains will be secured on them as soon as they reach the corresponding bitts on the forecastle.

4 mooring lines (2 for each side) must be ready on the forecastle for joining before manoeuvring to the platform.

The refinery operator shall not fail to give to the deck officer on duty on the forecastle all requested information concerning mooring operations as well as API's installation. All winches and windlass must be in perfect working condition with sufficient power and ready to work during the whole of the vessel's stay at the API platform. A good mooring rope of sufficient length must be ready aft and passed to the supply vessel enabling her to assist the tanker from the end of mooring up to few seconds before unmooring. Mooring operations will be carried out by the crew, under the Master's responsibility and according to the Pilot's suggestions.

During the ship's stay at the platform, the crew and API personnel will keep a constant watch on the mooring ropes and the platform. During the night the forecastle and mooring ropes must be brightly lit.

Unmooring:

The unmooring operations, except during unfavourable weather conditions, are quite simple. As soon as the 2 hoses have been disconnected, it will be sufficient to let go the supply vessel, heave up, as quickly as possible, the stern rope, then let go the 2 platform ropes, and put the main engine astern (if necessary). Masters are warned that as soon as the hoses are disconnected the service of the supply vessel will no longer be required.

Hose Handling:

On arrival both derricks must be rigged and ready to lift up the maximum permissible weight.

Throughout the period of time when the hoses are hoisted up, connected, disconnected or lowered overboard, 1 deck officer and 1 Crew member are required to coordinate and operate the winches. Lifting, connecting, lowering and other handling of hoses will be performed by API's gang under the Receiver's representative control.

Discharging Operations:

The Receivers' representative will advise the Master on all matters concerning the discharging speed, manifold pressure, or eventual hazards, but will not direct the discharging operations except if it may be necessary to protect the facilities or any Receivers' properties or apparatus.

Pollution:

The Master is fully responsible and must ensure that no petroleum or other contaminated products are discharged, or spilled overboard.

During the vessel's stay at the API installation, all deck scuppers and all overside deck openings shall be securely closed and oiltight. All pipe-lines not in use, must be blanked off.

Drip-pans must be in place at all times under manifold connections. An adequate supply of sandbags, or other anti-pollution chemical products, must be available at all times for immediate use.

Under no circumstances shall bilge water, oil, waste, or contaminated products be discharged overboard.

Blowing of boiler tubes is not permitted during vessel's stay at the Refinery Terminals and black smoke may not be emitted from the funnel.

The Receivers will take any action or steps necessary to clean up or remove the contamination of the sea and the terminal structures if any. The vessel and/or her Owner, will be responsible for all expenses and all damage in connection with the contamination.

Italian Authorities are very strict and severe about pollution. It is worthwhile to remind Masters of the eventual penal implications against them for pollution.

Safety:

During the vessel's stay at the API Terminal a sufficient number of crew members must remain on board to be ready for any kind of emergency. Crew members going ashore are warned that in case of bad weather it might not be possible to return on board until weather conditions have improved.

All fire equipment and hoses must be, at all times in perfect working condition and ready for use. A number of portable fire extinguishers must always be ready by the discharging manifolds and the breathing apparatus must be ready by the pump rooms for immediate use.

Main Engine and Auxiliaries:

Should the main engine and/or auxiliaries be temporarily out of use, the discharging operations will immediately be stopped, and vessel unmoored, until everything is once again in order. In such a case all expenses, delays and/or all arising damages will be to the account of vessel and/or her Owner.

Tending Mooring:

A crew member must be stationed at the bow of the ship while the vessel is at the platform to keep a constant watch on the moorings.

During the hours of darkness moorings must be illuminated.

Winches:

During the stay of the vessel at the terminal all deck winches must be ready to operate.

Supervising Discharging Operations:

The receivers' personnel will remain on board for the whole time. A qualified deck officer must always be available. It is recommended that the duty officer always carries with him a portable VHF in order to keep close and constant contact with Receivers' representative.

Supervising Floating Hoses:

Whilst the vessel is secured to the platform a sharp lookout on floating hoses must be ordered by the Master. Every abnormal situation in this respect must be immediately notified to Receivers' representative.

Washing Floating Hoses:

When discharge is completed, if requested, the vessel will pump water for a few minutes before disconnecting hoses, in order to displace crude-oil from the floating-lines. The Receiver's representative will advise the Officer on duty about this manoeuvre as well as pumping time.

Communications Between Ship and Shore:

Normally communications between ship and shore are maintained by API's representative. Masters are kindly requested to authorise the use of vessel's VHF when requested.

Boilers:

Boiler tubes must not be blown whilst at anchor or secured to the API platform.

Garbage: Garbage and refuse must not be thrown overboard while the vessel is at anchor or secured to the API platform.

Bunkers: Weather permitting, bunkers can be supplied by barges. API can supply all grades of fuel oil, marine diesel, gasoil and all grades of API's marine lube oils.

For bunker requirements vessels must cable to their own Agent at least 72 hours before their arrival (holidays, Saturdays excepted) stating qualities and quantities required. (No limitations for supplying).

Fresh Water: Available only by tugboats with favourable weather conditions, and to be requested through vessel's Agents.

IMPORTANT WARNING

All vessels with a draft up to 40 ft. scheduled for API platform but not duly equipped to operate thereat, will be moored, if possible, at API conventional berths. All expenses, time lost and/or damages arising from the above will be to account of and charged to vessel/owners.

Report: *Crude Oil Washing:*

To carry out crude oil washing operations (COW) the vessel must be fitted with the following equipment:

(a) An inert gas system capable of supplying gas containing not more than 5% oxygen to all cargo tanks during all discharging and washing operations. Such systems must be fitted with an automatic alarm signal which will operate if the oxygen content of the gas rises above 5%.

(b) A tank cleaning machine permanently installed in the cargo tanks and connected to the cargo/wash system by permanent steel piping.

(c) A remote reading tank gauging system to ensure that the liquid levels in the cargo tanks can be monitored at any time, without having to open any ullage ports.

(d) The tank cleaning lines must be completely separate and isolated from the fire fighting system.

The procedures to be followed are listed below:

1. Prior to vessel arrival at the discharge port, the following test will be carried out:

   All cargo discharge lines and wash system lines must prove to be tight and free of leaks. The test will be effected with crude oil, to a pressure ranging between 150 p.s.i. and 175 p.s.i.

   The main cargo pumps safety devices, i.e.: pump casing and bearing temperature gauges and high temperature alarms, pump overspeed trips, remote emergency stops, pump reverse rotation alarms, cargo pump trip for low inert gas pressure, must be tested and found fully operational.

2. All openings to all cargo tanks must be securely closed and the pressure/vacuum valves set in the operational position.
3. All in and out valves of sea wash water heater must be closed.
4. The crude supply for the washing system will be secured directly from the main discharge lines or from separate tank cleaning lines connected directly to the main cargo pumps.

   The pressure used for "COW" will be 140 p.s.i. maximum. In the case of vessels equipped with washing system supply coming direct from the main discharge lines, such back pressure of 140 p.s.i. will be achieved by closing down completely on manifold valve or two manifold valves, if necessary.

   In the case of vessels equipped with a separate tank cleaning line, the 140 p.s.i. back pressure will be achieved by controlling the main cargo pump revolutions and it will not be necessary to close any manifold valves.

   Whichever manifold is used the shore hoses, or hard arms, will not be pressurised for crude washing purposes.

5. Before commencing crude washing any tank, the oxygen content of the inert gas supply must be checked and must not be more than 5%. In addition the atmosphere in the tank to be washed must be checked and must not be more than 5%.

   The inert gas system must be capable of supplying positive pressure to all cargo tanks during all discharging and crude washing operations. In the event that pressure in the cargo tanks falls to 4 in. W.G. the system will automatically stop all cargo pumps. Before crude washing each tank, its pressure must be checked and must not be lower than 20 in. W.G.

6. The tanks will be washed in two stages:

   Top Wash: When the level in the tank is down to 15 ft. innage the top two/thirds of the tank will be washed, using all machines in the tank simultaneously, on a pressure of max. 140 p.s.i. The washing pattern will be from 40° to 120° elevations. During top washing the tank will continue to be pumped out on the main cargo pumps.

   Bottom Wash: The top wash cycle will normally be completed when the tank is draining out on the main cargo pumps. The washing machines will be stopped and reset to the bottom wash pattern (from 0° to 40° elevation). The tank main suction will be closed and the stripping suction opened.

   When the tank is dry, bottom washing will commence using a maximum of four machines in the tank to ensure good drainage throughout the bottom wash cycles.

   On completion of the bottom wash cycles, the machines will be stopped and the cargo system will revert to normal discharge operations.

7. The whole "COW" operation will be carried out under the dire supervision of a responsible Officer well acquainted with "CO and tank cleaning, who will be assigned to this supervision ta by the Master.

   The necessary personnel will be put at the disposal of th responsible Officer by the Master, to carry out "COW" operatio and, in particular, one man equipped with VHF radio will b stationed at the manifold throughout discharge operations.

   Before commencing "COW", the responsible Offic supervising the operation will discuss, in detail, the who operation with Receivers' Representative and will carefu observe any provisions issued by Port Authorities and t Receivers in relation to "COW".

   If during "COW" operations the Master and/or the responsib Officer judge, at any time, that the operational conditions do n ensure total safety, all "COW" operations will be stopped at onc

DENSITY: The average salinity of the water in the Port of Ancona 17.5 gr. per litre of chloride.

FRESH WATER: Along all the quays are numerous supply points wi rates varying from 15 to 25 t.p.h. Vessels in the roads can be supplie with drinking water via the port tugs.

FUEL: Vessels moored at berths can be supplied by tanker barge. Th supplier is S.P.A. API from their marine refinery at Falconara.

Requests for bunkers must be submitted to the ship's Agent at lea 72 hours in advance, Saturdays and holidays excepted. Any type product can be supplied.

FIRE FIGHTING FACILITIES: Apart from the water hydrants along th quays, which, if need be, can be used for coupling to hoses for fi fighting purposes, the port of Ancona has a fire brigade equipped wi fire engine, together with other means on land and water.

The fire brigade is near the marine station at Berth No. 13. Apart fro facilities on land, there are 2 craft available, one of which is high sophisticated. Telephone: 201715.

If necessary, at very short notice, the town fire brigade can be calle to the scene, their equipment consists of a fire engine with pumps an ladders and other modern means of efficient fire fighting. Telephon 115.

In port, there are the following maritime means for combating fire

a) A motor launch of the port captaincy with fire fighting hoses a also the ability to spray foam.

b) 2 motor barges with pumping facility operated by the port fi brigade, having the following characteristics:

Vessel "VV.F.207" – speed 11 knots, equipped with 2 fire fighti pumps each capable of delivering 6,000 litres per min. at a pressure 10 atmospheres and driven by 2 Fiat Aifo 260 h.p. engines each; 2 liqu foam pumps; 2 foam projectors; 2 foam tanks with a total capacity 5,800 litres; 20 delivery pipes with 70 UNI unions, 400 m. overall; 1 delivery pipes with 45 UNI unions, 220 m. overall; 1 comet portab projector, 2 fixed foam projectors; 16 UNI 70 hose attachment points; UNI 150 ditto; 2 double tube cannons for mixed usage (water and foan 1 electrical compressor giving 5 atm. pressure; 2×500 watt projecto of which 1 is portable with 100 m. of cable; 1 retransmitter appara attached exclusively to the apparatus operated by the fire brigade.

6 port tugs having the following characteristics:

Tugs "Luisella" and "Tiziana" – TSL 485 – speed 14 knots – 5,000 h – equipped with 2 exhaust pumps in the deck on starboard and po sides; regulation fire fighting equipment; 2 motor driven pumps; f internal use 2 pumps connectable to those on deck; internatio attachments and points; equipped with radar, radio and echo sounde

Tug "Katria Prima" – TSL 140 – speed 12.5 knots – 1,014 h.p. equipped with 1 monitor; 4×45 mm. swivel guns; thermo-mechanic electric pump of 60 t.p.h. capacity; foam tank – fitted with radar; rad echo sounder.

Tug "Luisa Davanzali" – TSL 238 – speed 12.5 knots; equipped wi 1×30 t.p.h. fire fighting pump; 2 exhauster pumps of 50 t.p.h. and 1 200 t.p.h. capacity; radar, radio, echo sounder, gyroscopic compass

Tug "Cesare Davanzali" – TSL 364 – speed 14 knots – 1,800 h.p. equipped with 2 electrical pumps of 200 cbm/hr. capacity for delive purposes and capable of attachment to Minimax equipment for fi fighting purposes using foam with 2 cannon type projectors; in the de are 14 points for attachment of hoses; 2×1,000 kW. adjusta projectors; 1 motor compressor of the low pressure type working a pressure of 8 atm.; equipped with radar, radio, echo sounder.

Tug "Nuovo Ancona" – TSL 148 – engine power 1,014 h.p. equipp with 2 fixed exhauster pumps of total capacity of 500 t.p.h. driven b 2×40 h.p. electric motors; 2 fixed fire fighting pumps, of capacity 250 t.p.h. total, driven by 2×40 h.p. electric motors; equipped with foa plant and projector; fire fighting pipes have 4 points with 70 mm. unio 1 portable exhauster pump of about 150 t.p.h. capacity – speed 12 kn – equipped with diving equipment – radio.

Tug "Luisa" 1,200 h.p.

CONSULS:

Sweden: Tel. 200252.
French Consular Agency: Tel. 206866.
Netherlands: Tel. 200764.
Denmark: Tel. 200252.
Belgium: Tel 896811.

REPAIRS: It is possible to effect repairs of all types at yards within port, and at the large electrical and mechanical repair undertakings the town.

Cantieri Navali Riuniti (for large construction). Tel: 5951.
Cantiere Morini (also has available a floating dock for vessels u 1,000 g.r.t. and slipways). Tel: 202224.
Cantiere Castracani (slipway). Tel: 55663.
Cantiere Riparazioni Navali (pleasure craft). Tel: 204323.
Cantiere Tecno-Matic (fibreglass units). Tel: 53643.
Cooperativa Metallurgica G. Tomassi (only for steel vessels). 204303.
Ditta EL.ME.A. (marine electrical equipment). Tel: 29409.
Ditta Schiavoni (marine electrical equipment). Tel: 55731.

DRY DOCKS: There is only one small floating dock in which it is possible to carry out repairs to vessels up to 1,000 g.r.t. The dock is owned by Cantieri Navali Morini. Tel: 204303.

SURVEYORS: In Ancona the Registro Italiano Navale has a town office at via Marsala No. 8. Tel: 202204. R.I.N.A. acts for the following foreign classification bodies: Germanischer Lloyd, Nippon Kaiji Kyokai, Jugoslavinski Registar Brodova and Register of Shipping of the U.S.S.R.

GANGWAY/DECK WATCHMEN: This service is advisable but not compulsory. In Ancona is a security firm "Istituto di Vigilanza Urbana e Campestre" di Dattilo Salvatore. Tel: 201784.

HATCHES: Hatches are opened by the crew where they are of the automatic type, and by the port labour force where they are of the conventional type. Hatches are re-closed in the event of rain.

CUSTOMS ALLOWANCES: On arrival in port, all goods under Customs exemption must be placed under seal. At the completion of Customs inspection, the Master may request the Customs officers permission to supply the following goods:

50 cigarettes for each Crew member.
1 kg. of salt for every 50 persons.
50 grams of sugar per person per day.
15 grams of coffee per person per day.
Liquor – small quantities to be agreed with the Customs officials according to the time of year.

REPATRIATION: It is possible to effect exchange of foreign Crew members on board foreign vessels since there is in the port an office of the Frontier Police.

For repatriation purposes, the following travel connections are available:

Train: Via the Ancona/Bologna/Rome line; via the Ancona to Rome direct line and via the Ancona/Pescara/Bari line.

Air: Departures from the Falconara Marittima Airport which is 10 km. from the port and reached by bus. There are 2 daily departures to Milan, 1 to Pescara and 1 to Rome.

Sea: the following lines are available:

From 1st January – 31st December, Wednesdays (1330 hrs.) and Saturdays (2200 hrs.) to Patras by Greek vessel "Mediterranean Sea". From 1st October – 30th May, Mondays (0900 hrs.) Tuesdays (0030 hrs.) and Fridays (1700 hrs.) to Zara and Spalato by Italian vessel "Tintoretto". From 1st June – 30th September daily departure to Zara by Jugoslav vessel "Illirija". From 1st June – 30th September every Thursday (1300 hrs.) and Sundays (2200 hrs.) to Patras by vessel "Mediterranean Sky". From 1st June – 30th September every Saturday (2200 hrs.) per Panamanian vessel "Neptunia" to Patras, Corfu and Haifa. From 1st June – 30th September every Tuesday (2200 hrs.) to Patras per Greek vessel "Patris". From 1st June – 30th September every Wednesday (1300 hrs.) and Saturday (2200 hrs.) departures to Patras and Higoumenitza by Greek vessel "Ionian Star". From 1st June – 30th September every Tuesday (1700 hrs.) departures to Dubrovnik by Italian vessel "Tintoretto".

There are other possiblities of connections with Greece and Yugoslavia. The information can be obtained by telephoning the following Agents:

Adriatica	Tel: 204915.
Morandi	Tel: 202033.
Paroletti	Tel: 56789.
Archibugi	Tel: 202223.

These Agents manage the lines and can give times and frequencies of sailings.

TIME: GMT plus 1 hour. From 29th March to 26th September, GMT plus 2 hours.

HOLIDAYS: Every Sunday, 1st January (New Year); the Monday after Easter; 25th April (Liberation); 1st May (Labour Day); 4th May (Town's Patron Saint's Day); 15th August (Assumption); 1st November (All Saints); 8th December (Immaculate Conception); 25th December (Christmas); 26th December (St. Stephen's).

Work is possible on all these days, but at an increased rate.

POLICE/AMBULANCE/FIRE: Port Police 201030. Town Police 202860. Yellow Cross Ambulance 55622. Red Cross Ambulance 22680. Port Fire Brigade 201715. Town Fire Brigade 22222.

TELEPHONES: It is not possible to connect telephone lines on board vessels. In the port there are numerous telephone boxes for national and local communications and where it is possible to telephone to any part of the world.

SERVICES: The following special services are available in Ancona:

Tank washing at Falconara Marittima by the "crude oil washing" system, compass adjusting, repairs to radar or other electronic instruments on board and underwater work.

SHORE LEAVE: Foreign Crew members may go ashore from 0800 until 0200 hrs. the next morning provided they have a pass stamped by the Port Police. Beyond 0200 hrs. a special permit from the police is necessary to allow an overnight stay outside the port area.

SPECIAL REGULATIONS: Vessels of draft greater than 30 ft. mooring at berths on the South mole are secured a short distance off the quay by means of dolphins.

DELAYS: No delays.

NOTICE: *Regulations concerning navigation, fishing and anchoring in vicinity of API installations:*

1. It is forbidden for any vessel or craft whatsoever, with the exception of vessels intended to operate at the API installations:

a) to transit, remain or anchor within a radius of 1 nautical mile centred on the installations;

b) to anchor and fish by whatever means within a radius of 1 nautical mile centred on the installations quoted;

c) to anchor, engage in bottom fishing or engage in any activity on the sea bed within the area limited by the following points:

A – Lat. 43° 40′ 20″ N., Long. 13° 24′ 57″ E.
B – Lat. 43° 44′ 28″ N., Long. 13° 30′ 42″ E.
C – Lat. 43° 44′ 12″ N., Long. 13° 31′ 09″ E.
D – Lat. 43° 39′ 42″ N., Long. 13° 24′ 57″ E.

2. In the areas of the sea mentioned in No. 1, all vessels and craft in general which accidentally become entangled with anchors, fishing equipment or similar, underwater pipe-lines, must obligatorily abandon such equipment on the bottom in order to obviate damage to it and inform as quickly as possible the Maritime Authority.

3. Regulation No. 11/86 of 22.2.86 is in force.

4. Those contravening this current regulation, provided that their action does not constitute the cause of a serious reaction, will be pursued within the terms of Article 1164 of the Navigation Code and must compensate for the damage caused. It is obligatory for all entities whatsoever to observe and cause to be observed the terms of the present regulation.

Signed: The Commandant of the Port of Ancona.
Date: 22nd February 1986.

DEVELOPMENTS: 5 deep water berths (920 m.) to be constructed. Existing breakwater to be extended. New breakwater (300 m.) to be constructed.

AUTHORITY: Capitaneria di Porto Ancona, Banchina Nazario Sauro 12, 60100 Ancona, Italy. *Tel:* 071-51697. *Telex:* 561529 Compan I. *Cables:* Compamare Ancona. *Contact:* Francesco Colli, Harbour Master and Port Director. Paolo Castellani, Assistant Harbour Master. Allesandro Pavlidi, Port Captain.

ARBATAX, Sardinia: 39.57 N. 09.42 E. (See Plan)

SHIPMASTER'S REPORT: September 1980.

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the roads 5 – 7 cables Northwards of the light of East Breakwater. Pilot leads vessel to the place for anchoring and also delivers on board all local documents and forms for completing for arrival clearance.

PILOTAGE: Not compulsory, but only available in daytime for entering. On leaving port the Pilot is available day and night. VHF Channel 16. Pilot boat black hull, about 6 m. in length, white house, on which is painted "Pilotti"; vessel awaits the Pilot Northward of the light of East Breakwater between breakwaters and Isola D'Oliastra Islet in position: Lat. 39° 57.24′ N., Long. 09° 42.95′ E., depth on roadstead from 10 m. to 30 m., good holding ground.

MAX. SIZE: Vessels of 200 m. length and max. draft 25 ft. 00 in. have entered.

HEALTH: Free Pratique may be requested by radio to "Sanimare Arbatax" between 12 to 6 hours prior to arrival, advising vessel's name, nationality, last port, number of crew and passengers and state of health on board. If from another Italian port Free Pratique is granted automatically.

VHF: Port Authority on Channels 16 and 11 from 0700 hrs. – 1900 hrs.

TUGS: One tug with sufficient power for assisting in manoeuvres is available, ship's lines used. Tug takes lines in the roads and accompanies vessel to the port. Prior to mooring vessel drops anchor with about 3 shackles, tug turns the stern of the ship towards the pier, after which the ropes from fore and aft are transported and secured on the pier, tug pushes vessel alongside the pier on the port-side. The chain is slackened until 5-6 shackles out.

BERTHING:

Banchina Ovest – length 450 m. – depth 25 ft.
Banchina Postal – length 100 m. – depth 15 ft.
Banchina Centrale – length 100 m. – depth 15 ft.
Banchina Sud – length 80 m. – depth 15 ft. (for Ro/Ro ships only).

CRANES: One private mobile crane, 6 tons capacity, for discharging pulpwood at Banchina Ovest.

MEDICAL: Advise Agent of any requirements.

DENSITY: 1025.

FRESH WATER: Only from water barges.

FUEL: Pipe-line 250 mm. in diameter from store tanks on shore to the terminal at the head of the West pier.

HATCHES: Opening/closing is normally carried out by ship's crew. Winchmen from stevedoring company or ship's crew.

CUSTOMS ALLOWANCES: Depends on flag of vessel.

REPATRIATION: Regular line of ferry boats, train to Cagliari close to which there is an airport.

TIME: GMT plus 1 hour from 29th March to 26th September, GMT plus 2 hours European time.

HOLIDAYS: 1st January (New Year's Day), 25th April (Liberation Day), 1st May (Labour Day), 15th August (Assumption), 1st November (All Saint's Day), 8th December (Local Religious Holiday), 25th December (Christmas Day), 26th December (Boxing Day).

IDENTIFICATION CARDS: Special shore passes issued by local police, against passports.

DEVELOPMENTS: Present basin will be dredged to 9 m., new basin close to present one will be constructed with depth of up to 10 m.

AUTHORITY: Ufficio Circondariale Marittimo, 08041 Arbatax, Sardinia, Italy. *Contact:* Antonio Camboni, Port Commandant. *Tel:* (0782) 667093, 667072.

AUGUSTA (including Priolo and Melilli): 37.13 N. 15.14 E. **(See Plan)**

LOCATION: Augusta – Position refers to Torre Avolos Old Lighthouse in position Lat. 37° 12′ 37″ N., Long. 15° 13′ 34″ E.

Priolo – Same position as Augusta, Priolo lays on Southern part of harbour including a chemical pier outside the breakwaters. The port is under the jurisdiction of Siracusa.

Melilli – Correct name is Siracusa Santa Panagia, located 6 miles South of Augusta. Lat. 37° 06′ 30″ N., Long. 15° 15′ 40″ E.

Largest scale charts: B.A. 181-187. U.S. 53000-53200-53201. Italian 270-271.

PORT LIMITS: A line drawn between Santa Croce Lighthouse and Magnisi Lighthouse defines the seaward limits of the Port of Augusta.

A line drawn between Punta Magnisi and Punta Santa Panagia defines the seaward limits of the port of Santa Panagia.

DOCUMENTS: Ship's information must be sent by telex to Compamare Augusta, or to Compamare Siracusa for Santa Panagia, 24 hours before arrival (see "examples" below) in accordance with instructions issued by European Economic Community No. 79/116.

Crew Lists (at least 4 copies).
Custom Manifest.
Passenger Lists (4 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.
The following documents must be sent to Harbour Master's Office:
Certificate of Registry.
Civil Liability Certificate (for tankers only).
Information Note of Arrival.
Additional Declaration of Departure.
Cargo and Gear Safety Certificate.
Safety Construction Certificate.
Italian Light Dues.
Tanker Check List (to be presented to Pilot for acknowledgement).

In addition ships bound for the Esso Terminal must also radio the refinery, Rafinesso Augusta, via Roma Radio (IAR) 72 hours and 48 hours before arrival, giving ETA in local time and following advice:

Bill of Lading quantities in long tons, metric tons, gross bbls./net bbls.

Slop quantity, water percentage, tank number. If slop mixed with cargo, advise quantity cargo in slop tank.

Arrival draft.

Temperature of cargo for vessel carrying atmospheric residues and catfeeds.

For tankers calling to load: 72 hours prior arrival send cargo layout, preferred order of loading and number of grades ship can load at same time.

Examples: Messages sent to vessels:

Vessel Over 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessels data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, IGS yes/no, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull machinery in good order.

Vessel under 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull, machinery in good order.

Chemical Carriers:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, certificate of fitness/IMO yes/no, last port and confirm that all apparatus, hull, machinery are in order.

Vessel's reply:

To: Harbour Master, Augusta.
Telex: 972336 Compau I

Vessel Features	Capo Argento, IBMX, Italian Flag, g.r.t. 2,976, d.w.t. 4,500, LOA 100 m. max. draft 5.95 m.
ETA Pilot	Pilot Augusta, 2nd December, 0600 hrs.
Agent	Mayflower Shipping Agency
Reason of Call	Unloading 1,400 tonnes Ethylene
Cargo	Ethylene 1,400 tonnes
SOLAS	Available SOLAS 74/Prot 78
IOPP	Expiring 30th April, 1986
CLC	Expiring 20th February, 1986
Paris Memo	Athens 19th September, 1985/No Prescription
IMO	Expiring December 1985
Last Port	Porto Torres
Remarks	In good order
	Master Capo Argento

PILOTAGE: Compulsory for vessels over 500 g.r.t. – 24 hours service – Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above. Weather permitting, Pilot boards about 1 mile East of port main entrance – In case of bad weather, the pilot boat will station itself just inside the entrance and instructions to proceed will be given to vessels by VHF. Upon request, to facilitate vessels, or for other special reasons, Pilot can board up to 3 miles off the normal embarkation point.

Pilot charges vary with vessel's g.r.t., for hours between sunrise to 0800 hrs. and 1700 hrs. to sunset, for night hours, for Sundays and holidays, for flammable and explosive cargo and for boarding over 1 mile from main breakwater.

ETA to be confirmed 1 hour before arrival, calling "Augusta Pi Station" on VHF Channel 12. In case of no radio contact, vessels mu stop about 2 miles Eastward of the breakwater and hoist or flash t international code signals.

The pilot boat has a black painted hull with a white band and wh superstructure with the word "Piloti" painted on both sides.

For Santa Panagia (Melilli), Pilot will board 1 mile seaward from Pun Santa Panagia for vessels incoming from South and 1 mile seawa from Punta Magnisi for vessels incoming from North. Pilot should contacted on VHF Channel 14. Second Pilot recommended by Loc Authorities for vessels of 60,000 g.r.t. or above.

APPROACHES: There are 2 entrances: the main one is situat between the central and northern breakwaters, with leading lights on heading of 273° 51′ – Entrance is about 260 m. wide, with a depth ov 36 m. in the middle, and may be used day and night.

Note: Vessels entering should be lined up on the leading lights/mar 1 mile before entrance and ship departing 0.5 miles before exit. In ca of controversy Harbour Master will ask for documentation of abo positions.

Santa Panagia is an open road and berthing to ISAB Terminal allowed in daytime only.

A current may cross the entrance after prolonged periods of win weather. The leading lights/marks are sometimes obscured by smo from the industrial plants in the Southern part of the harbour. Na vessels and outbound traffic have the right of way when passing throu the harbour entrance.

Santa Panagia:

(a) Masters are cautioned when approaching Santa Panagia by nig as there are no navigational aids in this area. Only 2 lighthous (Murro di Porco Lighthouse to the South and Cape S. Cro Lighthouse to the North) can be used to fix the position of t vessel. In the landfall however, their bearings are opposite a therefore useless. Radar must be in good operating condition

(b) Tunny nets are laid down in the area and marks can temporarily missing and small fishing boats engaged in net fishi may be encountered up to 8 miles from the coast; these boa carry no special marks or lights to indicate that they are usi nets.

(c) Naval ships quite often exercise off the East coast of Sic particularly in an area including Augusta to the North a extending well South of Syracuse.

Two submarine exercise areas are close to this part of the coa

(d) A current may cross the entrance of the bay as well as the termi area after prolonged periods of windy weather.

ANCHORAGES: Pilot compulsory inside and outside the breakwate within the port limits.

The Inner Anchorage has a central zone with a depth of water less then 22.4 m.

Outside it is recommended to anchor South of Main Entranc because North of it there are many limitations.

For Santa Panagia Pilot compulsory inside the harbour limits – vesse anchoring outside of this line are not considered to be in port a consequently without port dues.

MAX. SIZE: VLCCs can enter the harbour with tug assistance, with t following limitations: 69 ft. draft for operations in the road (bunkers provisions – crew changes) and 66 ft. 10 in. with a max. displaceme of 450,000 tons to moor alongside SELM Priolo Supertanker Jetty. Santa Panagia no limitations.

HEALTH: Vessels arriving from countries not suspect of epidemic diseases can ask and receive Free Pratique by radio, sending a telegra not more than 24 hours before arrival to "Sanimare Augusta" via Ro Radio (IAR) or "Sanimare Siracusa" for the Port of Santa Panag Arrivals from Italian or EEC Ports are considered clear.

It is necessary to request Free Pratique by radio because Hea Officers do not board vessel from sunset to 0800 hrs.

The Office of the Health Department is located at Via Lungoma Rossini. Tel: (0931) 974920.

RADIO: Augusta Radio P.T. Listening on 2182 kHz. Working on 16 and 2260 (24 hour service).

VHF: Augusta Radio P. T. Call Channel 16, working Channels 26 a 27 (24 hour service).

Harbour Master (Channel 16).
Pilots (Channel 12). Working 24 hours.
Tugs and Line Handlers (Channel 8). Working 24 hours.
Taxi-boats (Channel 10) From 0600 to 2330 hrs.
Agents Connection (Channel 9). Office hours.
Traffic Control (Channels 9 and 12). Working 24 hours.

TUGS: Tugs available in the harbour: 4×2,000 h.p., 2×2,400 h 3×2,500 h.p., 2×1,200 h.p. and 1 tug on stand-by/emergency 2,600 h.p.

Harbour service: 6 tugs on duty from 0700 – 1200 hrs. and from 13 – 1800 hrs. 3 tugs available from 1800 – 2200 hours and 2 tugs availa from 2200 – 0700 hrs.

Tugs' charges vary with vessel's g.r.t., for hours between 0001 – 08 hrs, 1200 – 1300 hrs., 1700 – 2359 hrs., for Saturday, Sunday holidays, for service exceeding 1 hour, for operations at SELM – Pr Terminal.

For Santa Panagia there are 3 tugs available, 1 tug can be emplo from Syracuse Harbour – additional tugs can be supplied from Augu Harbour.

Use of tugs is compulsory for berthing and unberthing. The num of tugs allocated is decided by the Harbour Authority according to g tonnage. Because of tug crew duty rosters, the most suitable tugs not always be available. Tugs make fast on the hook after the ves has cleared the entrance, using ship's ropes. Pilots communicate tugs via VHF portable radios which they bring on board with them.

Line Handlers: Service is performed with 1 launch for vessels of than 10,000 g.r.t. and 2 launches for vessels above 10,000 g.r.t.

Wires are not accepted but may be used when provided with a Manila or other fabric end tail with eye.

Charge varies with vessel g.r.t., flammable and explosive cargo, rain, waiting time (1 hour delay), overtime from 0600 – 0800 hrs., 1200 – 1300 hrs., 1700 – 2000 hrs., night hours, Saturday, Sunday, holidays, lines above the total of 8 and mooring on dolphins/buoys.

BERTHING: *Commercial Wharves:*

Ro/Ro Pier: Length 260 m. Depth 12.0 m.

Banchina di Riva: Length 246 m. Depth 12.0 m.

Commercial Quay: Length 255 m. Depth 12.0 m.

Consortium Jetty: Length 738 m. Depth at seaward end 12.2 m. 6 berths available. With Port Authority permission vessels may berth to discharge dirty ballast or transhipment cargoes.

MACET: Berth Nos. 1, 2 and 3 are at a finger jetty. Berth Nos. 1 and 3 used only by coasters and bunkering barges. Depth 12 ft. Berth No. 2 used by vessels up to 25,000 d.w.t. on stern discharge. Depth 28 ft. (see "Plan").

Enichem Augusta: Punta Cugno – Berth Nos. 3, 4, 5 and 5 Bis.

Berth No. 3 Northern Jetty used by Enichem Augusta for discharging and loading chemical products. Berth accepts vessels up to 3,000 d.w.t. mooring alongside. Depth 17 ft.

Berth No. 4 (Mid Jetty) used by Enichem Augusta for barges.

Berth No. 5 (Southern Jetty) used by Enichem Augusta for vessels up to 30,000 d.w.t. moored by stern for loading/discharging black/white products and chemicals. Depth alongside 30 ft.

Berth No. 5 Bis used by Enichem Augusta. It is a steel island connected to Berth No. 5 for vessels up to 5,000 d.w.t. for loading/discharging black/white products and chemicals. Depth alongside 21 ft.

Esso: Pier No. 1: Length of pier about 1,050 m. Heading 110°.

Berth No. 6: Used only by bunker barges.

Berth No. 7: For vessels up to 10,000 d.w.t. with LOA 197 ft. – 525 ft. Depth of water 35 ft. Pipe-lines with connection of 6 in. Loading rate 150 t.p.h. – 900 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore. Stern loading only.

Berth No. 8: For vessels up to 38,000 d.w.t. with LOA 197 ft. – 820 ft. Depth of water 35 ft. Pipelines with connections of 8 in. Loading of gasoline, JP/5, benzine and bitumen. Loading rate 165 t.p.h. – 900 t.p.h. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h. Shore capacity 20,000 tons.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, receiving tankers up to 90,000 d.w.t. with LOA 230 ft. – 909 ft. Depth of water 51 ft. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6 in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 140,000 d.w.t. with LOA 504 ft. – 974 ft. Depth of water 54 ft. Loading of all products as No. 10 except lube oil. Connections 10 in. No night-time movements for vessels over 60,000 g.r.t.

At about 400 m. from end platform there are 2 smaller platforms (Berths No. 9 and 12).

Berth No. 9: Receiving tankers up to 10,000 d.w.t. with LOA 197 ft. – 469 ft. Depth of water 26 ft. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 6 in. – 24 in.

Berth No. 12: For tankers up to 12,000 d.w.t. with length 213 ft. – 492 ft. Depth of water 28 ft. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Unicem: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. Used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day. Berths No. 13 Bis and 14 Bis recently completed but not yet in use.

N.A.T.O. Pier: Berth Nos. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

SELM-Priolo: Supertanker Jetty: For vessels up to 420,000 d.w.t. Berth Nos. 17 to 24 at SELM Jetty; Berth Nos. 25 and 26 at Steel Island; Berth No. 27, for vessels up to 20,000 d.w.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line. Connections: 16 in. for crude and 8 in. for products.

SELM concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, for vessels up to 20,000 d.w.t. Berth No. 31, for vessels up to 30,000 d.w.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, for small tankers only.

Berth No.	*Depth* (ft.)	*Max. Draft* (ft.)	*Max. DWT*
17	14.75	13.01	1,000
18	24.28	22.06	6,000
19	42.00	40.35	3,000-48,000
20	73.50	64.99	250,000
21	73.50	66.08	375,000
22	45.90	42.00	3,000-48,000
23	24.60	23.00	6,000
24	11.81	9.08	1,000
25	45.93	42.06	5,000-70,000
26	45.93	37.06	5,000-35,000
27	37.40	34.00	26,000
29	—	29.06	Used by Agrimont
30	14.43	13.00	
31	—	31.06	

ENICHEM – ANIC: (Carichi Liquidi): Is situated in Priolo's Cove. Chemical products are handled. Berth No. 33, for vessels up to 3,000 d.w.t. Berth No. 34, for vessels up to 15,000 d.w.t. Berth No. 35 and No. 36 used by small vessels only.

Also see "Shipmaster's Reports".

Santa Panagia: *Berthing Procedure:* At all berths vessels are berthed so as to head outwards. The vessel approaches the berth almost perpendicularly to the pier and with the aid of tugs (generally 6 for a VLCC) and swung seaward, to approach the berth with an angle of about 45°. When at safe distance from the berth and almost in position, the vessel is then swung parallel to the berth and pushed alongside.

No anchor is used, however, both must be ready for any emergency. The following are the maximum landing speeds:

Berth No. 1:	25,000 d.w.t., 22.5 cm./sec.
	50,000 d.w.t., 17.0 cm./sec.
Berth No. 2:	10,000 d.w.t., 25.0 cm./sec.
	30,000 d.w.t., 30.0 cm./sec.
Berth No. 5:	250,000 d.w.t., 14.5 cm./sec.
	50,000 d.w.t., 21.0 cm./sec.
Berth No. 6:	385,000 d.w.t., 13.5 cm./sec.
	50,000 d.w.t., 21.0 cm./sec.

Cautionary Advice: Masters are cautioned that prevailing strongest winds and the resulting swell can affect their stay alongside. It is therefore very important that vessels, particularly high freeboard ships pay particular attention to moorings. The most efficient moorings are all wire moorings – mixed moorings of different stretch characteristics and breaking strain should be avoided, particularly in breast lines and springs.

Moorings reeled on winches must be held by brakes hardened up to full torque. No self-tensioning devices should be used. The mooring must be reeled in such a direction as to assist the break. Where split drum winches are used, a maximum to 2 layers should be on the working drum when the mooring reaches the shore bollard/mooring hooks. Brake must be in good condition.

There are limits applicable to freeboard from a windage point of view. This together with maximum operable wind speeds will be discussed with Master's of VLCC by a Terminal Supervisor. The vessel must be held firmly against the fenders at all times. It is unnecessary and dangerous to slack away lines, even if they appear taut, if the ship is not hard against the fenders.

The minimum recommended is 2 spring lines and 2 breast lines at each end.

Melilli: *Operator:* Industria Siciliana Asfalti and Bitumi (ISAB).

The terminal is situated 6 miles South of Augusta, 5 miles North of Syracuse, Sicily. The Marine Terminal is connected to the Refinery storage through 5 lines for LPG and 18 large diameter pipe-lines for Crude and Products which allow for high unloading and loading rates.

All berths are equipped to ensure rapid and safe operations.

Clean and dirty ballast discharge facilities, including ballast reception tanks of 100,000 cu.m. (0.6 million barrels) are available.

A sheltered harbour accommodates service boats and 3 modern 2,000 h.p. tugs are permanently available.

When more tugs are required, additional units are supplied from nearby Augusta.

Bunkering facilities are available on all berths and sea-going barges are operating from the Terminal and from a sheltered harbour equipped for bunkering purposes.

Crude Oil Transhipment: The marine facilities are also suited for transhipment from ULCC-VLCC to smaller tankers better fitted to serve various refinery and/or pipe terminal locations in the Mediterranean and Adriatic.

Crude and Product Storage: 8 tanks are available for incoming crude with a total capacity of 800,000 cu.m. (5 million barrels).

Semi-finished (intermediate) product storage enables the operation of plant units when upstream sections are not available for short periods and contributes to Refinery flexibility.

In particular there is large storage of fuel oil and gas oil fractions and 12 motor fuel component storage tanks.

Total intermediate storage in 27 tanks, amounting to 431,000 cu.m. (2.7 million barrels).

Finished product storage is in 38 tanks of various grades with a capacity of 825,000 cu.m. (5.2 million barrels).

A further 42,000 cu.m. (0.25 million barrels) are held in Refinery service tanks.

Jetty: Deep water is available close to the shore at the jetty side. The marine facilities consist of a finger with 5 berths having the following capabilities and restrictions:

Berth No. 6: Vessels of minimum 18,000/max. 600,000 d.w.t. Max. LOA 1,200 ft. max. draft 78 ft. For unloading crude and loading fuel oil.

Berth No. 5: Vessels of minimum 18,000/max. 250,000 d.w.t. Max. LOA 1,200 ft. Max. draft 78 ft. For unloading crude and loading fuel oil, gasoil and gasoline.

Berth No. 1: Vessels of minimum 5,000/max. 55,000 d.w.t. Max. LOA 790 ft. Max. draft 42 ft. 6 in. For unloading crude and loading all products.

Berth No. 2: Vessels of minimum 10,000/max. 30,000 d.w.t. Max. LOA 650 ft. Max. draft 36 ft. For unloading crude and loading all products except LPG.

Berth No. 7: Vessels of minimum 500/max. 3,000 d.w.t. and LPG carriers of minimum 500/max. 1,500 d.w.t. Max. LOA 320 ft. Max. draft 18 ft. For loading all products.

Somicem-Magnisi: Sea berth, stern mooring for loading crude oil – max. 22,000 g.r.t. Draft 36 ft.

Also see "Agent's Report".

STEVEDORES: Available from Compagnia Lavoratori Portuali.

CRANES: *Heavy Lifts:* Floating cranes with lifting capacity of 20 tons – 94 tons at a distance of 27 m. – 12 m. are available.

Washing Floating Hoses:

When discharge is completed, if requested, the vessel will pump water for a few minutes before disconnecting hoses, in order to displace crude-oil from the floating-lines. The Receiver's representative will advise the Officer on duty about this manoeuvre as well as pumping time.

Communications Between Ship and Shore:

Normally communications between ship and shore are maintained by API's representative. Masters are kindly requested to authorise the use of vessel's VHF when requested.

Boilers:

Boiler tubes must not be blown whilst at anchor or secured to the API platform.

Garbage: Garbage and refuse must not be thrown overboard while the vessel is at anchor or secured to the API platform.

Bunkers: Weather permitting, bunkers can be supplied by barges. API can supply all grades of fuel oil, marine diesel, gasoil and all grades of API's marine lube oils.

For bunker requirements vessels must cable to their own Agent at least 72 hours before their arrival (holidays, Saturdays excepted) stating qualities and quantities required. (No limitations for supplying).

Fresh Water: Available only by tugboats with favourable weather conditions, and to be requested through vessel's Agents.

IMPORTANT WARNING

All vessels with a draft up to 40 ft. scheduled for API platform but not duly equipped to operate thereat, will be moored, if possible, at API conventional berths. All expenses, time lost and/or damages arising from the above will be to account of and charged to vessel/owners.

Report: *Crude Oil Washing:*

To carry out crude oil washing operations (COW) the vessel must be fitted with the following equipment:

(a) An inert gas system capable of supplying gas containing not more than 5% oxygen to all cargo tanks during all discharging and washing operations. Such systems must be fitted with an automatic alarm signal which will operate if the oxygen content of the gas rises above 5%.

(b) A tank cleaning machine permanently installed in the cargo tanks and connected to the cargo/wash system by permanent steel piping.

(c) A remote reading tank gauging system to ensure that the liquid levels in the cargo tanks can be monitored at any time, without having to open any ullage ports.

(d) The tank cleaning lines must be completely separate and isolated from the fire fighting system.

The procedures to be followed are listed below:

1. Prior to vessel arrival at the discharge port, the following test will be carried out:

   All cargo discharge lines and wash system lines must prove to be tight and free of leaks. The test will be effected with crude oil, to a pressure ranging between 150 p.s.i. and 175 p.s.i.

   The main cargo pumps safety devices, i.e.: pump casing and bearing temperature gauges and high temperature alarms, pump overspeed trips, remote emergency stops, pump reverse rotation alarms, cargo pump trip for low inert gas pressure, must be tested and found fully operational.

2. All openings to all cargo tanks must be securely closed and the pressure/vacuum valves set in the operational position.
3. All in and out valves of sea water heater must be closed.
4. The crude supply for the washing system will be secured directly from the main discharge lines or from separate tank cleaning lines connected directly to the main cargo pumps.

   The pressure used for "COW" will be 140 p.s.i. maximum. In the case of vessels equipped with washing system supply coming direct from the main discharge lines, such back pressure of 140 p.s.i. will be achieved by closing down completely on manifold valve or two manifold valves, if necessary.

   In the case of vessels equipped with a separate tank cleaning line, the 140 p.s.i. back pressure will be achieved by controlling the main cargo pump revolutions and it will not be necessary to close any manifold valves.

   Whichever manifold is used the shore hoses, or hard arms, will not be pressurised for crude washing purposes.

5. Before commencing crude washing any tank, the oxygen content of the inert gas supply must be checked and must not be more than 5%. In addition the atmosphere in the tank to be washed must be checked and must not be more than 5%.

   The inert gas system must be capable of supplying positive pressure to all cargo tanks during all discharging and crude washing operations. In the event that pressure in the cargo tanks falls to 4 in. W.G. the system will automatically stop all cargo pumps. Before crude washing each tank, its pressure must be checked and must not be lower than 20 in. W.G.

6. The tanks will be washed in two stages:

   Top Wash: When the level in the tank is down to 15 ft. innage the top two/thirds of the tank will be washed, using all machines in the tank simultaneously, on a pressure of max. 140 p.s.i. The washing pattern will be from 40° to 120° elevations. During top washing the tank will continue to be pumped out on the main cargo pumps.

   Bottom Wash: The top wash cycle will normally be completed when the tank is draining out on the main cargo pumps. The washing machines will be stopped and reset to the bottom wash pattern (from 0° to 40° elevation). The tank main suction will be closed and the stripping suction opened.

   When the tank is dry, bottom washing will commence using a maximum of four machines in the tank to ensure good drainage throughout the bottom wash cycles.

   On completion of the bottom wash cycles, the machines will be stopped and the cargo system will revert to normal discharge operations.

7. The whole "COW" operation will be carried out under the di supervision of a responsible Officer well acquainted with "CO and tank cleaning, who will be assigned to this supervision ta by the Master.

   The necessary personnel will be put at the disposal of t responsible Officer by the Master, to carry out "COW" operatio and, in particular, one man equipped with VHF radio will stationed at the manifold throughout discharge operations.

   Before commencing "COW", the responsible Offic supervising the operation will discuss, in detail, the wh operation with Receivers' Representative and will carefu observe any provisions issued by Port Authorities and Receivers in relation to "COW".

   If during "COW" operations the Master and/or the responsi Officer judge, at any time, that the operational conditions do n ensure total safety, all "COW" operations will be stopped at onc

DENSITY: The average salinity of the water in the Port of Ancona 17.5 gr. per litre of chloride.

FRESH WATER: Along all the quays are numerous supply points w rates varying from 15 to 25 t.p.h. Vessels in the roads can be supplie with drinking water via the port tugs.

FUEL: Vessels moored at berths can be supplied by tanker barge. T supplier is S.P.A. API from their marine refinery at Falconara.

Requests for bunkers must be submitted to the ship's Agent at lea 72 hours in advance, Saturdays and holidays excepted. Any type product can be supplied.

FIRE FIGHTING FACILITIES: Apart from the water hydrants along t quays, which, if need be, can be used for coupling to hoses for f fighting purposes, the port of Ancona has a fire brigade equipped w fire engine, together with other means on land and water.

The fire brigade is near the marine station at Berth No. 13. Apart fro facilities on land, there are 2 craft available, one of which is hig sophisticated. Telephone: 201715.

If necessary, at very short notice, the town fire brigade can be cal to the scene, their equipment consists of a fire engine with pumps a ladders and other modern means of efficient fire fighting. Telephon 115.

In port, there are the following maritime means for combating fire

a) A motor launch of the port captaincy with fire fighting hoses a also the ability to spray foam.

b) 2 motor barges with pumping facility operated by the port f brigade, having the following characteristics:

Vessel "VV.F.207" – speed 11 knots, equipped with 2 fire fighti pumps each capable of delivering 6,000 litres per min. at a pressure 10 atmospheres and driven by 2 Fiat Aifo 260 h.p. engines each; 2 liqu foam pumps; 2 foam projectors; 2 foam tanks with a total capacity 5,800 litres; 20 delivery pipes with 70 UNI unions, 400 m. overall; delivery pipes with 45 UNI unions, 220 m. overall; 1 comet porta projector, 2 fixed foam projectors; 16 UNI 70 hose attachment points UNI 150 ditto; 2 double tube cannons for mixed usage (water and foa 1 electrical compressor giving 5 atm. pressure; 2×500 watt projecto of which 1 is portable with 100 m. of cable; 1 retransmitter appara attached exclusively to the apparatus operated by the fire brigade. 6 port tugs having the following characteristics:

Tugs "Luisella" and "Tiziana" – TSL 485 – speed 14 knots – 5,000 h – equipped with 2 exhaust pumps in the deck on starboard and p sides; regulation fire fighting equipment; 2 motor driven pumps; internal use 2 pumps connectable to those on deck; internatio attachments and points; equipped with radar, radio and echo sound

Tug "Katria Prima" – TSL 140 – speed 12.5 knots – 1,014 h.p equipped with 1 monitor; 4×45 mm. swivel guns; thermo-mechanic electric pump of 60 t.p.h. capacity; foam tank – fitted with radar; rad echo sounder.

Tug "Luisa Davanzali" – TSL 238 – speed 12.5 knots; equipped wi 1×30 t.p.h. fire fighting pump; 2 exhauster pumps of 50 t.p.h. and 1 200 t.p.h. capacity; radar, radio, echo sounder, gyroscopic compass

Tug "Cesare Davanzali" – TSL 364 – speed 14 knots – 1,800 h.p equipped with 2 electrical pumps of 200 cbm/hr. capacity for delive purposes and capable of attachment to Minimax equipment for f fighting purposes using foam with 2 cannon type projectors; in the de are 14 points for attachment of hoses; 2×1,000 kW. adjusta projectors; 1 motor compressor of the low pressure type working a pressure of 8 atm.; equipped with radar, radio, echo sounder.

Tug "Nuovo Ancona" – TSL 148 – engine power 1,014 h.p. equipp with 2 fixed exhauster pumps of total capacity of 500 t.p.h. driven 2×40 h.p. electric motors; 2 fixed fire fighting pumps, of capacity 250 t.p.h. total, driven by 2×40 h.p. electric motors; equipped with foa plant and projector; fire fighting pipes have 4 points with 70 mm. unio 1 portable exhauster pump of about 150 t.p.h. capacity – speed 12 kn – equipped with diving equipment – radio.

Tug "Luisa" 1,200 h.p.

CONSULS:

Sweden: Tel. 200252.
French Consular Agency: Tel. 206866.
Netherlands: Tel. 200764.
Denmark: Tel. 200252.
Belgium: Tel 896811.

REPAIRS: It is possible to effect repairs of all types at yards within t port, and at the large electrical and mechanical repair undertakings the town.

Cantieri Navali Riuniti (for large construction). Tel: 5951.
Cantiere Morini (also has available a floating dock for vessels u 1,000 g.r.t. and slipways). Tel: 202224.
Cantiere Castracani (slipway). Tel: 55663.
Cantiere Riparazioni Navali (pleasure craft). Tel: 204323.
Cantiere Tecno-Matic (fibreglass units). Tel: 53643.
Cooperativa Metallurgica G. Tomassi (only for steel vessels). T 204303.
Ditta EL.ME.A. (marine electrical equipment). Tel: 29409.
Ditta Schiavoni (marine electrical equipment). Tel: 55731.

DRY DOCKS: There is only one small floating dock in which it is possible to carry out repairs to vessels up to 1,000 g.r.t. The dock is owned by Cantieri Navali Morini. Tel: 204303.
SURVEYORS: In Ancona the Registro Italiano Navale has a town office at via Marsala No. 8. Tel: 202204. R.I.N.A. acts for the following foreign classification bodies: Germanischer Lloyd, Nippon Kaiji Kyokai, Jugoslavinski Registar Brodova and Register of Shipping of the U.S.S.R.
GANGWAY/DECK WATCHMEN: This service is advisable but not compulsory. In Ancona is a security firm "Istituto di Vigilanza Urbana e Campestre" di Dattilo Salvatore. Tel: 201784.
HATCHES: Hatches are opened by the crew where they are of the automatic type, and by the port labour force where they are of the conventional type. Hatches are re-closed in the event of rain.
CUSTOMS ALLOWANCES: On arrival in port, all goods under Customs exemption must be placed under seal. At the completion of Customs inspection, the Master may request the Customs officers permission to supply the following goods:

50 cigarettes for each Crew member.
1 kg. of salt for every 50 persons.
50 grams of sugar per person per day.
15 grams of coffee per person per day.
Liquor – small quantities to be agreed with the Customs officials according to the time of year.

REPATRIATION: It is possible to effect exchange of foreign Crew members on board foreign vessels since there is in the port an office of the Frontier Police.

For repatriation purposes, the following travel connections are available:

Train: Via the Ancona/Bologna/Rome line; via the Ancona to Rome direct line and via the Ancona/Pescara/Bari line.

Air: Departures from the Falconara Marittima Airport which is 10 km. from the port and reached by bus. There are 2 daily departures to Milan, 1 to Pescara and 1 to Rome.

Sea: the following lines are available:
From 1st January – 31st December, Wednesdays (1330 hrs.) and Saturdays (2200 hrs.) to Patras by Greek vessel "Mediterranean Sea". From 1st October – 30th May, Mondays (0900 hrs.) Tuesdays (0030 hrs.) and Fridays (1700 hrs.) to Zara and Spalato by Italian vessel "Tintoretto". From 1st June – 30th September daily departure to Zara by Jugoslav vessel "Illirija". From 1st June – 30th September every Thursday (1300 hrs.) and Sundays (2200 hrs.) to Patras by vessel "Mediterranean Sky". From 1st June – 30th September every Saturday (2200 hrs.) per Panamanian vessel "Neptunia" to Patras, Corfu and Haifa. From 1st June – 30th September every Tuesday (2200 hrs.) to Patras per Greek vessel "Patris". From 1st June – 30th September every Wednesday (1300 hrs.) and Saturday (2200 hrs.) departures to Patras and Higoumenitza by Greek vessel "Ionian Star". From 1st June – 30th September every Tuesday (1700 hrs.) departures to Dubrovnik by Italian vessel "Tintoretto".

There are other possiblities of connections with Greece and Yugoslavia. The information can be obtained by telephoning the following Agents:

Adriatica	Tel: 204915.
Morandi	Tel: 202033.
Paroletti	Tel: 56789.
Archibugi	Tel: 202223.

These Agents manage the lines and can give times and frequencies of sailings.
TIME: GMT plus 1 hour. From 29th March to 26th September, GMT plus 2 hours.
HOLIDAYS: Every Sunday, 1st January (New Year); the Monday after Easter; 25th April (Liberation); 1st May (Labour Day); 4th May (Town's Patron Saint's Day); 15th August (Assumption); 1st November (All Saints); 8th December (Immaculate Conception); 25th December (Christmas); 26th December (St. Stephen's).

Work is possible on all these days, but at an increased rate.
POLICE/AMBULANCE/FIRE: Port Police 201030. Town Police 202860. Yellow Cross Ambulance 55622. Red Cross Ambulance 22680. Port Fire Brigade 201715. Town Fire Brigade 22222.
TELEPHONES: It is not possible to connect telephone lines on board vessels. In the port there are numerous telephone boxes for national and local communications and where it is possible to telephone to any part of the world.
SERVICES: The following special services are available in Ancona:

Tank washing at Falconara Marittima by the "crude oil washing" system, compass adjusting, repairs to radar or other electronic instruments on board and underwater work.
SHORE LEAVE: Foreign Crew members may go ashore from 0800 until 0200 hrs. the next morning provided they have a pass stamped by the Port Police. Beyond 0200 hrs. a special permit from the police is necessary to allow an overnight stay outside the port area.
SPECIAL REGULATIONS: Vessels of draft greater than 30 ft. mooring at berths on the South mole are secured a short distance off the quay by means of dolphins.
DELAYS: No delays.
NOTICE: *Regulations concerning navigation, fishing and anchoring in vicinity of API installations:*

1. It is forbidden for any vessel or craft whatsoever, with the exception of vessels intended to operate at the API installations:
a) to transit, remain or anchor within a radius of 1 nautical mile centred on the installations;
b) to anchor and fish by whatever means within a radius of 1 nautical mile centred on the installations quoted;
c) to anchor, engage in bottom fishing or engage in any activity on the sea bed within the area limited by the following points:

A – Lat. 43° 40′ 20″ N., Long. 13° 24′ 57″ E.
B – Lat. 43° 44′ 28″ N., Long. 13° 30′ 42″ E.
C – Lat. 43° 44′ 12″ N., Long. 13° 31′ 09″ E.
D – Lat. 43° 39′ 42″ N., Long. 13° 24′ 57″ E.

2. In the areas of the sea mentioned in No. 1, all vessels and craft in general which accidentally become entangled with anchors, fishing equipment or similar, underwater pipe-lines, must obligatorily abandon such equipment on the bottom in order to obviate damage to it and inform as quickly as possible the Maritime Authority.
3. Regulation No. 11/86 of 22.2.86 is in force.
4. Those contravening this current regulation, provided that their action does not constitute the cause of a serious reaction, will be pursued within the terms of Article 1164 of the Navigation Code and must compensate for the damage caused. It is obligatory for all entities whatsoever to observe and cause to be observed the terms of the present regulation.

Signed: The Commandant of the Port of Ancona.
Date: 22nd February 1986.

DEVELOPMENTS: 5 deep water berths (920 m.) to be constructed. Existing breakwater to be extended. New breakwater (300 m.) to be constructed.
AUTHORITY: Capitaneria di Porto Ancona, Banchina Nazario Sauro 12, 60100 Ancona, Italy. *Tel:* 071-51697. *Telex:* 561529 Compan I. *Cables:* Compamare Ancona. *Contact:* Francesco Colli, Harbour Master and Port Director. Paolo Castellani, Assistant Harbour Master. Allesandro Pavlidi, Port Captain.

ARBATAX, Sardinia: 39.57 N. 09.42 E. (See Plan)

SHIPMASTER'S REPORT: September 1980.

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the roads 5 – 7 cables Northwards of the light of East Breakwater. Pilot leads vessel to the place for anchoring and also delivers on board all local documents and forms for completing for arrival clearance.
PILOTAGE: Not compulsory, but only available in daytime for entering. On leaving port the Pilot is available day and night. VHF Channel 16. Pilot boat black hull, about 6 m. in length, white house, on which is painted "Pilotti"; vessel awaits the Pilot Northward of the light of East Breakwater between breakwaters and Isola D'Oliastra Islet in position: Lat. 39° 57.24′ N., Long. 09° 42.95′ E., depth on roadstead from 10 m. to 30 m., good holding ground.
MAX. SIZE: Vessels of 200 m. length and max. draft 25 ft. 00 in. have entered.
HEALTH: Free Pratique may be requested by radio to "Sanimare Arbatax" between 12 to 6 hours prior to arrival, advising vessel's name, nationality, last port, number of crew and passengers and state of health on board. If from another Italian port Free Pratique is granted automatically.
VHF: Port Authority on Channels 16 and 11 from 0700 hrs. – 1900 hrs.
TUGS: One tug with sufficient power for assisting in manoeuvres is available, ship's lines used. Tug takes lines in the roads and accompanies vessel to the port. Prior to mooring vessel drops anchor with about 3 shackles, tug turns the stern of the ship towards the pier, after which the ropes from fore and aft are transported and secured on the pier, tug pushes vessel alongside the pier on the port-side. The chain is slackened until 5-6 shackles out.
BERTHING:

Banchina Ovest – length 450 m. – depth 25 ft.
Banchina Postal – length 100 m. – depth 15 ft.
Banchina Centrale – length 100 m. – depth 15 ft.
Banchina Sud – length 80 m. – depth 15 ft. (for Ro/Ro ships only).

CRANES: One private mobile crane, 6 tons capacity, for discharging pulpwood at Banchina Ovest.
MEDICAL: Advise Agent of any requirements.
DENSITY: 1025.
FRESH WATER: Only from water barges.
FUEL: Pipe-line 250 mm. in diameter from store tanks on shore to the terminal at the head of the West pier.
HATCHES: Opening/closing is normally carried out by ship's crew. Winchmen from stevedoring company or ship's crew.
CUSTOMS ALLOWANCES: Depends on flag of vessel.
REPATRIATION: Regular line of ferry boats, train to Cagliari close to which there is an airport.
TIME: GMT plus 1 hour from 29th March to 26th September, GMT plus 2 hours European time.
HOLIDAYS: 1st January (New Year's Day), 25th April (Liberation Day), 1st May (Labour Day), 15th August (Assumption), 1st November (All Saint's Day), 8th December (Local Religious Holiday), 25th December (Christmas Day), 26th December (Boxing Day).
IDENTIFICATION CARDS: Special shore passes issued by local police, against passports.
DEVELOPMENTS: Present basin will be dredged to 9 m., new basin close to present one will be constructed with depth of up to 10 m.
AUTHORITY: Ufficio Circondariale Marittimo, 08041 Arbatax, Sardinia, Italy. *Contact:* Antonio Camboni, Port Commandant. *Tel:* (0782) 667093, 667072.

AUGUSTA (including Priolo and Melilli): 37.13 N. 15.14 E. **(See Plan)**

LOCATION: Augusta – Position refers to Torre Avolos Old Lighthouse in position Lat. 37° 12′ 37″ N., Long. 15° 13′ 34″ E.

Priolo – Same position as Augusta, Priolo lays on Southern part of harbour including a chemical pier outside the breakwaters. The port is under the jurisdiction of Siracusa.

Melilli – Correct name is Siracusa Santa Panagia, located 6 miles South of Augusta. Lat. 37° 06′ 30″ N., Long. 15° 15′ 40″ E.

Largest scale charts: B.A. 181-187. U.S. 53000-53200-53201. Italian 270-271.

PORT LIMITS: A line drawn between Santa Croce Lighthouse and Magnisi Lighthouse defines the seaward limits of the Port of Augusta.

A line drawn between Punta Magnisi and Punta Santa Panagia defines the seaward limits of the port of Santa Panagia.

DOCUMENTS: Ship's information must be sent by telex to Compamare Augusta, or to Compamare Siracusa for Santa Panagia, 24 hours before arrival (see "examples" below) in accordance with instructions issued by European Economic Community No. 79/116.

Crew Lists (at least 4 copies).
Custom Manifest.
Passenger Lists (4 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.

The following documents must be sent to Harbour Master's Office:

Certificate of Registry.
Civil Liability Certificate (for tankers only).
Information Note of Arrival.
Additional Declaration of Departure.
Cargo and Gear Safety Certificate.
Safety Construction Certificate.
Italian Light Dues.
Tanker Check List (to be presented to Pilot for acknowledgement).

In addition ships bound for the Esso Terminal must also radio the refinery, Rafinesso Augusta, via Roma Radio (IAR) 72 hours and 48 hours before arrival, giving ETA in local time and following advice:

Bill of Lading quantities in long tons, metric tons, gross bbls./net bbls.

Slop quantity, water percentage, tank number. If slop mixed with cargo, advise quantity cargo in slop tank.

Arrival draft.

Temperature of cargo for vessel carrying atmospheric residues and catfeeds.

For tankers calling to load: 72 hours prior arrival send cargo layout, preferred order of loading and number of grades ship can load at same time.

Examples: Messages sent to vessels:

Vessel Over 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessels data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, IGS yes/no, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull machinery in good order.

Vessel under 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull, machinery in good order.

Chemical Carriers:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, certificate of fitness/IMO yes/no, last port and confirm that all apparatus, hull, machinery are in order.

Vessel's reply:

To: Harbour Master, Augusta.
Telex: 972336 Compau I

Vessel Features	Capo Argento, IBMX, Italian Flag, g.r.t. 2,976, d.w.t. 4,500, LOA 100 m. max. draft 5.95 m.
ETA Pilot	Pilot Augusta, 2nd December, 0600 hrs.
Agent	Mayflower Shipping Agency
Reason of Call	Unloading 1,400 tonnes Ethylene
Cargo	Ethylene 1,400 tonnes
SOLAS	Available SOLAS 74/Prot 78
IOPP	Expiring 30th April, 1986
CLC	Expiring 20th February, 1986
Paris Memo	Athens 19th September, 1985/No Prescription
IMO	Expiring December 1985
Last Port	Porto Torres
Remarks	In good order Master Capo Argento

PILOTAGE: Compulsory for vessels over 500 g.r.t. – 24 hours service – Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above. Weather permitting, Pilot boards about 1 mile East of port main entrance – In case of bad weather, the pilot boat will station itself just inside the entrance and instructions to proceed will be given to vessels by VHF. Upon request, to facilitate vessels, or for other special reasons, Pilot can board up to 3 miles off the normal embarkation point.

Pilot charges vary with vessel's g.r.t., for hours between sunrise to 0800 hrs. and 1700 hrs. to sunset, for night hours, for Sundays and holidays, for flammable and explosive cargo and for boarding over 1 mile from main breakwater.

ETA to be confirmed 1 hour before arrival, calling "Augusta P Station" on VHF Channel 12. In case of no radio contact, vessels m stop about 2 miles Eastward of the breakwater and hoist or flash international code signals.

The pilot boat has a black painted hull with a white band and wh superstructure with the word "Piloti" painted on both sides.

For Santa Panagia (Melilli), Pilot will board 1 mile seaward from Pun Santa Panagia for vessels incoming from South and 1 mile seawa from Punta Magnisi for vessels incoming from North. Pilot should contacted on VHF Channel 14. Second Pilot recommended by Loc Authorities for vessels of 60,000 g.r.t. or above.

APPROACHES: There are 2 entrances: the main one is situat between the central and northern breakwaters, with leading lights on heading of 273° 51′ – Entrance is about 260 m. wide, with a depth ov 36 m. in the middle, and may be used day and night.

Note: Vessels entering should be lined up on the leading lights/mar 1 mile before entrance and ship departing 0.5 miles before exit. In ca of controversy Harbour Master will ask for documentation of abo positions.

Santa Panagia is an open road and berthing to ISAB Terminal allowed in daytime only.

A current may cross the entrance after prolonged periods of win weather. The leading lights/marks are sometimes obscured by smo from the industrial plants in the Southern part of the harbour. Na vessels and outbound traffic have the right of way when passing throu the harbour entrance.

Santa Panagia:

(a) Masters are cautioned when approaching Santa Panagia by nig as there are no navigational aids in this area. Only 2 lighthous (Murro di Porco Lighthouse to the South and Cape S. Cro Lighthouse to the North) can be used to fix the position of t vessel. In the landfall however, their bearings are opposite a therefore useless. Radar must be in good operating condition

(b) Tunny nets are laid down in the area and marks can temporarily missing and small fishing boats engaged in net fishi may be encountered up to 8 miles from the coast; these boa carry no special marks or lights to indicate that they are usi nets.

(c) Naval ships quite often exercise off the East coast of Sic particularly in an area including Augusta to the North a extending well South of Syracuse.

Two submarine exercise areas are close to this part of the coa

(d) A current may cross the entrance of the bay as well as the termin area after prolonged periods of windy weather.

ANCHORAGES: Pilot compulsory inside and outside the breakwate within the port limits.

The Inner Anchorage has a central zone with a depth of water n less then 22.4 m.

Outside it is recommended to anchor South of Main Entranc because North of it there are many limitations.

For Santa Panagia Pilot compulsory inside the harbour limits – vesse anchoring outside of this line are not considered to be in port a consequently without port dues.

MAX. SIZE: VLCCs can enter the harbour with tug assistance, with t following limitations: 69 ft. draft for operations in the road (bunkers provisions – crew changes) and 66 ft. 10 in. with a max. displaceme of 450,000 tons to moor alongside SELM Priolo Supertanker Jetty. F Santa Panagia no limitations.

HEALTH: Vessels arriving from countries not suspect of epidemic diseases can ask and receive Free Pratique by radio, sending a telegra not more than 24 hours before arrival to "Sanimare Augusta" via Ro Radio (IAR) or "Sanimare Siracusa" for the Port of Santa Panag Arrivals from Italian or EEC Ports are considered clear.

It is necessary to request Free Pratique by radio because Hea Officers do not board vessel from sunset to 0800 hrs.

The Office of the Health Department is located at Via Lungoma Rossini. Tel: (0931) 974920.

RADIO: Augusta Radio P.T. Listening on 2182 kHz. Working on 16 and 2260 (24 hour service).

VHF: Augusta Radio P. T. Call Channel 16, working Channels 26 a 27 (24 hour service).

Harbour Master (Channel 16).
Pilots (Channel 12). Working 24 hours.
Tugs and Line Handlers (Channel 8). Working 24 hours.
Taxi-boats (Channel 10) From 0600 to 2330 hrs.
Agents Connection (Channel 9). Office hours.
Traffic Control (Channels 9 and 12). Working 24 hours.

TUGS: Tugs available in the harbour: 4×2,000 h.p., 2×2,400 h 3×2,500 h.p., 2×1,200 h.p. and 1 tug on stand-by/emergency 2,600 h.p.

Harbour service: 6 tugs on duty from 0700 – 1200 hrs. and from 13 – 1800 hrs. 3 tugs available from 1800 – 2200 hours and 2 tugs availa from 2200 – 0700 hrs.

Tugs' charges vary with vessel's g.r.t., for hours between 0001 – 08 hrs, 1200 – 1300 hrs., 1700 – 2359 hrs., for Saturday, Sunday a holidays, for service exceeding 1 hour, for operations at SELM – Pri Terminal.

For Santa Panagia there are 3 tugs available, 1 tug can be emplo from Syracuse Harbour – additional tugs can be supplied from Augu Harbour.

Use of tugs is compulsory for berthing and unberthing. The num of tugs allocated is decided by the Harbour Authority according to gr tonnage. Because of tug crew duty rosters, the most suitable tugs not always be available. Tugs make fast on the hook after the ves has cleared the entrance, using ship's ropes. Pilots communicate w tugs via VHF portable radios which they bring on board with them.

Line Handlers: Service is performed with 1 launch for vessels of l than 10,000 g.r.t. and 2 launches for vessels above 10,000 g.r.t.

Wires are not accepted but may be used when provided with a 5 Manila or other fabric end tail with eye.

Charge varies with vessel g.r.t., flammable and explosive cargo, rain, waiting time (1 hour delay), overtime from 0600 – 0800 hrs., 1200 – 1300 hrs., 1700 – 2000 hrs., night hours, Saturday, Sunday, holidays, lines above the total of 8 and mooring on dolphins/buoys.

BERTHING: *Commercial Wharves:*
Ro/Ro Pier: Length 260 m. Depth 12.0 m.
Banchina di Riva: Length 246 m. Depth 12.0 m.
Commercial Quay: Length 255 m. Depth 12.0 m.

Consortium Jetty: Length 738 m. Depth at seaward end 12.2 m. 6 berths available. With Port Authority permission vessels may berth to discharge dirty ballast or transhipment cargoes.

MACET: Berth Nos. 1, 2 and 3 are at a finger jetty. Berth Nos. 1 and 3 used only by coasters and bunkering barges. Depth 12 ft. Berth No. 2 used by vessels up to 25,000 d.w.t. on stern discharge. Depth 28 ft. (see "Plan").

Enichem Augusta: Punta Cugno – Berth Nos. 3, 4, 5 and 5 Bis.

Berth No. 3 Northern Jetty used by Enichem Augusta for discharging and loading chemical products. Berth accepts vessels up to 3,000 d.w.t. mooring alongside. Depth 17 ft.

Berth No. 4 (Mid Jetty) used by Enichem Augusta for barges.

Berth No. 5 (Southern Jetty) used by Enichem Augusta for vessels up to 30,000 d.w.t. moored by stern for loading/discharging black/white products and chemicals. Depth alongside 30 ft.

Berth No. 5 Bis used by Enichem Augusta. It is a steel island connected to Berth No. 5 for vessels up to 5,000 d.w.t. for loading/discharging black/white products and chemicals. Depth alongside 21 ft.

Esso: Pier No. 1: Length of pier about 1,050 m. Heading 110°.

Berth No. 6: Used only by bunker barges.

Berth No. 7: For vessels up to 10,000 d.w.t. with LOA 197 ft. – 525 ft. Depth of water 35 ft. Pipe-lines with connection of 6 in. Loading rate 150 t.p.h. – 900 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore. Stern loading only.

Berth No. 8: For vessels up to 38,000 d.w.t. with LOA 197 ft. – 820 ft. Depth of water 35 ft. Pipelines with connections of 8 in. Loading of gasoline, JP/5, benzine and bitumen. Loading rate 165 t.p.h. – 900 t.p.h. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h. Shore capacity 20,000 tons.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, receiving tankers up to 90,000 d.w.t. with LOA 230 ft. – 909 ft. Depth of water 51 ft. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6 in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 140,000 d.w.t. with LOA 504 ft. – 974 ft. Depth of water 54 ft. Loading of all products as No. 10 except lube oil. Connections 10 in. No night-time movements for vessels over 60,000 g.r.t.

At about 400 m. from end platform there are 2 smaller platforms (Berths No. 9 and 12).

Berth No. 9: Receiving tankers up to 10,000 d.w.t. with LOA 197 ft. – 469 ft. Depth of water 26 ft. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 6 in. – 24 in.

Berth No. 12: For tankers up to 12,000 d.w.t. with length 213 ft. – 492 ft. Depth of water 28 ft. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Unicem: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. Used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day. Berths No. 13 Bis and 14 Bis recently completed but not yet in use.

N.A.T.O. Pier: Berth Nos. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

SELM-Priolo: Supertanker Jetty: For vessels up to 420,000 d.w.t. Berth Nos. 17 to 24 at SELM Jetty; Berth Nos. 25 and 26 at Steel Island; Berth No. 27, for vessels up to 20,000 d.w.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line. Connections: 16 in. for crude and 8 in. for products.

SELM concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, for vessels up to 20,000 d.w.t. Berth No. 31, for vessels up to 30,000 d.w.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, for small tankers only.

Berth No.	*Depth* (ft.)	*Max. Draft* (ft.)	*Max. DWT*

ENICHEM – ANIC: (Carichi Liquidi): Is situated in Priolo's Cove. Chemical products are handled. Berth No. 33, for vessels up to 3,000 d.w.t. Berth No. 34, for vessels up to 15,000 d.w.t. Berth No. 35 and No. 36 used by small vessels only.

Also see "Shipmaster's Reports".

Santa Panagia: *Berthing Procedure:* At all berths vessels are berthed so as to head outwards. The vessel approaches the berth almost perpendicularly to the pier and with the aid of tugs (generally 6 for a VLCC) and swung seaward, to approach the berth with an angle of about 45°. When at safe distance from the berth and almost in position, the vessel is then swung parallel to the berth and pushed alongside.

No anchor is used, however, both must be ready for any emergency. The following are the maximum landing speeds:

Berth No. 1: 25,000 d.w.t., 22.5 cm./sec.
50,000 d.w.t., 17.0 cm./sec.
Berth No. 2: 10,000 d.w.t., 25.0 cm./sec.
30,000 d.w.t., 30.0 cm./sec.
Berth No. 5: 250,000 d.w.t., 14.5 cm./sec.
50,000 d.w.t., 21.0 cm./sec.
Berth No. 6: 385,000 d.w.t., 13.5 cm./sec.
50,000 d.w.t., 21.0 cm./sec.

Cautionary Advice: Masters are cautioned that prevailing strongest winds and the resulting swell can affect their stay alongside. It is therefore very important that vessels, particularly high freeboard ships pay particulary attention to moorings. The most efficient moorings are all wire moorings – mixed moorings of different stretch characteristics and breaking strain should be avoided, particularly in breast lines and springs.

Moorings reeled on winches must be held by brakes hardened up to full torque. No self-tensioning devices should be used. The mooring must be reeled in such a direction as to assist the break. Where split drum winches are used, a maximum to 2 layers should be on the working drum when the mooring reaches the shore bollard/mooring hooks. Brake must be in good condition.

There are limits applicable to freeboard from a windage point of view. This together with maximum operable wind speeds will be discussed with Master's of VLCC by a Terminal Supervisor. The vessel must be held firmly against the fenders at all times. It is unnecessary and dangerous to slack away lines, even if they appear taut, if the ship is not hard against the fenders.

The minimum recommended is 2 spring lines and 2 breast lines at each end.

Melilli: *Operator:* Industria Siciliana Asfalti and Bitumi (ISAB).

The terminal is situated 6 miles South of Augusta, 5 miles North of Syracuse, Sicily. The Marine Terminal is connected to the Refinery storage through 5 lines for LPG and 18 large diameter pipe-lines for Crude and Products which allow for high unloading and loading rates.

All berths are equipped to ensure rapid and safe operations.

Clean and dirty ballast discharge facilities, including ballast reception tanks of 100,000 cu.m. (0.6 million barrels) are available.

A sheltered harbour accommodates service boats and 3 modern 2,000 h.p. tugs are permanently available.

When more tugs are required, additional units are supplied from nearby Augusta.

Bunkering facilities are available on all berths and sea-going barges are operating from the Terminal and from a sheltered harbour equipped for bunkering purposes.

Crude Oil Transhipment: The marine facilities are also suited for transhipment from ULCC-VLCC to smaller tankers better fitted to serve various refinery and/or pipe terminal locations in the Mediterranean and Adriatic.

Crude and Product Storage: 8 tanks are available for incoming crude with a total capacity of 800,000 cu.m. (5 million barrels).

Semi-finished (intermediate) product storage enables the operation of plant units when upstream sections are not available for short periods and contributes to Refinery flexibility.

In particular there is large storage of fuel oil and gas oil fractions and 12 motor fuel component storage tanks.

Total intermediate storage in 27 tanks, amounting to 431,000 cu.m. (2.7 million barrels).

Finished product storage is in 38 tanks of various grades with a capacity of 825,000 cu.m. (5.2 million barrels).

A further 42,000 cu.m. (0.25 million barrels) are held in Refinery service tanks.

Jetty: Deep water is available close to the shore at the jetty side. The marine facilities consist of a finger with 5 berths having the following capabilities and restrictions:

Berth No. 6: Vessels of minimum 18,000/max. 600,000 d.w.t. Max. LOA 1,200 ft. max. draft 78 ft. For unloading crude and loading fuel oil.

Berth No. 5: Vessels of minimum 18,000/max. 250,000 d.w.t. Max. LOA 1,200 ft. Max. draft 78 ft. For unloading crude and loading fuel oil, gasoil and gasoline.

Berth No. 1: Vessels of minimum 5,000/max. 55,000 d.w.t. Max. LOA 790 ft. Max. draft 42 ft. 6 in. For unloading crude and loading all products.

Berth No. 2: Vessels of minimum 10,000/max. 30,000 d.w.t. Max. LOA 650 ft. Max. draft 36 ft. For unloading crude and loading all products except LPG.

Berth No. 7: Vessels of minimum 500/max. 3,000 d.w.t. and LPG carriers of minimum 500/max. 1,500 d.w.t. Max. LOA 320 ft. Max. draft 18 ft. For loading all products.

Somicem-Magnisi: Sea berth, stern mooring for loading crude oil – max. 22,000 g.r.t. Draft 36 ft.

Also see "Agent's Report".

STEVEDORES: Available from Compagnia Lavoratori Portuali.

CRANES: *Heavy Lifts:* Floating cranes with lifting capacity of 20 tons – 94 tons at a distance of 27 m. – 12 m. are available.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.
TANKERS: See "Agents Report" for accomplishments required before entering the Harbour and "Berthing" for facilities.

All petroleum product carriers, chemical and gas tankers calling at Augusta for loading or discharging must confirm, by cabling the Harbour Master, that the responsible officers taking care of loading/discharging/handling operations, fulfil the requirements according to IMO Convention STCW/78 and are in possession of relevant valid certificates.
DENSITY: 1025, however it may be reduced by heavy rain.
FRESH WATER: Good quality potable water available by barges.
FUEL: All grades available by pipe-line or barge at anchorage, max. draft 65 ft.

Suppliers Esso, Agip, I.P., Shell, Mobil and Gulf. 48 hours notice required.
CONSULS:

Denmark	Tel: (0931) 977470.
Liberia	Tel: (0931) 975341.
Norway	Tel: (0931) 978544.

REPAIRS: Not permitted to tankers while alongside refineries jetties, may be carried out, while at anchorage, subject to Harbour Master's authorisation. If repairs to engine or it will affect the proper use of engine or in any way restrict the capability of manoeuvring the ship, continuous tugboat assistance may be imposed. Light steel, carpentry and routine maintenance is available from small local shipyards. Also electronic and electrical services.
DRY DOCKS: One floating dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons. Ships up to 5,000 g.r.t. can be moored alongside the dry dock for light repair operations.

One floating dock, length 115 m., breadth 22.0 m. Lifting capacity 2,750 tons.
SURVEYORS: Available.
GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable. Employment of shore fire guards advisable.
OPENING/CLOSING HATCHES: Normally by ship's crew.
CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.
REPATRIATION: No difficulties.
AIRPORT: Nearest at Catania, can be reached in 40 minutes (distance 40 km. by car). Daily flights to Rome and Milan for international connections. Weekly flights to North Europe capitals available.
TIME: GMT plus 1 hour. Summer time, last Sunday in March to last Sunday in September, GMT plus 2 hours.
HOLIDAYS: Tankers not affected. 1st January; Easter Monday; 25th April; 15th August; 8th December; 25th December.
POLICE/FIRE/AMBULANCE: Boundary and Immigration Police, Tel: 113; Police (Carabinieri), Tel: 112; Ambulance, Tel: 971122; Fire, Tel: 974777.
TELEPHONES: Situated at all berths, not for private use. No direct connection to vessels.
SHORE LEAVE: Immigration Police issues shore passes to permit the landing of the crew and passengers.
IDENTIFICATION CARDS: Shore passes given by Immigration Police.
GENERAL: *Garbage removal:* Compulsory service on arrival and every 24 hours thereafter.

SHIPMASTER'S REPORT: June 1982.
If landing a sick crew member, Pilot will board and vessel anchors inside the breakwaters. Harbour Master and assistant boarded to check that ship's certificates all valid. All usual entry papers required except Crew Declaration and Stores List, but total quantity of cigarettes required. Crew Lists on IMO Fal Form 5. Cables sent to Agents on Sundays and holidays should include Telex number in address otherwise they are not delivered until the next day.

We were anchored about 1.5 hours and the Pilot stayed on board. It was necessary to send ashore some crew members to assist with the stretcher, but they brought it back with them.

EEC Tanker Check List required.

SHIPMASTER'S REPORT: April 1985.
Radio Pratique: Send radio message, 12 hours prior to arrival to "Sanimare Siracusa".
Pilotage: Pilot boards 1 mile North of Cabo Santa Panagia and is contacted by VHF Channel 14. Call sign is "Siracusa Pilots".
Fresh Water: Water is available by barge from Augusta so advance notice required.
Repairs: Normal repairs, but no welding can be carried out alongside.
Fuel: Bunkers are taken via pipe-line when loading/discharging.
Officials: All Officials come from Siracusa (Syracuse).
Ship Chandlers: Available.

SHIPMASTER'S REPORT: February 1987.
Vessel: 95,000 d.w.t.
Berth: Santa Panagia Oil Terminal (formerly Mellili).

Pilot boards to anchor the vessel. He boards about 1 mile N.E. of Santa Panagia. The anchorage is in deep water, bottom mud and clay.

After anchoring, Agent boards with Harbour Master to check vessel's documents. As is usual at Italian ports, 3 firemen live on board.

1 tug each end, 2 ship's lines, 1 tug pushing, their lines taken ashore by boat. Tugs are paid by the hour (i.e. 1 hour 5 mins. = 2 hours' pay).

Shore passes required and shore leave is by boat to boat harbour. Ship's stamp required on all documents.

SHIPMASTER'S REPORT: May 1987.
Port : Priolo.

Vessels are directed to proceed to Santa Panagia Bay by the Agent. It comes under the jurisdiction of Siracusa. Pilots are picked up at Siracusa or off the berth. This appears to be dependent on what berth movements there are.

Anchorage is close off the berth or in Siracusa Bay. Vessel is charg for anchorage whether used or not.

There are no known restrictions at the berth.

Stores appear to be a considerable problem, due to Custom Regulations, so cancelled our requirements. Laundry was ve expensive.

Shore leave is by launch from ship. No walking along jetty is allowe Passes are supplied by Agents.

Master or his deputy *must* visit Harbour Master's Office to sight a sign for having seen Italian Notices to Mariners.

SHIPMASTER'S REPORT: October 1987 (Updated February 1988)
Documents:

6 Copies Crew List.
2 Copies Crew Declaration.
2 Copies Manifest.
1 Copy Health Declaration.
1 Copy Arms and Ammunition List.
6 Copies Cargo Manifest.
All Passports.

The port is a naval port and tends to be very strict with documentatio All the certificates are to be sited by the Harbour Master and a de officer before they are taken ashore to the Harbour Master's Offic Shore passes are issued.
Charts: BA. Charts No. 966 and 1941.
Approaches: Mount Etna is often seen visually at about 60 miles. It behind Catania about 20 miles to the North of Augusta. The Catan area often shows up on the radar at over 70 miles. Cape Spartivento a good radar target at 80 miles.

In the vicinity of Augusta, Siracusa and Cape Morro Di Porco ha proved to be good radar targets at over 40 miles.

There is a Racon (G) on the North beacon (green) at the ma breakwater entrance.
Pilotage: Pilotage is available throughout 24 hours. Daytime movemen only are carried out at certain berths. If vessel has to await berthing s can always anchor inside the breakwater. The pilotage service is goo and efficient. Many traffic movements take place in the port.

The Pilot boards from a fast black hulled 'Speedcutter'. If the weath is good he will board 0.5 miles outside the breakwater and if the weath is poor he will board inside the breakwater heads. VHF Channel 12 used for communicating with the pilots. He may also be contact through the Port Authority telex (Telex No. 0043912336 COMPAU The Pilot requires an EEC Tanker Check List. Overtime rates charg between 1900 hrs. and 0800 hrs.
Anchorages: The anchorages off Augusta are generally poor, especi in bad weather as the bottom shelves rapidly and the holding ground poor. The best anchorage for large vessels is about 100° T at a distan of one mile from the Southern Breakwater entrance (anchorage prohibited within 1 mile of the entrance). Small vessels anchor in th northern area near Porto Xifonio. A favoured anchorage area for larg vessels away from Augusta is at Bahia Dis Panagia which is abo 4 miles South of Augusta. The alternative area is in the Bay of Sime which is about 6.5 miles South of Catania. This Bay is open and th holding ground is quite good, thereby allowing vessels to drag safe In February 1988 the coastguard moved us away and told us that o Catania or Augusta could be used for waiting.

Vessels nominated to berth or for services (bunkering, stores, et anchor inside the breakwater and under Pilot's guidance. Small vesse use Waiting Area "A". Vessels can drag in strong winds so a seco anchor and engines to be kept in readiness.
Health: Vessels are to request "Free Pratique" from Sanimare Augus Telex No. 0043 970817 AUG RT, 24 hours before arrival or earlie arriving from a nearby port. The vessel is to answer standard Wo Health Declaration questions. The agent will confirm Free Pratiq before the Pilot boards. Free Pratique not necessary if from EEC count
Tugs: Many tugs available. Ship's lines are used.

For Tankers, the following applies:

GRT	500 – 2,000	inward 1 tug	outward None
	2,000 – 5,000	inward 1 tug	outward 1 tug
	5,000 – 12,000	inward 2 tugs	outward 1 tug
	over 12,000	inward 2 tugs	outward 2 tugs

For Dry Cargo vessels under 5,000 G.R.T. no tugs required inwa or outward.

If over 5,000 G.R.T. the table above applies.
Berthing: The port is mainly for oil products and gases. There is o berth for fertilisers near the Southern Breakwater. All berths in the p are numbered.

For gas products Pontile Montecantini, just outside Augusta So Breakwater, is used and it handles all gas products.

Pontile Super Petrolier (Berth No. 18 – inner North side) which is South of the Military Pier also handles gas products. All berths are w fendered. Mooring boats are used.

At Pontile Montecantini which is well exposed in the Winter moorings consist of 2 head/stern lines, 2 breast lines and 2 springs ea end. Vessels berth head out at all piers. At Pontile Montecantini vess berth on either side, the North side berth is No. 34. The use of the p gangway is compulsory. It is used by pier personnel only. The offsh anchor is used when berthing.
Cargo: Pontile Montecantini Pier - Priolo: Vessel required to nitrog purge to less than 0.2% and less than −50°C dewpoint in 13 ho (2,756 cu.m.) at about 1,000 cu.m.p.h. The surveyor was not ofte attendance, the ship's staff did all the monitoring.

The propylene Chicksan is 6 in. with a 6 in. vapour return to sh flare.

Shore maximum loading rate 250 t.p.h. Temperature in tank −4 giving a manifold temperature of −44°C. The shore minimum rat cooling down is 20 t.p.h. The requested supply rates adhered to c closely by the terminal. Only a little English was spoken by the staff. There is a shore stop for minimum/maximum.

Pontile Super Petroliere: For LPG mixture, Propane 25%, Butane 75%.

Hydraulic Boom/hose arrangement is 6 in. 300 ASA with 2 in. vapour hose attached. Shore reducer supplied, shore labour connect/disconnect hoses. Max. rate 200 t.p.h. Temperature LPG mix −4°C. Density 0.5667 at 15°C. Ship stop only. On presentation of Bill of Lading, watch difference; we were presented with shore/ship difference of 45 tonnes for discharge Tripoli, Libya. Understand this happens from time to time.

Fresh Water: Fresh water is available by barge throughout 24 hours at all berths. Any quantity of water can be supplied at a fast pumping rate using the barge hoses.

General: Boat service is provided by calling on VHF Channel 10, give the vessel's berth number or anchorage position. This is the only way to get ashore as walking down the piers is not permitted.

Shore passes are required.

Bunker barges are operated on VHF Channel 9. They are suitable for attending large tankers but are very awkward when supplying small gas vessels.

There are numerous ship chandlers available at the port, the produce is good and the prices are reasonable.

As this port is a Naval port it is under very strict control of the Military Harbour Master. They monitor gas vessels very closely.

Daily rubbish collection is compulsory.

The nearest airport is at Catania which is about 20 miles to the North.

Customs board after the Agent. Immigration matters now carried out ashore.

AGENT'S REPORT:

The following is a copy of a telex received from a ship's Agent in February 1980.

From: Seafox – Shipping Agents and Bunker Brokers. Head Office: Via Garibaldi, 3/5. Phones : (0931) 977470-978544. Telex: 970072 BONMAR I. Cable: Seafox Augusta Tlx. 970072. 96011 Augusta, Sicily.

We are acting as Shipping Agents in Augusta-Siracuse-Melilli (ISAB) ports and in this connection we take the liberty to advise you of new ordinance issued by Ports Authority in Augusta and Siracuse Ports in order to be able to inform through your good publication well known over the world.

Port Information:

According to instructions issued by European Economic Community No. 79/116, please be advised that Augusta Port Authority introduced a new Ordinance, to apply immediately, as follows:

Quote:

All Masters of petroleum-gas-chemical tankers, having d.w.t. 1,600 and over, with full or partial cargo or in ballast and not gas-free. Before entering or leaving Italian ports must comply with following regulations:

1. In due time, before entering territorial waters adjacent to the port, cable via Romaradio to their Agents:
   (a) Ship's name and call letters.
   (b) Ship's flag.
   (c) Length and draft.
   (d) Destination port and ETA.
   (e) Quantity and quality on board.
   (f) If ship carrying chemical products in bulk, Master's declaration to be in possession of safety equipment and construction certificate to carry chemical products in bulk, according to IMO Code.
   (g) If ship carrying chemical products in bags or liquid gas in containers, Master's declaration to be in possession of the appropriate certificate, according IMO Code.
2. On Pilot boarding vessel, Master must submit following Check List, duly filled, to the Pilot:

(a) Vessel's details:

1. Ship's name.
2. Flag.
3. Owners.
4. Port of Registry.
5. Year built.
6. Gross tonnage.
7. Length.
8. Classification.
9. Call letters.
10. Kind of propulsion.
11. Agents.
12. Propulsion apparatus-horsepower.
13. Draft forward.
14. Draft aft.
15. Draft amidships.
16. Cargo (according to cargo plan).
17. Quality.
18. Quantity.

(b) Safety Equipment

		Good Working Order (Yes)	*Deficiencies* (No)

(d) Master and Crew on board

Description of Title and Number – issued certificates of . . . . .
Date issued . . . .
Place issued/country . . . .

Master
Chief Mate
Second Mate
Third Mate
Chief Engineer
First Engineer
Second Engineer
Third Engineer
Radio Officer
Pilot on board
Remaining other crew members, deck and engine

Date . . . .
Master's signature or Master's Representative (if applicable)

Unquote

Please kindly instruct all Masters to comply accordingly in order to avoid delay in entering the port.

These same regulations apply for Melilli Port (ISAB Terminal) except for first part of information which all Masters have to cable directly to "Compamare Siracusa" via Romaradio in due time before arrival.

AUTHORITY: Capitaneria di Porto, 96011 Augusta. *Tel:* (0931) 978922, 978695. *Telex:* 972336. *Contact:* Captain Pietro Trovato Gangemi, Port Commandant.

BAGNOLI: 40.48 N. 14.10 E. (See Plan)

DOCUMENTS: An arrival report containing vessel's main particulars and data of certificates has to be filled in by Port Officer upon arrival.

5 Crew Lists.
5 Passenger Lists.
Stores List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Bagnoli Pilot is permanently on watch as from 0600 to 0600 hrs. Usual Pilot position is Lat. 40° 47′ 30″ N., Long. 14° 08′ 10″ E. Pilotage is compulsory for vessels over 500 g.r.t. for anchoring or entering the port. Permanent watch is maintained by pilot station on VHF Channel 9 and/or 12. Vessel requiring Pilot may also use other international signals, such as flag, morse/sound letter "G". When in port vessels to give pilot station 1 hour's notice for any service required. In the event of bad weather (Bagnoli area is mainly exposed to S.W. winds) vessels to shift out of piers or to change anchorage to Baia Roads (sheltered natural bay 3 miles from Bagnoli in a Westerly direction).

ANCHORAGE: Depth of safe anchorages in Bagnoli area and in Baia Roads ranging from 20 m. to 45 m. – sandy bottom. Anchorage is allowed in the line from the lighthouse of Nisida Island to the lighthouse of Capo Miseno.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: See "Berthing"

HEALTH: Free Pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimare, Naples.

RADIO: Naples Radio.

TUGS: Presently no tug available, if required they come from Naples. Time taken approximately 2 hours.

BERTHING: *Italsider Ore/Coal Discharging Pier:* Two berths available. Pier length 357 m. Berth accommodation length 200 m. – max. draft allowed when berthing in Westerly direction is 41 ft. 6 in. – max. draft allowed when berthing in an Easterly direction is 36 ft. with H.T. This pier is equipped with two turntable gantry cranes and conveyor belts. Ore discharging rate: 1,100 t.p.h. Coal discharging rate: 900 t.p.h. All necessary stevedoring services are performed by Italsider with their own personnel. Cranes capacity: 32 tons. Fresh water available.

Italsider Loading Pier: Equipped with 6 turntable cranes and rails – max. draft allowed on both berths is 10.5 m. Fresh water available.

Federconsorzi Discharging Pier: Equipped with a fixed gantry crane and aerial ropeway for discharging of phosphates and pyrites. Discharging rate per shift of 8 hours – 450 tons. Max. draft allowed is 5.40 m. Fresh water available.

Tide Range: Approximately 30 cm.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge. Vessels at anchor supplied with fresh water by barge from Naples.

FUEL: All types available, always delivered by barge, normally oil companies require 48 hours notice.

CONSULS: At Naples.

REPAIRS: Small repairs undertaken.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: (For entire duration of stay). Tobacco, 50 cigarettes per crew member. Spirits: 1 bottle (opened) per crew member.
TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.
HOLIDAYS: See "Naples".
POLICE/AMBULANCE/FIRE: Police 7602553; Ambulance 7520696, 258044 (Ospedale S. Paolo); Fire 7330210 and 7605353.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
GENERAL: *Launch Hire:* Vessels waiting at anchor for their turn may hire launch for crew shore leave and relevant service performed from 0700 to 2400 hrs.

The Port of Bagnoli is mainly used for the discharge of ores, minerals, coal and for the loading of steel products for account of the Italsider S.p.A., metallurgic industrial group of national interest, operating with its own shore appliances. Manufacturers of chemical products, the Federconsorzi of Naples, operate in the Port of Bagnoli also with their own shore appliances.
AUTHORITY: Capitaneria di Porto di Napoli, Sezione Staccata di Bagnoli, Via Coroglio 10 Bis, Napoli. *Tel:* 7232272. *Cables:* Seziomare Bagnoli. *Contact:* Sandro Musto, Captain of the Port.

BARI: 41.08 N. 16.51 E. (See Plan)

DOCUMENTS: On arrival:
5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.
Health Documents.
On departure:
Additional declaration of departure.
PILOTAGE: Pilot boards vessels on arrival by motor-boat one mile N.W. of the head of the main breakwater. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port. The Pilot Office is located at Berth No. 13 (Tel. 080-5211507) and listens on VHF Channels 16 and 12.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.
ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.
Prohibited Anchorage: Anchoring is prohibited near the port entrance and the point of union of the heads of the S. Cataldo Mole and the third arm of the New Foraneo Mole, due to the presence of underwater pipelines.

From 1st June to 30th September, it is prohibited for all vessels to anchor in front of the Port of Bari, included between the land and the line extending 239° for 2.5 miles from the S. Cataldo Lighthouse.
RESTRICTIONS: Max. depth at harbour entrance 40 ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

Night berthing and unberthing is restricted for vessels exceeding 5,000 g.r.t. because of the unavailability of the tugs. Only 1 tug is available for 24 hours a day and a second tug only between 0700 – 2200 hrs. and with 24 hours advance notice.
MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.
HEALTH: Masters can request Free Pratique by radio by applying to "Sanimare Bari". Free Pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.
RADIO: Radio Roma, call sign "IAR." Bari Radio P.T. call sign "IPB" on 2182 kHz. and VHF Channel 16.
VHF: Port Captain's Office on Channel 16 from 0800 hrs. – 2000 hrs.
TUGS: The use of tugs is optional. However, their use can be made temporarily compulsory on the instructions of the Maritime Authority for certain types of vessels, taking account of the type of cargo carried, as well as in the event of unfavourable weather conditions or security requirements in the port and of vessels.

The use of tugs for tankers over 1,600 g.r.t. is compulsory during the operations of arrival and sailing and manoeuvring inside the port. Tankers from 1,600 g.r.t. to 5,000 g.r.t. use 1 tug, and tankers over 5,000 g.r.t. use 2 tugs.

The service is provided by the Societa Rimorchiatori Napoletani with offices on Berth No. 8 (Tel. 080-219342), using tugs of 1,100 h.p. and 800 h.p. The tugs provide service from 0700 hrs. – 1900 hrs., and listen on VHF Channels 6 and 12.

After the hours of service, the tankers, moored at S. Cataldo Mole containing, or which have contained, oil products in Category "A", must alternatively:
(a) Put into action the inertion plants for the tanks in question containing, or which have contained, the oil products, provided such plants are installed.
(b) Use the available assistance service for the discharge operations provided by the tugs.
(c) Leave the berth, and proceed to the outer roads to await th return again to the S. Cataldo Berth, when the tug servi recommences.

BERTHING: When specific side alongside berth is required b stevedores, Agents radio Master prior arrival and advise Pilot. Otherwis side alongside at Master's option after conferring with Pilot. Depth a piers 10 ft. – 47 ft. dependent location. No shore fenders alongsid quays.

BULK HANDLING FACILITIES: Grain discharge by 2 suction pipes rate of 90 to 100 metric t.p.h. each.
CARGO HANDLING EQUIPMENT:
Electric jib cranes on rails on the Eastern (Levante) Berth:
2 × 6/7 tons capacity.
2 × 6/15/24 tons capacity.
Electric jib cranes on the Deposito Franco Berth:
2 × 3 tons capacity.
Mobile cranes:
1 × 30 tons capacity.
2 × 100 tons capacity.
1 × 150 tons capacity.
Lift trucks:
1 × 42 tons capacity with telescopic spreader for 20 ft., 30 ft. a 40 ft. containers.
1 × 27 tons capacity with spreader for 20 ft. and 40 ft. containers
1 × 14 tons capacity.
1 × 12 tons capacity.
3 × 6.5 tons capacity.
2 × 4 tons capacity.
2 × 3 tons capacity.

STEVEDORES: Important to give ETA in good time. Normal wor hours: Winter time (weekdays), 0800 – 1200 hrs., 1300 – 1700 h Saturdays, 0800 – 1300 hrs. Summer time (weekdays), 0800 1200 hrs., 1400 – 1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 – 0800 hrs. the tariff to be increased 2 1200 – 1300 hrs., 50%; 1700 – 2000 hrs., 25%; 2000 – 0600 hrs., 7

For handling pieces over 1,000 kilos, increase of 50% on the ta For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 – 0800 hrs. the tariff to be increased 10 0800 – 1200 hrs., 50%; 1400 – 1800 hrs., 50%; 1200 – 1400 hrs., 10 1800 – 2400 hrs., 100%.
MEDICAL: Not necessary for Agents to receive advance notic required medical attention. Hospital facilities available.
TANKERS: Not allowed to do any degassing of tanks or any kin repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspectio tankers and gas-free certificate can be obtained. Only clean ballas be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. p line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline

Crude oil discharged to Stanic Refinery from Berths No. 31 and N (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 3 and 34.

Deballasting Facilities: There is a shore capacity for 6,500 tons of ballast water. All S. Cataldo Berths are served by a common 12 in. deballast line. On each berth a dirty product arm is used for deballasting line partially made of concrete), the normal deballasting rate is 250 t.p.h. The maximum pressure being limited to 42 p.s.i.

For this reason it is suggested to arrive at berth with minimum safe manoeuvring ballast quantity.

No slop facilities are available.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths, except Molo Pizzoli, at a rate of 20 t.p.h. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

IDENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

SURVEYORS: 1.There are cargo inspectors available; these can be obtained from S.G.S. Tel: 080/410333.

2. The representative of Lloyd's Register in the port is Lorusso.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended, shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permited to be held out of bond but no spirits allowance permitted.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff increased as follows: From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police 291111. Ambulance (First Aid) 444848. Fire 115.

EMERGENCY CO-ORDINATION CENTRE:

Bari Port Captaincy – Tel: 216860. On VHF Channel 16 from 0800 hrs. - 2100 hrs.

Bari Radio 'P.T.' on VHF (listens throughout 24 hours) on Channel 16.

BANKS: Banca Commerciale Italiana, Via Abate Gimma No. 87, 70100 Bari Tel: 080 – 216680.

Credito Italiano, Via Putignani No. 98, 70100 Bari. Tel: 080-216771.

Banco di Roma, Via Calefati No. 82, 70100 Bari. Tel: 080-235300.

STORING: See "Prelims".

1. Vessels in port can be supplied by lorries.
2. Lorries with stores for vessels at quays, apart from normal Customs requirements, (if necessary), have to be authorised to enter the port.
3. Lorries with trailers can line up on the berths alongside the vessels. The process is subjected to the commercial operations on hand and /or the position of the vessel at the berth.
4. Fork lift trucks are never used for supplying stores to ships in this port.
5. For the supply of provisions there is the company S.p.A. Cianciola – Tel: 080/235260, 235261, 235262. Telex: 810021. Cianci I. P. O. B. 240, 70100 Bari who may be approached for any specific requirement. The same Company also has a large area in the port, as a free zone, for storage of goods.
6. Local unloaders can be employed to help in placing goods in store on board if required and available.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

AUTHORITY: Capitaneria di Porto – Bari, Corso de Tullio 1, 70100 Bari, Italy. *Tel:* 080-5216860. *Telex:* 812289. *Cables:* Compamare Bari. Also VHF Channel 16. *Contact:* Alfredo Fusco, Port Captain.

Consorzio del Porto di Bari, Molo S. Vito, Stazione Marittima Passeggeri, Bari, Italy. *Tel:* 080-5235205.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's Tonnage.
Load Line Certificate.
Derat Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Compulsory for vessels over 500 g.r.t., tankers and gas carriers. Pilotage available 24 hours.

Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of pilot station is "Piloti Porto, Brindisi". Characteristics of pilot boat: gross tonnage, 9.4; power, 65 h.p.; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 m. to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

VHF: Pilots on Channel 12 throughout 24 hours.

Port Authority on Channels 16 and 11, from 0700 hrs. – 1900 hrs.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne Junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (Centrigrade), 16/20; specific weight, 0.950/0.960. Gasoil, viscosity Engler at 20° (Centigrade), 1.4; specific weight, 0.830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

CONSULS: Vice-Consulate of Denmark, Portugal and Netherlands, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.

TANKERS: See "Agents Report" for accomplishments required before entering the Harbour and "Berthing" for facilities.

All petroleum product carriers, chemical and gas tankers calling at Augusta for loading or discharging must confirm, by cabling the Harbour Master, that the responsible officers taking care of loading/discharging/handling operations, fulfil the requirements according to IMO Convention STCW/78 and are in possession of relevant valid certificates.

DENSITY: 1025, however it may be reduced by heavy rain.

FRESH WATER: Good quality potable water available by barges.

FUEL: All grades available by pipe-line or barge at anchorage, max. draft 65 ft.

Suppliers Esso, Agip, I.P., Shell, Mobil and Gulf. 48 hours notice required.

CONSULS:

Denmark	Tel: (0931) 977470.
Liberia	Tel: (0931) 975341.
Norway	Tel: (0931) 978544.

REPAIRS: Not permitted to tankers while alongside refineries jetties, may be carried out, while at anchorage, subject to Harbour Master's authorisation. If repairs to engine or it will affect the proper use of engine or in any way restrict the capability of manoeuvring the ship, continuous tugboat assistance may be imposed. Light steel, carpentry and routine maintenance is available from small local shipyards. Also electronic and electrical services.

DRY DOCKS: One floating dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons. Ships up to 5,000 g.r.t. can be moored alongside the dry dock for light repair operations.

One floating dock, length 115 m., breadth 22.0 m. Lifting capacity 2,750 tons.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable. Employment of shore fire guards advisable.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

REPATRIATION: No difficulties.

AIRPORT: Nearest at Catania, can be reached in 40 minutes (distance 40 km. by car). Daily flights to Rome and Milan for international connections. Weekly flights to North Europe capitals available.

TIME: GMT plus 1 hour. Summer time, last Sunday in March to last Sunday in September, GMT plus 2 hours.

HOLIDAYS: Tankers not affected. 1st January; Easter Monday; 25th April; 15th August; 8th December; 25th December.

POLICE/FIRE/AMBULANCE: Boundary and Immigration Police, Tel: 113; Police (Carabinieri), Tel: 112; Ambulance, Tel: 971122; Fire, Tel: 974777.

TELEPHONES: Situated at all berths, not for private use. No direct connection to vessels.

SHORE LEAVE: Immigration Police issues shore passes to permit the landing of the crew and passengers.

IDENTIFICATION CARDS: Shore passes given by Immigration Police.

GENERAL: *Garbage removal:* Compulsory service on arrival and every 24 hours thereafter.

SHIPMASTER'S REPORT: June 1982.

If landing a sick crew member, Pilot will board and vessel anchors inside the breakwaters. Harbour Master and assistant boarded to check that ship's certificates all valid. All usual entry papers required except Crew Declaration and Stores List, but total quantity of cigarettes required. Crew Lists on IMO Fal Form 5. Cables sent to Agents on Sundays and holidays should include Telex number in address otherwise they are not delivered until the next day.

We were anchored about 1.5 hours and the Pilot stayed on board. It was necessary to send ashore some crew members to assist with the stretcher, but they brought it back with them.

EEC Tanker Check List required.

SHIPMASTER'S REPORT: April 1985.

Radio Pratique: Send radio message, 12 hours prior to arrival to "Sanimare Siracusa".

Pilotage: Pilot boards 1 mile North of Cabo Santa Panagia and is contacted by VHF Channel 14. Call sign is "Siracusa Pilots".

Fresh Water: Water is available by barge from Augusta so advance notice required.

Repairs: Normal repairs, but no welding can be carried out alongside.

Fuel: Bunkers are taken via pipe-line when loading/discharging.

Officials: All Officials come from Siracusa (Syracuse).

Ship Chandlers: Available.

SHIPMASTER'S REPORT: February 1987.

Vessel: 95,000 d.w.t.

Berth: Santa Panagia Oil Terminal (formerly Mellili).

Pilot boards to anchor the vessel. He boards about 1 mile N.E. of Santa Panagia. The anchorage is in deep water, bottom mud and clay.

After anchoring, Agent boards with Harbour Master to check vessel's documents. As is usual at Italian ports, 3 firemen live on board.

1 tug each end, 2 ship's lines, 1 tug pushing, their lines taken ashore by boat. Tugs are paid by the hour (i.e. 1 hour 5 mins. = 2 hours' pay).

Shore passes required and shore leave is by boat to boat harbour. Ship's stamp required on all documents.

SHIPMASTER'S REPORT: May 1987.

Port : Priolo.

Vessels are directed to proceed to Santa Panagia Bay by the Agent. It comes under the jurisdiction of Siracusa. Pilots are picked up at Siracusa or off the berth. This appears to be dependent on what berth movements there are.

Anchorage is close off the berth or in Siracusa Bay. Vessel is charg for anchorage whether used or not.

There are no known restrictions at the berth.

Stores appear to be a considerable problem, due to Custom Regulations, so cancelled our requirements. Laundry was ve expensive.

Shore leave is by launch from ship. No walking along jetty is allowe Passes are supplied by Agents.

Master or his deputy *must* visit Harbour Master's Office to sight a sign for having seen Italian Notices to Mariners.

SHIPMASTER'S REPORT: October 1987 (Updated February 1988)

Documents:

6 Copies Crew List.
2 Copies Crew Declaration.
2 Copies Manifest.
1 Copy Health Declaration.
1 Copy Arms and Ammunition List.
6 Copies Cargo Manifest.
All Passports.

The port is a naval port and tends to be very strict with documentatio All the certificates are to be sited by the Harbour Master and a de officer before they are taken ashore to the Harbour Master's Offic Shore passes are issued.

Charts: BA. Charts No. 966 and 1941.

Approaches: Mount Etna is often seen visually at about 60 miles. It behind Catania about 20 miles to the North of Augusta. The Catan area often shows up on the radar at over 70 miles. Cape Spartivento a good radar target at 80 miles.

In the vicinity of Augusta, Siracusa and Cape Morro Di Porco ha proved to be good radar targets at over 40 miles.

There is a Racon (G) on the North beacon (green) at the ma breakwater entrance.

Pilotage: Pilotage is available throughout 24 hours. Daytime movemen only are carried out at certain berths. If vessel has to await berthing sh can always anchor inside the breakwater. The pilotage service is goo and efficient. Many traffic movements take place in the port.

The Pilot boards from a fast black hulled 'Speedcutter'. If the weath is good he will board 0.5 miles outside the breakwater and if the weath is poor he will board inside the breakwater heads. VHF Channel 12 used for communicating with the pilots. He may also be contacte through the Port Authority telex (Telex No. 0043912336 COMPAU The Pilot requires an EEC Tanker Check List. Overtime rates charge between 1900 hrs. and 0800 hrs.

Anchorages: The anchorages off Augusta are generally poor, especia in bad weather as the bottom shelves rapidly and the holding ground poor. The best anchorage for large vessels is about 100° T at a distanc of one mile from the Southern Breakwater entrance (anchorage prohibited within 1 mile of the entrance). Small vessels anchor in th northern area near Porto Xifonio. A favoured anchorage area for larg vessels away from Augusta is at Bahia Dis Panagia which is abo 4 miles South of Augusta. The alternative area is in the Bay of Sime which is about 6.5 miles South of Catania. This Bay is open and th holding ground is quite good, thereby allowing vessels to drag safe In February 1988 the coastguard moved us away and told us that on Catania or Augusta could be used for waiting.

Vessels nominated to berth or for services (bunkering, stores, etc anchor inside the breakwater and under Pilot's guidance. Small vesse use Waiting Area "A". Vessels can drag in strong winds so a secon anchor and engines to be kept in readiness.

Health: Vessels are to request "Free Pratique" from Sanimare Augus Telex No. 0043 970817 AUG RT, 24 hours before arrival or earlier arriving from a nearby port. The vessel is to answer standard Wo Health Declaration questions. The agent will confirm Free Pratiq before the Pilot boards. Free Pratique not necessary if from EEC count

Tugs: Many tugs available. Ship's lines are used.

For Tankers, the following applies:

GRT	500 – 2,000	inward 1 tug	outward None
	2,000 – 5,000	inward 1 tug	outward 1 tug
	5,000 – 12,000	inward 2 tugs	outward 1 tug
	over 12,000	inward 2 tugs	outward 2 tugs

For Dry Cargo vessels under 5,000 G.R.T. no tugs required inwa or outward.

If over 5,000 G.R.T. the table above applies.

Berthing: The port is mainly for oil products and gases. There is o berth for fertilisers near the Southern Breakwater. All berths in the p are numbered.

For gas products Pontile Montecantini, just outside Augusta Sou Breakwater, is used and it handles all gas products.

Pontile Super Petrolier (Berth No. 18 – inner North side) which is South of the Military Pier also handles gas products. All berths are fendered. Mooring boats are used.

At Pontile Montecantini which is well exposed in the Winter t moorings consist of 2 head/stern lines, 2 breast lines and 2 springs ea end. Vessels berth head out at all piers. At Pontile Montecantini vess berth on either side, the North side berth is No. 34. The use of the p gangway is compulsory. It is used by pier personnel only. The offsh anchor is used when berthing.

Cargo: Pontile Montecantini Pier - Priolo: Vessel required to nitrog purge to less than 0.2% and less than −50°C dewpoint in 13 ho (2,756 cu.m.) at about 1,000 cu.m.p.h. The surveyor was not ofte attendance, the ship's staff did all the monitoring.

The propylene Chicksan is 6 in. with a 6 in. vapour return to sh flare.

Shore maximum loading rate 250 t.p.h. Temperature in tank −46 giving a manifold temperature of −44°C. The shore minimum rate cooling down is 20 t.p.h. The requested supply rates adhered to c closely by the terminal. Only a little English was spoken by the staff. There is a shore stop for minimum/maximum.

Pontile Super Petroliere: For LPG mixture, Propane 25%, Butane 75%.

Hydraulic Boom/hose arrangement is 6 in. 300 ASA with 2 in. vapour hose attached. Shore reducer supplied, shore labour connect/disconnect hoses. Max. rate 200 t.p.h. Temperature LPG mix −4°C. Density 0.5667 at 15°C. Ship stop only. On presentation of Bill of Lading, watch difference; we were presented with shore/ship difference of 45 tonnes for discharge Tripoli, Libya. Understand this happens from time to time.

Fresh Water: Fresh water is available by barge throughout 24 hours at all berths. Any quantity of water can be supplied at a fast pumping rate using the barge hoses.

General: Boat service is provided by calling on VHF Channel 10, give the vessel's berth number or anchorage position. This is the only way to get ashore as walking down the piers is not permitted.

Shore passes are required.

Bunker barges are operated on VHF Channel 9. They are suitable for attending large tankers but are very awkward when supplying small gas vessels.

There are numerous ship chandlers available at the port, the produce is good and the prices are reasonable.

As this port is a Naval port it is under very strict control of the Military Harbour Master. They monitor gas vessels very closely.

Daily rubbish collection is compulsory.

The nearest airport is at Catania which is about 20 miles to the North.

Customs board after the Agent. Immigration matters now carried out ashore.

AGENT'S REPORT:

The following is a copy of a telex received from a ship's Agent in February 1980.

From: Seafox – Shipping Agents and Bunker Brokers. Head Office: Via Garibaldi, 3/5. Phones : (0931) 977470-978544. Telex: 970072 BONMAR I. Cable: Seafox Augusta Tlx. 970072. 96011 Augusta, Sicily.

We are acting as Shipping Agents in Augusta-Siracuse-Melilli (ISAB) ports and in this connection we take the liberty to advise you of new ordinance issued by Ports Authority in Augusta and Siracuse Ports in order to be able to inform through your good publication well known over the world.

Port Information:

According to instructions issued by European Economic Community No. 79/116, please be advised that Augusta Port Authority introduced a new Ordinance, to apply immediately, as follows:

Quote:

All Masters of petroleum-gas-chemical tankers, having d.w.t. 1,600 and over, with full or partial cargo or in ballast and not gas-free. Before entering or leaving Italian ports must comply with following regulations:

1. In due time, before entering territorial waters adjacent to the port, cable via Romaradio to their Agents:
   (a) Ship's name and call letters.
   (b) Ship's flag.
   (c) Length and draft.
   (d) Destination port and ETA.
   (e) Quantity and quality on board.
   (f) If ship carrying chemical products in bulk, Master's declaration to be in possession of safety equipment and construction certificate to carry chemical products in bulk, according to IMO Code.
   (g) If ship carrying chemical products in bags or liquid gas in containers, Master's declaration to be in possession of the appropriate certificate, according IMO Code.
2. On Pilot boarding vessel, Master must submit following Check List, duly filled, to the Pilot:

(a) Vessel's details:

1. Ship's name.
2. Flag.
3. Owners.
4. Port of Registry.
5. Year built.
6. Gross tonnage.
7. Length.
8. Classification.
9. Call letters.
10. Kind of propulsion.
11. Agents.
12. Propulsion apparatus-horsepower.
13. Draft forward.
14. Draft aft.
15. Draft amidships.
16. Cargo (according to cargo plan).
17. Quality.
18. Quantity.

(d) Master and Crew on board

Description of Title and Number – issued certificates of. . . . .
Date issued . . . .
Place issued/country . . . .

Master
Chief Mate
Second Mate
Third Mate
Chief Engineer
First Engineer
Second Engineer
Third Engineer
Radio Officer
Pilot on board
Remaining other crew members, deck and engine

Date. . . . .

Master's signature or Master's Representative (if applicable)

Unquote

Please kindly instruct all Masters to comply accordingly in order to avoid delay in entering the port.

These same regulations apply for Melilli Port (ISAB Terminal) except for first part of information which all Masters have to cable directly to "Compamare Siracusa" via Romaradio in due time before arrival.

AUTHORITY: Capitaneria di Porto, 96011 Augusta. *Tel:* (0931) 978922, 978695. *Telex:* 972336. *Contact:* Captain Pietro Trovato Gangemi, Port Commandant.

BAGNOLI: 40.48 N. 14.10 E. (See Plan)

DOCUMENTS: An arrival report containing vessel's main particulars and data of certificates has to be filled in by Port Officer upon arrival.

5 Crew Lists.
5 Passenger Lists.
Stores List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Bagnoli Pilot is permanently on watch as from 0600 to 0600 hrs. Usual Pilot position is Lat. 40° 47′ 30″ N., Long. 14° 08′ 10″ E. Pilotage is compulsory for vessels over 500 g.r.t. for anchoring or entering the port. Permanent watch is maintained by pilot station on VHF Channel 9 and/or 12. Vessel requiring Pilot may also use other international signals, such as flag, morse/sound letter "G". When in port vessels to give pilot station 1 hour's notice for any service required. In the event of bad weather (Bagnoli area is mainly exposed to S.W. winds) vessels to shift out of piers or to change anchorage to Baia Roads (sheltered natural bay 3 miles from Bagnoli in a Westerly direction).

ANCHORAGE: Depth of safe anchorages in Bagnoli area and in Baia Roads ranging from 20 m. to 45 m. – sandy bottom. Anchorage is allowed in the line from the lighthouse of Nisida Island to the lighthouse of Capo Miseno.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimare, Naples.

RADIO: Naples Radio.

TUGS: Presently no tug available, if required they come from Naples. Time taken approximately 2 hours.

BERTHING: *Italsider Ore/Coal Discharging Pier:* Two berths available. Pier length 357 m. Berth accommodation length 200 m. – max. draft allowed when berthing in Westerly direction is 41 ft. 6 in. – max. draft allowed when berthing in an Easterly direction is 36 ft. with H.T. This pier is equipped with two turntable gantry cranes and conveyor belts. Ore discharging rate: 1,100 t.p.h. Coal discharging rate: 900 t.p.h. All necessary stevedoring services are performed by Italsider with their own personnel. Cranes capacity: 32 tons. Fresh water available.

Italsider Loading Pier: Equipped with 6 turntable cranes and rails – max. draft allowed on both berths is 10.5 m. Fresh water available.

Federconsorzi Discharging Pier: Equipped with a fixed gantry crane and aerial ropeway for discharging of phosphates and pyrites. Discharging rate per shift of 8 hours – 450 tons. Max. draft allowed is 5.40 m. Fresh water available.

Tide Range: Approximately 30 cm.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge. Vessels at anchor supplied with fresh water by barge from Naples.

FUEL: All types available, always delivered by barge, normally oil companies require 48 hours notice.

CONSULS: At Naples.

REPAIRS: Small repairs undertaken.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: (For entire duration of stay). Tobacco, 50 cigarettes per crew member. Spirits: 1 bottle (opened) per crew member.
TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.
HOLIDAYS: See "Naples".
POLICE/AMBULANCE/FIRE: Police 7602553; Ambulance 7520696, 258044 (Ospedale S. Paolo); Fire 7330210 and 7605353.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
GENERAL: *Launch Hire:* Vessels waiting at anchor for their turn may hire launch for crew shore leave and relevant service performed from 0700 to 2400 hrs.

The Port of Bagnoli is mainly used for the discharge of ores, minerals, coal and for the loading of steel products for account of the Italsider S.p.A., metallurgic industrial group of national interest, operating with its own shore appliances. Manufacturers of chemical products, the Federconsorzi of Naples, operate in the Port of Bagnoli also with their own shore appliances.
AUTHORITY: Capitaneria di Porto di Napoli, Sezione Staccata di Bagnoli, Via Coroglio 10 Bis, Napoli. *Tel:* 7232272. *Cables:* Seziomare Bagnoli. *Contact:* Sandro Musto, Captain of the Port.

BARI: 41.08 N. 16.51 E. (See Plan)

DOCUMENTS: On arrival:
5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.
Health Documents.
On departure:
Additional declaration of departure.

PILOTAGE: Pilot boards vessels on arrival by motor-boat one mile N.W. of the head of the main breakwater. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port. The Pilot Office is located at Berth No. 13 (Tel. 080-5211507) and listens on VHF Channels 16 and 12.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.
ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.
Prohibited Anchorage: Anchoring is prohibited near the port entrance and the point of union of the heads of the S. Cataldo Mole and the third arm of the New Foraneo Mole, due to the presence of underwater pipelines.

From 1st June to 30th September, it is prohibited for all vessels to anchor in front of the Port of Bari, included between the land and the line extending 239° for 2.5 miles from the S. Cataldo Lighthouse.
RESTRICTIONS: Max. depth at harbour entrance 40 ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

Night berthing and unberthing is restricted for vessels exceeding 5,000 g.r.t. because of the unavailability of the tugs. Only 1 tug is available for 24 hours a day and a second tug only between 0700 – 2200 hrs. and with 24 hours advance notice.
MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.
HEALTH: Masters can request Free Pratique by radio by applying to "Sanimare Bari". Free Pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.
RADIO: Radio Roma, call sign "IAR." Bari Radio P.T. call sign "IPB" on 2182 kHz. and VHF Channel 16.
VHF: Port Captain's Office on Channel 16 from 0800 hrs. – 2000 hrs.
TUGS: The use of tugs is optional. However, their use can be made temporarily compulsory on the instructions of the Maritime Authority for certain types of vessels, taking account of the type of cargo carried, as well as in the event of unfavourable weather conditions or security requirements in the port and of vessels.

The use of tugs for tankers over 1,600 g.r.t. is compulsory during the operations of arrival and sailing and manoeuvring inside the port. Tankers from 1,600 g.r.t. to 5,000 g.r.t. use 1 tug, and tankers over 5,000 g.r.t. use 2 tugs.

The service is provided by the Societa Rimorchiatori Napoletani with offices on Berth No. 8 (Tel. 080-219342), using tugs of 1,100 h.p. and 800 h.p. The tugs provide service from 0700 hrs. – 1900 hrs., and listen on VHF Channels 6 and 12.

After the hours of service, the tankers, moored at S. Cataldo Mole containing, or which have contained, oil products in Category "A", must alternatively:
(a) Put into action the inertion plants for the tanks in question containing, or which have contained, the oil products, provided such plants are installed.
(b) Use the available assistance service for the discharge operations provided by the tugs.
(c) Leave the berth, and proceed to the outer roads to await return again to the S. Cataldo Berth, when the tug serv recommences.

BERTHING: When specific side alongside berth is required stevedores, Agents radio Master prior arrival and advise Pilot. Otherw side alongside at Master's option after conferring with Pilot. Depth piers 10 ft. – 47 ft. dependent location. No shore fenders alongsi quays.

1 × 14 tons capacity.
1 × 12 tons capacity.
3 × 6.5 tons capacity.
2 × 4 tons capacity.
2 × 3 tons capacity.

STEVEDORES: Important to give ETA in good time. Normal work hours: Winter time (weekdays), 0800 – 1200 hrs., 1300 – 1700 Saturdays, 0800 – 1300 hrs. Summer time (weekdays), 0800 1200 hrs., 1400 – 1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 – 0800 hrs. the tariff to be increased 25 1200 – 1300 hrs., 50%; 1700 – 2000 hrs., 25%; 2000 – 0600 hrs., 70

For handling pieces over 1,000 kilos, increase of 50% on the ta For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 – 0800 hrs. the tariff to be increased 100 0800 – 1200 hrs., 50%; 1400 – 1800 hrs., 50%; 1200 – 1400 hrs., 100 1800 – 2400 hrs., 100%.
MEDICAL: Not necessary for Agents to receive advance notice required medical attention. Hospital facilities available.
TANKERS: Not allowed to do any degassing of tanks or any kind repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspection tankers and gas-free certificate can be obtained. Only clean ballast be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. p line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline

Crude oil discharged to Stanic Refinery from Berths No. 31 and N (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 3 and 34.

Deballasting Facilities: There is a shore capacity for 6,500 tons of ballast water. All S. Cataldo Berths are served by a common 12 in. deballast line. On each berth a dirty product arm is used for deballasting line partially made of concrete), the normal deballasting rate is 250 t.p.h. The maximum pressure being limited to 42 p.s.i.

For this reason it is suggested to arrive at berth with minimum safe manoeuvring ballast quantity.

No slop facilities are available.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths, except Molo Pizzoli, at a rate of 20 t.p.h. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

IDENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

Austria
Belgium
Bolivia
Denmark
Ethiopia
France
Germany F.R.
Greece
Liberia
Monaco
Netherlands
Norway
Portugal
Spain
Sweden
Switzerland
Turkey
United Kingdom

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

SURVEYORS: 1.There are cargo inspectors available; these can be obtained from S.G.S. Tel: 080/410333.

2. The representative of Lloyd's Register in the port is Lorusso.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended, shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permited to be held out of bond but no spirits allowance permitted.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff increased as follows: From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police 291111. Ambulance (First Aid) 444848. Fire 115.

EMERGENCY CO-ORDINATION CENTRE:

Bari Port Captaincy – Tel: 216860. On VHF Channel 16 from 0800 hrs. - 2100 hrs.

Bari Radio 'P.T.' on VHF (listens throughout 24 hours) on Channel 16.

BANKS: Banca Commerciale Italiana, Via Abate Gimma No. 87, 70100 Bari Tel: 080 – 216680.

Credito Italiano, Via Putignani No. 98, 70100 Bari. Tel: 080-216771.

Banco di Roma, Via Calefati No. 82, 70100 Bari. Tel: 080-235300.

STORING: See "Prelims".

1. Vessels in port can be supplied by lorries.
2. Lorries with stores for vessels at quays, apart from normal Customs requirements, (if necessary), have to be authorised to enter the port.
3. Lorries with trailers can line up on the berths alongside the vessels. The process is subjected to the commercial operations on hand and /or the position of the vessel at the berth.
4. Fork lift trucks are never used for supplying stores to ships in this port.
5. For the supply of provisions there is the company S.p.A. Cianciola – Tel: 080/235260, 235261, 235262. Telex: 810021. Cianci I. P. O. B. 240, 70100 Bari who may be approached for any specific requirement. The same Company also has a large area in the port, as a free zone, for storage of goods.
6. Local unloaders can be employed to help in placing goods in store on board if required and available.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

AUTHORITY: Capitaneria di Porto – Bari, Corso de Tullio 1, 70100 Bari, Italy. *Tel:* 080-5216860. *Telex:* 812289. *Cables:* Compamare Bari. Also VHF Channel 16. *Contact:* Alfredo Fusco, Port Captain.

Consorzio del Porto di Bari, Molo S. Vito, Stazione Marittima Passeggeri, Bari, Italy. *Tel:* 080-5235205.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's Tonnage.
Load Line Certificate.
Derat Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Compulsory for vessels over 500 g.r.t., tankers and gas carriers. Pilotage available 24 hours.

Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of pilot station is "Piloti Porto, Brindisi". Characteristics of pilot boat: gross tonnage, 9.4; power, 65 h.p.; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 m. to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

VHF: Pilots on Channel 12 throughout 24 hours.

Port Authority on Channels 16 and 11, from 0700 hrs. – 1900 hrs.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne Junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (Centrigrade), 16/20; specific weight, 0.950/0.960. Gasoil, viscosity Engler at 20° (Centigrade), 1.4; specific weight, 0.830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

CONSULS: Vice-Consulate of Denmark, Portugal and Netherlands, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

AUGUSTA (including Priolo and Melilli): 37.13 N. 15.14 E. **(See Plan)**

LOCATION: Augusta – Position refers to Torre Avolos Old Lighthouse in position Lat. 37° 12′ 37″ N., Long. 15° 13′ 34″ E.

Priolo – Same position as Augusta, Priolo lays on Southern part of harbour including a chemical pier outside the breakwaters. The port is under the jurisdiction of Siracusa.

Melilli – Correct name is Siracusa Santa Panagia, located 6 miles South of Augusta. Lat. 37° 06′ 30″ N., Long. 15° 15′ 40″ E.

Largest scale charts: B.A. 181-187. U.S. 53000-53200-53201. Italian 270-271.

PORT LIMITS: A line drawn between Santa Croce Lighthouse and Magnisi Lighthouse defines the seaward limits of the Port of Augusta.

A line drawn between Punta Magnisi and Punta Santa Panagia defines the seaward limits of the port of Santa Panagia.

DOCUMENTS: Ship's information must be sent by telex to Compamare Augusta, or to Compamare Siracusa for Santa Panagia, 24 hours before arrival (see "examples" below) in accordance with instructions issued by European Economic Community No. 79/116.

Crew Lists (at least 4 copies).
Custom Manifest.
Passenger Lists (4 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.

The following documents must be sent to Harbour Master's Office:
Certificate of Registry.
Civil Liability Certificate (for tankers only).
Information Note of Arrival.
Additional Declaration of Departure.
Cargo and Gear Safety Certificate.
Safety Construction Certificate.
Italian Light Dues.
Tanker Check List (to be presented to Pilot for acknowledgement).

In addition ships bound for the Esso Terminal must also radio the refinery, Rafinesso Augusta, via Roma Radio (IAR) 72 hours and 48 hours before arrival, giving ETA in local time and following advice:
Bill of Lading quantities in long tons, metric tons, gross bbls./net bbls.
Slop quantity, water percentage, tank number. If slop mixed with cargo, advise quantity cargo in slop tank.
Arrival draft.
Temperature of cargo for vessel carrying atmospheric residues and catfeeds.

For tankers calling to load: 72 hours prior arrival send cargo layout, preferred order of loading and number of grades ship can load at same time.

Examples: Messages sent to vessels:

Vessel Over 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessels data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, IGS yes/no, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull machinery in good order.

Vessel under 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull, machinery in good order.

Chemical Carriers:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 74-78, em. 81/83.

CLC data, Paris memo issued date prescriptions, if any, certificate of fitness/IMO yes/no, last port and confirm that all apparatus, hull, machinery are in order.

Vessel's reply:

To: Harbour Master, Augusta.
Telex: 972336 Compau I

Vessel Features	Capo Argento, IBMX, Italian Flag, g.r.t. 2,976, d.w.t. 4,500, LOA 100 m. max. draft 5.95 m.
ETA Pilot	Pilot Augusta, 2nd December, 0600 hrs.
Agent	Mayflower Shipping Agency
Reason of Call	Unloading 1,400 tonnes Ethylene
Cargo	Ethylene 1,400 tonnes
SOLAS	Available SOLAS 74/Prot 78
IOPP	Expiring 30th April, 1986
CLC	Expiring 20th February, 1986
Paris Memo	Athens 19th September, 1985/No Prescription
IMO	Expiring December 1985
Last Port	Porto Torres
Remarks	In good order
	Master Capo Argento

PILOTAGE: Compulsory for vessels over 500 g.r.t. – 24 hours service – Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above. Weather permitting, Pilot boards about 1 mile East of port main entrance – In case of bad weather, the pilot boat will station itself just inside the entrance and instructions to proceed will be given to vessels by VHF. Upon request, to facilitate vessels, or for other special reasons, Pilot can board up to 3 miles off the normal embarkation point.

Pilot charges vary with vessel's g.r.t., for hours between sunrise to 0800 hrs. and 1700 hrs. to sunset, for night hours, for Sundays and holidays, for flammable and explosive cargo and for boarding over 1 mile from main breakwater.

ETA to be confirmed 1 hour before arrival, calling "Augusta Pilot Station" on VHF Channel 12. In case of no radio contact, vessels must stop about 2 miles Eastward of the breakwater and hoist or flash the international code signals.

The pilot boat has a black painted hull with a white band and white superstructure with the word "Piloti" painted on both sides.

For Santa Panagia (Melilli), Pilot will board 1 mile seaward from Punta Santa Panagia for vessels incoming from South and 1 mile seaward from Punta Magnisi for vessels incoming from North. Pilot should be contacted on VHF Channel 14. Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above.

APPROACHES: There are 2 entrances: the main one is situated between the central and northern breakwaters, with leading lights on a heading of 273° 51′ – Entrance is about 260 m. wide, with a depth over 36 m. in the middle, and may be used day and night.

Note: Vessels entering should be lined up on the leading lights/marks 1 mile before entrance and ship departing 0.5 miles before exit. In case of controversy Harbour Master will ask for documentation of above positions.

Santa Panagia is an open road and berthing to ISAB Terminal is allowed in daytime only.

A current may cross the entrance after prolonged periods of windy weather. The leading lights/marks are sometimes obscured by smoke from the industrial plants in the Southern part of the harbour. Naval vessels and outbound traffic have the right of way when passing through the harbour entrance.

Santa Panagia:

(a) Masters are cautioned when approaching Santa Panagia by night as there are no navigational aids in this area. Only 2 lighthouses (Murro di Porco Lighthouse to the South and Cape S. Croce Lighthouse to the North) can be used to fix the position of the vessel. In the landfall however, their bearings are opposite and therefore useless. Radar must be in good operating condition.

(b) Tunny nets are laid down in the area and marks can be temporarily missing and small fishing boats engaged in net fishing may be encountered up to 8 miles from the coast; these boats carry no special marks or lights to indicate that they are using nets.

(c) Naval ships quite often exercise off the East coast of Sicily, particularly in an area including Augusta to the North and extending well South of Syracuse.
Two submarine exercise areas are close to this part of the coast.

(d) A current may cross the entrance of the bay as well as the terminal area after prolonged periods of windy weather.

ANCHORAGES: Pilot compulsory inside and outside the breakwaters within the port limits.

The Inner Anchorage has a central zone with a depth of water not less then 22.4 m.

Outside it is recommended to anchor South of Main Entrance, because North of it there are many limitations.

For Santa Panagia Pilot compulsory inside the harbour limits – vessels anchoring outside of this line are not considered to be in port and consequently without port dues.

MAX. SIZE: VLCCs can enter the harbour with tug assistance, with the following limitations: 69 ft. draft for operations in the road (bunkers - provisions – crew changes) and 66 ft. 10 in. with a max. displacement of 450,000 tons to moor alongside SELM Priolo Supertanker Jetty. For Santa Panagia no limitations.

HEALTH: Vessels arriving from countries not suspect of epidemical diseases can ask and receive Free Pratique by radio, sending a telegram not more than 24 hours before arrival to "Sanimare Augusta" via Roma Radio (IAR) or "Sanimare Siracusa" for the Port of Santa Panagia. Arrivals from Italian or EEC Ports are considered clear.

It is necessary to request Free Pratique by radio because Health Officers do not board vessel from sunset to 0800 hrs.

The Office of the Health Department is located at Via Lungomare Rossini. Tel: (0931) 974920.

RADIO: Augusta Radio P.T. Listening on 2182 kHz. Working on 1643 and 2260 (24 hour service).

VHF: Augusta Radio P. T. Call Channel 16, working Channels 26 and 27 (24 hour service).

Harbour Master (Channel 16).
Pilots (Channel 12). Working 24 hours.
Tugs and Line Handlers (Channel 8). Working 24 hours.
Taxi-boats (Channel 10) From 0600 to 2330 hrs.
Agents Connection (Channel 9). Office hours.
Traffic Control (Channels 9 and 12). Working 24 hours.

TUGS: Tugs available in the harbour: 4×2,000 h.p., 2×2,400 h.p. 3×2,500 h.p., 2×1,200 h.p. and 1 tug on stand-by/emergency of 2,600 h.p.

Harbour service: 6 tugs on duty from 0700 – 1200 hrs. and from 1300 – 1800 hrs. 3 tugs available from 1800 – 2200 hours and 2 tugs available from 2200 – 0700 hrs.

Tugs' charges vary with vessel's g.r.t., for hours between 0001 – 0800 hrs, 1200 – 1300 hrs., 1700 – 2359 hrs., for Saturday, Sunday and holidays, for service exceeding 1 hour, for operations at SELM – Priolo Terminal.

For Santa Panagia there are 3 tugs available, 1 tug can be employed from Syracuse Harbour – additional tugs can be supplied from Augusta Harbour.

Use of tugs is compulsory for berthing and unberthing. The number of tugs allocated is decided by the Harbour Authority according to gross tonnage. Because of tug crew duty rosters, the most suitable tugs may not always be available. Tugs make fast on the hook after the vessel has cleared the entrance, using ship's ropes. Pilots communicate with tugs via VHF portable radios which they bring on board with them.

Line Handlers: Service is performed with 1 launch for vessels of less than 10,000 g.r.t. and 2 launches for vessels above 10,000 g.r.t.

Wires are not accepted but may be used when provided with a 5 m. Manila or other fabric end tail with eye.

Charge varies with vessel g.r.t., flammable and explosive cargo, rain, waiting time (1 hour delay), overtime from 0600 – 0800 hrs., 1200 – 1300 hrs., 1700 – 2000 hrs., night hours, Saturday, Sunday, holidays, lines above the total of 8 and mooring on dolphins/buoys.

BERTHING: *Commercial Wharves:*

Ro/Ro Pier: Length 260 m. Depth 12.0 m.

Banchina di Riva: Length 246 m. Depth 12.0 m.

Commercial Quay: Length 255 m. Depth 12.0 m.

Consortium Jetty: Length 738 m. Depth at seaward end 12.2 m. 6 berths available. With Port Authority permission vessels may berth to discharge dirty ballast or transhipment cargoes.

MACET: Berth Nos. 1, 2 and 3 are at a finger jetty. Berth Nos. 1 and 3 used only by coasters and bunkering barges. Depth 12 ft. Berth No. 2 used by vessels up to 25,000 d.w.t. on stern discharge. Depth 28 ft. (see "Plan").

Enichem Augusta: Punta Cugno – Berth Nos. 3, 4, 5 and 5 Bis.

Berth No. 3 Northern Jetty used by Enichem Augusta for discharging and loading chemical products. Berth accepts vessels up to 3,000 d.w.t. mooring alongside. Depth 17 ft.

Berth No. 4 (Mid Jetty) used by Enichem Augusta for barges.

Berth No. 5 (Southern Jetty) used by Enichem Augusta for vessels up to 30,000 d.w.t. moored by stern for loading/discharging black/white products and chemicals. Depth alongside 30 ft.

Berth No. 5 Bis used by Enichem Augusta. It is a steel island connected to Berth No. 5 for vessels up to 5,000 d.w.t. for loading/discharging black/white products and chemicals. Depth alongside 21 ft.

Esso: Pier No. 1: Length of pier about 1,050 m. Heading 110°.

Berth No. 6: Used only by bunker barges.

Berth No. 7: For vessels up to 10,000 d.w.t. with LOA 197 ft. – 525 ft. Depth of water 35 ft. Pipe-lines with connection of 6 in. Loading rate 150 t.p.h. – 900 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore. Stern loading only.

Berth No. 8: For vessels up to 38,000 d.w.t. with LOA 197 ft. – 820 ft. Depth of water 35 ft. Pipelines with connections of 8 in. Loading of gasoline, JP/5, benzine and bitumen. Loading rate 165 t.p.h. – 900 t.p.h. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h. Shore capacity 20,000 tons.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, receiving tankers up to 90,000 d.w.t. with LOA 230 ft. – 909 ft. Depth of water 51 ft. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6 in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 140,000 d.w.t. with LOA 504 ft. – 974 ft. Depth of water 54 ft. Loading of all products as No. 10 except lube oil. Connections 10 in. No night-time movements for vessels over 60,000 g.r.t.

At about 400 m. from end platform there are 2 smaller platforms (Berths No. 9 and 12).

Berth No. 9: Receiving tankers up to 10,000 d.w.t. with LOA 197 ft. – 469 ft. Depth of water 26 ft. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 6 in. – 24 in.

Berth No. 12: For tankers up to 12,000 d.w.t. with length 213 ft. – 492 ft. Depth of water 28 ft. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Unicem: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. Used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day. Berths No. 13 Bis and 14 Bis recently completed but not yet in use.

N.A.T.O. Pier: Berth Nos. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

SELM-Priolo: Supertanker Jetty: For vessels up to 420,000 d.w.t. Berth Nos. 17 to 24 at SELM Jetty; Berth Nos. 25 and 26 at Steel Island; Berth No. 27, for vessels up to 20,000 d.w.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line. Connections: 16 in. for crude and 8 in. for products.

SELM concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, for vessels up to 20,000 d.w.t. Berth No. 31, for vessels up to 30,000 d.w.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, for small tankers only.

Berth No.	*Depth* (ft.)	*Max. Draft* (ft.)	*Max. DWT*
17	14.75	13.01	1,000
18	24.28	22.06	6,000
19	42.00	40.35	3,000-48,000
20	73.50	64.99	250,000
21	73.50	66.08	375,000
22	45.90	42.00	3,000-48,000
23	24.60	23.00	6,000
24	11.81	9.08	1,000
25	45.93	42.06	5,000-70,000
26	45.93	37.06	5,000-35,000
27	37.40	34.00	26,000
29	—	29.06	Used by Agrimont
30	14.43	13.00	
31	—	31.06	

ENICHEM – ANIC: (Carichi Liquidi): Is situated in Priolo's Cove. Chemical products are handled. Berth No. 33, for vessels up to 3,000 d.w.t. Berth No. 34, for vessels up to 15,000 d.w.t. Berth No. 35 and No. 36 used by small vessels only.

Also see "Shipmaster's Reports".

Santa Panagia: *Berthing Procedure:* At all berths vessels are berthed so as to head outwards. The vessel approaches the berth almost perpendicularly to the pier and with the aid of tugs (generally 6 for a VLCC) and swung seaward, to approach the berth with an angle of about 45°. When at safe distance from the berth and almost in position, the vessel is then swung parallel to the berth and pushed alongside.

No anchor is used, however, both must be ready for any emergency. The following are the maximum landing speeds:

Berth No. 1:	25,000 d.w.t., 22.5 cm./sec.
	50,000 d.w.t., 17.0 cm./sec.
Berth No. 2:	10,000 d.w.t., 25.0 cm./sec.
	30,000 d.w.t., 30.0 cm./sec.
Berth No. 5:	250,000 d.w.t., 14.5 cm./sec.
	50,000 d.w.t., 21.0 cm./sec.
Berth No. 6:	385,000 d.w.t., 13.5 cm./sec.
	50,000 d.w.t., 21.0 cm./sec.

Cautionary Advice: Masters are cautioned that prevailing strongest winds and the resulting swell can affect their stay alongside. It is therefore very important that vessels, particularly high freeboard ships pay particular attention to moorings. The most efficient moorings are all wire moorings – mixed moorings of different stretch characteristics and breaking strain should be avoided, particularly in breast lines and springs.

Moorings reeled on winches must be held by brakes hardened up to full torque. No self-tensioning devices should be used. The mooring must be reeled in such a direction as to assist the break. Where split drum winches are used, a maximum to 2 layers should be on the working drum when the mooring reaches the shore bollard/mooring hooks. Brake must be in good condition.

There are limits applicable to freeboard from a windage point of view. This together with maximum operable wind speeds will be discussed with Master's of VLCC by a Terminal Supervisor. The vessel must be held firmly against the fenders at all times. It is unnecessary and dangerous to slack away lines, even if they appear taut, if the ship is not hard against the fenders.

The minimum recommended is 2 spring lines and 2 breast lines at each end.

Melilli: *Operator:* Industria Siciliana Asfalti and Bitumi (ISAB).

The terminal is situated 6 miles South of Augusta, 5 miles North of Syracuse, Sicily. The Marine Terminal is connected to the Refinery storage through 5 lines for LPG and 18 large diameter pipe-lines for Crude and Products which allow for high unloading and loading rates.

All berths are equipped to ensure rapid and safe operations.

Clean and dirty ballast discharge facilities, including ballast reception tanks of 100,000 cu.m. (0.6 million barrels) are available.

A sheltered harbour accommodates service boats and 3 modern 2,000 h.p. tugs are permanently available.

When more tugs are required, additional units are supplied from nearby Augusta.

Bunkering facilities are available on all berths and sea-going barges are operating from the Terminal and from a sheltered harbour equipped for bunkering purposes.

Crude Oil Transhipment: The marine facilities are also suited for transhipment from ULCC-VLCC to smaller tankers better fitted to serve various refinery and/or pipe terminal locations in the Mediterranean and Adriatic.

Crude and Product Storage: 8 tanks are available for incoming crude with a total capacity of 800,000 cu.m. (5 million barrels).

Semi-finished (intermediate) product storage enables the operation of plant units when upstream sections are not available for short periods and contributes to Refinery flexibility.

In particular there is large storage of fuel oil and gas oil fractions and 12 motor fuel component storage tanks.

Total intermediate storage in 27 tanks, amounting to 431,000 cu.m. (2.7 million barrels).

Finished product storage is in 38 tanks of various grades with a capacity of 825,000 cu.m. (5.2 million barrels).

A further 42,000 cu.m. (0.25 million barrels) are held in Refinery service tanks.

Jetty: Deep water is available close to the shore at the jetty side. The marine facilities consist of a finger with 5 berths having the following capabilities and restrictions:

Berth No. 6: Vessels of minimum 18,000/max. 600,000 d.w.t. Max. LOA 1,200 ft. max. draft 78 ft. For unloading crude and loading fuel oil.

Berth No. 5: Vessels of minimum 18,000/max. 250,000 d.w.t. Max. LOA 1,200 ft. Max. draft 78 ft. For unloading crude and loading fuel oil, gasoil and gasoline.

Berth No. 1: Vessels of minimum 5,000/max. 55,000 d.w.t. Max. LOA 790 ft. Max. draft 42 ft. 6 in. For unloading crude and loading all products.

Berth No. 2: Vessels of minimum 10,000/max. 30,000 d.w.t. Max. LOA 650 ft. Max. draft 36 ft. For unloading crude and loading all products except LPG.

Berth No. 7: Vessels of minimum 500/max. 3,000 d.w.t. and LPG carriers of minimum 500/max. 1,500 d.w.t. Max. LOA 320 ft. Max. draft 18 ft. For loading all products.

Somicem-Magnisi: Sea berth, stern mooring for loading crude oil – max. 22,000 g.r.t. Draft 36 ft.

Also see "Agent's Report".

STEVEDORES: Available from Compagnia Lavoratori Portuali.

CRANES: *Heavy Lifts:* Floating cranes with lifting capacity of 20 tons – 94 tons at a distance of 27 m. – 12 m. are available.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.

TANKERS: See "Agents Report" for accomplishments required before entering the Harbour and "Berthing" for facilities.

All petroleum product carriers, chemical and gas tankers calling at Augusta for loading or discharging must confirm, by cabling the Harbour Master, that the responsible officers taking care of loading/discharging/handling operations, fulfil the requirements according to IMO Convention STCW/78 and are in possession of relevant valid certificates.

DENSITY: 1025, however it may be reduced by heavy rain.

FRESH WATER: Good quality potable water available by barges.

FUEL: All grades available by pipe-line or barge at anchorage, max. draft 65 ft.

Suppliers Esso, Agip, I.P., Shell, Mobil and Gulf. 48 hours notice required.

CONSULS:

Denmark	Tel: (0931) 977470.
Liberia	Tel: (0931) 975341.
Norway	Tel: (0931) 978544.

REPAIRS: Not permitted to tankers while alongside refineries jetties, may be carried out, while at anchorage, subject to Harbour Master's authorisation. If repairs to engine or it will affect the proper use of engine or in any way restrict the capability of manoeuvring the ship, continuous tugboat assistance may be imposed. Light steel, carpentry and routine maintenance is available from small local shipyards. Also electronic and electrical services.

DRY DOCKS: One floating dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons. Ships up to 5,000 g.r.t. can be moored alongside the dry dock for light repair operations.

One floating dock, length 115 m., breadth 22.0 m. Lifting capacity 2,750 tons.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable. Employment of shore fire guards advisable.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

REPATRIATION: No difficulties.

AIRPORT: Nearest at Catania, can be reached in 40 minutes (distance 40 km. by car). Daily flights to Rome and Milan for international connections. Weekly flights to North Europe capitals available.

TIME: GMT plus 1 hour. Summer time, last Sunday in March to last Sunday in September, GMT plus 2 hours.

HOLIDAYS: Tankers not affected. 1st January; Easter Monday; 25th April; 15th August; 8th December; 25th December.

POLICE/FIRE/AMBULANCE: Boundary and Immigration Police, Tel: 113; Police (Carabinieri), Tel: 112; Ambulance, Tel: 971122; Fire, Tel: 974777.

TELEPHONES: Situated at all berths, not for private use. No direct connection to vessels.

SHORE LEAVE: Immigration Police issues shore passes to permit the landing of the crew and passengers.

IDENTIFICATION CARDS: Shore passes given by Immigration Police.

GENERAL: *Garbage removal:* Compulsory service on arrival and every 24 hours thereafter.

SHIPMASTER'S REPORT: June 1982.

If landing a sick crew member, Pilot will board and vessel anchors inside the breakwaters. Harbour Master and assistant boarded to check that ship's certificates all valid. All usual entry papers required except Crew Declaration and Stores List, but total quantity of cigarettes required. Crew Lists on IMO Fal Form 5. Cables sent to Agents on Sundays and holidays should include Telex number in address otherwise they are not delivered until the next day.

We were anchored about 1.5 hours and the Pilot stayed on board. It was necessary to send ashore some crew members to assist with the stretcher, but they brought it back with them.

EEC Tanker Check List required.

SHIPMASTER'S REPORT: April 1985.

Radio Pratique: Send radio message, 12 hours prior to arrival to "Sanimare Siracusa".

Pilotage: Pilot boards 1 mile North of Cabo Santa Panagia and is contacted by VHF Channel 14. Call sign is "Siracusa Pilots".

Fresh Water: Water is available by barge from Augusta so advance notice required.

Repairs: Normal repairs, but no welding can be carried out alongside.

Fuel: Bunkers are taken via pipe-line when loading/discharging.

Officials: All Officials come from Siracusa (Syracuse).

Ship Chandlers: Available.

SHIPMASTER'S REPORT: February 1987.

Vessel: 95,000 d.w.t.

Berth: Santa Panagia Oil Terminal (formerly Mellili).

Pilot boards to anchor the vessel. He boards about 1 mile N.E. of Santa Panagia. The anchorage is in deep water, bottom mud and clay.

After anchoring, Agent boards with Harbour Master to check vessel's documents. As is usual at Italian ports, 3 firemen live on board.

1 tug each end, 2 ship's lines, 1 tug pushing, their lines taken ashore by boat. Tugs are paid by the hour (i.e. 1 hour 5 mins. = 2 hours' pay).

Shore passes required and shore leave is by boat to boat harbour. Ship's stamp required on all documents.

SHIPMASTER'S REPORT: May 1987.

Port : Priolo.

Vessels are directed to proceed to Santa Panagia Bay by the Agent. It comes under the jurisdiction of Siracusa. Pilots are picked up at Siracusa or off the berth. This appears to be dependent on what berth movements there are.

Anchorage is close off the berth or in Siracusa Bay. Vessel is charg for anchorage whether used or not.

There are no known restrictions at the berth.

Stores appear to be a considerable problem, due to Custom Regulations, so cancelled our requirements. Laundry was ve expensive.

Shore leave is by launch from ship. No walking along jetty is allowe Passes are supplied by Agents.

Master or his deputy *must* visit Harbour Master's Office to sight an sign for having seen Italian Notices to Mariners.

SHIPMASTER'S REPORT: October 1987 (Updated February 1988).

Documents:

6 Copies Crew List.
2 Copies Crew Declaration.
2 Copies Manifest.
1 Copy Health Declaration.
1 Copy Arms and Ammunition List.
6 Copies Cargo Manifest.
All Passports.

The port is a naval port and tends to be very strict with documentatio All the certificates are to be sited by the Harbour Master and a dec officer before they are taken ashore to the Harbour Master's Offic Shore passes are issued.

Charts: BA. Charts No. 966 and 1941.

Approaches: Mount Etna is often seen visually at about 60 miles. It i behind Catania about 20 miles to the North of Augusta. The Catani area often shows up on the radar at over 70 miles. Cape Spartivento i a good radar target at 80 miles.

In the vicinity of Augusta, Siracusa and Cape Morro Di Porco hav proved to be good radar targets at over 40 miles.

There is a Racon (G) on the North beacon (green) at the mai breakwater entrance.

Pilotage: Pilotage is available throughout 24 hours. Daytime movements only are carried out at certain berths. If vessel has to await berthing sh can always anchor inside the breakwater. The pilotage service is goo and efficient. Many traffic movements take place in the port.

The Pilot boards from a fast black hulled 'Speedcutter'. If the weathe is good he will board 0.5 miles outside the breakwater and if the weathe is poor he will board inside the breakwater heads. VHF Channel 12 i used for communicating with the pilots. He may also be contacte through the Port Authority telex (Telex No. 0043912336 COMPAU I The Pilot requires an EEC Tanker Check List. Overtime rates charge between 1900 hrs. and 0800 hrs.

Anchorages: The anchorages off Augusta are generally poor, especial in bad weather as the bottom shelves rapidly and the holding ground i poor. The best anchorage for large vessels is about 100° T at a distanc of one mile from the Southern Breakwater entrance (anchorage i prohibited within 1 mile of the entrance). Small vessels anchor in th northern area near Porto Xifonio. A favoured anchorage area for larg vessels away from Augusta is at Bahia Dis Panagia which is abou 4 miles South of Augusta. The alternative area is in the Bay of Simet which is about 6.5 miles South of Catania. This Bay is open and th holding ground is quite good, thereby allowing vessels to drag safel In February 1988 the coastguard moved us away and told us that onl Catania or Augusta could be used for waiting.

Vessels nominated to berth or for services (bunkering, stores, etc anchor inside the breakwater and under Pilot's guidance. Small vesse use Waiting Area "A". Vessels can drag in strong winds so a secon anchor and engines to be kept in readiness.

Health: Vessels are to request "Free Pratique" from Sanimare Augusta Telex No. 0043 970817 AUG RT, 24 hours before arrival or earlier i arriving from a nearby port. The vessel is to answer standard Worl Health Declaration questions. The agent will confirm Free Pratiqu before the Pilot boards. Free Pratique not necessary if from EEC countr

Tugs: Many tugs available. Ship's lines are used.

For Tankers, the following applies:

GRT 500 – 2,000	inward 1 tug	outward None
2,000 – 5,000	inward 1 tug	outward 1 tug
5,000 – 12,000	inward 2 tugs	outward 1 tug
over 12,000	inward 2 tugs	outward 2 tugs

For Dry Cargo vessels under 5,000 G.R.T. no tugs required inwar or outward.

If over 5,000 G.R.T. the table above applies.

Berthing: The port is mainly for oil products and gases. There is on berth for fertilisers near the Southern Breakwater. All berths in the po are numbered.

For gas products Pontile Montecantini, just outside Augusta Sout Breakwater, is used and it handles all gas products.

Pontile Super Petrolier (Berth No. 18 – inner North side) which is ju South of the Military Pier also handles gas products. All berths are wel fendered. Mooring boats are used.

At Pontile Montecantini which is well exposed in the Winter th moorings consist of 2 head/stern lines, 2 breast lines and 2 springs eac end. Vessels berth head out at all piers. At Pontile Montecantini vesse berth on either side, the North side berth is No. 34. The use of the pi gangway is compulsory. It is used by pier personnel only. The offsho anchor is used when berthing.

Cargo: Pontile Montecantini Pier - Priolo: Vessel required to nitroge purge to less than 0.2% and less than −50°C dewpoint in 13 hou (2,756 cu.m.) at about 1,000 cu.m.p.h. The surveyor was not often i attendance, the ship's staff did all the monitoring.

The propylene Chicksan is 6 in. with a 6 in. vapour return to sho flare.

Shore maximum loading rate 250 t.p.h. Temperature in tank −46°C giving a manifold temperature of −44°C. The shore minimum rate fo cooling down is 20 t.p.h. The requested supply rates adhered to qu closely by the terminal. Only a little English was spoken by the je staff. There is a shore stop for minimum/maximum.

Pontile Super Petroliere: For LPG mixture, Propane 25%, Butane 75%.

Hydraulic Boom/hose arrangement is 6 in. 300 ASA with 2 in. vapour hose attached. Shore reducer supplied, shore labour connect/disconnect hoses. Max. rate 200 t.p.h. Temperature LPG mix −4°C. Density 0.5667 at 15°C. Ship stop only. On presentation of Bill of Lading, watch difference; we were presented with shore/ship difference of 45 tonnes for discharge Tripoli, Libya. Understand this happens from time to time.

Fresh Water: Fresh water is available by barge throughout 24 hours at all berths. Any quantity of water can be supplied at a fast pumping rate using the barge hoses.

General: Boat service is provided by calling on VHF Channel 10, give the vessel's berth number or anchorage position. This is the only way to get ashore as walking down the piers is not permitted.

Shore passes are required.

Bunker barges are operated on VHF Channel 9. They are suitable for attending large tankers but are very awkward when supplying small gas vessels.

There are numerous ship chandlers available at the port, the produce is good and the prices are reasonable.

As this port is a Naval port it is under very strict control of the Military Harbour Master. They monitor gas vessels very closely.

Daily rubbish collection is compulsory.

The nearest airport is at Catania which is about 20 miles to the North.

Customs board after the Agent. Immigration matters now carried out ashore.

AGENT'S REPORT:

The following is a copy of a telex received from a ship's Agent in February 1980.

From: Seafox – Shipping Agents and Bunker Brokers. Head Office: Via Garibaldi, 3/5. Phones : (0931) 977470-978544. Telex: 970072 BONMAR I. Cable: Seafox Augusta Tlx. 970072. 96011 Augusta, Sicily.

We are acting as Shipping Agents in Augusta-Siracuse-Melilli (ISAB) ports and in this connection we take the liberty to advise you of new ordinance issued by Ports Authority in Augusta and Siracuse Ports in order to be able to inform through your good publication well known over the world.

Port Information:

According to instructions issued by European Economic Community No. 79/116, please be advised that Augusta Port Authority introduced a new Ordinance, to apply immediately, as follows:

Quote:

All Masters of petroleum-gas-chemical tankers, having d.w.t. 1,600 and over, with full or partial cargo or in ballast and not gas-free. Before entering or leaving Italian ports must comply with following regulations:

1. In due time, before entering territorial waters adjacent to the port, cable via Romaradio to their Agents:
   (a) Ship's name and call letters.
   (b) Ship's flag.
   (c) Length and draft.
   (d) Destination port and ETA.
   (e) Quantity and quality on board.
   (f) If ship carrying chemical products in bulk, Master's declaration to be in possession of safety equipment and construction certificate to carry chemical products in bulk, according to IMO Code.
   (g) If ship carrying chemical products in bags or liquid gas in containers, Master's declaration to be in possession of the appropriate certificate, according IMO Code.
2. On Pilot boarding vessel, Master must submit following Check List, duly filled, to the Pilot:

(a) *Vessel's details:*

1. Ship's name.
2. Flag.
3. Owners.
4. Port of Registry.
5. Year built.
6. Gross tonnage.
7. Length.
8. Classification.
9. Call letters.
10. Kind of propulsion.
11. Agents.
12. Propulsion apparatus-horsepower.
13. Draft forward.
14. Draft aft.
15. Draft amidships.
16. Cargo (according to cargo plan).
17. Quality.
18. Quantity.

(b) *Safety Equipment*

Unquote

Please kindly instruct all Masters to comply accordingly in order to avoid delay in entering the port.

These same regulations apply for Melilli Port (ISAB Terminal) except for first part of information which all Masters have to cable directly to "Compamare Siracusa" via Romaradio in due time before arrival.

AUTHORITY: Capitaneria di Porto, 96011 Augusta. *Tel:* (0931) 978922, 978695. *Telex:* 972336. *Contact:* Captain Pietro Trovato Gangemi, Port Commandant.

BAGNOLI: 40.48 N. 14.10 E. (See Plan)

DOCUMENTS: An arrival report containing vessel's main particulars and data of certificates has to be filled in by Port Officer upon arrival.
5 Crew Lists.
5 Passenger Lists.
Stores List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Bagnoli Pilot is permanently on watch as from 0600 to 0600 hrs. Usual Pilot position is Lat. 40° 47′ 30″ N., Long. 14° 08′ 10″ E. Pilotage is compulsory for vessels over 500 g.r.t. for anchoring or entering the port. Permanent watch is maintained by pilot station on VHF Channel 9 and/or 12. Vessel requiring Pilot may also use other international signals, such as flag, morse/sound letter "G". When in port vessels to give pilot station 1 hour's notice for any service required. In the event of bad weather (Bagnoli area is mainly exposed to S.W. winds) vessels to shift out of piers or to change anchorage to Baia Roads (sheltered natural bay 3 miles from Bagnoli in a Westerly direction).

ANCHORAGE: Depth of safe anchorages in Bagnoli area and in Baia Roads ranging from 20 m. to 45 m. – sandy bottom. Anchorage is allowed in the line from the lighthouse of Nisida Island to the lighthouse of Capo Miseno.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimare, Naples.

RADIO: Naples Radio.

TUGS: Presently no tug available, if required they come from Naples. Time taken approximately 2 hours.

BERTHING: *Italsider Ore/Coal Discharging Pier:* Two berths available. Pier length 357 m. Berth accommodation length 200 m. – max. draft allowed when berthing in Westerly direction is 41 ft. 6 in. – max. draft allowed when berthing in an Easterly direction is 36 ft. with H.T. This pier is equipped with two turntable gantry cranes and conveyor belts. Ore discharging rate: 1,100 t.p.h. Coal discharging rate: 900 t.p.h. All necessary stevedoring services are performed by Italsider with their own personnel. Cranes capacity: 32 tons. Fresh water available.

Italsider Loading Pier: Equipped with 6 turntable cranes and rails – max. draft allowed on both berths is 10.5 m. Fresh water available.

Federconsorzi Discharging Pier: Equipped with a fixed gantry crane and aerial ropeway for discharging of phosphates and pyrites. Discharging rate per shift of 8 hours – 450 tons. Max. draft allowed is 5.40 m. Fresh water available.

Tide Range: Approximately 30 cm.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge. Vessels at anchor supplied with fresh water by barge from Naples.

FUEL: All types available, always delivered by barge, normally oil companies require 48 hours notice.

CONSULS: At Naples.

REPAIRS: Small repairs undertaken.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: (For entire duration of stay). Tobacco, 50 cigarettes per crew member. Spirits: 1 bottle (opened) per crew member.
TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.
HOLIDAYS: See "Naples".
POLICE/AMBULANCE/FIRE: Police 7602553; Ambulance 7520696, 258044 (Ospedale S. Paolo); Fire 7330210 and 7605353.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
GENERAL: *Launch Hire:* Vessels waiting at anchor for their turn may hire launch for crew shore leave and relevant service performed from 0700 to 2400 hrs.

The Port of Bagnoli is mainly used for the discharge of ores, minerals, coal and for the loading of steel products for account of the Italsider S.p.A., metallurgic industrial group of national interest, operating with its own shore appliances. Manufacturers of chemical products, the Federconsorzi of Naples, operate in the Port of Bagnoli also with their own shore appliances.
AUTHORITY: Capitaneria di Porto di Napoli, Sezione Staccata di Bagnoli, Via Coroglio 10 Bis, Napoli. *Tel:* 7232272. *Cables:* Seziomare Bagnoli. *Contact:* Sandro Musto, Captain of the Port.

BARI: 41.08 N. 16.51 E. (See Plan)

DOCUMENTS: On arrival:
5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.
Health Documents.
On departure:
Additional declaration of departure.
PILOTAGE: Pilot boards vessels on arrival by motor-boat one mile N.W. of the head of the main breakwater. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port. The Pilot Office is located at Berth No. 13 (Tel. 080-5211507) and listens on VHF Channels 16 and 12.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.
ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.
Prohibited Anchorage: Anchoring is prohibited near the port entrance and the point of union of the heads of the S. Cataldo Mole and the third arm of the New Foraneo Mole, due to the presence of underwater pipelines.

From 1st June to 30th September, it is prohibited for all vessels to anchor in front of the Port of Bari, included between the land and the line extending 239° for 2.5 miles from the S. Cataldo Lighthouse.
RESTRICTIONS: Max. depth at harbour entrance 40 ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

Night berthing and unberthing is restricted for vessels exceeding 5,000 g.r.t. because of the unavailability of the tugs. Only 1 tug is available for 24 hours a day and a second tug only between 0700 – 2200 hrs. and with 24 hours advance notice.
MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.
HEALTH: Masters can request Free Pratique by radio by applying to "Sanimare Bari". Free Pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.
RADIO: Radio Roma, call sign "IAR." Bari Radio P.T. call sign "IPB" on 2182 kHz. and VHF Channel 16.
VHF: Port Captain's Office on Channel 16 from 0800 hrs. – 2000 hrs.
TUGS: The use of tugs is optional. However, their use can be made temporarily compulsory on the instructions of the Maritime Authority for certain types of vessels, taking account of the type of cargo carried, as well as in the event of unfavourable weather conditions or security requirements in the port and of vessels.

The use of tugs for tankers over 1,600 g.r.t. is compulsory during the operations of arrival and sailing and manoeuvring inside the port. Tankers from 1,600 g.r.t. to 5,000 g.r.t. use 1 tug, and tankers over 5,000 g.r.t. use 2 tugs.

The service is provided by the Societa Rimorchiatori Napoletani with offices on Berth No. 8 (Tel. 080-219342), using tugs of 1,100 h.p. and 800 h.p. The tugs provide service from 0700 hrs. – 1900 hrs., and listen on VHF Channels 6 and 12.

After the hours of service, the tankers, moored at S. Cataldo Mole containing, or which have contained, oil products in Category "A", must alternatively:
(a) Put into action the inertion plants for the tanks in question containing, or which have contained, the oil products, provided such plants are installed.
(b) Use the available assistance service for the discharge operations provided by the tugs.
(c) Leave the berth, and proceed to the outer roads to await th return again to the S. Cataldo Berth, when the tug servi recommences.

BERTHING: When specific side alongside berth is required b stevedores, Agents radio Master prior arrival and advise Pilot. Otherwis side alongside at Master's option after conferring with Pilot. Depth a piers 10 ft. – 47 ft. dependent location. No shore fenders alongsid quays.

BULK HANDLING FACILITIES: Grain discharge by 2 suction pipes a rate of 90 to 100 metric t.p.h. each.
CARGO HANDLING EQUIPMENT:
Electric jib cranes on rails on the Eastern (Levante) Berth:
2 × 6/7 tons capacity.
2 × 6/15/24 tons capacity.
Electric jib cranes on the Deposito Franco Berth:
2 × 3 tons capacity.
Mobile cranes:
1 × 30 tons capacity.
2 × 100 tons capacity.
1 × 150 tons capacity.
Lift trucks:
1 × 42 tons capacity with telescopic spreader for 20 ft., 30 ft. an 40 ft. containers.
1 × 27 tons capacity with spreader for 20 ft. and 40 ft. containers.
1 × 14 tons capacity.
1 × 12 tons capacity.
3 × 6.5 tons capacity.
2 × 4 tons capacity.
2 × 3 tons capacity.
STEVEDORES: Important to give ETA in good time. Normal workin hours: Winter time (weekdays), 0800 – 1200 hrs., 1300 – 1700 hrs Saturdays, 0800 – 1300 hrs. Summer time (weekdays), 0800 – 1200 hrs., 1400 – 1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 – 0800 hrs. the tariff to be increased 25% 1200 – 1300 hrs., 50%; 1700 – 2000 hrs., 25%; 2000 – 0600 hrs., 70%

For handling pieces over 1,000 kilos, increase of 50% on the tari For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 – 0800 hrs. the tariff to be increased 100% 0800 – 1200 hrs., 50%; 1400 – 1800 hrs., 50%; 1200 – 1400 hrs., 100% 1800 – 2400 hrs., 100%.
MEDICAL: Not necessary for Agents to receive advance notice required medical attention. Hospital facilities available.
TANKERS: Not allowed to do any degassing of tanks or any kind repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspection tankers and gas-free certificate can be obtained. Only clean ballast c be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. pi line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline.

Crude oil discharged to Stanic Refinery from Berths No. 31 and No (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 32 and 34.

Deballasting Facilities: There is a shore capacity for 6,500 tons of ballast water. All S. Cataldo Berths are served by a common 12 in. deballast line. On each berth a dirty product arm is used for deballasting line (partially made of concrete), the normal deballasting rate is 250 t.p.h. The maximum pressure being limited to 42 p.s.i.

For this reason it is suggested to arrive at berth with minimum safe manoeuvring ballast quantity.

No slop facilities are available.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths, except Molo Pizzoli, at a rate of 20 t.p.h. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

DENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

Austria
Belgium
Bolivia
Denmark
Ethiopia
France
Germany F.R.
Greece
Liberia
Monaco
Netherlands
Norway
Portugal
Spain
Sweden
Switzerland
Turkey
United Kingdom

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

SURVEYORS: 1. There are cargo inspectors available; these can be obtained from S.G.S. Tel: 080/410333.

2. The representative of Lloyd's Register in the port is Lorusso.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended, shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permited to be held out of bond but no spirits allowance permitted.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff ncreased as follows: From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police 291111. Ambulance (First Aid) 444848. Fire 115.

EMERGENCY CO-ORDINATION CENTRE:

Bari Port Captaincy – Tel: 216860. On VHF Channel 16 from 0800 hrs. - 2100 hrs.

Bari Radio 'P.T.' on VHF (listens throughout 24 hours) on Channel 16.

BANKS: Banca Commerciale Italiana, Via Abate Gimma No. 87, 70100 Bari Tel: 080 – 216680.

Credito Italiano, Via Putignani No. 98, 70100 Bari. Tel: 080-216771.

Banco di Roma, Via Calefati No. 82, 70100 Bari. Tel: 080-235300.

STORING: See "Prelims".

1. Vessels in port can be supplied by lorries.
2. Lorries with stores for vessels at quays, apart from normal Customs requirements, (if necessary), have to be authorised to enter the port.
3. Lorries with trailers can line up on the berths alongside the vessels. The process is subjected to the commercial operations on hand and /or the position of the vessel at the berth.
4. Fork lift trucks are never used for supplying stores to ships in this port.
5. For the supply of provisions there is the company S.p.A. Cianciola – Tel: 080/235260, 235261, 235262. Telex: 810021. Cianci I. P. O. B. 240, 70100 Bari who may be approached for any specific requirement. The same Company also has a large area in the port, as a free zone, for storage of goods.
6. Local unloaders can be employed to help in placing goods in store on board if required and available.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

AUTHORITY: Capitaneria di Porto – Bari, Corso de Tullio 1, 70100 Bari, Italy. *Tel:* 080-5216860. *Telex:* 812289. *Cables:* Compamare Bari. Also VHF Channel 16. *Contact:* Alfredo Fusco, Port Captain.

Consorzio del Porto di Bari, Molo S. Vito, Stazione Marittima Passeggeri, Bari, Italy. *Tel:* 080-5235205.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's Tonnage.
Load Line Certificate.
Derat Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Compulsory for vessels over 500 g.r.t., tankers and gas carriers. Pilotage available 24 hours.

Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of pilot station is "Piloti Porto, Brindisi". Characteristics of pilot boat: gross tonnage, 9.4; power, 65 h.p.; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 m. to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

VHF: Pilots on Channel 12 throughout 24 hours.

Port Authority on Channels 16 and 11, from 0700 hrs. – 1900 hrs.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne Junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (Centrigrade), 16/20; specific weight, 0.950/0.960. Gasoil, viscosity Engler at 20° (Centigrade), 1.4; specific weight, 0.830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

CONSULS: Vice-Consulate of Denmark, Portugal and Netherlands, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: For vessels over 500 tons effecting international voyages:

(a) Passenger vessels:
  Safety Certificate.
  Radio and Radiophone Certificates (latter if included in vessel's equipment).

(b) Freighters:
  Safety Construction Certificate.
  Safety Equipment Certificate.
  Radio and Radiophone Certificates.

CUSTOMS ALLOWANCES: 50 cigarettes a day for each crew member, if vessel's stay in port exceeds 24 hours. No allowance if stay is shorter than 24 hours. Third of a bottle of spirits only.

REPATRIATION: Adequate facilities exist for effecting crew changes and repatriations as necessary.

AIRPORT: Distance from local airport 5 km. (3 miles). Airport regularly served by Alitalia Airline, ensuring 2 daily flights to Rome and 1 daily flight to other Italian cities, including, among others; Naples, Catania, Palermo, Cagliari, and other destinations via Rome. Direct international flights not scheduled from Brindisi.

TIME: Local time 1 hour ahead of GMT; from 29th March to 26th September, 2 hours ahead of GMT (Summer time).

HOLIDAYS: Officially recognised. Both national and religious holidays include: Sundays; New Year's Day; Epiphany (6th Jan.); St. Joseph's Name Day (19th March); Easter (Easter Monday); Anniversary of Liberation (25th April); Labour Day (1st May); Ascension, Corpus Domini (movable dates); Proclamation of the Italian Republic (2nd June); the Saints Peter and Paul Name Day (29th June); Assumption (15th August); All Saints' Day (1st Nov.); National Unity (4th Nov.); the Virgin Immaculate Conception (8th Dec.); Christmas, Boxing Day.

POLICE/AMBULANCE/FIRE: Police, 25555; Ambulance, 21310; Fire, 21222.

TELEPHONES: No current arrangements existing for placing telephones on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not particularly needed besides regular seaman's books.

DEVELOPMENTS: Under construction: 1 pier in outer harbour, which is scheduled to be 200 m. in length (219 yards) with a depth of 12 m. (39 ft. 4 in.).

Coal unloading wharf of 670 m. length to be built to accommodate 2×150,000 d.w.t. vessels. Unloading will be by 2×1,500 t.p.h. bucket unloaders.

AUTHORITY: Capitaneria di Porto – Brindisi, Via Regina Margherita, No. 1, 72100 Brindisi, Italy. *Tel:* (0831) 21022, 21023. *Telex:* 813395 Compbr I. *FAX:* (0831) 21023. *Cables:* Compamare Brindisi.

CAGLIARI (including Sarroch), Sardinia: 39.05 N. 09.01 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
2 Provisions Manifests.
2 Manifests of Crew Personal Effects.
Cargo Manifest.
Bills of Lading.
2 Arrival Reports, completed on arrival.
Maritime Declaration of Health, completed on arrival.
Ship's Certificates including Italian Anchorage Dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 500 tons. Requested by ship's Agents. Vessels should wait in the roads for Pilot to board. International Code signals used for calling Pilot. Pilot station telephone number: 652929. Pilot boards tankers about 2 miles East of oil terminal.

Sarroch: Compulsory for all tankers. Vessels should wait in roads as follows:

G1 – (for tankers of more than 42 ft. draft) Lat. 39° 05′ 00″ N., Long. 09° 05′ 00″ E.
G2 – (for tankers of less than 42 ft. draft) Lat. 39° 04′ 27″ N., Long. 09° 03′ 15″ E.
G3 – (for tankers of less than 5000 g.r.t.) Lat. 39° 05′ 48″ N., Long. 09° 02′ 00″ E.

Pilot station telephone number 929006–929057. VHF Channel 16.

ANCHORAGE: All of the Roads are available for anchorage except where prohibited zones indicated on charts.

HEALTH: Free Pratique may be requested by radio to Sanimare Cagliari between 12 to 6 hours prior to arrival advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO: Cagliari Radio operating continuously on 2182 kHz, and on 156.8 MHz.

Tankers: 48 hours' radio notice must be given, also advice of readiness on arrival.

Following information to be sent with first ETA message to Saras – Sarroch, Telex: 790169 Saraff I.

1. Quantity of clean and/or dirty ballast.
2. Quantity of slops to be discharged/kept on board.
3. Previous cargo.
4. Condition of cargo tanks i.e. inerted, gas free, etc.
5. Arrival draft.
6. Sailing draft.
7. Distances bow manifold and stern manifold.
8. Manifold size and number of loading arms required.
9. Maximum acceptable loading rate.

MAX. SIZE: Cagliari Port: Max. draft 26 ft. Sarroch, SARAS Termin tankers up to 380,000 d.w.t. Max. draft 68 ft. Depth of channel 75 ft.

VHF: *Cagliari:* Harbour Master's Office, Channel 16.

Sarroch: Harbour Master's Office, Channel 16. Pilot station, Channel Mooring station, Channel 6. Boat service station, Channel 8. Loadin Master – Saras Terminal, Channel 14.

Also see "Shipmaster's Report".

TUGS: 6 available, of up to 4,500 h.p.

Cagliari: Normally join vessels at the port entrance.

Sarroch: Normally join tankers at anchorage points and assist berthin at Saras Jetties Terminal.

BERTHING: *Cagliari*

Berth No. 1: Length 68.0 m.; draft 14 ft.
Berth No. 2: Length 128.0 m.; draft 24 ft.
Berth No. 3: Length 227.0 m.; draft 21 ft.
Berth No. 4: Length 123.7 m.; draft 18 ft. 03 in.
Berth No. 5: Length 60.3 m.; draft 18 ft. 03 in.
Berth No. 6: Length 116.8 m.; draft 8 ft.
Berth No. 7: Length 92.6 m.; draft 16 ft. 06 in.
Berth No. 8: Length 278.6 m.; draft 23 ft.
Berth No. 9: Length 325.8 m.; draft 24 ft.
Berth No. 10: Length 328.0 m.; draft 26 ft. 06 in.
Berth No. 11: Length 203.2 m.; draft 26 ft. 06 in.
Berth Nos. 2, 3 and 4 reserved daily for passenger ships.

MEDICAL: All facilities available at Cagliari.

TANKERS: *Sarroch Saras Jetties*

P.1: draft 39 ft. 6 in.
P.2: draft 36 ft.
P.3: draft 41 ft.
P.4: draft 38 ft.
P.5: draft 36 ft.
P.6: draft 26 ft.
P.7: draft 35 ft.
P.8: not yet workable
P.9: not yet workable
P.10: draft 23 ft.

Platform Island No. 1 (for crude oil discharging only) draft 68 ft.
Platform Island No. 2 (for crude oil discharging only) draft 57 ft.

Loading Rates:

Berth Nos. 1 – 4	Crude oil	5,000 t.p.h.
	Fuel oil	2,000 t.p.h.
	Gas oil	2,000 t.p.h.
	Gasoline	1,000 t.p.h.
Berth No. 5	Fuel oil	2,000 t.p.h.
	Gas oil	800 t.p.h.
	Gasoline	500 t.p.h.
	LPG	200 t.p.h.

Berth No. 6 For Bunkering Barges and small tankers up to 3,00 d.w.t. Fuel oil, gas oil, kerosene and gasoline at slow pumping rates.

Berth No. 7	LPG	200 t.p.h.
	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.

Platform island for crude oil only at 10,000 t.p.h.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No water barge although bunker barges may be able supply small quantity fresh wat in emergency only.

At times fresh water is in short supply and may not be available. Cost of delivery of fresh water by tug is 3,000 lire per tonne.

FUEL: All grades available ex-barge only. Barges supply vessels anchor and vessels calling for bunkers only.

Vessels calling at Sarroch for bunkers by barge are required to kee Agents closely advised of their ETA and bunker requirements. Messag confirming the vessel's ETA should be sent to Agents 72, 48 and hours before vessel's arrival. Masters should note that Custom Regulations do not permit the return of bunkers to the refinery after th barge is loaded, therefore an accurate figure of bunkers required mu be given in the first ETA message to Agents.

CONSULS:
Belgium
Denmark
France
Netherlands
Norway
Sweden
United Kingdom

REPAIRS: Minor repairs can be handled at Cagliari. Slipway for vess up to 400 tons.

BALLAST: The discharge of ballast by tankers can be effected at berths at a pumping rate between 1,000 and 2,500 t.p.h. Reception ballast ashore is into 3 tanks with total capacity of 20,000 cu.m. a 6 API separator vessels.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wi spirits per man, usually allowed for consumption on board while vess in port.

REPATRIATION: No difficulties.

AIRPORT: Elmas Airport situated 12 km. from Cagliari.

TIME: GMT plus 1 hour. Summertime March to September: GMT p 2 hours.

HOLIDAYS: Not applicable to tankers. New Year's Day (1st Janua Epiphany (6th January); St. Joseph (19th March); Liberation Day (April); Labour Day (1st May); Easter and Day after Easter; Ascens Day; Corpus Domini; Proclamation Day (2nd June); St. Peter & St. (29th June); Assumption B.V.Maria (15th August); All Saints' Day November); Victory Day (4th November); Immaculate Conception December); Christmas Day (25th December); Boxing Day December).

POLICE/FIRE/AMBULANCE: *Cagliari:* Police Tel: 658956. Fire 652222. Ambulance Tel: 656979.

Sarroch: Police Tel: 929063. Fire Tel: 652222. Ambulance Tel: 929

TELEPHONE: No telephone connection on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes issued by local police.

DEVELOPMENTS: The new industrial port S.W. of Cagliari is still u construction. Both Meridionale and Settentrionale Moles have now completed.

SHIPMASTER'S REPORT: October 1979 (Updated 1986).

Anchorage Restrictions: The following port regulation in force since April 30th, 1979:

Vessels calling at Sarroch for orders only, may not get permission to anchor at Golfo di Cagliari Anchorage.

Such a vessel must remain in position South of the line Cape Spartivento – Cape Carbonara.

Offence against this regulation will cause the vessel to be fully charged for harbour and light dues in connection with clearing by Immigration, Port Health, Customs and Agents.

VHF: Pilot operates on Channels 16 and 9. Agencies operate on Channel 8. Loading Master Sarroch/Saras Jetties operate on Channel 14. Call sign: "Saras Terminal".

SHIPMASTER'S REPORT: May 1981.

At the oil berths it is usual to have 4 tugs and tugs are paid by the hour, i.e. the use of a tug for 61 minutes costs 2 hours hire.

Moorings are usually 3,2,2, with head and stern lines sent first followed by springs. Require plenty of turns on the bitts for tugs.

Apparently the boatmen will not come out to the vessel if she is anchored outside the designated anchorage areas as shown on the chart unless, of course, the draft prohibits a close approach. It is frequently used for bunkering and crew changes.

To obtain fresh water from the jetty it is necessary to obtain, in duplicate, an official form from the Agent.

According to Pilot the max. size is now 250,000 d.w.t. and draft 23 m.

Harbour Master boards for, usually, at least one inspection and collects EEC Check List. Vessels documents usually taken ashore for perusal by Harbour Master.

Anchorage dues are valid for one month.

AUTHORITY: Capitaneria di Porto di Cagliari, 09100 Cagliari, Italy. *Contact:* Captain Sergio Albanese, Port Commandant.

SARAS Marine Terminal, 09018 Sarroch (CA), Italy. *Tel:* (070) 900031 - 900061. *Telex:* 790169. *Cables:* Saras – Sarroch. *Contact:* Captain D. Grosso, Manager – Marine Service.

CATANIA, Sicily: 37.29 N. 15.06 E. **(See Plan)**

DOCUMENTS: Arrival report requested by Harbour Authorities. Also see "Augusta".

PILOTAGE: Master can communicate with Pilot on VHF Channel 16. Pilot boards at sight on harbour entry. International Code signals used to call Pilot.

ANCHORAGE: Vessel must remain on roads awaiting Pilot.

RESTRICTIONS: No restrictions on entry at night, except for tankers (either loaded or empty, as per harbour regulation). The tide at Catania is no more than 30 cm. Bar at entrance 30 ft.

MAX. SIZE: No limitation on the length and breadth but only on draft of vessel, provided same can be contained within the size of piers of Catania Harbour. See "Berthing".

HEALTH: The usual Sanitary Pratique as per all Italian ports is requested. Free Pratique obtainable by radio prior arrival sending cable to "Sanimare Catania".

RADIO: The quickest way is to address messages to "Romaradio", better if adding to the telegraphic address the telex number of Agency, so that after very short time from reception at Romaradio the message is in Agent's hands.

It is important that 72 *working* hours notice of ETA be passed to Agent.

TUGS: When Pilots are on board, they can call tugs by small radio-calling station. Very frequently the tug's Company, when seeing a large ship, join vessel at same time as Pilot. Tugs using ship's lines.

BERTHING:

Berth No.		*Length*	*Depth*
1 and 2	Molo Mezzogiorno, Oil berths	361 m.	30 ft. 6 in.
6	Molo Crispi, Silo berth	154 m.	30 ft.
7	" "	130 m.	29 ft.

21	" "	111 m.	19 ft. 6 in.
22	" "	60 m.	16 ft. to 20 ft.

STEVEDORES: As per actual Port Labour Regulations, in order to book gangs, stowage details must reach Agency not later than 1100 hrs. of the day before ship's arrival, except for work to be done on Saturdays, Sundays and Mondays when application for gangs must be made on Friday.

The official load/discharge rate for general cargo is 50 tons per hatch per day (8 hours), but real output is higher. Increase for overtime, continuous shifts (0700–1330 hrs.; 1330–2000 hrs.; 2000–0230 hrs.). Night work, Sundays, national holidays, etc.

MEDICAL: Hospital facilities easily available. No advance notice required unless for emergency cases and for cases to be urgently treated during night and holidays.

TANKERS: 2 tanker berths are situated in line at Southern Breakwater, called "Molo Mezzogiorno". There are 3 pipe-lines, diameters of 8 in., 6 in., 4 in. No discharge facilities for tank washing.

Tankers are not allowed to berth or unberth at night.

SALINITY: Average salinity of water inside the port is the same as the average salinity of Mediterranean.

FRESH WATER: Available at nearly all quays including bunker piers.

FUEL: Bunkers available and supplied only by pipe connection at bunker pier (Molo Mezzogiorno). Max. rate 400 t.p.h.

REPAIRS/DRY DOCK: Small repairs can be carried out at Catania. No dry docks available.

CUSTOMS ALLOWANCES: Tobacco, for foreign ships not in coastal service in Italian Ports: 50 cigarettes per each crew member, for the first 24 hours of the ship's stay in port. Other cigarettes can be obtained for which an application to the Customs House is required. Spirits: 2 or 3 bottles per day (provided minimum 20 crew members).

AIRPORT: Very near important airport with regular international flights.

TIME: GMT plus 1 hour. In Summer time GMT plus 2 hours.

HOLIDAYS: Normally, during all holidays it is possible to work with extra payment.

TELEPHONES: Numbers of emergency services: Police 531905; Emergency Police 113; Fire Brigade 327702; Sanitary Office 532123; Harbour Master 531667, 531134; Pilot 531906; Mooring 531150.

DEVELOPMENTS: Ferry berth under construction. 40 ton multi-purpose container crane to be installed. With spreader it will be able to handle 20 ft., 35 ft. and 40 ft. containers and general cargo up to 45 tons by hook.

AUTHORITY: Capitaneira di Porto. Via Dusmet, Porto di Catania, Italy. *Tel:* 531667, 531134. *Telex:* 912350. *Cables:* Capitaneria di Porto-Catania. *Contact:* Comm. Antonino Petralia.

CHIOGGIA: 45.14 N. 12.19 E. **(See Plan)**

PORT LIMITS: Bacino Marittima and Banchina Lombardo Esterno.

DOCUMENTS:

6 Crew Lists (IMO Form).
6 Passenger Lists.
2 Stores Lists.
2 Cargo Manifests.
2 Crew Personal Effects Lists.

PILOTAGE: Compulsory for vessels over 500 g.r.t. ETA at least 24 hours prior to arrival. Pilot will board 1.5 miles E.N.E. of channel entrance. Vessels on arrival may contact Pilots by VHF (Channel 14).

ANCHORAGE: Recommended anchorage 1.5 miles North East of the entrance. All vessels must keep radio watch, specially in Winter time owing to very strong E.N.E. winds.

Anchorage in inner road available, with Harbour Master authorisation.

HEALTH: Clearance on arrival.

VHF: Harbour Master on Channel 16 from 0800 hrs. – 2000 hrs. Venice Radio (PT) on Channel 16, continuously.

TUGS: Available.

BERTHING: For general cargo there are the following berths: Banchina Lombardo Esterno: Length 650 m., max. draft 21 ft. Bacino Marittima, with 3 berths available, total length 480 m., draft from 14 ft. to 16 ft.

Banchina Lombardo Interno: Length 100 m., draft 14 ft. For bulk carriers (grain etc.) there are 2 mooring buoys.

Campo Boe San Felice: For ships LOA 220 m., max. draft 28 ft.
Campo Boe Perognola: For ships LOA 150 m., max. draft 21 ft.
Ro/Ro berth: Bacino Marittima South – max. draft 15 ft.

CRANES: 16 mobile cargo cranes – max. capacity 130 tons. 3 floating elevators for bulk carriers. 1 cargo crane on rails – capacity 5 tons alongside Banchina Lombardo Interno.

STEVEDORES: Working hours normally 0800 – 1200 hrs, 1400 – 1800 hrs.

MEDICAL: Hospital facilities available.

FRESH WATER: Available on the berth by hose connection. For ships on road by tug or barge, is necessary.

FUEL: Available by lighter.

REPAIRS: Routine maintenance possible.

CUSTOMS ALLOWANCES: Italian Regulations apply.

SHIPMASTER'S REPORT: August 1980.

Vessel discharged yellow corn.

Chioggia is a famous fishing port in the Southern region of the Venice lagoon. In the past few years more and more vessels with grain cargo have been directed to this port because the facilities of Venice, Ravenna, etc., are not sufficient to handle the increasing quantities of imported grain, corn, soyabean meal, etc.

Vessels with an arrival draft deeper than 28 ft. have to anchor outside the breakwater about one mile N.E. of the entrance. The depth there is 12.0 m. – 14.0 m., the bottom is muddy. The lightering operations are done by floating elevator and modern barges. It is understood that the season is good and the sea calm. The daily discharge rate with one elevator is between 3,000 and 4,000 metric tons. The elevator is not self propelled, the barges are handled by a modern pushing tug. From the vessel the barges move alongside to the inner harbour basin named "Bacino della Stazione Marittima" where they are discharged by mobile cranes into lorries.

A shipchandler is available, the quality of fresh provisions is good. The shipchandler also co-operates with "Unitor" gas and oxygen change.

Fresh water is only available by tug at outer roads and in small quantities, tug charges about U.S.$300.00 per hour.

Transportation of crew and small amounts of stores is done by the pilot boat, which charges U.S.$75.00 per trip from 0800 hrs. until 1700 hrs. Monday-Saturday, outside that time 50% more.

The pilot boat listens on Channel 14 VHF during daytime, otherwise only when there is work for the Pilot.

When vessel's draft is not more than 28 ft., shifting into the inner roads is possible, there is a place close S.W. of the castle "Forte S. Felice" with two mooring buoys for the stern and one for the bow, distance between stern buoys and bow buoy is 250 m., the depth is 10.0 m. – 11.0 m.

There is one tug available, further tugs have to come from Venice.

At the inner roads fresh water is available by waterboat from Venice-Marghera, minimum of two days notice required, the quality is good. A crewboat is available and has to be arranged by the Agent, VHF is not available, the charge rate is about 30,000 (thirty thousand) Italian Lira per trip.

The nearest airport is Venice/Marco Polo Airport, taxi charges from Chioggia to Airport between 30,000 and 40,000 Italian Lira.

From the ship's documents only the Certificate of Measurement was required by the authorities, other forms like those required at Venice.

Doctor and hospital with X-ray facility available, giving medical reports in Italian language only.

Repair facilities are not available, have to be ordered from Venice.

AUTHORITY: Capitaneria di Porto – Chioggia, Piazza Santa Croce 1290, 30015 Chioggia, Italy. *Tel:* (041) 400242, 404741, 404761. *Telex:* 411063 Compch I. *Cables:* Compamare Chioggia. *FAX:* (041) 406812. *Contact:* R. Barnabei, Port Commandant.

CIRO MARINA (Pta. Alice): 39.24 N. 17.09 E. **(See Plan)**

SHIPMASTER'S REPORT: November 1979.

The vessel was instructed to go to Ciro Marina to load a cargo of salt, at the time the vessel was berthed at Marina de Carrara. We realised that we did not have a chart of Ciro Marina and ordered one from Genoa. After 4 days still no chart was forthcoming, I do not think such a chart exists.

We approached Ciro Marina from the South, as close in as was considered prudent, but no sign of any harbour could be seen at the village of Ciro Marina.

Looking further North towards Pta. Alice (Al-lee-chi) a large hangar type building and loader could be seen, (this coincides with the statement in the Pilot supplement, page 78). We rounded the point and proceeded towards the loader, where dolphins could be seen. (See "Plan").

Torre Vecchia is not so noticeable when approaching from the East. (Mediterranean Pilot Vol. 2, Page 475, lines 18-22).

It was established that a Pilot should have been ordered through Crotone Pilot Station, 20 miles South of Pta. Alice. As the weather was excellent, and ascertaining that there was ample water I decided to berth the vessel, this was accomplished without any difficulty.

It is best to drop the anchor well out, as it is used to haul small ships off the dolphins to load, as the loader cannot traverse right in close. We were told there is usually a buoy moored offshore to take an offshore headline, but this had been washed ashore in the Winter. An offshore dolphin for a similar stern line is in position. (See "Plan").

I was told the loader can load up to 2,000 tonnes per hour, and is fairly manoeuvrable. With the loader placed amidships it was necessary to shift ship twice, to load right forward, and right aft.

No fresh water is available. It might be possible to get a small quantity of stores, although getting them on board would be quite a carry, the loading chute/pipe is about 300 m. long with a narrow catwalk alongside the loading belt, it is not the best way to get stores aboard.

Sailing presents no difficulties, just let go and steam away. The Pilot does not appear.

As this is an open to the sea berth it is dangerous with winds from W.S.W. through North to E.S.E., or any Northerly swell. Vessels of 14,000 tons use this "port" and large quantities of salt are exported.

References:

B.A. Chart 198.

Mediterranean Pilot Volume 2. 9th Edition 1965. Pages 474 and 475, along with supplement No. 7 – 1975.

Position: Gulf of Taranto. Lat. 39° 24.2' N., Long. 17° 08.7' E. (approx.).

Type of Port: Open to the sea.

Pilot: Ordered through Crotone Pilot, VHF Channels 16 and 14.

Radio Station: Crotone Radio is the nearest.

Cargo Loaded: Mineral salt.

Rate of Load: Up to 2,000 tonnes per hour.

Fresh Water: Not available.

Boatmen: Available. They stand by from arrival to departure.

AUTHORITY: Capitaneria di Porto Crotone, Lago Molo, Porto Nuovo, 88074 Crotone, Italy. *Tel:* 0962-20721, 0962-20722. *Telex:* 890083 Compcr I. *Contact:* Manlio Ritiore, Harbour Master.

CIVITAVECCHIA: 42.05 N. 11.47 E. **(See Plan**

DOCUMENTS: On arrival:

4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
2 Provisions Lists.
2 Lists of Crew Articles, including Tobacco, Cigarettes, Spirits, Radio etc.
Detailed declaration of all firearms, weapons and ammunition onboard as ship's equipment.
Manifest(s) and Bill(s) of Lading (non-negotiable) covering all cargo on board.

It is recommended that particular care be exercised in giving the exact weight and number of tobacco, cigarettes, spirits, paper for cigarettes, cigars, cigarillos, coffee, sugar, salt, pepper, spices, cocoa and chocolate, etc., on board, as well as bunker quantities and lube oil, thus avoiding fines in case the Customs guards in searching vessel subsequently should find any concealed.

PILOTAGE: Pilots are advised of vessel's arrival by Port Authorities and by Agents. Therefore accurate advance notice of ETA should be addressed by Master to Agents. Pilot usually boards vessel within 1 mile of port. Pilot station in port area. Pilots work on VHF Channel 14.

ANCHORAGES: Any vacant place assigned by Port Authorities, taking into account vessel's draft. If port is congested vessels anchor at roads. Pilot assistance is recommended.

RESTRICTIONS: No restrictions are imposed upon entry. With the exceptions of particular individual cases to be submitted for perusal to Harbour Authorities, vessels may berth and sail at any time, weather permitting. Only 1 tug available between 0000 hrs. – 0500 hrs.

MAX. SIZE: Max. draft 34 ft. 6 in.

HEALTH: Clearance is granted by radio; Master to cable Sanimare Civitavecchia 24 hours prior to vessel's arrival. Quarantine requirements are those prevailing in all other Italian ports.

RADIO: Communications to and from vessels are sent and received from Civitavecchia Radio.

TUGS: Tugs wait for vessel at port entrance. Tug assistance is necessary although not compulsory.

BERTHING: Shore fenders keep vessel off the quay.

Berths: No. 2 for vessels up to 180 m. length, 28 ft. 6 in. draft.
No. 7 for vessels up to 160 m. length, 25 ft. draft.
No. 8 for vessels up to 240 m. length, 34 ft. draft.
No. 9 for vessels up to 130 m. length, 24 ft. draft.
No. 10 for vessels up to 220 m. length, 28 ft. 6 in. draft.
No. 11 for vessels up to 220 m. length, 28 ft. 6 in. draft.
No. 14 for vessels up to 190 m. length, 34 ft. draft.
No. 18 for vessels up to 220 m. length, 34 ft. 6 in. draft.
No. 20 for vessels up to 220 m. length, 38 ft. draft.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 8: Grain silo of 35/40,000 tons capacity is available; this berth is equipped with 1 rail-sucker with capacity 400 t.p.h. Ore, coal, fertilisers, sulphur, etc. can be handled at Quay Nos. 2, 7, 9, 10, 11 and 14. Structures for containers not available here, nevertheless small traffic might be practicable. Ro/Ro traffic practicable. No facilities exist for LPG carriers.

STEVEDORES: To enable Agent to order gangs it is very important to provide accurate ETA in good time.

Normal working time, Saturday inclusive: From 0600 – 1230 hrs., from 1230 – 1900 hrs. and from 1900 – 0030 hrs. against payment of 50% extra, Saturday 70% extra.

Sunday: Work can be performed at overtime rates plus 53% extra from 0600 – 1230 hrs., and 100% extra from 1230 hrs. – 1900 hrs.

Holidays: Work can be performed at overtime rates plus 150% extra from 0600 – 1230 hrs., from 1230 – 1900 hrs. and from 1900 – 0030 hrs.

MEDICAL: Not necessary to receive advance note of required medical attention. Hospital and clinical surgery available. Master to advise in advance of particular inoculations required.

TANKERS: Max. draft allowed 38 ft. Max. length 220 m. Tankers are not permitted to enter port before sunrise and after sunset. Diameter of discharge lines 8 in. – 14 in.

FRESH WATER: Drinking water and water for boilers is supplied from pier by hoses. Average pumping rate 40 t.p.h. – 100 t.p.h. Fresh water also available by barge, capacity 120 tons.

Shipmaster's Report: April 1980: Fresh water is always in short supply and only limited quantities supplied to vessels.

FUEL: Bunkering can be effected by means of barges and/or tank-lorries at all quays. Grades available: fuel oil and gas oil.

IDENTIFICATION CARDS: Required. Passes issued by local police.

CONSULS: There are no Consulates, but only Consular Agencies or Honorary Representatives for the following countries:

Finland	Tel. 23134	Portugal	Tel. 23048
France	Tel. 23048	Spain	Tel. 24304
Norway	Tel. 25207	Sweden	Tel. 23109

Nearest British Consulate is in Rome.

REPAIRS: Repairs of limited extent and importance may be carried out by 2 local workshops.

GANGWAY/DECK WATCHMEN: Watchmen services recommended.

CERTIFICATES: Requirements are those prevailing in all other Italian ports, e.g. Tonnage Certificate, Safety Equipment, Load Line, Derat Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco. Quantity permitted to each crew member: 50 grams to be smoked within first 48 hours. Wine and Spirits. 1 open bottle of spirits.

REPATRIATION: Facilities exist to effect crew changes and to arrange repatriations.

AIRPORT: Distance from airport Leonardo da Vinci (Rome) 70 km.

TIME: 1 hour in advance in relation to GMT. Clock will be advanced 1 hour in Summertime, giving 2 hours advance of GMT.

POLICE/AMBULANCE/FIRE: Police, 23729; Ambulance, 23382; Fire 23333.

TELEPHONES: Can be connected on board vessels at Quay No. 7, 8, 9 and 10.

HOLIDAYS: All Sundays, 1st and 6th January, 19th March, 25th and 28th April, 1st May, 2nd and 29th June, 15th August, 1st and 4th November, 8th, 25th and 26th December, Easter Monday, Ascension Day, Corpus Domini. Holiday work is subject to the authorisation of port authorities.

DEVELOPMENTS: Breakwater under construction.

AUTHORITY: Capitaneria di Porto di Civitavecchia, 00053 Civitavecchia, Italy. *Tel:* 0766-20250/35993. *Telex:* 611011. *Cables:* Compamare Civitavecchia. *Contact:* Technical Department or Harbour Master.

FIUMICINO: 41.46 N. 12.13 E. (See Plan)

DOCUMENTS:

Before entering territorial waters in the vicinity of the port, tankers' Masters must, directly or by ship's Agent advise authority of the following:

Ship's name and call sign;
Length and draft;
Destination and ETA;
General nature and quantity of cargo.

Documents required:

3 copies Crew List.
Stores Manifest.
List of Personal Effects.
Manifest of Cargo.

PILOTAGE: Vessel should await Pilot about 1.0 miles off the tanker loading platforms which are situated in the following positions:

Platform R1: Lat. 41° 45′ 13.54″ N., Long. 12° 09′ 14.54″ E.
Platform R2: Lat. 41° 44′ 44.35″ N., Long. 12° 10′ 03.58″ E.

ANCHORAGE: Vessels waiting to berth should anchor to the South of Platform R2, not less than 1 mile from the platform. The anchorage is not recommended during strong South or South-westerly winds, and in unfavourable weather conditions it is advisable for vessels to remain underway.

It is forbidden to use anchors in the near vicinity of the tanker berths, due to the presence of underwater pipe-lines. When approaching the moorings, anchors must be firmly secured in the hawse.

RESTRICTIONS: Pilotage and mooring is not carried out during hours of darkness. Unmooring possible day and night.

MAX. SIZE: R1 platform: 150,000–290,000 d.w.tonnes, 200,000 displacement tonnes, draft 50 ft.

R2 platform: 150,000 d.w.tonnes, 130,000 displacement tonnes, draft 45 ft.

HEALTH: Agent will advise "Sanimare Roma Fiumicino" via Civilta' Romana, 8-Roma, and doctor will come on board in the Roads, usually at 0900 hours.

RADIO: Advise Refinery of vessel's ETA 72 hours before arrival via Roma Radio. Confirm ETA 24 hours before arrival.

Vessels arriving for the first time at Fiumicino should also advise dimensions of vessel's manifold flange connections, as follows: distance from bow, distance from ship's side, height above deck, outside diameter, inside diameter, number of holes, distance between centre of opposite holes and diameter of holes.

Vessels should also communicate draft, cargo temperature, lifting power of derrick, and vessels loading should also advise quantity of ballast on board.

During cargo operations, the tanker will communicate by radio-telephone with the pumping station and the refinery.

VHF: Pilot station on VHF Channel 16. Listens during daylight hours only. Port Authority available 24 hours on VHF Channel 16.

TUGS: 1 × 2,330 h.p. Tug required by crude oil tankers and product tankers.

MEDICAL: Local doctor and hospitals available in Rome.

TANKERS: 2 offshore mooring platforms, R1 and R2, connected to sea-lines of 16 in. (2) with manifold connections of 16 in. at Platform R1 and 12 in. at Platform R2. Loading rates 800 to 1,000 cu.m. per hour. Max. rate of discharge 5,500 cu.m.p.h. for crude and 1,000 cu.m.p.h. for products.

Platform R1 for crude oil tankers.

Platform R2 for product tankers and small crude oil tankers of not less than 10,000 d.w.t.

Mooring: Vessel to have ready on arrival: port derrick rigged for hose handling; boat-rope, pilot ladder, heaving lines and lifebuoys on both sides; and bow stopper.

Vessel is moored by the bow about 30 m. to 50 m. distant from the mooring platform.

Hoses: Connecting and disconnecting hoses performed by refinery personnel, vessel to supply winchman and man the derrick. Derrick capacity to be at least 3 tons for ships loading and discharging products and 8 tons for crude oil tankers. Each platform is equipped with 2 floating hoses, about 200 m. long, which drift fully extended when berth is not occupied.

BALLAST: Raffineria di Roma can accept dirty ballast or tank washings up to a maximum of 13,000 tons. Recommended advise before arrival the quantity of ballast to be discharged. Ballast should be reduced to a safe minimum to save time at the mooring berth.

SALINITY: 25-28 grams per litre.

FRESH WATER: Supply by barge 100 tons per trip.

FUEL: Bunkers not available, only lube oil in drums can be supplied.

CONSULS: All Consulates and Embassies in Rome.

REPAIRS: Small repairs can be effected but no dry dock.

CUSTOMS ALLOWANCES: 40 cigarettes per day for 3 days for each Crew member.

AIRPORT: International airport "Leonardo da Vinci" at Fiumicino.

TIME: GMT plus 1 hour. From March 29th to September 26th, GMT plus 2 hours.

REGULATIONS: Raffineria di Roma will hold vessel responsible for consequences of any pollution caused by oil leaking or discharged from the ship. Strictest precautions to be observed.

Engine to be kept ready to leave the berth in the shortest possible time.

Propeller movements are forbidden while vessel in berth, due to presence of floating pipe-lines.

WINDS: In the Fiumicino Roads the strongest winds come from S.W., but all winds coming from S.E. to N.W. can cause storms that can be dangerous both for moored ships and anchored ships.

Northern winds, being partially weakened by the coast, are dangerous only when exceptionally strong.

Usually storms begin with S.E. winds, which then turn South-westerly reaching their maximum force; then they usually turn Northerly or North-westerly, finally weakening; this cycle can last from 3 days up to more than a week. However the above cycle does not always develop in this way, since the peculiar characteristic of this zone is the rapidity by which wind can change both in force and direction, as well as the sea possibility of becoming rough in a very short time. The stream almost always goes from S.E. towards N.W. at the speed of 0.5 to 1 knot. Owing to the Tiber's mouth, the stream can exceptionally increase in intensity, but due to the distance between terminals and shore, it has never up to now increased in intensity to such a point as to be dangerous for mooring and anchoring ships. Tides are practically negligible; in fact the maximum difference between high and low tide is about 0.40 m.

GENERAL: A refinery representative will remain on the vessel to supervise cargo inspection, loading/unloading and surveillance. He is to be provided with accommodation and meals.

A Raffineria di Roma S.p.A. representative will, upon boarding the vessel, require a letter, stating:

(a) the minimum discharge rate of crude oil, products or ballast or the maximum loading rate;
(b) the maximum back pressure to be maintained at ship's manifold;
(c) amount of cargo requested for loading vessel.

AUTHORITY: Locamare Fiumicino, Viale Traiano 71, 00054 Fiumicino, Italy. *Tel:* (06) 6451911, 6451933. *Cables:* Locamare Fiumicino. *Contact:* Giuseppe di Matteo, Comandante.

Operator: Fina Italiana S.p.A., Via Rossini 6, C.P. 10056, 20122 Milano, Italy. *Tel:* 7759. *Telex:* 311210 Fina I.

GAETA: 41.13 N. 13.35 E. (See Plan)

PORT LIMITS: Although not reported on nautical charts, port limits may be considered as the seaward boundaries of the compulsory pilotage area.

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List.
6 copies Cargo Manifest.
3 copies Provisions Manifest (Stores List).
3 copies List of Crew Personal Effects.
2 copies Arrival Report (on form submitted by Agents).
2 copies Maritime Health Declaration.
Vaccination Certificates for sighting.
Ship's Certificates including Italian Authority dues.

PILOTAGE: Compulsory for entering Roads, docking and undocking. Seaward boundaries of compulsory pilotage area within 2 miles from Punta Stendardo, up to a line joining Punta Stendardo with Torre Scauri (line bearing about 65° from Punta Stendardo). Pilots meet vessel about 2 miles from Punta Stendardo and can be contacted by VHF (calling Channel 16, working Channel 12) 1 hour before vessel's arrival.

Advance notice to Pilots given by vessel's Agent.

ANCHORAGES: Safe anchorage can be found outside the compulsory pilotage area or, according to Pilot's instructions, inside above said area.

RESTRICTIONS: No restrictions outside the compulsory pilotage area. Inside above area vessels to keep clear from prohibited anchorage areas, sea berth facilities and mooring buoys, mooring buoys for military vessels, oil jetty facilities and mussel beds.

Also see "Berthing".

MAX. SIZE: Inside compulsory pilotage area, max. permissible length, breadth, draft, within values of 200,000 d.w.t. class VLCC.

Also see "Berthing".

HEALTH: Pratique automatic for vessels coming from ports in E.E.C. countries.

Otherwise Free Pratique granted by local Health Officer who boards ships on arrival together with Harbour Officers, between 0700 hrs. and sunset. In order to facilitate boarding by officers at anchorage or berths, it is requested that vessels have a convenient accommodation ladder/gangway ready.

RADIO: 72, 48 and 24 hours' definite notice to Agent through Roma Radio (IAR).

VHF: Port Authority, Pilots, Tugs, Oil Sea Berth, Oil Jetty and Agency Offices equipped with VHF; calling Channel 16.

TUGS: Tugs standing just inside Punta Stendardo, being called for service by the boarding Pilot. Ship's lines used.

Tug-boat assistance compulsory, for vessel over 1,600 g.r.t., for docking and undocking; stand-by tug compulsory, for vessel loading or discharging at oil jetty (but not at oil sea berth), from connection to disconnection of cargo hoses.

BERTHING: Oil sea berth for VLCCs discharging crude oil, oil jetty for tankers discharging/loading crude oil and oil products, dry cargo main quay "Caboto", dry cargo pier "Genepesca". Docking/undocking normally performed in daytime only with possible exceptions.

VLCC Sea Berth: Owned by Messrs. S.I.O G. (Societa' Italiana Oleodotti Gaeta) for class VLCC 200,000 d.w.t. discharging crude oil. Restrictions for vessels within above d.w.t. class not yet officially issued. Max. values of d.w.t., length, draft of vessels already called:
- Max. d.w.t.: 260,000 (VLCC Athene)
- Max. length: 349 m. (VLCC Agip Lazio)
- Max. draft: 20.30 m. (VLCC Agip Lazio)

One or 2 extra tugs (in addition to the 3 existing in the Port of Gaeta) may be needed for berthing larger size vessels at the sea berth, said extra tugs to come from Naples with adequate advance notice.

TERMINAL A.G.I.P.: Owned by A.G.I.P. (Deposito Costiero Di Gaeta) for tankers discharging/loading crude oil and oil products.

Restrictions:

Maximum permissible draft . . . . 48 ft.
Maximum permissible distance between cargo manifolds and vessel's stern. . . . . 450 ft.
Maximum permissible height of above vessel's cargo manifold from sea level . . . . 49 ft.

Tankers up to 60,000 d.w.t. normally berth and operate at A.G.I.P. Jetty; tankers over 60,000 d.w.t. and up to 90,000 d.w.t. may be berthed at Oil Jetty or at Sea Berth according A.G.I.P. advice; tankers over 90,000 d.w.t. will find berth at Sea Berth.

Terminal A.G.I.P. is a finger jetty with 3 berths: North Berth with restrictions as above; South Berth for vessels up to 39 ft. draft; stern berth for small coastwise vessels.

North and South Berths equipped with 4 articulated 8 in. steel pipe connections.

Dry Cargo Quay "Caboto": 106 m. long quay with max. official draft limitation of 20 ft.; vessels up to 130 m. length, drafts up to 20 ft. fwd and 22 ft. aft, are normally accommodated.

Dry Cargo Pier "Genepesca": 50 m. long pier with 1 berth each side for vessels up to 15 ft. draft.

New Dry Cargo Quay "Salvo D'Acquisto": Length 223 m., width 80.0 m., dredged depth 7.0 m.

Dry Cargo Handling: Cargo normally handled – general cargo, clay, kaolin, fertilisers, animal-feed, frozen commodities, clinker, cement, steel rounds, steel coils, aluminium ingots, etc.

CRANES: 4 mobile dock cranes available, each having max. lifting capacity 30 tons (normal working capacity 15 tons).

STEVEDORES: Compagnia Lavoratori Portuali 'G. Caboto'. Gangs ordered by Agents dealing with cargo.

MEDICAL: Physician, Dentist, Eye and other Specialists available. Hospital and Nursing Home in Formia (7 km. from Gaeta); new Gaeta Hospital operative. Inoculation service available. Vaccination Certificates issued. Extension of Derat Certificates granted.

TANKERS: See "Berthing".

BALLAST: At all berths only clean ballast can be pumped out. G.I.P. Oil Jetty equipped with system for discharging ballast ashore through 8 in. connections and a 1600 m. long 10 in. pipe-line at a rate of about 400 – 450 t.p.h.

FRESH WATER: Of excellent quality supplied to ships at all berths but not at sea berth. At sea berth or at road, fresh water can be supplied by tug-boat but expensive.

FUEL: Supplies of Bunker "C" and Gasoil can be arranged ex-installation at A.G.I.P. Oil Jetty; a minimum quantity of 200 tons is required for fuel and 100 tons for Gasoil. At dry cargo berths bunkers can only be arranged by road tanker. Bunkers not available for vessels accommodated at sea berth.

REPAIRS: Minor steel and machinery repairs currently performed by local machine shops; major repairs may be effected by personnel and equipment from Naples.

DRY DOCKS: 2 dry docks for vessels up to about 70 m. length.

SURVEYORS: Lloyd's, A.B.S. and other Classification Societies' Surveyors obtainable from Naples.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened wine/spirit bottle per man.

REPATRIATION: Facilities available for effecting crew changes and arranging repatriation.

AIRPORT: Nearest airports Naples (96 km.) and Rome (International airport 135 km.).

TIME: GMT plus 1 hour September to March; GMT plus 2 hours March to September.

POLICE/AMBULANCE/FIRE: Police station telephone numbers: 113 (emergency); 460031; 460474. Ambulances telephone numbers: 24361; 24461. Fire department telephone number: 460270; 460931.

TELEPHONES: Arrangements for placing telephone aboard vessels not available.

EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office.

IDENTIFICATION CARDS: Shore passes issued by local police.

STORING: At dry cargo berths vessels may be stored by truck. At oil jetty or sea berth by motor launch or barge.

AUTHORITY: Capitaneria di Porto – Gaeta, Piazzale Cabato, 04024 – Gaeta. *Tel:* 460088. *Contact:* Ferdinando Landi, Port Commandant.

GELA: 37.04 N. 14.15 E.

DOCUMENTS:

For Maritime Authority:
Arrival Report.
Crew List.
Ship's Certificates, for sighting.

For Port Health:
Maritime Declaration of Health (1 copy).
Vaccination Certificates, for sighting.

For Customs:
List of supplies, deck and engine stores.
Cargo Manifest and Bills of Lading.

For Commissariat of Public Safety:
Passenger List (2 copies).
Crew List (1 copy).
Shore Passes for all Passengers and Crew.

PILOTAGE: Pilotage is compulsory for vessels of 500 g.r.t. and o
The Gela Pilots' Corporation, based at Ionio Street No.
Tel: 0933/917051, has VHF equipment (Channel 16 for calling
Channel 12 for working).

Requests for pilotage must be made two hours prior to ETA, an
office hours (0600hrs.to 2000 hrs.).

The Corporation has 2 service vessels with a black hull and with
letter "P" painted in white on both sides. To call the Pilot, the sig
laid down in the international signalling code must be employed.

The pilotage service is rendered up to 1 mile from the Port Islan

Vessels awaiting the Pilot must anchor 1 mile to the West of
breakwater on a bearing of 250° from the green light on the breakwa
or 1 mile to the East of the same breakwater on a bearing of 160°
the red light on the breakwater.

Berthing may be effected daylight hours. Unberthing can be effec
day and night.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: See "Pilotage".

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique is not granted by radio but is given onbo
after an accurate inspection.

RADIO: Roma Radio or Augusta Radio. Messages are forwar
quicker through Roma Radio. There is a coastal radio station at Ge

VHF: The District Maritime Office listens on VHF Channel 16 dur
office hours (0800 to 2000 hrs.).

TUGS: Tug service is effected by 3 tugs stationed at the Port Islan

Use of tugs is compulsory for tankers and dry cargo vess
(dependent on g.r.t. and n.r.t.).

BERTHING: On the Port Island of Gela, the following berths
available:

6 berths on the breakwater suitable for taking tankers with a gr
registered tonnage up to 30,000 tonnes and with a draft of 31 ft. 6
All berths are equipped to take bilge water and dirty ballast.

2 berths at the head of the pier suitable for taking vessels with
cargo loading facilities and up to 18,000 g.r.t. with a draft of 31 ft. 6

The Eastern berth is equipped with two platform trucks for handl
bulk cargo, capacity 8 tons.

The Western berth does not have stationary quay equipment; mob
cranes can be made available for handling manufactured produ
capacity 2.5 tons.

2 berths on the small head of the pier capable of taking tankers
to 3,000 g.r.t. with a draft of 20 ft.

1 sea berth in the buoyed area capable of taking tankers up
80,000 g.r.t. with a draft of 42 ft.

Also see "Tankers".

TANKERS: Anic Sea Line Terminal: Situated about 1 mile off
breakwater, a crude oil discharge berth in depth of 42 ft. served by 34
sea-line terminating in two 12 in. flexible hoses. No slop dischar
facilities. At the breakwater, Berth Nos. 1 to 6 for loading refined produ
and LPG can accommodate vessels up to 30,000 g.r.t. with max. d
31 ft. 6 in. Berth Nos. 1 and 2 are used for crude oil and heavy produ
Berth Nos. 3 and 4 are used for light products and gasoil. Berth Nos
and 6 are used for LPG and petrochemical products.

Storage tanks situated up to about 15 m. above sea level.

STEVEDORES: Stevedoring carried out by local company. Labour m
be ordered by Agent 3 – 12 hours in advance, depending on the s
requested.

MEDICAL: All assistance can be arranged by Agents. Hospital
private clinic available. Vaccinations and inoculations together
relative certificates can be carried out by the Office of Marine Heal

DENSITY: 1024.

FRESH WATER: Available at all berths against payment. Rate 10
Not available at Sea-Line Terminal.

FUEL: Available to vessels moored at the jetty head by means of
tanker, for small quantities only.

FIRE PRECAUTIONS: General standards of safety applicable
ports must be observed.

CONSULS: No local representation.

REPAIRS: Only minor repairs possible (Wood and metal work).

DRY DOCKS: None.

OPENING/CLOSING HATCHES: Optional to employ shore perso

CUSTOMS ALLOWANCES: As for other Italian Ports.

CLASSIFICATION SOCIETIES: None.

AIRPORT: No airport at Gela. Nearest airports at Catania and Pale

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: 1st January, Easter, Lunedi dell' Angelo (Angel's Monday), April 25th, May 1st, August 15th, November 1st, December 8th, December 25th and 26th.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
TELEPHONES: It is not possible to have telephones placed onboard.
AUTHORITY: Capitaneria di Porto di Gela, Ufficia Circondariale Maritimo, Gela.

GENOA: 44.24 N. 08.54 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
3 Cargo Manifests.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

Tankers: All the ships whose building contract dates 1975 or whose building started after June, 1976, must have a certificate I.O.P.P. (International Oil Pollution Prevention). If not, sailing will not be granted.

All other ships built before must have onboard all anti-pollution equipment and must hold the I.O.P.P. Certificate as from October 2nd, 1984.

Also the ships whose country has not taken part in MARPOL will be inspected by Port Authorities and R.I.N.A. for obtaining sailing permit.

PILOTAGE: Pilots advised of vessel's arrival by port authority and the latter by vessel's Agent. Therefore accurate ETA recommended. Pilotage compulsory for vessels over 500 g.r.t. To contact Pilots and pilot boats, VHF Channel 12. Time of working 24 hours. Pilots board vessel at about 1 mile off port entrance.

ANCHORAGES: Anchorage beyond the meridian passing through the port light at the end of Duca di Galliera Pier is forbidden from 1st June to 15th September.

RESTRICTIONS: Tankers not usually berthed during night.

During discharging at SPM vessel should keep at all times at least 30% of her SDWT (cargo and/or ballast) on board and trim should not exceed 5 m.

MAX. SIZE: Tankers: Up to 46 ft. draft within port. No limit for tankers mooring at Single mooring platform outside the port.

Other vessels: 31 ft. to 40 ft. draft. Also see "Tankers" and "Berthing".

HEALTH: Free Pratique may be requested by radio to "Sanimare, Genoa", between 12 to 6 hours before arrival, advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from all ports where there is no sanitary order.

RADIO: Genoa Radio, call sign ICB. Agent uses same station when cabling to vessels.

TUGS: Tugs join vessel at port entrance. Ship's line used. 42 tugs available, 600 h.p. – 6,000 h.p. Use of tugs optional except for vessels mooring to the platform or the buoy (oil discharge).

BERTHING: Pilot advises Master which side to berth. Shore fenders keep vessel off quay.

Molo Vecchio: 452 m. berthing length; 29–31 ft. permitted draft.

Silos Ponte Parodi: 200 m. berthing length; 36 ft. permitted draft.

Silos S. Limbania: 150 m. berthing length on both sides of the pier; permitted draft: 33 ft. East side, 36 ft. West side.

Ponte dei Mille: East side: 292 m. berthing length; 27–28 ft. permitted draft West side: 265 m. berthing length; 26–27 ft. permitted draft.

Ponte Andrea Doria: East side: 238 m. berthing length; 36 ft. permitted draft. West side: 233 m. berthing length; 36 ft. permitted draft.

Calata Oli Minerali: 474 m. berthing length (bow mooring); 24–36 ft. permitted draft.

Calata Stefano Canzio: 422 m. berthing length (bow mooring); 31–33 ft. permitted draft.

Calata Bettolo: 434 m. berthing length; 30 ft. permitted draft.

Ponte Rubattino: East side: 328 m. berthing length; 34 ft. 6 in. permitted draft. West side: 340 m. berthing length; 27–29 ft. permitted draft.

Ponte S. Giorgio: East side: 390 m. (will soon be in operation); 32 ft. permitted draft (will be 37 ft. 6 in.). West side: 264 m. berthing length; 30 ft. 6 in. permitted draft.

Ponte Ex-Idroscalo: East side: 190 m. berthing length; 29 ft. permitted draft. Head: 190 m. berthing length; 35 ft. permitted draft. West side: 260 m. berthing length; 28–32 ft. permitted draft.

Ponte Ethiopia: East side: 255 m. berthing length; 32–33 ft. permitted draft. Head: 146 m. berthing length; 32 ft. permitted draft. West side: 399 m. berthing length; 29–31 ft. permitted draft.

Ponte Eritrea: East side: 388 m. berthing length; 29–31 ft. permitted draft. Head: 145 m. berthing length; 31 ft. permitted draft. West side: 398 m. berthing length; 29–31 ft. permitted draft.

Banchina Italsider: 500 m. berthing length; 40–44 ft. permitted draft.

Also see "Container Handling Facilities" and "Specialised Cargo Handling Facilities".

CRANES: Over 300 cranes and elevators with lifting capacities ranging from 1 to 45 tons. Over 80 self-propelling cranes with lifting capacities ranging from 10 to 45 tons. 9 floating cranes with lifting capacities of up to 210 tons.

CONTAINER HANDLING FACILITIES: Ponte N. Ronco/Ponte Canepa/Ponte Libia: The Container Terminal covers a total surface of about 250,000 sq.m., of which 230,000 sq.m. are uncovered areas for positioning containers and about 17,000 sq.m. consist of covered areas for deposit of packed goods coming from stripping and intended for stuffing of containers. Quays with a total length of 1,200 m. and a depth of 11 m. – 11.5 m. (36 ft. – 38 ft.) make it possible to berth 5 ships and modern lifting facilities enable to effect loading and unloading operations at a rate of 1 container every 3 minutes. About 5 km. of railway lines are at the disposal of the terminal for the containers marshalling.

The terminal has a stacking capacity of about 10,000 containers and handles 200,000 containers a year for 30 companies.

The Port of Genoa Authority (C.A.P.) runs the Container Terminal and sees to the integral management of the operations for unloading/loading containers.

The Port Authority renders all the services in connection with containers and cargo, and in particular:

Total planning of ship operations, included calculations of stability, draft, torsion, etc.

Checking of the conditions of containers on receiving and on delivering them, on stuffing and on stripping, and issuing of the relevant "interchanges".

Drawing up of damage reports.

Cleaning and disinfestation (when necessary) of containers.

Assistance on stowing, unstowing and on lashing, unlashing cargo inside containers.

Assistance in repairing packing.

Container sealing, labelling and weighing.

Assistance to reefer containers (plugging and unplugging to electric outlets, checking of temperatures, drawing up of "pre-trip inspection certificates").

Terminal Equipment:
6 × 45 ton container gantry cranes.
6 transtainers on rails.
4 transtainers on tyres.
Large fleet of straddle carriers, lift trucks, trailers and fork-lift trucks.

Calata Sanita Container Terminal:

Length of Quay	525 m.
Available Operating Length	440 m.
Depth	14.5 m. (46 ft.)
Total Area	165,000 sq. m.
Stacking Capacity	4,000 TEU.
Annual Handling Capacity	200,000 TEU.
Portainer Cranes	3×45 ton Lifting Capacity
Transtainers	8×40 ton Lifting Capacity

Also see "Developments".

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing" for max. draft.

Ro/Ro Terminals: 25 special berths at Ponte Spinola, Ponte Calvi, Ponte dei Mille, Ponte A. Doria, Calata S. Lazzarino, Ponte Colombo, Ponte Assereto, Calata San Benigno, Calata Bettolo, Calata Bengasi, Calata Tripoli and Calata Derna, 45,000 sq.m. parking areas.

Cotton: 2 warehouses at Molo Vecchio, totalling 42,000 sq.m. in area and a 85,000 bale capacity.

Grain Silos: One at Santa Limbania (65,000 ton storage capacity – 600 t.p.h. unloading capacity). One at Ponte Parodi (45,000 ton storage capacity – 450 t.p.h. unloading capacity).

Maritime Passenger Stations: One at Ponte dei Mille and another one at Ponte Andrea Doria, capable of dealing with 5,000 passengers a day.

Three stations for Ro/Ro passengers at Ponte Calvi, Ponte Colombo and Calata Chiappella.

Animal Fats and Oils Depots: Plants at Ponte Assereto, Calata Sanita and Ponte Etiopia.

144 tanks having a total capacity of up to 53,000 tons.

14 barges with a total capacity of up to 12,000 tons.

Timber Terminal: 2 berths at Ponte ex-Idroscalo, 50,000 sq.m. area yard.

Coffee: A special warehouse is available at Ponte Etiopia, covering 8,800 sq.m. 50,000 sacks can be stored there.

Cellulose Terminals: 2 special berths at Ponte Eritrea and Ponte Somalia. 12,000 sq.m. of covered area.

Export-cargo Clearing Centre: Warehouse of 15,000 sq.m. equipped for the handling of 1,000 tons a day of parcels.

Wool: A special warehouse at Ponte Libia covering a 17,000 sq.m. area. 40,000 bale capacity.

Other Special Plants: Warehouses, depots, and special facilities for wine, salt, skins, bananas, coal.

TANKERS: Berths in Genoa Harbour suitable for tankers up to 750 ft. length, 34 ft. draft. Tankers discharging at Calata Sanita and Calata Olii Minerali are berthed stern to quay.

Multedo Harbour situated West of main harbour has the following jetties:

Multedo Pier – for vessels up to 588 ft. length, 31 ft. draft.
Pier "A" – for vessels up to 580 ft. length, 36 ft. draft.
Pier "B" – for vessels up to 850 ft. length, 43 ft. draft.
Pier "C" – for vessels up to 850 ft. length, 46 ft. draft.
Pier "D" – Presently accommodating tankers up to 46 ft. draft.

Discharge Rate: Maximum discharge rate for crude products:

Pier "A"	2,500/3,500 t.p.h.
Pier "B"	3,500/6,000 t.p.h.
Pier "C"	6,000/8,000 t.p.h.
Pier "D"	6,000/8,000 t.p.h.

Masters may speak direct to Pilots or Harbour Masters at Multedo Oil Berth in order to obtain latest information about berthing, etc., by calling on VHF Channel 6.

All tankers over 40,000 d.w.t. must have inert gas system fitted and working.

Multedo Inner Harbour: Cautionary Advice: The twisted course of the buoyed channel and its limited width decreasing from 700 ft. at the entrance down to 490 ft. abeam the head of Molo Multedo represent a high risk factor. Therefore a good helmsman should steer the ship and prompt engine response is required. In approaching the entrance channel do not attempt to pass between the SPM and the breakwater.

Berthing Procedure: From the pilot station, vessels approach the buoyed channel heading 036°(T) in order to pass 800 m. abeam the tower and 200 m. abeam of the new Voltri Breakwater head. Tugs are made fast at the entrance of the buoyed channel. Vessels are swung in the dredged turning area off the pier heads and backed down to the berths. The mooring operation is controlled from the pier by a Marine Terminal Supervisor (Docking Master) who communicates with the Pilot by walkie-talkie.

Calata Canzio: Cautionary Advice: The direction of approach across the West-going current, the limited width and the considerable traffic of vessels demand great caution when entering or leaving the East Entrance.

Single Buoy Mooring: The new mooring facility is located at 1,740 m. from the airport breakwater in a water depth of about 65 m., at distance of 2,250 m. from the platform and just in front of Italsider steel factory; it is linked with shore plants by a submarine pipe-line.

The new buoy can accommodate tankers up to 270,000 d.w.t., 350 m. length, 53 m. beam, 20 m. draft. This size was chosen on account of the fact that 80% of vessels coming up to the platform are under 270,000 d.w.t., whereas it can accommodate vessels up to 500,000 d.w.t.

The terminal operations are expected to take the following time:

Mooring: (from tanker arrival to pump beginning) 2 – 3 hours.

Discharge: (tankers up to 270,000 d.w.t. and discharge rate 9,000 cu.m./p.h.) 20 hours.

Unmooring: 30 minutes.

Single Mooring Platform: A steel tower, set up about 2,800 m. off the Genoa Multedo Oil Dock in water 50 m. in depth is provided for the discharge of crude oil from supertankers up to 500,000 d.w.t. Unloading capacity 14,000 cu.m./h.

A 48 in. (120 cm.) submarine pipe-line connects the tower with the terminals of all the oil companies operating at the Multedo Oil Dock.

Technical Characteristics: The tower consists of a steel structure having the form of a truncated pyramid set into the sea-bed at a depth of 50 m. and supporting the following parts above the level of the sea:

A lower platform having quarters for the accommodation of personnel or the housing of the various services, the deck being at a height of 6.335 m. a.s.l. This platform is protected by a steel structure mounted on elastic supports, with wooden fenders topped with rubber buffers. The toroidal structure, externally to the rubber buffers, is 34.20 m. in diameter. Under the impact of a vessel, the ring will shift axially for a distance of 2 m. as a result of the system of shock absorbers which support the lower platform.

An upper platform 10.335 m. a.s.l. which carries the rotating arm for berthing tankers and the connection of the floating discharge hoses. The rotating arm reaches a height of 13.882 m. a.s.l. and is fitted with:

(a) a bollard capable of withstanding a horizontal pull of 360 tons;

(b) 2 pipes 24 in. in diameter running to a double universal joint at sea level for connecting the riser of the submarine line to the floating hoses linking tower and tanker; on the rotating part of the tower, the two 24 in. pipes are fitted with cut-off valves and may be connected one to the other by means of a by-pass with a gate valve;

(c) a 5 ton service crane;

(d) a lighted beacon and radar reflector at a height of 23 m.

Floating Hoses for Crude Oil Discharge: The 2× 24 in. pipes with which the riser connects on the tower are coupled by universal joints to 2 floating hoses of 24 in. diameter, with 16 in. terminals, each hose being about 310 m. in length and consisting of 29 sections of 10.67 m., of which the last 3 are of 16 in. diameter for connecting to the ship's manifold. They are fitted with a blank flange, a Camlock rapid-closing joint and a Keystone rapid cut-off valve that will ensure perfect tightness and rapid disconnection in an emergency.

The hose connections are exactly 90° left of the bollard with respect to the mooring vessel.

Signal Lights and Fog Horn: The tower is equipped with a regulation flashing white light 23 m. a.s.l. and a fog horn.

The 2 floating hoses are marked at night by 5 red lights visible at a distance of 2 miles.

Request for Berth: Mooring at the tower is generally reserved for tankers which, owing to their size and draft, are unable to use the Multedo Oil Dock and have applied for permission to the Port of Genoa Authority Oil Dock Management.

Order of Berthing: Arriving tankers that are to work cargo at the tower and are awaiting authorisation to berth thereat must anchor in the roads.

The order of berthing is that of anchorage in the roads and, for vessels authorised to berth, according to the moment when arrival in the roads is signalled to the Port Authority's lookout station at the foot of the main lighthouse in Genoa Harbour.

Should it be impossible to communicate with the lookout station, the time when communication is established with the Genoa-Multedo Oil Dock Operations Office over VHF radio, on the frequency that will be notified as soon as possible (normally Channel 6 – 156.3 MHz), indicating the point of anchorage or the ship's position, will serve for establishing the order of berthing.

Berthing at the tower will be authorised by the Oil Dock Management upon receipt of the Master's written or radioed assurance that the ship is fully efficient and ready to proceed to berth and commence discharge. The Oil Companies that are receivers of cargoes or in anyway interested as users of the Oil Dock should begin discharge within 4 hours of completion of mooring and continue without interruption, day and night.

Saving cases of proven *force majeure,* vessels moored at the tower must restrict berth occupancy to the time strictly needed for discharge operations and for ballasting.

Berthing at Tower: Berthing at the tower will be authorised only weat
permitting and must be carried out with the assistance of a Pilot. T
Master may ask for the help of tugs, in the number needed to ens
the manoeuvre being executed safely.

Ships should moor using two 15 in. nylon hawsers 65 m. in leng
supplied by the tower, each able to withstand a 300 ton pull. The e
of each hawser is fitted with a 4.5 m. length of chain of which the la
link, devoid of stud, will be made fast to the ship's bow structures f
securing mooring ropes.

The section of chain outside the fairleads contains a safety eleme
calculated for a breaking load of 200 tons.

The vessel's mooring structures: anchor plates with aperture for p
quick release hooks, bollards, steel ropes, warping winches, etc., mu
be in fully efficient condition and able to withstand the stresses to whi
they will be subject once the mooring ropes have been made fast
them; they must furthermore allow for the ship being unmoored at a
moment by the crew.

As the mooring hawsers can break for accidental or oth
unpredictable causes before the limit of 200 tons is reached, desp
the inspection normally made before the arrival of each ship, all tanke
moored at the tower must at all times have their engines ready to mo
at full speed.

Safety Distance around Tower and Pipe-line: No ship or other craft ma
station itself, anchor, fish, or carry out underwater or other activities
the area around the tower and pipe-line, boundaries of which are:

South: Parallel 44° 23′ 30″ N.
North: The coast.
West: Meridian 8° 49′ 40″ E.
East: Meridian 8° 49′ 20″ E.

Excepting for tankers proceeding to the tower and the craft provid
harbour services and assistance, or other craft which have been du
authorised, no vessel or whatsoever craft may sail within a radius
800 m. of the tower.

Mooring and Warping Ropes: The 2 mooring hawsers will be secure
to a bollard which is part of the rotating structure of the tower and abo
14 m. a.s.l. When no vessel is at berth, the 2 hawsers float on t
surface, supported by red and yellow luminescent sleeves.

The ends of the hawsers are secured to 2 luminescent red buo
which support the lengths of chain that are to be made fast aboard.

Before a tanker arrives, the Port Authority's personnel will make t
ends of the chain of each mooring line fast to a big, floatin
polypropylene rope about 80 m. in length which the vessel must pick u
so that she may be slowly warped in to the tower.

Vessel will be moored with the aid of a craft suitable for operations
the open sea.

*Watches, Emergency services and Master's Contacts with Person
Engaged in Discharge:* As though at anchor in the roads, vesse
moored at the tower must continue to keep sea watches and retain o
board the crew required to cope with any emergency manoeuvre, eith
for vacating the berth or to meet any other serious event involving t
safety of the ship, persons and cargo.

Before commencing discharge, Masters should take steps to see th
liaison ensuring rapid and reliable communication between the Oil Doc
Management's representatives aboard, the Company interested with t
discharge and the Master has been arranged.

Safety Measures to keep Vessel Clear of Tower: Vessels at berth mu
keep sufficiently clear of the outer ring of the tower to ensure that t
bow bulb will not collide with the tower structures.

To this end, the Master must adopt all necessary measures a
precautions and take such other steps as may be ordered by the P
Authority, including the use of a tug in order to keep the vessel at a sa
distance from the tower.

Vessels needing to activate propellers in order to heat turbines mu
keep revolution to the minimum and run engines astern.

Hose Handling: While vessels are approaching and mooring at t
tower, one of the craft will take the floating hoses in tow, arranging a
keeping them in a position where they will not hinder manoeuvring.

On completion of mooring, the hoses will be brought alongside t
vessel on the port side, so that the ends are level with the ship's manifo
and will be secured to the tackle of the cargo derrick in such a mann
that the cargo receivers' personnel and the ship's crew may jointly ho
connect and get the hoses ready and then begin discharge. Hoses mu
not be subjected to a pressure of more than 14 kg./sq. cm.

The ship's derrick should be able to lift at least 10 tons.

Stand-By Tenders during Discharge: During mooring and discharge a
until sailing, the Port Authority will keep alongside or in proximity to t
tower a stand-by tender of suitable size and power provided with t
personnel, material and equipment that will ensure the proper function
of the tower's facilities and provide any assistance that may be need
in the event of a spillage or other emergency.

Another smaller craft, duly equipped for the purpose, will be provid
by the Port Authority for liaison between the Oil Dock, tower, tanker a
tender and for transporting personnel or light materials.

The 2 craft will be equipped with continuous listening VHF radio a
with anti-pollution and fire-fighting equipment.

Platform Services: The services relating to the operation of the tow
fixed and mobile facilities are under the control of the Genoa-Mult
Oil Dock Management, which exercises them through its personnel
the spot.

The employee in charge of services on the tower will be in touch
VHF radio, with the Oil Dock Management, informing the latter h
discharge is proceeding and of any abnormality and receiving from t
latter such instructions as may be necessary. Locally, he will kee
touch with the ship's Master and the representative of the Comp
interested with the discharge in order to facilitate operations in so fa
he is responsible and comply with all requests that may resu
advantages and in improving safety in general.

Personnel Attending to Ship's Discharge: The Oil Company who is cargo receiver or anyway interested with the discharge and the Master, each within his own field of competence, will jointly supervise and be responsible for discharge and for connecting and disconnecting hoses.

A representative of the cargo receivers appointed for the purpose, will keep in constant touch with the company's booster station and the Oil Dock by means of VHF radio. He will act also in collaboration with the Master and the Port Authority's representative. For connecting and disconnecting hoses, the latter will make available the material and equipment provided on the tender.

Filling of Hoses With Water When Not In Use: For reasons of safety and to prevent pollution, the floating hoses must be kept full of water when not in use.

To this end, the 2 hoses are connected in the tower by means of the by-pass before the gate and non-return valves.

In agreement with the Master, the cargo receivers must drain the hoses of water before commencing discharge.

On completion of discharge, the cargo receivers must likewise flush out the hoses to remove all traces of oil, fill then with water, disconnect them, apply the blank flanges, close the Keystone cut-off valves and lower the hoses into the sea.

It is strictly forbidden:

(a) to introduce compressed air or any kind of gas into the hoses or the submarine pipe-line;

(b) to discharge the water from the hoses into the sea at the beginning of operations or that used for flushing the hoses on completion of operations.

During flushing, the cargo receivers must take all precautions against leakage or spillage of the water employed for the purpose.

Interruption of Discharge Operations for Safety Reasons: In the event of a deterioration of sea conditions, violent thunderstorms, trouble with the facilities that jeopardises safety, large scale pollution or other dangerous circumstances, the Management of the Oil Dock may, at its own unchallengeable discretion, order:

- immediate interruption of discharge;
- that the hoses be got ready for lowering into the sea;
- the adoption of all such measures as will enable the vessel rapidly to vacate the berth.

In agreement with the cargo receivers, vessels must therefore maintain a trim during discharge that will enable them to take to sea safely at any moment.

Prohibition to Pollute. Cleaning Up: Ships moored at the tower must not pollute the water with hydrocarbons, solid residues, or oil mixtures of any kind, nor effect gas-freeing or tank cleaning or transfer oil from one tank to another by means of temporary hoses or pipes slung over manholes or other tank apertures.

In the event of oil spills, the Oil Dock Management, without prejudice to the application of the penalties provided by law, will order the anti-pollution equipment of the craft standing by to come into operation at once, at the expense of whomsoever may be concerned, and the despatch of other equipment for cleaning up should it deem this necessary.

Bunkering and Victualling: Bunkers, victuals, drinking water and stores must in general be taken aboard while awaiting berth in the roads. Such operations may also be effected with the vessel moored at the tower before or during discharge (but not during ballasting) according to the procedure prescribed by the Oil Dock Management and with observance of the precautions that are ordered.

Ships and any other craft coming alongside tankers must be provided with a sufficient number of strong fenders to prevent hull to hull contact and be fitted with spark arresters on all main and auxiliary engine exhausts.

Authorisation to go Aboard: Persons needing to go aboard to do work or for other justified reasons must be provided with an authorisation issued by the Oil Dock Management.

Work on Engines: It is forbidden to vessels moored at the tower to carry out works which put the engines out of action or reduce its efficiency.

Other work which cannot be delayed may be authorised exceptionally by the Oil Dock Management at its own discretion provided certain instructions and safety measures are observed.

Transhipments: Vessels moored at the tower may carry out transhipment of their cargoes only to vessels moored in the Oil Dock, for such purposes making use of the pipe-line.

Other Regulations: Without prejudice to the regulations currently in force in the waters of the Maritime Department of Genoa, for all such matters as are not expressly provided for in the present regulations there shall be applied, to the extent to which they are applicable, the provisions of the Harbour Police and Safety Regulations for the Genoa-Multedo Oil Dock, approved by order No. 10 of the President of the Port of Genoa Authority on the 30th September, 1968, the regulations for bunkering tankers in the Genoa-Multedo Oil Dock, approved by decree No. 1384 of the President of the Port of Genoa Authority on the 1st September, 1966, of the Marine Services and Harbour Police Regulations approved by order No. 2 of the President of the Port of Genoa Authority on the 1st March, 1972, and the other laws and regulations in force in the Port of Genoa.

Penalties: Infringements of these regulations will be punished by application of the penalties provided in the Code of Navigation.

Safety Rules to Complied with during Stay of Tankers at Sea Terminal of Genoa-Multedo: The following are the principal safety rules that the Master is bound to strictly comply with and enforce during the stay of the ship under his command of Genoa-Multedo.

1. The main propelling machinery must be kept ready to move (standby) and there must always be available on board a sufficient number of crewmen to enable the ship to leave the berth immediately whenever ordered to by the Port of Genoa Authority (Consorzio Autonomo del Porto);
2. Vessel must have ready the accommodation ladder on starboard side and – on port side – the pilot ladder rigged forward of the poophouse;
3. Decks and surrounding waters must be properly lighted;
4. When mooring to platform anchors must never be dropped;
5. Vessel's firefighting equipment and the men in charge of its operation must always be ready for immediate action (in case of emergency). Men in drunken state must be watched and kept under supervision;
6. The ends provided with eyes of 2 strong 3.5 in./4 in. wire cables, length of which must be of 80 m./100 m. (260 ft./330 ft.) at least, must be placed hanging one fore and one aft to enable the ship to be towed out (to sea) in case of fire.
7. Unless authorised to the contrary and which will only be allowed in exceptional cases by the Oil Harbour Master, it is forbidden:
   (a) to carry out repair works, cleaning or gasfreeing of tanks or bunkers, etc.;
   (b) to carry out loading of cargo, water or other liquid products using hoses introduced through the cargo tanks lids.
8. It is strictly prohibited:
   (a) to keep fires of any kind on board, with the only exception of those for the service of ship's boilers and galleys if located in special rooms thoroughly protected against gas exhalations and far from the cargo lines;
   (b) to throw or pump overboard water ballast, bilge-water or water from any other source, that might pollute the port waters;
   (c) to cause escape of oil from the sea valves due to delay in starting the ballast pumps or any other reasons; to cause escape of oil due to leakage of pipes or valves on board; to provoke overflow of oil from cargo tanks. Accidental leakages on deck on deck must be collected into suitable receptacles and – with all precautions – poured again into the cargo tanks or carried ashore; all scuppers on the main deck and particularly those near the cargo manifolds must be plugged during the loading/unloading and ballasting operations;
   (d) the use of devices, tools and wrenches not made of non-sparking material, to connect or disconnect hoses, pipes or pipe fittings and to carry out work to any ship's equipment placed on deck or inside those spaces where the generation and/or presence of gas is possible;
   (e) to smoke on board except in those rooms approved by the Master and to throw overboard lighted matches or cigarettes;
   (f) the use of rocket signals, flares, etc.;
   (g) the use of electric hot plates, fans and other equipment which might produce sparks on deck or into those rooms having openings towards the cargo tanks;
   (h) the use of electric portable lamps and cables and of telephones not being explosion proof;
   (i) to keep open skylights, doors and hatches of spaces located in way of or near the cargo tanks;
   (l) to keep open the cargo tanks lids; to keep open Butterworth openings.

   The ship's personnel should take care that all ullage openings and gas vents are provided with spark arresters and that the latter are sound. They also should take care that the spark arresters placed on the funnels and combustion gases exhausts are sound;
   (m) shifting of steel tools, winch manoeuvring, loading and unloading of materials, connecting and disconnecting of cargo hoses during the whole period in which sampling and gauging of cargo tanks is carried out;
   (n) to carry out loading and unloading operations during storms with lightning;
   (o) the idling of pumps. Ship's personnel should immediately stop pumps that – for any reason – should idle;
   (p) the blowing of boiler's tubes;
   (q) the coming onboard of unauthorised people.
9. All engine propelled boats approaching the vessel must be provided with spark arresters on the combustion gas exhausts.
10. During shifting operations into tanks:
    (a) radio apparatus must be switched off and all aerials set to ground;
    (b) cargo lines not in use must have all valves closed and manifolds are to be blank flanged.
11. Loading of ship's stores and equipment should be carried out from the extreme poop. In case the aforesaid operations have to be carried out on deck, near the cargo tanks and should it involve the handling of heavy or metallic materials anyway, all precautions relating to the case or those each time specified by the Oil Harbour Master, should be taken.

    As a general rule the above mentioned operations are not allowed during the loading or ballasting of the ship. The crafts used for the transportation of the materials must approach the ship, stay alongside and move out without making use of the engine.
12. Tankers having on board inflammable or dangerous products, or – being empty or in ballast – having their tanks not certified gasfree, must hoist steadily and well in view, a red flag (letter "B" of the international code of signals) and by night a red light, which can be sighted from round the horizon.

Products/Chemicals:

Pier Alfa: Diameter of the connecting flange 10 in. ASA 150 with vertical face, the radius of 750 mm. from the axis of the connecting pipe at manifold is to be free from any hindrance. The distance between two centres of the 2 neighbouring pipes to manifold must be minimum 1,250 mm. A space of 1,200 mm. from the flange towards ship's rail horizontal axis is to be free of any hindrance.

West Pier: Diameter of the connecting flange 6 in. ASA 150 with vertical face. Radius from axis at least 500 mm. free from any hindrance. Minimum distance between 2 neighbouring centres at manifold 1,000 mm. Free space from flange towards ship's rail along horizontal axis at least 1,200 mm. It is understood that ships not equipped for above discharge will not be allowed to operate.

BALLAST: Facilities exist for the collection and clearance of slops by means of special barges.

STEVEDORES: *Working Hours:* General cargo: 3 shifts from Monday to Saturday: 0630 – 1300 hrs., 1300 – 1930 hrs., 1930 – 0100 hrs.

A fourth working shift is available from Monday to Friday in the period 15th March/15th November.

Coal, ore, grain: only the first 2 shifts. Italsider Pier: 24 hours' daily in 3 shifts.

MEDICAL: All medical assistance available. Advance notice required for urgent cases only.

DENSITY: Varying from 1025 to 1026.

FRESH WATER: Available direct from quay at almost all berths. Supply by lighter, minimum 20 cu.m.

FUEL: All grades available. Delivered by barge. 48 hours' notice desirable.

REPAIRS: All types of repairs available. Preferable have advance notice of requirements.

DRY DOCKS: 1 floating dry dock, lifting capacity up to 15,000 tons; 7 dry docks (largest dimensions 280 m. × 40 m. × 12.50 m.). Max. size 100,000 d.w.t.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: Customs allow a maximum of 50 cigarettes or 10 cigars, or 50 grams tobacco per person, as long as vessel stays in port. All cigarettes, cigars, etc. must be ready on arrival in a locker in order to be checked and sealed by Customs guards. Wine and/or spirits. Wine allowed any reasonable amounts.

Spirits allowed: 1 bottle for every 2 Crew members.

Report: May 1983: Customs Regulations – Supply of Cigarettes and Tobacco: "Please inform members of a new rule at Genoa concerning forwarding of cigarettes, which provides that they may only be sent from the Port of Registry with invoices visaed by the Italian Consul there.

At Genoa, the Master must declare cigarettes and tobacco on board, number of crew and duration of next employment, thereafter the Customs will allow 40 cigarettes each day to each crew member for the duration of the voyage.

In case there is sufficient stock on board, the Customs will not allow supply, which might cause other troubles as well, due to the fact that the truck normally carrying other provisions and stores will remain stopped at Customs until the situation with cigarettes is clear".

CARGO GEAR: Certificates must be in order, otherwise authorities may prevent vessel performing commercial operations, especially if using derricks.

REPATRIATION: All facilities available.

AIRPORT: Located at about 5 km. from town. Served by regular lines, international services.

Alitalia to Rome, Bari, Parigi, Naples; British Airways to London; Alisarda to Olbia; A.T.I. to Rome, Turin, Palermo, Alghero, Cagliara; Swissair to Zurich; Lufthansa to Frankfurt; Golden West Airlines to Turin, Venice and Trieste.

TIME: Local time in relation to GMT 1 hour ahead. Summer time further 1 hour ahead from March to September.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Patron Saint's Day (24th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).

Holiday work is available at overtime rates. Generally workers not available on 1st January, 1st May and 25th December. Saturday: Work performed after 1200 hrs. is at overtime rates.

POLICE/AMBULANCE/FIRE: Police: tel. 113; 25.69.75; 26.13.95; Ambulance: tel. 59.59.51; Fire: tel. 25.25.25 – 25.80.21.

TELEPHONES: Telephones can be placed on board at cost fixed by Italian State Telephone System.

DEVELOPMENTS:

Genoa Port Docks:

Works in Progress:

Within the port of Genoa area, the more outstanding works are:

New industrial zone including the construction of a giant floating-dock in pre-stressed-reinforced concrete for vessels of up to 350,000 d.w.t. A deep water (−22 m.) 350 m. long, service pier will also be built, together with 400 m. of new quays with 11 m. – 20 m. depth alongside and 80,000 sq.m. of connected areas;

Besides the aforementioned listed works, there are others worthy mention as follows:

Medium term works:

Rectification of the Calata Gadda and Calata Boccardo quays th allowing a more efficient use for ship repair purposes;

Long term works:

Completion of the San Benigno area arrangement works.

Voltri Dock:

Works in progress:

Seaward filling in works will be continued;

The protection breakwater will be extended 500 m. Eastward;

End-stretch of the seaward road connecting the material excavatio area with the sea zone to be filled in.

Medium term works:

Voltri will consist of quays 1,100 m. long in the first stage, and 2,050 m on completion.

5 container berths 300 m. long, 15 m. draft are planned, each termina composed of 135,000 sq.m. of yards. They will be of the close type – which means no outside vehicles allowed to circulate with the terminal – and will be capable of handling 100,000 TEU pe year, that is 500,000 TEU total capacity per year.

The yard will be divided in zones as follows:

Operative zone, for container unloading/loading operation adjacent to the quay;

Areas for container handling and marshalling;

Areas for reefer containers;

Parking areas for service vehicles.

The Ro/Ro terminal is planned to be 500 m. long, with adjacent yard 250,000 sq.m. in area, which will allow the parking of 2,000 truck at the same time.

The 8 berths above mentioned will absorb 3,000,000 tons traffic general cargo per year.

Two check-points for Customs controls are provided, each having 60,000 sq.m. surface. One will be sited at the Eastern way out an the other at the Western way, thus allowing the service of container and Ro/Ro traffic at minimum distance and maximum efficiency The check-point will have space enough to park 300 trucks an straight connections with the City and National roads.

An area of 50,000 sq.m. is already used for stacking empty container and storing trucks and trailers.

The first section, 2 container berths, equipped with 4 × 45 to container gantry cranes and 2 Ro/Ro berths will be operational 1991.

IDENTIFICATION CARDS: Required. Shore passes issued by loca police.

LA SPEZIA: 44.01 N. 09.51 E. (See Plan

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 List of Parcels.
1 Cargo Manifest.
1 Bill of Lading.
All Ship's Certificates including Italian Anchorage Dues.

Shipmaster's Report: November 1988.

3 copies Crew List.
3 copies Passenger List.
2 copies Stores List.
1 copy Parcel List (if any).
1 copy Cargo Manifest.
1 set Bills of Lading.
Oil Record Book.
Ship's Certificates.
1 Statement of Amount of Lubricating Oil on board.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot station situate on breakwater at entrance to Gulf. 1 hour's notice to Pilots required t shifting and sailing vessel. Pilot boards incoming vessels at Tor Scuola.

Pilot on VHF Channel 14 from 2000 hrs. – 0600 hrs. Listens 1 ho before vessel expected. Tel. (0187) 30172, 30222.

ANCHORAGE: Safe areas available in depths 25 ft. to 34 ft. Mu bottom, no tide.

Tankers: If waiting for berth, required to anchor in Safety Zon immediately behind the breakwater. If this anchorage is occupied b 2 vessels later arrivals must anchor outside the Gulf.

RESTRICTIONS: Western entrance to Gulf is 400 m. wide with dep of 42 ft. 6 in. The dredged channel to the port is 42 ft. deep. Easte entrance is 200 m. wide used by smaller vessels only.

MAX. SIZE: Limited only by draft; 33 ft. for the Mercantile Port and gra silos. For vessels proceeding to coal berth max. draft 30 ft. 4 in. F vessels proceeding to Enel Pier max. draft 35 ft.

Tankers up to 40 ft. draft accommodated.

HEALTH: Radio Pratique may be requested to Sanimare-La Spe before arrival. Pratique is automatic for vessels from Ports in E.E countries.

RADIO: Genoa Radio – ICB or Marina Militare ICS. Radio teleph station at Leghorn, transmitting 2591 kHz, receiving 2182 kHz.

VHF: Pilot Service Channel 14, Port Control Channel 9, Harbour Mas Channel 16 (0800 – 2000 hrs.), and boat service Channel 12.

TUGS: 19 tugs available up to 1,359 h.p. For large tankers, 4 tugs usually used.

BERTHING: Primo Bacino:

Garibaldi Mole: The port basin is limited to the East by Garibaldi Mole, running North – South, to the coast and for a length of 509 m. It has depths of 8 m. – 10 m. and is used for discharging cereals, paper, containers and metal products. It has open storage areas and warehouses. The mole is used on both sides, which are equipped with fenders.

Malaspina Wharf: 200 m. long and 106 m. wide, with depth of water of 6.5 m. – 7 m. It has fenders.

Paita Wharf: 535 m. long. On its Eastern extension is a moden coal silo. On the shoulders of the wharf are areas for open storage of goods, and in the West Area there is the Ferruzzi cereals warehouse and the Carapelli edible oil store. The wharf has fenders, and on its Western extremity has an 80 m. section suitable for discharge using ship's gear. A 155 m. wharf is used for the offices of Customs and the Port Captaincy.

Italia Mole: 368 m. long, 10 m. wide, depth of water 5.5 m. – 7 m. Constructed to protect the port basin, and therefore not equipped with port equipment, it is used for berthing tugs.

Currently, it is to be used for berthing the passenger ferries between La Spezia and Bastia (Corsica).

IP Landing Stage: 200 m. long, with 13 m. depth of water. It is equipped with bollards, fire-fighting equipment and hydrants. It allows berthing, loading and discharge of 2 tankers simultaneously, having equipment operating with a suction-depression system.

Minor Berths: These are constituted by 2 small piers where medium sized tankers can moor bow-on.

Secondo Bacino:

Artom Wharf: 320 m. long, with depth of water 11 m.

Fornelli Pier: West Side: The La Spezia Container Terminal, with 520 m. quay with depth of 12 m. – 13 m.

South Side: 150 m. long, currently used in Summer season for passenger vessels to berth.

East Side: Presently being developed as the second container berth.

Outer Terminals:

The Port of La Spezia incorporates the terminals of a few companies involved in maritime traffic. There are, to the East of the port, the Messina and Tarros Terminals, all with their own berths and private operational land areas for containers.

ENEL Landing Stage: 225 m. long, it is used for berthing vessels carrying fuel for the electricity power station.

SNAM Terminal: 480 m. long, situated in the bay of Panigaglia, it is employed in the discharge of methane carriers.

SPI Terminal: This is a terminal situated in the Eastern Area of the Gulf, provided with 5 buoys, permitting the discharge of tankers. The discharged products are shipped by underwater pipe-line to the coastal storage installation and from there to the refinery and storage area.

TANKERS: SPI Buoy Terminal, situated 650 m. from San Bartolomeo shore. Vessels moor stern towards the shore. A crude oil discharge berth in depth of 11.50 m., suitable for tankers up to 30,000 d.w.t. Other oil berth at ENEL Quay, depth 35 ft.

Safety Regulations are handed to Master on arrival and must be strictly observed. No shore steam or electricity available.

BULK HANDLING FACILITIES: Ferruzzi Grain Silos, 39,450 tons capacity, at Paita Dock. Discharge by 2 cereal suction towers with 4 pumps, overall loading/discharging capacity 400 t.p.h.

Sosimage at Garibaldi Quay, grain discharged by 4 vacuum-operated intake pipes, capacity 400 t.p.h. Capacity of silos, 30,000 tons. Length of quay 220 m., depth 35 ft. Berth will accept vessels of 30,000 d.w.t.

Vetrocoke Cokapuania: Coal conveyor system at Paita Dock, capacity 450 t.p.h. from colliers and 330 t.p.h. from other vessels. Capacity of silos 12,000 cu.m.

Carapelli Edible Oil Store: A temporary custody customs warehouse, with a covered area of 2,480 sq.m. and a 5,000 tons stocking capacity.

Speter Paper and Cellulose Store: Situated on the Garibaldi Mole, it has a covered area of 2,480 sq.m., and a 5,000 tons stocking capacity.

ENEL: Coal handling facility with 2 grab cranes, rate 10,000 tons per day. Max. LOA 255 m. Max. beam 32 m. Max. draft 13.0 m.

CRANES:

Garibaldi Mole, West Side:
Berth No. 1: 4 bridge cranes, capacity 6 tons (hook or bucket operation).
Berth No. 2: 2 bridge cranes, capacity 6 tons (hook or bucket operation).
1 bridge crane, capacity 8 tons (hook or bucket operation).
Berth No. 3: 3 bridge cranes, capacity 6 tons (hook or bucket operation).

East Quay:
Berth No. 9: 1 crane, capacity 3-6 tons (hook or bucket operation).
2 cranes, capacity 6-12 tons (hook or bucket operation).

Malaspina Dock:
Berth No. 4: 2 gantry cranes, capacity 3 tons (hook only).
2 gantry cranes, capacity 3-6 tons (hook or bucket operation).

Paita Dock:
Berth No. 5: 2 overhead travelling cranes, 10 ton capacity, travel 120 m.
Berth Nos. 6 & 7: 4 jib cranes, capacity 6 tons (hook or bucket operation).

Additional Cranes: 2 self-propelled cranes, (hook operation) 20 tons lifting power. 1 self-propelled crane for loading and unloading (hook or bucket operation) 40 tons lifting power. 1 self-propelled crane, 60 tons lifting power, for loading and unloading of various goods and containers.

Floating crane, capacity 110 tons, available in the Industrial Zone.

Artom Wharf in the second basin is equipped with 4 jib cranes with capacity of 20 tonnes.

On the Fornelli Pier, West side, is the La Spezia Container Terminal equipped with 2 RMG ship to shore cranes, up to 42 tons with 20 ft. to 40 ft. spreader and three RMG stacking cranes up to 45 tons.

STEVEDORES: Gangs to be ordered by 0700 hrs. for morning shift, and by 1300 hrs. for afternoon shift every normal day from Monday to Friday. For mechanised work the same routine is to be followed. Saturdays, morning is considered as overtime work (tariff plus 27.50%). On the afternoon of Saturday, time is considered as holidays and so are Sundays. Saturdays and Sundays shift to be ordered on Friday afternoon by 1500 hrs.

MEDICAL: All facilities available. Vaccination/inoculation can be arranged. Prior notice should be given if urgent attention required on arrival.

FRESH WATER: Available at most berths, or by barge.

FUEL: Supplied by barge and road tankers at berths.

CONSULS: Following countries represented at Spezia: Denmark, France, Finland, Netherlands, Norway, Portugal, Sweden.

REPAIRS: Naval and civil repair yards can undertake all types of work. Divers available through Port Captain.

DRY DOCKS: Available only when not used for naval vessels: No. 5, 209.65 m. by 27.60 m.; No. 6, 210.20 m. by 23.10 m. Floating dock for 110,000 d.w.t.

TIME: GMT plus 1 hour. GMT plus 2 hours from March 29th to September 26th.

POLICE/AMBULANCE/FIRE: Police tel: 0187-34418. Hospital tel: 0187/533111.

HOLIDAYS: New Year's Day (1st January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Assumption B.V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes issued to crew.

DEVELOPMENTS: 2 new berths (467 m. length) for container vessels and Ro/Ro vessels under construction at Molo Fornelli (East side) quay with depth 14.5 m. Expected to be operational in 1991. Additional container cranes will be available.

SHIPMASTER'S REPORT: October 1988.

General: It is very difficult to contact the pilot station prior to arrival. It appears that pilots are only using portable W/T when answering ships approaching La Spezia Roads.

Channel 16 and working channels are frequently disturbed by powerful stations in the vicinity (Corse, Genoa, etc.).

Anchoring: Vessels up to 10.0 m. draft can anchor in position 1 mile S.E. of breakwater (Passo di Poniente) and at a distance of about 7 cables from Torre Scuola Island.

This anchorage is not recommended for ships with a draft of 10.0 m. in periods of swell. Charted depths are 13.0 m. up to 15.0 m.

In case of swell, or ship with draft of 10.0 m. or more, it is preferable to anchor 1 mile East of Del Tino Island.

Pilot: Pilot embarks in the Inner Harbour, when ship has already cleared the breakwaters (Passo di Poniente).

AUTHORITY: Capitaneria di Porto, Viale Italia 4, La Spezia, Italy. *Tel:* 0187-28580.

Camera di Commercio Industria Artigianato ed Agricoltura La Spezia, 19100 La Spezia. *Tel:* 32133/34/35. *Telex:* 282687 Camesp I. *Contact:* The President.

NOTES

Please also advise Shipping Guides Ltd.

LIVORNO (Leghorn): 43.33 N. 10.20 E. (See Plan)

DOCUMENTS: Complete set of Manifests and B/Ls relative to cargo destined for this port. Complete set of Manifests of all cargo in transit. 3 Crew Lists. 3 Passenger Lists.

ANCHORAGE: Anywhere between 1 – 1.5 miles from breakwater.

PILOTAGE: Pilotage compulsory for all vessel's over 500 g.r.t. Sound signals for calling Pilot, 3 long blasts, or international signal "G". Pilot boards vessels 1 mile from breakwater.

Shipmaster's Report: June 1988.

Vessel has to call Pilot Station on VHF Channels 16/12 giving the usual ETA information.

Thereafter vessel has to call Port Control on Channel 10.

If this procedure is not followed Pilot will not board and delay will be incurred.

APPROACHES: Navigation within the confines of the port is very tight, the radius of bends are small, channels are narrow and swinging areas cramped. Masters must, therefore, exercise extreme vigilance when their ships are navigating in the port. In particular, it must be emphasised that prompt and accurate responses are required from engines and, in turbine-driven ships, full astern requirements should be met promptly and with maximum power. Masters should inform their Chief Engineers about these requirements before the ship enters the port.

Anchors must be ready to let go.

The current outside the breakwater usually sets across the entrance, but it is variable in both speed and direction. Care must be taken to allow for the set of current when lining up the ship for the entrance.

Immediately on entering between the Diga della Vegliaia and Diga Curvilinea, the ship has to make a 70° turn to port, then navigate a narrow channel for 0.5 miles to Bacino S. Stefano where ships bound for the Nuova Darsena (Berth Nos. 10 and 11) are swung. It is very important to arrive at the Bacino S. Stefano at the slowest possible speed in order to effect a tight swing. When the wind is from the Southern semi-circle, control of the ship can become difficult and proper control of the tugs is important.

RESTRICTIONS: No night berthing for tankers; no restrictions for tankers on sailing, when empty and up to 15,000 gross tonnage according to weather conditions.

MAX. SIZE: See "Berthing".

HEALTH: To obtain Free Pratique by radio cable to "Sanimare", Livorno, advising all health particulars at least 12 hours before arrival.

RADIO: Livorno Radio generally used for communications.

Arrival Advice: Agent to make request for berthing 3 days prior to arrival for cargo vessels and 10 days prior to arrival for passenger and cruise ships. Request to be made before 1000 hrs.

Day before arrival and not later than 1200 hrs. (1000 hrs. on holidays) advise ETA (day, hour, minutes = 00.00.00); number of containers to be moved.

RADAR: None.

VHF: Livorno Radio on Channels 16 and 26. Pilots and Port Control on Channels 14 and 16 and Harbour Master on Channel 16 from 0800 hrs. (0600 hrs. in summer) until 2400 hrs. Ship information service on Channels 16 and 10.

TUGS: There are a total of 20 tugs (700 h.p. – 6,200 h.p.) stationed in the port. Some are steam driven, others are motor driven. It is not always possible to allocate the best or most suitable tugs to each ship due to the strict duty roster of the tug crews. Tugs employ "on the hook" towing methods using ship's lines. Only good lines should be used for this purpose. Tugs are made fast outside the breakwater to assist ships to make the 70° port turn at the entrance.

For the larger ships, 4 tugs are normally used, 2 on the hook forward and 2 on the hook aft. In some circumstances, a fifth tug may be used, connecting on the hook forward.

Pilots communicate with the tugs by VHF using portable sets they bring on board with them.

BERTHING: Depths and Lengths of Various Berths

Berth	*Berth No.*	*Length/Depth/Remarks*
Bacino Santo Stefano - North West Side:		
1. Nuova Darsena Petroli	10	Length 344 ft. tankers.
	11	Length 295 ft., depth 37 ft. for tankers with a max. length of 984 ft. Tankers longer than 984 ft. with a draft of 37 ft. 6 in. can be moored in good weather on full tide
2. Radice Nuova Darsena Petroli	11/A	Length 229 ft., depth 14 ft.
3. Piccolo Fondale	11/B	Length 360 ft., depth 17 ft. 6 in. Only for vessel of a max. length of 360 ft. Petroleum/gas oil.
4. Vecchia Darsena Petroli	12	Length 20 ft. Petroleum/gas oil/fuel oil/crude oil.
	13	Length 98 ft., depth 30 ft. 6 in. for tankers with a length between 593 ft. and 748 ft. L.P.G.
5. Darsena Toscana West Side	14	Length 984 ft., depth 37 ft. Containers.
Bacino di Evoluzione:		
1. Calata Tripoli (Dow Chemical)	16	Length 690 ft., depth 26 ft. Chemicals/Ferries.
Darsena N. 1:		
1. Calata Assab		Total Length 1,312 ft.
	17	Depth 29 ft. U.S. Navy.
	18	Depth 29 ft. Ferries.
2. Calata Gondar	19	Length 690 ft., depth 27 ft. Ferries.
3. Calata Addis Abeba	20	Length 875 ft., depth 26 ft. 6 in. Bulk Cargoes.
4. Calata Neghelli	21	Length 787 ft. depth 26 ft. 6 in. Fruit.
Calata Neghelli	0	Length 197 ft,. depth 20 ft. Fruit.
Canale Industriale:		
1. Calata Bengasi	22	Length 885 ft., depth 28 ft. Timbe bulk cargoes.
2. Pontile Giopescal	23	Length 328 ft., depth 20 ft.
3. Terminal C. Colombo	24	Length 1,350 ft. Depth 28 ft. 0 in. For vessels of max. length of 610 ft. only.
4. Pontile Cledca	25	Length 262 ft., depth 18 ft. Tar, pitch, solvents.
5. Pontile Valchisone	26	Length 230 ft., depth 18 ft. Ro/Ro
6. Costiero Italso	27	Length 220 ft., depth 28 ft. with distance barge. Vegetable oils.
7. Costiero D.O.C. (Chemicals)	28	Length 656 ft., depth 28 ft. with distance barge. Petroleum, oils, solvents, gas oil, fuel oil, latex, vegetable oil.
8. Costiero D'Alesio	29	Length 460 ft., depth 28 ft. with distance barge. Tankers.
9. Costiero Liquigas/AGIP	30	Length 656 ft., depth 28 ft. LPG.
10. Silos Ardenza	34	Length 690 ft., depth 28 ft.
11. Terminal Leonardo Da Vinci	35	Length 545 ft., depth 28 ft. Max. LOA 150 m.
12. Darsena Ugione	36	For tankers of max. length 230 ft depth 20 ft.
Montedison	36/A	For tankers with max. length of 430 ft. and draft of 25 ft. 6 in.
	37	For tankers with a max. length o 367 ft. and draft of 20 ft.
13. Officine Meccaniche Botteghi	38	Length 490 ft., depth 18 ft.
Calata del Magnale:		
1. Magnale Non Operativo	39	Length 4,265 ft., depth 14 ft. Repairs.
2. Magnale Operativo Nord	40	Length 490 ft., depth 14 ft. Cemen
3. Magnale Operativo Centro	40	Length 490 ft., depth 18 ft. Cemen
4. Magnale Operativo Sud	40	Length 490 ft., depth 14 ft. Cemen
Darsena Pisa:		
1. Calata Darsena Pisa	41-42	Length 820 ft., depth 39 ft. 6 in. Bulk cargoes.
Bacino Santo Stefano - South East Side:		
1. Calata Alto Fondale	43-44-45 -46-47	Length 2,505 ft., depth 35 ft.
	48	Length 195 ft., depth 18 ft. Ferries
Bacino Cappellini		
1. Calata Orlando	49	Length 495 ft., depth 28 ft.
	50	Length 495 ft., depth 28 ft. Bulk cargoes.
	51	Length 495 ft., depth 27 ft. Bulk cargoes.
2. Calata Siena	58	Length 165 ft., depth 20 ft. Ferries
3. Calata Punto Franco		Total length 885 ft.
	59	Depth 28 ft. Ferries.
	60	Depth 28 ft. With distance barge Draft 34 ft. Bulk cargoes.
Bacino Firenze:		
1. Calata Pisa	52/53-54	Total length 1,475 ft., depth 25 ft
2. Calata Carrara	55/56-57	Total length 1,475 ft., depth 25 ft
Porto Mediceo:		
1. Calata Sgarallino	61-62	Total length 785 ft., depth 28 ft. 6 in. Passenger vessels.
2. Andana Degli Anelli	64	Length 490 ft., depth 25 ft.
3. Pontile Elba	66 North	Length 190 ft., depth 18 ft. Passenger vessels/ferries.
	66 South	Length 190 ft., depth 17 ft. Passenger vessels/ferries.
4. Andana Delle Ancore	67	Length 525 ft., depth 13 ft.
5. Banchina Allestimento Cantiere Orlando	74	Length 590 ft. Fitting out berth.
6. Molo Mediceo	75	Length 1,540 ft., depth 19 ft.
Darsena Nuova:		
1. Banchina South	70	Length 328 ft., depth 19 ft. 6 in.
2. Banchina West	71	Length 328 ft., depth 19 ft. 6 in.
Nuovo Bacino di Carenaggio:		
1. Banchina East	76	Length 1,050 ft., depth 26 ft. 6 i
	78	Length 835 ft., depth 29 ft. 6 in.

Mobile Cranes and Equipment. *Owned by A.M.M.:* 1 crane capacity 60 tons.
1 crane capacity 40 tons.
1 crane capacity 25 tons.
5 fork-lifts up to 6 tons.
Owned by Dockers' Organization
3 Van Carrier capacity 30 tons.
18 Portainers up to 40 tons.
220 Travelling cranes of various type (fork-lifts lifting capacity up to 25 tons, bulldozers, tractors etc.)
Owned by private enterprises
2 Rubber tyred transtainers capacity 40 tons.
210 fork-lifts and travelling cranes
125 flatcars
40 tractors, towings etc.
7 semiportal suckers for cereals discharge.

BULK HANDLING FACILITIES: Grain: discharging rate 1,000 to 1,500 m. tons per day.

Ore and coal bulk: discharged by shore elevators at Calata Orlando, discharging rate 1,500 to 2,000 tons per day.

Cereals Silos: Silos Livornesi 28,000 tons. Silos and Tirrenian Warehouses 31,500 tons. Ardenza of Liquifarm G.I.A. 52,000 tons. Italso 32,000 ton.

TANKERS:
Nuova Darsena Petroli Terminal:

Cautionary Advice: The berthing heads of Berth Nos. 10 and 11 in the Nuova Darsena Terminal are constructed on stone walls and their protection consists of 4 fenders.

These fenders have small energy absorption characteristics and their size and spacing afford little protection against striking the quay wall or indenting the hull due to small single point landings. Heavy landings must, therefore, be avoided and ships must dock as parallel to the berth as possible.

The Nuova Darsena Berths are exposed to Westerly winds and, therefore, ships should ensure that moorings are adequate and in good condition.

Berthing Procedures: Ships for Berth Nos. 10 and 11 are swung in the Bacino S. Stefano, making a port swing with the aid of tugs and are then backed down to berth. Ships are, therefore, always starboard side to these berths. Headlines are run out first by mooring boat and, when in position, 2 of the tugs push the ship alongside. The mooring boats at Livorno are underpowered and there is no power assistance on the jetties to heave moorings ashore. For large ships, it is recommended to use 2 mooring boats.

Fibre ropes only to be used as head and stern lines.

The shore gangway is located aft of the hose tower.

Cargo Bunker Connections:

Crude oil	4 hoses × 10 in. ASA
Dirty products	1 hose × 6 in. ASA
Gasoil	1 hose × 8 in. ASA
Clean products	1 hose × 8 in. ASA

Bunker is supplied throughout the same flow booms.

Ullaging, Temperatures, etc.: To be taken by ship's personnel prior to arrival.

Deballasting Facilities: Receiving capacity is 15,000 cu.m. The rate is about 600 cu.m.p.h.

Passing Traffic, Weather, Tide, Current: The berth is exposed to winds from the Western semi-circle. The short breasting distance and the low quay make it very important to keep a close watch on moorings during unsettled weather conditions, particularly during the later stages of discharging when the moorings will become very steep. Ships with entirely separate ballast systems may ballast simultaneously with discharging; otherwise discharging may have to be stopped to take on ballast.

Density of Dock Water: Lowest recorded 1018.

Cargo and Bunker Facilities: Crude receiving facilities consist of 1×30 in. and 1×20 in. pipe-lines. Tankage is located about 5 km. away. Average discharge rates are about 3,000 t.p.h. Fuel oils are shipped via 1×16 in. line, average loading rate 650 t.p.h. Gas oil is shipped via 1×12 in. line, average loading rate 550 t.p.h.

Freeboard Restrictions: The Port Authority will not allow the freeboard of discharging tankers to rise above the height of the firefighting foam cannons located at the berth, i.e., 14 m. above water level. Ships which cannot maintain their freeboard below this level by ballasting during discharge will have to stop discharging when the freeboard reaches 14 m. and take on ballast before resuming discharge.

Darsena Ugione Terminal:

Cautionary Advice: Darsena Ugione, located about 1 mile up the narrow and congested Industrial Canal is itself narrow and congested. Ships have to back into Ugione and the corners of the Darsena are not fully protected. The fendering on Berth No. 36A (used by larger ships), does not fully protect the berthing head and great care must be taken.

The Channel to and from Darsena Ugione and the Darsena itself is subject to silting, and therefore maximum advertised draft must never be exceeded.

Berthing Procedures: Ships bound for Darsena Ugione will proceed up the Industrial Canal with the assistance of tugs and be swung either in the Bacino di Evoluzione about 0.5 km. below Ugione or at the entrance to Ugione itself. Before backing into Ugione, the port anchor is dropped and the head and stern lines are run out by mooring boat. There is no power assistance on the shore to heave the mooring ropes to the bollards and, therefore, ships should take care not to run out too much line at once. This is especially important if wires are used. There are no good spring line leads and, therefore, head and stern and breastlines should be placed accordingly. Ships are always starboard side to Berth No. 36A.

Shore gangway is run from main deck, close to manifold.

Cargo Bunker Connection: All products are handled through 2 fully balanced hard arms having 6 in. ASA bolted connections.

Cargo, Bunkers Handled: All grades of clean and dirty products are handled at Darsena Ugione. Loading rates average between 100 t.p.h. and 500 t.p.h.

Deballasting Facilities: Ballast water is discharged ashore through 12 in. line, maximum storage capacity is 3,000 tons. Tank washings (slops) cannot be received. Discharge rate of ballast water averages 300 t.p.h., therefore, ships should arrive with minimum ballast consistent with safety.

Both Terminals:

Oil Pollution Clean-up: Facilities are available.

Fire Fighting Facilities: At both terminals, elevated foam cannons serve each berth. At Nuova Darsena, the cannons are remotely controlled.

Services: Fresh water, distilled water, laundry, and stores are available.

Repairs, Gas Freeing, Immobilisation: All kinds of ships' repairs can be undertaken at Livorno including servicing of radio, radar and echo sounders with prior notice.

Tank cleaning and gas freeing are not allowed alongside the tanker berths.

While alongside the tanker berths, the engine and steering gear must be maintained ready at all times.

Also see "Berthing".

BRIDGES: None that interfere with port traffic.

STEVEDORES: ETA required by Agent in order to arrange matters with stevedores at least 48 hours before arrival.

MEDICAL: It is advisable to give details of assistance required together with ETA cable. Hospital facilities available.

FRESH WATER: Fresh water available at all berths except Bacino Alto Fondale. Water barge available.

FUEL: All grades available from berth. Advance notice required 48 hours; supply subject to Owners' stem.

FIRE PRECAUTIONS: Berths at which tankers operate are equipped with monitors.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
GANGWAY/DECK WATCHMEN: Recommended, 8 hour shifts, 0600 - 1400, 1400 - 2200, 2200 - 0600 hrs.
CERTIFICATES: All ship's certificates required.
CUSTOMS ALLOWANCES: Tobacco: 50 cigarettes, or 50 grams tobacco per man for the first 24 hours. Wine and/or Spirits: only in consignment of the Master.
CONSULS:

Colombia	Greece	Peru
Denmark	Liberia	Portugal
Finland	Monaco	Spain
France	Netherlands	Sweden
Germany F.R.	Norway	Switzerland

REPAIRS: All types of deck and engine repairs are possible.
DRY DOCKS: Dry docks suitable to accommodate a Liberty type ship. A small floating dry dock for vessels up to maximum of 1,500 tons.
New Graving dock 350 m. × 56 m., depth on sill 10.0 m. (For 300,000 d.w.t. vessels).
REPATRIATION: All necessary repatriations possible.
AIRPORT: Nearest at Pisa, distance about 20 km.; served by Alitalia, British Airways, Lufthansa and Air France.
TIME: Local time is 1 hour ahead of GMT, and Summer time 2 hours ahead.
HOLIDAYS: 1st January, Easter Monday, 1st May, 15th August, 1st November, 8th December, 25th December, 26th December.
POLICE/AMBULANCE/FIRE: Police Tel: 23413, Carabinieri Tel: 808002, Dept. of Customs Guards Tel: 24066, Ambulances Tel: 33333/22111, Fire Brigade Tel: 22222.
TELEPHONES: Only at some quays is it possible to place telephones on board.
SERVICES: Tank cleaning and slop facilities available. Compass adjuster available. Refuse collection.
SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Shore passes required, issued by local police authorities.
DELAYS: No considerable delays.

SHIPMASTER'S REPORT: July 1987 (updated April 1988).
Port: **Vada.**
Location: 15 miles South of Livorno.
Chart: BA. Chart No. 131.
Documents:
8 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
3 copies Cargo Manifest.
3 copies Italian Port Authority Inward and Outward Forms.

Anchorage: Anchorage is 1.2 miles SSW of the pier face.

In poor weather Secche Di Vada Lt. 248° × 1.4 miles found to provide good holding ground in West winds of Force 7.

Pilotage: Pilots are supplied from Livorno. Vessels should call Livorno Pilot on VHF Channel 12, 2 hours before arrival at Vada.

Pilot boards from a mooring boat about 0.5 miles SW of the pier.

Restrictions: Daylight berthing only and after 0730 hrs. Departure is possible 24 hours without a Pilot.

VHF: Livorno Information Service on VHF Channel 10. They are very helpful.

Tugs: No tugs available.

Berthing: The berth accepts vessels up to 30,000 cu.m. with a draft 11.0 m.

Vessels normally berth port side alongside. The mooring boat comes from the nearby general cargo harbour.

It is possible to berth starboard side to but this makes departure difficult.

The Pilot likes to use the anchor when berthing, however, he should be persuaded not to use it as it makes departure difficult and sometimes hazardous.

Moorings in good weather consist of 3 head/stern lines and 2 springs forward and aft. An additional forward back spring is provided by the shore.

Depth alongside is about 42 ft.

Shore gangway used.

The berth is very exposed and berthing delays often occur especially in Winter. If the weather deteriorates while the vessel is alongside the berth the vessel may have to leave in a hurry.

The fenders are good.

Cargo: There is a single ethylene Chicksan of 8 in. which can take the ship's maximum pumping rate (pressure about 2-3 Bar).

Sampling takes about 4 hours.

The capacity of the shore tank for ethylene is approximately 4,800 tonnes. The maximum single intake is 4,000 tonnes. The plant uses about 300 tonnes per day for plastics.

General: The receiver of the cargo was Solvay, Telex No. 500127 Solvri, at Vada.

Very few services available at the rigid pier. No store trucks are able to come down the pier. The Pier Manager will assist in getting down the pier (length of pier 1 mile) in a service car.

Crew changes are not normally allowed, however, it would be possible to make one or two changes as long as prior permission had been given by the terminal. Crew members arriving have to go to the Agent's Office in Livorno during working hours (between 0800 and 1700).

The nearest airport is at Pisa which is about 1 hour by car.

It is about 40 minutes walk from the vessel to the town, which is a pleasant tourist town. Money can be changed at the bank and exchange bureau next door to the bank between 0800 – 1300 hrs. and 1600 – 1800 hrs.

REPORT: November 1989.

The following is from an agent to a ship operator.

This letter is to inform you that the local Harbour Authorities have recently issued a new regulation, which makes it compulsory, to declare on the "Berth Request", the following information in addition to the usual ship's details:

1. Ship's international call sign and official number.
2. Arrival draft (fore and aft).
3. Previous and subsequent ports of call.
4. When Livorno is the first or last Mediterranean port of call, the following must be declared:
   (a) Access point (Gibraltar/Suez/Bosporus) with date and time of transit.
   (b) Exit point (Gibraltar/Suez/Bosporus) with expected date and time of transit.
5. Memorandum of understanding on port state control (Memorandum of Paris): place and date of issue and expiry date.
6. Total cargo on board on arrival and on departure, cargo previously carried, and whether tanks are clean, dry, gas-free.

Please note that if any of the above details are missing, the Harbour Authorities will not accept the "Berth Request".

AUTHORITY: Capitaneria Di Porto Di Livorno, 57 100 Livorno, Italy. *Tel:* 21-362. *Contact:* Angelo Cedro, Captain of the Port.

Azienda Dei Mezzi Meccanici E Dei Magazzini Del Porto, Largo Strozzi 1, Livorno. *Tel:* 24-504. *Telex:* 500486. *Contact:* Direttore: Dr. Francesco Ruffini.

MANFREDONIA: 41.37 N. 15.55 E. (See Pla

PORT LIMITS: Seaward boundaries do not exist. A vessel is considere an "arrived ship" and (subject to Charter-Party terms) laytime w commence when boarding the Pilot or dropping the anchor in the Roads

DOCUMENTS:
5 Crew Lists.
3 Provision Lists.
1 Arrival Report.
3 Curios Lists.
Cargo Manifest (Italian Form).
Bills of Lading and ship's documents not expired.

PILOTAGE: Compulsory for vessels over 500 g.r.t. The ship's ETA furnished to the Pilots by the Agent. VHF service around the clock o Channel 12; Pilot station to be contacted 1 or 2 hours prior the ship arrival in the Roads. International signals are used for calling Pilot; Pi has to be taken on board within 1 mile range from the harbour entranc but, upon ship's request, Pilot may board the vessel wherever require The pilot boat has a black hull with a white stripe all around and th letter "P" printed on both sides of the bow. White superstructure an mast. Max. speed 8 knots.

ANCHORAGE: Boundaries according to the draft; the bottom (mud an sand) has good holding. No anchorage is suggested with heavy S.E weather. See "Plan".

RESTRICTIONS: Ships carrying dangerous cargoes will only berth daytime (from sunrise to sunset); departure is allowed at any time f all vessels.

MAX. SIZE: No restrictions on LOA or beam. The only limitation is give by the draft which is 32 ft. 6 in. for ships operating to the New Industri Port and 21 ft. 6 in. for those operating to the old harbour. The abov drafts are referred to the Mean tide condition. One more foot can b added if docking with high tide.

HEALTH: Free Pratique is granted by the Port Authorities at anchorag or at the dock. Radio Pratique may be requested, by cable via Ba Radio, to "Sanimare Manfredonia".

RADIO: For ETA and other communications with Agents, receivers, etc Roma Radio is suggested; call sign IAR.

VHF: Port Authorities: Channel 16 from 0800 to 2000 hrs local time fro October to May and 24 hour watch from June to September.

Pilots, Tugs and Mooring Gangs: Watch and working Channel 12 service continuous.

Local Agents provided with VHF equipment listen from 0800 t 1700 hrs. on Channel 9 and 12.

RADAR: The new pilot station will be equipped with radar and Pilot should be able to provide a suitable radar service and port control.

TUGS: 2 tug boats of 1,300 h.p. Usually join the vessels in the Road together with the Pilot. Either ship's or tug's lines are used. Towage compulsory for ships carrying dangerous cargoes.

BERTHING: New Industrial Port: A/1 300 m., A/2 250 m., A/3 265 m A/4 265 m., A/5 315 m. Draft at MHWS 32 ft. 6 in.

Old Commercial Port: Nos. 1, 2 and 3 together 480 m., Nos. 4 and together 220 m. Draft at MHWS 21 ft. 6 in.

CRANES: Old Commercial Port: Pier No. 2 equipped with 2 cranes wi a safe working load of 6 tons each.

New Industrial Port: 2 cranes Reggiane type, multi-purpose, a located on piers A/3 and A/4. Safe working load 25 tons at 40 m. sprea

BULK CARGO FACILITIES: In addition to the cranes, the new port equipped with 3 escalators for loading fertiliser in bulk (Berth A/2) an 2 self-moving suction pumps for cereals (Berths A/1 and A/2).

The rates are: Fertiliser in bulk 3,000 tons per working day. Grai wheat and other cereals 5,000 tons per working day. Sulphur in bu 2,000 tons per working day. Silver sand 2,500 tons per working da (working day 0700 – 1900 hrs.).

BRIDGES: None.

STEVEDORES: Gangs arrangements made by the Agent in due tim The load or discharge rates vary depending on the type of cargo, th vessel, the type of the ship's gear, etc.

MEDICAL: Crew members must be in possession of a valid vaccinat card against cholera and yellow fever when coming from countri declared infected by the international health laws.

DENSITY: The average salinity of water in the port is 1026.

FRESH WATER: Available on the quays of both ports. Water operations carried out by hoses which are connected to the pi connections.

FUEL: Any kind, grades and viscosity delivered by trucks.

FIRE PRECAUTIONS: Towing wires hanging from the sea side forwa and aft.

CONSULS: None.

REPAIRS: Small deck and engine repairs are possible.

DRY DOCK: None.

SURVEYORS: All Classification Societies are represented in Ba 2 hours away from Manfredonia.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Opening and closing carried out ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes per man. 1 bottle spirits

REPATRIATION: All facilities exist for effecting Crew changes a arranging all the necessary pratiques for repatriation.

AIRPORT: The nearest airport is Bari, 130 km. away, but the re-open of Foggia airport, 36 km away is expected.

TIME: From the last Sunday of March till the last Sunday of Septem "daylight saving time" is in force. GMT plus 2 hours. For the rest of t year the standard time is used, GMT plus 1 hour.

HOLIDAYS: Cargo operations are not carried out on the following da All Sundays, April 25th, August 15th and 31st, December 8th, 25th a 26th, and January 1st.

POLICE/AMBULANCE/FIRE: For all services dial 113.

SERVICES: Compass adjusting, radar and gyro repairs. Divers avai on request.

TELEPHONE: No arrangements exist for placing telephone on board. 1 telephone booth exists on "Molo di Ponente", Old Commercial Port, for local and long distance calls. A few telephone booths on Berths A/1 and A/3 of the New Industrial Port are to be connected in the near future.

SHORE LEAVE: Crew members of all nationalities are allowed ashore.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

DELAYS: Delays for port congestion are very unusual, however, delays no longer than 24/48 hours are expected.

GENERAL: 2 shipchandlers are available for stores, provisions, cigarettes and spirits.

AUTHORITY: Capitaneria di Porto, Piazza Marconi, Manfredonia. *Tel:* (0884) 23871-2-3. *Telex:* 812156 Compmf I. *Contact:* Harbour Master.

MESSINA: 38.11 N. 15.34 E. (See Plan)

DOCUMENTS: If vessel comes from foreign port, whenever possible, at least 1 copy of Crew List and Passenger List to be sent some days before her arrival, so that they can be delivered to police in advance. Required on arrival:

3 Crew Lists.
1 Provisions List.
3 Lists Passengers in Transit.
3 Lists Passengers Disembarking.
1 List of Articles – new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, new articles, etc. If on inspection articles or quantities not in conformity or in excess, Master responsible; articles removed and heavy fine imposed.

Copies of Cargo Manifest also to be prepared on arrival.

If Anchorage Dues already paid and still in force, the relative receipt to be shown to the Harbour Authorities, together with other ship's papers and report of arrival to be delivered to them.

PILOTAGE: Pilotage through Messina Straits is available but not compulsory.

Vessels in transit who intend to avail themselves of optional pilotage may request a Pilot via:

a) Radio PT – Messina (IDF) on frequency 2182 kHz by radiotelephony at least 4 hours in advance.
b) The Messina and Reggio Calabria Port Captaincy telegraphically at least 12 hours in advance.
c) Through the ship's Agent.
d) By contacting the local pilot station directly by telephone 090/44483 or VHF Channel 12 at any time.

Ships requesting a pilotage service shall embark the Pilot in the following positions (which are also the boarding positions for the Port Pilots):

a) If Southbound: 3 nautical miles North of Cape Peloro.
b) If Northbound: 1.5 nautical miles S.E. of San Ranieri Light.

We wish to point out the great advantages that such a pilotage service may render to the ship, both in terms of fuel saving because it avoids the longer passage to the South of Sicily, and in terms of safety to navigation.

Also see "Italy – General" before first port and "Report" dated May 1985.

ANCHORAGES: Allowed outside harbour; at Paradiso's Bay, sufficient depths for safe anchorage existing. Advisable to request Pilot's assistance for indication of best anchorages.

Prohibited Anchorage: Between the parallels of 38° 12′ 58″ N. and 38° 10′ 48″ N.

RESTRICTIONS: For entering harbour during night-time ETA to be given in advance.

Also see "Italy – General" before first port and "Report" dated May 1985.

MAX. SIZE: Max. draft allowed: 33 ft. at passenger quay; other berths 27 ft.

Max. length 200 – 300 m.

Tankers: Length 100 m., draft 27 ft.

HEALTH: Free Pratique automatic for vessels coming from other Italian ports and quarantine flag not to be flown on entering. From other countries usual procedure applies.

RADIO/VHF: Contact through Rome Radio, Naples Radio, Augusta Radio, or Messina Radio VHF Channel 16 or R/T 2182 kHz.

TUGS: Not compulsory. Tugs join vessels at about 0.5 miles from entrance of harbour. If tug's lines used increase of 10% on tariff.

STEVEDORES: To enable Agent order gangs important obtain accurate ETA. Latest time to order gangs: normal shift 0730 hrs. for work in the morning; 1200 hrs. for work in afternoon; night shift 1600 hrs. same day – Saturday noon or Sunday at 1200 hrs. on Saturday.

Failure to give ETA results in cost of waiting gangs, charged to vessel.

Tonnage: Per gang in 8 hours: General cargo 50 ton – cereals 80 ton.

MEDICAL: Doctor can attend sick crew members or for vaccinations. Hospitals available.

TANKERS: There is a Eurobunker station only. Small tankers from time to time discharge fuel oil, gasoline, etc. Gas freeing, tank cleaning, slops and dirty ballast reception facilities available.

CONSULS:

Argentina
Australia
Colombia
Denmark
Finland
Germany F.R.
Guatemala
Netherlands
Norway
Panama
Peru
Sweden

FRESH WATER: Only quays have water pipe-line connections and water may be supplied day and night directly from ashore by hoses; during Summer time water may be supplied from 0600 to 1100 hrs. only. Water available at night time by boat (max. 250 tons).

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: One dry dock belonging to SMEB (Societa' Messinese Esercizio Bacini) can be hired. Dimensions are as follows: Length 853 ft. (260 m), breadth 118 ft. (36 m.). One dry dock belonging to Italian Navy, therefore application must be granted by the Marina Militare. Dimensions are as follows: 492 ft. × 52 ft. 7 in. (bottom), 81 ft. 6 in. × 24 ft. 8 in. (top).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: May be carried out by the crew or stevedores.

CERTIFICATES:

Safety Certificate.
Wireless Safety Certificate.
Freeboard Certificate.
Derat Certificate.
Anchorage Duties Voucher.
Crew List.
Passenger List.
Construction Certificate.

CUSTOMS ALLOWANCES: 50 gm. tobacco for each seaman. Spirits: 0.75 bottle for all crew.

REPATRIATION: No particular facilities existing; but necessary repatriation can normally be arranged.

AIRPORT: Reggio Calabria Airport – distance about 10 km. From Messina, Reggio Calabria can be reached in 15 minutes by hydrofoil boats, which run every half hour (about). Flights from Reggio Airport in Winter, 1 per day; in Summer, 2 per day.

TIME: In relation to GMT local time is an hour ahead. During Summer, from March to September, clocks are put 1 hour forward.

HOLIDAYS: Work can be arranged, provided timely notice is given, in following official holidays, paying the respective increase on normal tariff: New Year's Day (January 1st); Easter Monday; 25th April; 1st May; June 3rd; local religious holiday; 15th August; 25th December; 26th December.

POLICE/AMBULANCE/FIRE: Police, 46830; Ambulance, 2935592; Fire, 2930222.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

REPORT: May 1985.

The following is a copy of telex from ship's Agent to Ship Operator.

Quote:

Port Orders 7 – 18/85

As from 10th May 1985 *temporarily pilotage in the Strait of Messina* is compulsory for vessels over 6,000 g.r.t. carrying petroleum products or noxious substances to the sea. Pilotage is also compulsory to vessels not carrying the above products over 15,000 g.r.t. Vessels are to inform at least 12 hours prior arrival Messina Radio call sign IDF frequency 2182 kHz and cable Port Authorities of Messina and Reggio Calabria or through their Agents the following:

International call sign.
Flag.
G.r.t. as per International Certificate.
Type of cargo/es and quantities.
CLC and IDPP certificate details.

Same information has to be given to *Messina* and *Reggio Calabria's Port Authorities* by vessels not compulsory to take Pilot at least 2 hours prior their arrival at Messina via Messina Radio or VHF/FM Channel 16.

Pilot boards vessels coming from South at 2.5 miles S.E. of Punta S. Raineri Light.

Pilot boards vessels coming from North at 3 miles North of Capo Peloro Light.

Joint Port orders No. 6/85 and 13/85 issued respectively by Reggio Calabria Maritime Direction and Catania Maritime Direction is abrogated as from 10/5/1985.

Furthermore the decree of Ministry of Merchant Marine of 8th May 1985 about the navigation in the Strait of Messina states as follows:

As from 10th May 1985 the navigation in the Strait of Messina is forbidden to vessels equal or over 50,000 g.r.t. carrying petroleum products or noxious substances to the sea as defined by the International Conventions effective in Italy.

Unquote.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority dues.
Vaccination Certificates for sighting.

ARRIVAL ADVICE: At least 24 hours' notice of arrival to be passed to Agent in order to obtain allocation of berth from Port Authority. Consignees-Receivers as for Charter Party.

PILOTAGE: Pilot boards 1.5 miles off the berths. International Code signals used. Pilot can be contacted on VHF Channel 12. Compulsory for vessels over 500 g.r.t. (Berthing/Unberthing).

ANCHORAGE: There are 6 anchorages for tankers over 3,000 g.r.t.

No. 1 up to 600 m. off the harbour green light – Bearing 034°

No. 2 up to 920 m. off the harbour green light – Bearing 091°

No. 3 up to 3,870 m. off the harbour green light – Bearing 097°

No. 4 up to 3,050 m. off the harbour green light – Bearing 101°

No. 5 up to 1,200 m. off the harbour green light – Bearing 036°. Not in use at present due to sea bed being fouled (April 1986.).

No. 6 up to 1,600 m. off the harbour green light – Bearing 065°

Anchoring prohibited within 1 mile of Refinery Wharves. Pilot can be used for anchoring but not compulsory.

RESTRICTIONS: All tankers are berthed and unberthed between 0600 hrs. and 2000 hrs.

MAX. SIZE: Tankers up to 420,000 d.w.t.

HEALTH: Free Pratique on board may be requested on arrival by way of ship's Agents. The procedure to obtain Free Pratique by radio is being perfected. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO/VHF: Harbour Master Authority, Mediterranea Refinery, Pilot and Tugs may be contacted on VHF Channel 12. Harbour Master Authority may be contacted also on VHF Channel 16.

TUGS: 4 tugs available, 2×2,500 h.p., and 2×1,800 h.p. Meet vessel 0.75 miles off berths. Obligatory, at least one for mooring/ unmooring tankers over 3,000 g.r.t. Ship's lines used.

DRY CARGO FACILITIES: Ludovico Mazzullo Jetty, length 340 m., depth 22 ft.; Pennello Eolie Jetty, length 65 m., depth 23 ft.

TANKERS: AGIP Petroli Co.: 10 berths for Tankers, distributed in 3 Jetties as follows:

No. 1 Jetty: (West Jetty) 500 m. long, for loading/unloading, with the following berths:

Berth No. 1 (West side – Outer end) – depth 48 ft. LPG arms and lines available.

Berth No. 2 (East side – Outer end) – depth 48 ft.

Berth No. 3 (West side – Inner end) – depth 21 ft. LPG arms and lines available.

Berth No. 4 (East side – Inner end) – depth 20 ft. LPG arms and lines available. Arms: 12 in. and 8 in. Ballast lines 2×10 in. – Cargo lines 20, 16, 12 and 10 in.

No. 2 Jetty: (Middle Jetty.) 650 m. long, for loading/unloading, with the following berths:

Berth No. 5 (West side – Middle) – depth 55 ft.

Berth No. 6 (East side – Middle) – depth 55 ft. Arms:12 in. – Ballast line 1×20 in. – Cargo lines 2×40 in. (Crude oil) – 20, 16, 12 in. (Fuel oil) – 20 in. (Gasoil) – 12 in. (Virgin Naphtha) – 10 in. (Super Gasoline) – 10 in. (Normal Gasoline) – 10 in. (Kerosine).

Berth No. 5 bis (West side – Outer end) – depth 83 ft. Available for vessels up to 420,000 d.w.t.

Berth No. 6 bis (East side – Outer end) – depth 75 ft. Arms: 16 in. – Crude oil lines 2×40 in.

Berth No. 7 (West side – Inner end) – depth 25 ft., loading arms 6 in.

Berth No. 8 (East side – Inner end) – depth 24 ft., loading arms 6 in.

Berth No. 7 available for vessels up to 6,500 d.w.t. LPG arms and lines available.

Berth No. 8 available for vessels up to 4,500 d.w.t. LPG arms and lines available.

No. 3 Jetty: (East Jetty) 558 m. long, for loading/unloading under construction, with following berths:

Berth No. 9 (West side) – depth 45 ft.

Berth No. 10 (East side) – depth 45 ft.

Vessels berth head out. Lines run to mooring dolphin ahead and astern. Anchor is compulsory only for small tonnage tankers. Tankers may use wire ropes only on the jetty mooring hook. On the bitts may use wire ropes only if the eyes are made of manila or nylon. For tankers alongside the jetty it is compulsory to have ahead and astern, outside, wire ropes with eye.

Crude oil washing permitted.

Oilboom: Compulsory for vessels alongside the refinery jetties.

MEDICAL: All facilities available.

FIRE WATCHMEN: Compulsory for tankers alongside the Refinery Mediterranea jetties. Number of watchmen onboard is variable, according to the cargo Class ("A", "B" or "C") loading/discharging and to the tanker's g.r.t.

GANGWAY/DECK WATCHMEN: Watchmen service available. It is, however, recommended but not compulsory.

FRESH WATER: Boiler and drinking water supplied from the jetty. At anchorage by barge. Max. pumping rate 50 t.p.h.

FUEL: All grades available at Mediterranea Refinery berths, subject to prior notice. Also available at Milazzo Dry cargo harbour berths, all grades available by tank or truck.

CONSULS: No Consuls in Milazzo. The nearest are in Messina for the following countries: Peru, Great Britain, Argentine, Norway, Uruguay, Chile, Denmark, Germany F.R., Australia.

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

BALLAST: Ballast facilities available at Mediterranea's berths. Reception 1,000 t.p.h. No restrictions on capacity.

TIME: GMT plus 1 hour. Summer-time: March to September GMT plus 2 hours.

HOLIDAYS: Cargo work can be arranged on every day.

SURVEYORS: Cargo Surveyors and Superintendents available. Ships Surveyors and Salvage Association also available.

CUSTOMS ALLOWANCES: 50 cigarettes are allowed per man per day for the first 2 days.

AIRPORT: The nearest is at Reggio Calabria where there are 3 regular flights per day. Reggio Calabria can be reached by car and by hydrofoil in about 2 hours. Catania Airport also nearby, and may be reached by car or train in about 2 hours.

TELEPHONE: Connections possible at Refinery Wharves.

GARBAGE: Boats are available, and compulsory for vessels 24 ho after arrival.

BANKS: Italian banks only.

STORING: Vessels can be stored by barge during loading a unloading.

Fork lift trucks can only be used in the commercial port.

Local riggers can be employed to assist with storing in the commerc (dry-cargo) port only.

SHORE LEAVE: Allowed, but transit through the refinery area n permitted except in emergency. Boats are available for hire fro wharves and anchorage to the landing pier in the Port of Milazzo. Sho passes given by local police.

IDENTIFICATION CARDS: Shore passes given by local police.

DEVELOPMENTS: Coal unloading wharf of 530 m. Length and 30 depth to be built. Vessels of 120,000 d.w.t. will be unloaded 2×1,500 t.p.h. bucket unloading systems.

SHIPMASTER'S REPORT: April 1986.

Vessel: 95,000 d.w.t.

With vessels this size Pilot will normally board for anchoring whi operation is carried out with anchor in gear due to water depth. Usua slack down to about 2 shackles in water and then slack to 9 shackle

Only means of getting ashore from anchorage and from the refine jetty is by boat service which is arranged through Agent. V communication is very good and on berth the refinery requires V watch on Channel 12. Bonded stores sealed by Customs and for Liber registered vessels will not be unsealed irrespective of vessel's length stay.

Boat service does not operate after 2300 hrs. or if weather, boatman's opinion, is too rough.

If American dollars are required then it is necessary to go to Messi to obtain them.

Pilot for berthing boards from pilot boat at anchor and usually reques vessel to weigh anchor before boarding. 3 tugs for berthing, 2 of whi require 2 ship's ropes each, forward and aft, third tug puts up small ro amidships.

At Berth No. 5 usually starboard side to. Moorings 3, 2, 2 with hea and stern lines first then springs, then breasts. Good mooring faciliti with messengers and winches and berth is designed for VLCCs w shore gangway.

MONFALCONE: 45.48 N. 13.32 E. (See Pla

PORT LIMITS: A vessel is considered to be an "arrived ship" wher is secured alongside the berth.

DOCUMENTS:

Arrival Report.

Crew List.

Passenger List.

Customs Documents.

All SOLAS Certificates.

Health Documents (only for vessels that are not arriving from t United States, and are not members of the West European Union).

PILOTAGE: Pilotage service is the responsibility of the Harbour Offi and is carried out by local Pilots. Pilots are not supplied with ra equipment. Pilotage service has to be requested by radio via Trie radio station, to the Harbour Office or via VHF Channel 16. Pilotag compulsory for vessels over 500 g.r.t. Pilot boat is equipped with VH Pilot boards about one mile from the entrance buoy.

ANCHORAGE: Vessels awaiting entry to the port are required to anc between Duino and Sistiana, about 3 miles from the entrance. T anchorage provides good shelter from winds from the first and fou quarters. The depth is approx. 12.0 m. and the bottom is mud.

RESTRICTIONS: Pilotage is effected day and night. It is not availa during thick fog or when strong winds are blowing from the first quadra Maximum draft at high water is 10.5 m.

MAX. SIZE: At the ENEL Berth (berth for the discharge of coal destin for the electrical power station), vessels longer than 180 m. may n berth.

HEALTH: Pratique requested by radio via the Maritime Health Offic Trieste.

RADIO: Nearest coast station is Trieste Radio, through which all ra messages should be routed.

TUGS: Tug service is optional except for vessels proceeding to EN Berth, but the Maritime Authority can make service tempor compulsory.

BERTHING: 1,080 m. of berthing space (7 berths) for loading a discharging various types of cargo, with a maximum depth of wate 10.5 m. One berth 120 m. long for discharging cereals with maxim depth of 10.5 m. The berths are served by railway branch lines.

BULK HANDLING FACILITIES: Silo berth is well equipped discharging cereals.

CRANES: 5 heavy lift cranes on rails up to 45 tonnes capacity. 8 mo cranes of varying capacities.

BRIDGES: There are no bridges that hinder maritime traffic.

STEVEDORES: Ordered via Agent.

MEDICAL: Hospital, doctor and vaccination facilities available.

TANKERS: The port only receives tankers with cargoes for ENEL

DENSITY: Average 1027.

FRESH WATER: Available at all berths.
FUEL: Bunkering is by barge or by truck (capacity 20 tons).
FIRE PRECAUTIONS: Only for hazardous goods, during bunkering operations and the effecting of any work on board vessels involving flames.
CONSULS: None at Monfalcone, but available at Trieste.
REPAIRS: Minor repairs only.
DRY DOCKS: Max. size 300,000 d.w.t.
SURVEYORS: None at Monfalcone, but these may be easily contacted at Trieste.
GANGWAY/DECK WATCHMEN: Not compulsory, but available through Agent.
OPENING/CLOSING HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 50 cigarettes or 50 grams of tobacco available per man per day for the first two days.
AIRPORT: 5 km. from Monfalcone with connections to Milan and Rome.
TIME: GMT plus 1 hour; from 29th March to 26th September GMT plus 2 hours.
HOLIDAYS: Every Sunday, 1st January, 6th January, 1st May, Easter, first day after Easter, 15th August, 1st November, 25th and 26th December. It is, however, possible to load and discharge vessels on these days by paying premium rates.
POLICE/AMBULANCE/FIRE: Police 113 or 72332; Ambulance 72249; Fire 74444.
TELEPHONES: Not available on board, numerous public telephones in the port.
SHORE LEAVE: Possible. Time restriction for crew members of certain countries.
IDENTIFICATION CARDS: Issued without any formality by the local police.
REGULATIONS: There are no special regulations.
DELAYS: Caused only by weather conditions.
BANKS: Banca Antoniana, Via F. Rosselli No. 37. Tel: 45301.
Banca Cattolica, Via Marconi No. 1. Tel: 470337.
Credito Italiano, Via Oberdan No. 5. Tel: 40061.
Banca del Friuli, Piazza Cavour No. 22. Tel: 73230.
Banco di Roma, Piazza Cavour No. 34. Tel: 45191.
STORING: See "Prelims".

1. There are no coastal fuel stores, and vessels arriving at Monfalcone are either supplied by road tanker or by fuel barges. The usage of the one or the other means is the responsibility of the Owners or Agents.
2. Supplies by barge can be effected at any time, whilst by road tanker only during non-working hours.
3. For loading and discharge, vehicles may come right alongside the berthed vessels.
4. There are no forklift trucks in use in the port of Monfalcone for unloading goods.
5. For discharge or shipment of goods, there is an Accident Prevention Ordnance No. 07/1981 issued by the Port Captaincy of Monfalcone.

GENERAL: During the Winter, there are days of very strong winds gusting up to 110 km/h. coming from the first quadrant which sweep the port's quays. The wind tends to become strong during the night, and it is necessary to strengthen moorings.
DEVELOPMENTS: An additional berth will be available in the near future.
AUTHORITY: Capitaneria di Porto – Monfalcone, Via C. Cosulich 20, 34074 Monfalcone, Italy. *Tel:* 0481-712111/712112. *Telex:* 461087. *FAX:* 0481-483408. *Contact:* Captain Giovenni Gardella, Harbour Master.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority Dues.
Vaccination Certificates for sighting.
PILOTAGE: 13 Pilots and 3 motor launches. ETA to pilot station, VHF Channels 12 and 16 or to "Compamare" on Channel 6.
ANCHORAGES: Approximately 70 anchorages, having depths ranging from 11 m. to 15 m.
APPROACHES: *Port Approaches:* Approaches to the Gulf of Naples are free of navigational dangers. Ships approaching Naples from the North are cautioned to avoid the Procida Canal, between Procida Island and Capo Miseno (1.5 miles wide) in view of the heavy traffic usually met in this area and other navigation hazards. Passing well clear West of Ischia Island is recommended. Caution is necessary because numerous fishing boats are likely to be encountered in the area, especially at night and in the early morning.
Port Operations: The port is located on the Northern shore of a natural Gulf and is well sheltered from Northerly winds, but winds from the S.W. to S.E. may affect port operations at the petroleum berths, by creating a considerable swell inside the breakwater.
Entry/Berthing: For the berthing manoeuvres, and particularly when ships swing inside the petroleum basin, it is very important that ship's engine orders are carried out accurately and promptly. The Chief Engineer should be advised in advance of importance of this.
RESTRICTIONS: 2 port entrances of which the Western is 280 m. wide, the Eastern is 250 m. wide.
Use of propellers and thruster within 20 m. of piers not allowed.
MAX. SIZE: Tankers up to 45 ft. draft.
HEALTH: Free Pratique may be requested by radio to "Sanimare Naples" between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board, Pratique is automatic for vessels coming from ports in E.E.C. countries.
TUGS: 8 tugs available as required to assist berthing.

CONTAINER FACILITIES: The port is equipped with a container terminal. The facility includes: Quay of 650 m. Depth of water 12 m. – 15 m. (Bausan Quay). Container park of 300,000 sq.m. A link with the National Railway Network. 4 cranes for 20 ft. and 40 ft. containers at Bausan Quay East. 125 outlets for refrigerated containers.

A trans-European railway terminal operated by International Containers S.A. fitted with a Paceco-Vickers transtainer of 35 tons, lateral cranes of 35 tons and 7 tons, and fork-lift trucks.

There is an additional 50,000 sq.m. of container storage near the city and various private storage areas.
BULK HANDLING FACILITIES:
Coal: Four 6 ton units with hourly payload of 400 tons.
Cereals: 2 suction towers × 600 t.p.h. and 1 silo × 50,000 tons capacity; 2 suction towers × 250 t.p.h. and 1 silo × 40,000 tons capacity.
Containers: One 45 ton container bridge crane at Flavio Gioia Pier, capable of a lift every 2 minutes and 4×50 ton container bridge cranes at Bausan Pier.
Ro–Ro: 3 platforms and 1 slipway.

CRANES:
Electric: 10×6 tons, 8×12 tons, 6×12 tons, 10×15 tons, 1×20 tons, 4×50 tons (Portainers), 1×45 tons (Portainer).
Floating: 1 of 100 ton (Italian Navy) and 1 of 60 ton (SEBN).

TANKERS: The petroleum port is located at the far East area of the port and consists of the Vigliena Pier, Calata Progresso and Progresso Pier. The petroleum port is exclusively used for handling crude oil and petroleum products at its 11 berths, and several pipe-lines connect these berths with the Naples Refinery of Mobil Oil Italiana, the plant of Mobil Chimica Italiana and the bulk plants of Agip, Esso Standard Italiana and IIP (ex-Shell Italiana) which are all located in industrial area of Naples adjoining the petroleum port at a distance not exceeding 4 miles. The maximum size of crude tankers, fully loaded, which can be accommodated at Progresso Pier is 90,000 d.w.t.

FRESH WATER: Water pipe-lines are connected to all wharves and piers in Port. Water barges available.

FUEL: All grades available. Delivered by barge subject to advance notice given.

Shore Passes for all passengers and crew.

PILOTAGE: Pilots are requested by international code signals Telegraphic address: Pilot – Olbia, at least 2 hours notice of arr required. VHF of 15 Watts on pilot boat (Watch on Channel 16 – Work on Channels 6, 9, 12, 14) with service from 0500 hrs. till 0100 hrs. P launch is wooden motor boat of 145 h.p. – speed 12 knots. Pilot boa 1 mile from lighthouse Isola Bocca. Vessels may anchor temporarily await Pilot.

ANCHORAGE: In the Roads of Golfo Aranci.

RESTRICTIONS: Entrance kept clear for liners.

MAX. SIZE: Max. draft 20 ft.

HEALTH: Before arrival vessel to advise Agents if Free Pratiq required, indicating state of health on board.

RADIO: The Port Authority listen on Channel 16 (VHF, range abo 30 miles).

TUGS: 1 available, 1,910 h.p. service is optional, tug normally mee vessel in vicinity of Isola Bianca.

CRANES: 1 of 6 tons and 1 of 32 tons on rails in the inner port (at t Benedetto Brin Quay). 3 mobiles of 15 tons, 11.75 tons and 5.7 tons

STEVEDORES: Agents require ETA 24 hours before arrival in order arrange gangs.

MEDICAL: Hospital facilities available. Vaccinations and inoculatio can be done, except for yellow fever which must be done in Cagliar

FRESH WATER: Available in inner port and Isola Bianca.

FUEL: Available only by tank truck, subject 2 to 3 days notice.

CONSULS: No local representatives.

GANGWAY/DECK WATCHMEN: Service is optional.

OPENING/CLOSING HATCHES: Work is exclusively done stevedores.

CUSTOMS ALLOWANCES: 40 grammes tobacco per person per da Not permitted to take tobacco out of the docks. Reasonable amou wine/spirits allowed for normal consumption on board.

AIRPORT: Olbia Airport is Olbia – Costa Esmeralda, 3 km. awa Regular services with Rome, Milan, Pisa, Bologna, Cagliari and N (this last one in Summertime).

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from March September.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th Apr Labour Day (1st May); Easter Monday; Assumption B. V. Ma (15th August); All Saints' Day (1st November); Immaculate Conceptio (8th December); Christmas Day (25th December); Boxing Day (2 December).

POLICE/AMBULANCE/FIRE: Police, 22380; Ambulance, 22394; F 22222.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes required.

DEVELOPMENTS: Planned to dredge entrance to 10 m. depth.

AUTHORITY: Capitaneria di Porto di Olbia, Viale Isola Bianca, 070 Olbia, Italy. *Tel:* (0789) 21243, 21637. *Telex:* 792080. *Contact:* F. Luci Il Comandante.

ORISTANO, Sardinia: 39.45 N. 08.30. E. (See Pla

LOCATION: Oristano is situated on the West coast of Sardinia in t Gulf of Oristano. Oristano is the chief town of the province of Orista and the population is in the region of 29,000.

RESTRICTIONS: Entry/Departure, berthing and unberthing carried in daylight hours only as the port is not equipped with leading lights buoys.

MAX. SIZE: Martini Silo Quay – Max. draft 8.5 m.
MI.CHI.SA – Max. draft. 5.0 m.

VHF: Oristano Pilots on Channels 16 and 12.

TUGS: One tug available. Larger vessels require additional tugs wh must come from Porto Torres (at high cost).

BERTHING: The port consists of 2 harbours. The outer basin be located between the 2 breakwaters and used for general cargo purpo and the inner basin being the industrial harbour. The manoeuvring a between the outer and inner basin has a diameter of 450 m. and de of 12 m. The depth of both outer and inner basins is 12 m. The ou basin when completed will have berthing space of 1,240 m. and inner basin (for industrial traffic) will have 2,500 m.
Soc. Chimica del Tirso: Length of berth 48 m. Berth for discharg liquid chemicals to industries in Ottana.
Banchina di Servizio: Service berth, length 70 m., for berthing of s vessels.

Banchina Industriale – Canale W-E Silos Mangimi Martini: Length 370 m. Berth for discharging cereals. 2 suction pipes and 2 arms available.

In the near future a plant will be built to produce fodder and animal feed.

Banchina Industriale – Canale W-E – MI. CHI. SA.: Length of berth 69 m. Vessels berth to load bentonite by means of conveyor.

MEDICAL: 2 hospitals with 280 beds.

AIRPORT: Civil airport at Cagliari, Alghera and Olbia (daily connections to Rome, Milan, Naples, Bergamo, Pisa, Turin, Venice and Nice) are only 1 hour's drive from Oristano by car.

SHIPMASTER'S REPORT: 1978.

Oristano Bay has many shallows, none marked with buoys however there is an approach buoy which is presently unlit. A good anchorage was obtained 2.5 miles from the port. The Bay is completely open to the West and with a S.W. to West wind the swell builds up. The Perlite Co. loading berth is a pier and a ship berths across the 'T' end of it, the ship being parallel to the beach. The berthing part itself is 120 ft. long and the loading chute can be raised to a height of 6.5 m. – 6.8 m., depending on tide. A vessel has to move on the pier for loading in different hatches, as the chute has a fixed base. I understand that although at the time there was hardly any swell in Bay, alongside there was considerable movement. The loading rate as quoted by the Agent is 500 t.p.h. Good communications were obtained with link calls on VHF through Cagliari Radio to the Agents. The local Pilot lives in Porto Torres and boards at Torregrande. No VHF communication possible.

A new harbour is being built in the Bay as observed on the ship's radar. This consists of 2 breakwaters and a third breakwater extending at right angles across the entrance, with opening at both ends. In the Southern part of the Bay, there is a no anchoring and fishing area.

In the opinion of the Master the berth is not practical during the Winter months, as delays are caused by swell coming into the port. One vessel was at anchor for 3 days and sailed finally without loading.

SHIPMASTER'S REPORT: January 1979.

Port under construction.

This vessel (LOA 299 ft. Extreme breadth 43 ft. 9 in. draft 16 ft. 10 in.) was the fifth vessel to call at the port. We were unable to obtain Chart 3917 however, Chart 161A together with information given in sailing directions proved sufficient for the vessel to be brought to the anchorage.

Pilotage: The Pilot advises that he wishes to be embarked close to a buoy in position Lat. 39° 53′ N., Long. 08° 31′ E. which is indicated on Chart 3917. The pilot boat is a small open boat and does not have any distinctive marks. This boat would not be suitable for taking out to the Gulf' especially with a strong Westerly wind.

The Pilot brings the buoy astern and then proceeds on the course of approximately S.E. directly towards the harbour entrance.

Anchorage: Agent requested vessel to anchor about 2 miles off "Grande Torres".

VHF: Not available.

Radio: The Agent requested an accurate ETA as he makes arrangements for the Pilot and on seeing the vessel at the anchorage notifies the receivers by telex. This is then followed by a written Notice of Readiness of berthing.

Berthing: The grain silo berth is at the North side of "Canale Industriale" at its mid-length. This vessel swung with the aid of the port anchor and berthed starboard side alongside.

The quay is constructed of solid concrete and rises to a height of about 8 ft. above the water level. At the water line there is a ridge of about 9 in. extending along the whole length of the quay. Rubber fenders about 2 ft. in diameter are chained to the face of the quay at approximately 120 ft. intervals.

Once the vessel is alongside and against the fenders, it is protected from the concrete ridge but during berthing it would be possible to land on the projection because of the spacing of the fenders.

Bollards are also approximately 120 ft. apart except for one situated ahead of the vessel which is approximately 150 ft. from the next one aft. They coincide with the fenders.

The breakwater protects the harbour but difficulty may be experienced alongside due to swell following strong winds from a Westerly direction.

Port Facilities: Access to the vessel by road vehicle and fresh water facilities are still to be provided.

Harbour does not appear to provide any fire fighting facilities and when the grain silo is closed there is no telephone available.

It is about 10 miles by car to Oristano and the Agent's office. Half of the journey is by unmade road. There are no ship chandlers or repair facilities available in Oristano. Taxi drivers are reluctant to drive their vehicles over the rough ground and made additional high charges for the journey. The ship's agency was very helpful and went to great lengths to arrange for ship's laundry and to have water delivered to the vessel by truck. They also made some purchase of small items for the vessel.

The port of Oristano is likely to become a large complex and it must be assumed that provision of services to ships will be developed.

SHIPMASTER'S REPORT: March 1984 (Update on January 1979 report).

Our vessel LOA 191 m. arrived with laden draft of 35 ft. 5 in. to discharge a part cargo of 12,000 tonnes of grain.

Pilot station is under construction, but Pilot has (at home) VHF listening on Channel 12. So there is VHF communication with "pilot station".

Anchoring position according to Agent's cable is Lat. 39° 51.2′ N., Long. 08° 28.0′ E. and Pilot informed us by VHF when we were approaching the anchorage not to anchor further East than 1.5 miles from a line joining Cape San Marcos and Cape Frasca lights (due to our deep draft). Finally we anchored in position Lat. 39° 50.2′ N., Long. 08° 28.5′ E.

Pilot boat is still a small open boat with outboard engine, but they were expecting a new fast pilot boat in March 1984.

There is a white and red fairway buoy at approximate position, bearing from Cape S. Marcos light 063° distance 3.5 miles. The following 3 pairs of buoys green and red (red to port entering) and finally 1 red buoy. None of the buoys had lights at the beginning of March 1984.

Therefore entering and leaving the port is permitted only in daylight.

There is a tug stationed at Oristano of about 500 b.h.p. but when large vessels are expected a tug of about 5,000 b.h.p. comes from either Porto Torres or Cagliari. We were told that "large" vessels means more than 5,000 tons gross, but we could not confirm the size information. Naturally we had the assistance of both tugs in mooring and unmooring. The 5,000 b.h.p. tug made fast forward well outside the buoyed channel.

The buoyed channel has minimum depth 13 m. and the depth alongside "Martini" grain pier is 11.5 m., but in charter party draft limitation was 36 ft. SW.

Grain vessels berth port side alongside and when leaving they are swung by tugs and engine just in front of the pier as Canal Maritime is dredged to 11.5 m.

Grain Pier has good fenders but while the head of the vessel is somewhat protected by the silo, the stern is exposed to the strong Northwesterly and Westerly winds and at least 6 stern ropes, 1 breast and 2 springs aft must be passed ashore.

There is a local Shipchandler, but large orders must come from Cagliari.

Fresh water is available but very expensive and only by truck, minimum order 20 tonnes at 25,000 lire per tonne.

A new road of 6 km. connects the port with the town of Oristano.

SHIPMASTER'S REPORT: January 1985.

Vessel, LOA 148 m. Beam 22 m., visited Oristano (Lat. 39° 45′ N., Long. 08° 30′ E.), to unload maize with deepest draft 9.00 m.

Approaching: We reached pilot boarding ground/anchorage safely by steering to sea buoy at the entrance of Oristano Gulf. Sea buoy was recently installed at Lat. 39° 45′ N., Long. 08° 29′ E. (position approx.) but unlit, at night it can easily be detected by radar.

Anchorage: North: Close to sea buoy in 6 m. – 7 m. for light draft vessel. South: Close to sea buoy in 15 m. – 16 m. for deep draft vessel.

Pilotage: Pilotage is compulsory, only one Pilot at this port. ETA notice can be given 2 hours prior to arrival through VHF Channel 12 and Pilot keeps in touch with incoming vessel with his own radio. Pilot usually boards the vessel near the sea buoy and takes ship to harbour along a buoyed channel, which was also recently installed and reached both entrance breakwaters. It was installed according to IALA buoyage system (red to port) but unlit. Entry, departure and (un)berthing was restricted at night time.

Tugs: One tug only available and meets the vessel near the breakwater, ship's line was used. If Master insists on extra tug for berthing/unberthing in heavy weather, 48 hours prior notice is necessary, high cost is imposed as extra tug will come from Port of Cagliari. Master should pay special attention to (un)berthing with one tug, which is too low-powered to control a large vessel.

Manoeuvring:

(a) Depth: Buoyed channel was dredged to 13 m. and depth of both inner and outer port is 12 m.

(b) Buoyed channel and entrance breakwater about 200 m. wide and the inner basin entrance is 200 m. wide. Both inner and outer basins have plenty of room for turning around, diameter about 800 m.

General:

(a) Fresh water can be supplied by truck only.

(b) Fuel available by truck.

(c) Provisions and bonded stores can be purchased, ship suppliers provided assorted items, price is very reasonable.

(d) Cash advance in U.S. currency is restricted to small amounts as bank could not collect too much foreign currency.

(e) Density 1025.

PALERMO, Sicily: 38.07 N. 13.20 E. (See Plan)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 499 gross tons. Pilot station keeps listening watch on VHF Channel 12. Pilot joins vessel 1 mile off port entrance. Pilot can be requested by International Code Signals. Pilot station and every Pilot equipped with walkie-talkie VHF set. In case of rough weather pilot boat will be in the bay and will lead ships through port entrance where Pilot will be able to board.

Line Handling: Compulsory for vessels over 499 g.r.t. Line handlers are normally employed at Pilot's orders but they can be directly contacted by VHF Channel 12.

ANCHORAGE: It is advisable to use Pilot for anchoring in Palermo Bay.

RESTRICTIONS: No entry restriction, but there is a daily ferry service from Naples arriving at about 0645 hrs. and sailing at 2030 hrs. and another ferry service four times a week (Monday, Wednesday, Friday and Sunday) arriving at about 1300 hrs. and sailing 1500 hrs. No vessel is allowed to leave or enter the port half an hour before arrival or sailing of these vessels.

MAX. SIZE: Max. draft is up to 44 ft. (13.40 m.) according to the quay. Tankers up to 15 m. draft.

HEALTH: Free Pratique may be requested by radio to "Sanimare", Palermo, between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board. Pratique is automatic for vessels coming from ports in Italy, U.K., France, Belgium, Netherlands, Federal Republic of Germany and Greece.

RADIO: Naples Radio, Roma Radio, Cagliari Radio or Palermo Radio.

VHF: Port Captain listens on Channel 16 from 0800 hrs. – 2000 hrs.

TUGS: Four tugs are available with up to 2,000 h.p. Tugs normally join vessel in the bay. Ship's lines are used.

BERTHING:

Pier/Quay	*Length* (m.)	*Maximum draft* (ft.)	(m.)
Quattroventi Quay	235	24	7.40
Puntone Quay (containers)	400	44	13.40
S.Lucia Pier – East side	50	31	9.40
S.Lucia Pier – South side	180	24-31	7.40-9.40
Marinai d'Italia – Quay 1	115	34	10.40
Piave Pier – North side	326	37.5	11.40
Piave Pier – East side	85	37.5	11.40
Piave Pier – South side	326	37.5	11.40
Marinai d'Italia – Quay 2	110	37.5	11.40
V.Veneto Pier – North side	326	37.5	11.40
V.Veneto Pier – East side	65	37.5	11.40
V.Veneto Pier – South side	326	24	7.40
Marinai d'Italia – Quay 3	115	24	7.40
Sammuzzo Quay	350	24	7.40
Trapezoidal Mole – East side	350	*	*

* The quay is under construction. When completed, within 3 years, max. draft will be 54 ft. (16.40 m.), depth 17.0 m.

CONTAINER HANDLING FACILITIES: One 30.5 tonne container crane (gantry crane) with outreach of 23 m. from quay edge, height of spreader above sea level 17.5 m.

One 42 tonne container crane (gantry crane) with outreach of 34 m. from quay edge, height of spreader above sea level 29.5 m.

One 42 tonne container crane (gantry crane) with outreach of 36 m. from quay edge, height of spreader above sea level 29.5 m.

One 40 tonne mobile container crane with outreach of 30 m. from quay edge, height of spreader above sea level 26 m.

6 heavy duty lift trucks with front loading lifting frame and spreader (lifting capacity from 6 tonnes – 40 tonnes).

15 tractors.

63 trailer trucks, length 20 ft. and 40 ft.

BULK HANDLING FACILITIES: Silos for cereals at Piave Pier with a total capacity of 29,100 metric tons; discharge rate 250-350 tonnes p.h. (by the suction tower).

Warehouses (either bonded or not) and sheds with a total area of 10,000 sq.m. and a total capacity of 72,000 cu.m.

Refrigerated warehouses with a total capacity of 11,796 cu.m.

Tanks for oils and wines (which can also be used for stockage of any other type of liquid products) with a total capacity of 5,000 cu.m., linked to docks by pipe-lines.

Open air areas for over 220,000 sq.m.

CRANES: 8 electric cranes with capacity of 15 tons, max. outreach 25 m. and min. outreach 7 m.

4 mobile cranes with capacities of 13 – 20 metric tons.

STEVEDORES: Gangs arranged through Agent for all goods except containers; engagement of gangs can be done in two ways (option left to Agent):

For "labour by day" (0800 – 1200 hrs. and 1300 – 1700 hrs.), to be ordered at 0730 hrs., 0830 hrs., 0930 hrs., 1030 hrs. to start work respectively at 0800 hrs., 0900 hrs., 1000 hrs., 1100 hrs., and 1230 hrs. to start work at 1300 hrs.

For "shifts labour" (first shift 0800 – 1430 hrs., second shift 1430 – 2100 hrs.), to start work at 0800 hrs. or 1430 hrs. to be ordered respectively at 0730 hrs. and 1230 hrs.

Container handling, (every service, including stevedores) is provided by Ente Autonomo del Porto (Port Authority) Palermo for two daily shifts (first shift 0700 – 1400 hrs.; second shift 1400 – 2100 hrs.).

Port labour capacity (quantity of goods, except containers, loaded in 8 hours daily work employing all stevedores available:

Fully loaded trucks and vans carried by Ro/Ro ships – 240.

Bulk cargo 1,700 tonnes.

General cargo 700 tonnes.

Port labour capacity for container handling 140 TEU per shift per crane.

MEDICAL: Assistance will be given upon request.

TANKERS:

Oil Products: Agip. Max. length 185 m., draft 32 ft., 25,000 d.w.t. Tankers drop anchors and are tied up at 2 buoys astern. Discharge rate 200–400 t.p.h.

Esso: Max. draft 15 m., no limitation for length. Vessel drops anchor and ties up at 2 buoys by stern. Discharging rate 600 – 700 t.p.h.

DENSITY: 1025.

FRESH WATER: Available at any quay and in the bay. Rate by hose 70 t.p.h., by barge 80 t.p.h. Barge capacity 250 tonnes.

FUEL: Fuel oil, gas oil and marine diesel available at the quays and by barge with capacity 360 tonnes.

CONSULS: Austria, Belgium, Bolivia, Brazil, Denmark, Finland, France, Germany F.R., Greece, Liberia, Libya, Malta, Monaco, Netherlands, Norway, Panama, Peru, Portugal, Senegal, Spain, Sweden, Tunisia, U.S.A.

GANGWAY/DECK WATCHMEN: Not compulsory; usually number of watchmen required depends upon the Master.

OPENING/CLOSING HATCHES: Crew usually carry out this operation.

CUSTOMS ALLOWANCES: 40 cigarettes and one opened bottle wine/spirits per man.

TIME: GMT plus one hour. Summertime: March to September, G plus 2 hours.

REPAIRS/DRY DOCKS: Palermo Shipyard, located in the Northeaste part of the port is operated by Fincantieri-Cantieri Navali Italiani, wh groups all the largest Italian shipyards and is part of I.R.I.

It is one of the largest and most experienced shipyards in t Mediterranean area for ship repairs, maintenance, dry dock faciliti large marine motor services and for conversion of ships of any type a dimension.

The shipyard is equipped with:

One dry dock for vessels up to 400,000 d.w.t., fitted with 2 cranes 120 tonnes and 2 cranes of 20 tonnes capacity.

One dry dock for vessels up to 20,000 d.w.t.

One floating dock for vessels up to 150,000 d.w.t.

One floating dock for vessels up to 32,000 d.w.t.

Two berths for vessels up to 400,000 d.w.t., fitted with cranes 120 tonnes and 20 tonnes capacity.

One berth for vessels up to 160,000 d.w.t., fitted with cranes 60 tonnes and 30 tonnes capacity.

Two piers (1×110 m. long and 1×150 m. long) for vessels up 80,000 d.w.t., each fitted with a crane of 30 tonnes capacity.

A basin-dock for construction of new vessels up to 200,000 d.w which can be alternatively employed for simultaneously building 2 4 units such as ferries, sections for lengthening vessels, etc.

A plate shop capable of machining 150 tonnes a day and which equipped with all the latest machinery drilling and welding units.

Some engineering workshops also equipped with the latest types machinery enabling total dismantling and re-assembly of engines.

Also see "Developments".

Tankers – Gas Free Plant:

A gas-free plant for tankers has recently been completed in proxim of the shipyard.

It is also able to purify dirty ballast water unloaded by oil tankers.

The plant has following potentialities:

Purify oily waters: 2,300 cu.m.p.h.

Reception of slops: 750 cu.m.p.h.

Steam production: 40 tonnes p.h.

Production of demineralized water: 20 cu.m.p.h.

Production of inert gas: 6,000 cu.m.p.h.

DRY DOCKS: Floating dock, length 285 m., breadth 46 m., suitable vessels up to 150,000 d.w.t.

Floating dock, length 194 m., breadth 30 m., suitable for vessels to 31,000 d.w.t.

Graving dock, length 172 m. breadth 28 m., suitable for vessels up 25,000 d.w.t.

Graving dock, length 370 m. breadth 68 m., suitable for vessels up 400,000 d.w.t.

Also see "Developments".

AIRPORT: Distance from Punta Raisi Airport is about 30 km. Airp served by regular services.

REPATRIATION: Good facilities exist.

HOLIDAYS: All Sundays; New Year's Day (1st January); Epipha (6th January); Liberation Day (25th April); Easter Monday; Labour D (1st May); Patron Saint's Day (15th July); Assumption B.V. Ma (15th August); All Saints' Day (1st November); Immaculate Concept Day (8th December); Christmas Day (25th December); Saint Stephe Day (26th December).

The following holidays are considered "Non-Workable" (except Ro/Ro vessels employed in regular lines): 1st January, Easter Sund 1st May, 15th July, 15th August, 25th December.

POLICE/AMBULANCE/FIRE: Police, 583664, 333433. Ambulanc 306644. Fire, 587919.

TELEPHONES: Available if required.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes given by local police.

DEVELOPMENTS: One dry dock under construction for vessels up 150,000 tons. A terminal for ocean dry bulk cargoes will be operatio within 1 year.

AUTHORITY: Ente Autonomo del Porto di Palermo, via Principe Belmonte 1/C, 90139 Palermo. *Tel:* 091-586133. *Telex:* 910377 Epor *FAX:* 091-583040. *Cables:* Ente Autonomo Porto – Palerm *Contact:* Doctor Paolo Cimino, General Manager.

PIOMBINO: 42.56 N. 10.33 E. (See Pla

PORT LIMITS: Within 1 mile of Breakwater Light.

DOCUMENTS:

3 copies of Crew List.

3 copies List of Passengers in Transit or Disembarking.

1 Customs List, including ship and crew articles (Master is respons for any excess or shortfall).

1 copy of Manifest and B/L of Cargo Discharging.

1 copy of Manifest for Cargo in Transit.

PILOTAGE: ETA to Agent in local time (GMT plus 1 hour). Summ time March to September (GMT plus 2 hours).

Pilots embark E.S.E. from breakwater light, distance 1 mile or according to weather conditions. Pilotage usually available at gre distance on request of ship or Agent. Being an open road, care sho be taken to provide shelter to Pilot embarking/disembarking faci especially in Southerly winds or a swell.

Pilot ladder according to Convention Safety of Life at Sea, and E recommendations.

Southerly gales may prevent Pilot from embarking or even from approaching the ship; in this case pilot boat may guide limited size vessels to sheltered water and then embark Pilot (signals by lamp or by VHF on Channel 12).

Pilotage compulsory for vessels over 500 b.r.t. for entering and leaving the Port of Piombino and the Port of Tor del Sale (ENEL terminal 2.5 miles East of Piombino) also for shifting in harbour waters.

Pilotage compulsory for all ships directed to anchor in a wide area affected by submarine pipe-lines (see "Anchorage").

Pilot station has 2 Pilot boats fitted with VHF, keeping watch on Channel 12.

Pilots: Corporazione Piloti del Porto di Piombino e Tor del Sale, Piazzale Premuda, 30 – 57025 Piombino (LI). Tel: (0565) 30.535 (Office); 40.580, 30.175, 40.740, 41.345 (Residences).

ANCHORAGE: Outside the harbour, East or S.E. of Breakwater Light, according to size and draft of vessel. Pilotage compulsory for anchoring within a large area situated North of Lat. 42° 53′ N., and East of Long. 10° 32′ E. until Long. 10° 37′ East. A submarine pipe-line has been laid within the said area limits, starting from the coast and running in a Southwesterly direction to the Island of Elba. Anchorage is prohibited within a distance of 0.5 miles from the pipe-line. International signals and marks are yet to be set on the pipe-line.

Instructions for anchoring in the whole area are to be requested (compulsory) to the Pilots via VHF Channel 12, pending the setting up of a Vessel Traffic Service which is expected to start in the near future, possibly operated by the Pilotage Authority (see "VTS").

RESTRICTIONS: Berthing of large vessels (50,000 d.w.t. or more) is unadvisable in darkness or bad weather. Southerly gales prevent berthing, also for smaller vessels. Severe Southerly gales may force all ships in harbour to leave berths on account of swell and proceed to sea.

No restrictions on sailing but sometimes necessary to disembark Pilot at Portoferraio (Elba Island, 12 miles). Considerable swell in harbour during gales.

MAX. SIZE: Max. draft 39 ft., length 260 m., no breadth restriction. Can accommodate vessels up to 80,000 d.w.t.

HEALTH: Free Pratique automatic for vessels coming from Continent, "Q" flag not to be flown on entering. From other countries, including Spain and Portugal, usual procedure applies. Not coming from Continent it is possible to request Free Pratique by radio to "Sanimare, Piombino", between 12 to 6 hours before arrival.

RADIO: Civitavecchia or Livorno Radio.

VTS: Vessel Traffic Service is being organised by the pilotage service and will be operated from the ancient Semaphore Station in position: Lat. 42° 55′ 21″ N., Long. 10° 32′ 33″ E. The building is described in Sailing Directions as white with quadrangular tower and signal mast. VTS will furnish information, radar assistance and radar pilotage in the approaches to Piombino, etc.

BERTHING: Deltasider – Piombino (ex-Acciaierie di Piombino). Pier equipped for quick discharging of ore 1,000 tonnes per hour, coal 800 tonnes per hour, scrap, etc. – Berth No. 4 depth 39 ft. Berth No. 3 depth 35 ft. 6 in. Other commercial berths, max. depth 29 ft., equipped with mobile crane 10 tons.

4 berths for Ro-Ro vessels, max. draft 22 ft., max. length 140 m. (priority to vessels of Sardinia Lines). 2 additional Ro-Ro Berths for limited size ferries, reserved for Elba Island traffic (mostly tourists).

STEVEDORES: To enable Agent to order gangs, it is important to radio accurate ETA. Latest time to order gangs: shift 0600 – 1400 hrs., 1700 hrs. day before, shift 2200 – 0600 hrs., 1700 hrs. same day, shift 1400 – 2200 hrs., 1100 hrs. same day. Failure to give precise ETA may result in ship losing 12 – 24 hours, and the cost of the gang not employed.

MEDICAL: Doctor and dentist can attend sick crew. Hospital facilities available.

TANKERS: Oil terminal at Torre del Sale. In the vicinity of Torre del Sale (2.5 miles East of Piombino), a small shelter-harbour has been adapted for supplying the ENEL (National Electricity Board) electric plant with combustible oil. Torre del Sale shelter harbour can accommodate small tankers (up to 2,000 d.w.t.) with draft not exceeding 14 ft. Daylight traffic only with several restrictions for manoeuvring (use of tugs compulsory, wind not exceeding 14 knots, swell no higher than 1.5 m.). Pilotage compulsory and performed by Piombino Pilots with same charges and rules as in Piombino Harbour. VHF Channel 12.

FRESH WATER: Available at any pier, by pipe-line.

FUEL: Available by barge from Livorno.

OPENING/CLOSING HATCHES: Normally carried out by crew (if stevedores, extra charge).

CERTIFICATES:
Certificate of Registry.
Load Line.
Safety Equipment.
Radio Certificate.
Derat Certificate.

CONSULS: No Consuls.

REPAIRS: Small repairs only undertaken.

SURVEYORS: Cargo Inspectors available locally or from Leghorn. Surveyors available.

REPATRIATION: It is possible to arrange repatriation.

HOLIDAYS: Cargo work can be arranged on all official holidays.

POLICE/AMBULANCE/FIRE: Police 31111 or 32222; Ambulance 36022; Fire 33333; Emergency call (all services) 113.

EMERGENCY CO-ORDINATION CENTRE: Capitaneria di Porto – Livorno. Tel: 21362. Telegraphic address: Compamare, Livorno.

BANKS: Monte dei Paschi di Siena, Filiale di Piombino, Corso Italia 77 – 57025 Piombino. Tel: 33021, 35125. Telex: 590195 Paspio I.

Banca Toscana, Filiale di Piombino, Via Lombroso 9/13 – 57025 Piombino. Tel: 33321. Telex: 590057.

Banca Popolare di Novara, Filiale di Piombino, Via della Repubblica 7 – 57025 Piombino. Tel: 31345. Telex: 590320 Novbca I. P.O.Box 165.

Cassa di Risparmio di Livorno, Filiale di Piombino, Corso Italia 111 – 57025 Piombino. Tel: 34290.

STORING: See "Prelims".
1. By truck.
2. Storing while discharging possible by barge or trucks.
3. Trucks are allowed to proceed to some berths, not all berths.
4. Forklift can be used.
5. Customs Regulations as for all Italian ports.
6. Usually not.

SHORE LEAVE: Allowed.

AUTHORITY: Ufficio Circondariale Marittimo, Piazzale Premuda 21, Piombino. *Tel:* (0565) 32506. *Contact:* Comandante del Porto.

PORTO EMPEDOCLE: 37.17 N. 13.32 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port at which a vessel is considered to be an "arrived ship" and laytime to commence are regulated by contract.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Maritime Health Declaration.
1 Cargo Manifest.
1 Crew Declaration.
2 Arrival Reports.
1 Stores List.

PILOTAGE: Pilotage is compulsory for ships with a gross tonnage of more than 500 tons.

International Code Signals and VHF Channel 16 are used to call Pilot. Pilot station telegraphic address "Corporazione Piloti – Porto Empedocle", Tel: 66035 – The Pilot boat displays International Pilot Signals. The Pilot normally boards about 0.25 miles from the port entrance.

ANCHORAGE: About 1 mile from the red light at the head of the Western mole between bearings 90° and 315° in depths of about 10 m.

RESTRICTIONS: No restrictions.

MAX. SIZE: North and East Pier (1st arm): Max. draft 21 ft.
East Pier (2nd arm): Max. draft 25 ft.

HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio Pratique at present.

RADIO: No radio station, however it is possible to call "Capitaneria di Porto" (Harbour Master) operating on frequency of 2182 kHz from 0800 hrs. to 2000 hrs. local time.

VHF: Pilot station on Channel 16 (calling) and 12 (working) continuous. Harbour Master on Channel 16 from 0800 hrs. to 2000 hrs. local time.

RADAR: No radar available.

TUGS: One tug available.

BERTHING: 2 quays with max. draft 21 ft. and 1 pier with max. draft 25 ft. Berths are used for loading salt, fertilisers and general cargo and discharging bulk phosphate.

Salt is loaded at a rate of 300 t.p.h (approx.) at North Pier and 800 t.p.h. (approx.) at East Pier second arm.

CRANES: 1 crane for discharging phosphates. On request it is possible to obtain cranes from outside the port for heavy goods.

SPECIALISED CARGO-HANDLING FACILITIES: The berths are not equipped for handling containers or Ro/Ro traffic. Only small quantities of chemical liquid for local industries are handled.

BRIDGES: No bridges.

STEVEDORES: There are 2 ordering times each day. The first at 0730 hrs. and the second at 1230 hrs. It is possible to order gangs outside normal working hours through ship's Agent.

MEDICAL: All facilities available. Nearest hospital is located at Agrigento, 5 km. away.

TANKERS: No tanker facilities.

DENSITY: Salt water.

FRESH WATER: Only small quantities supplied by tank truck.

FUEL: Small quantities supplied by tank truck.

CONSULS: None.

REPAIRS: Small repairs only undertaken.

DRY DOCKS: None.

SURVEYORS: Registro Italiano Navale (R. I. Na. Agent).

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew, can be done by stevedores on request.

CUSTOMS ALLOWANCES: 40 grammes of tobacco per man. Normal daily consumption wine/spirits allowed.

CARGO GEAR: Shore gear normally used for discharging. Ship's gear used for loading phosphates.

REPATRIATION: Can be arranged through Agents.

AIRPORT: Palermo approx. 170 km., Catania approx. 200 km. Daily flights to main Italian airports.

TIME: GMT plus 1 hour. Summer time (between 29th March to 26th September) clocks advanced 1 hour.

HOLIDAYS: All Sundays, 1st January, 25th April, Easter Monday, 1st May, 15th August, 25th December (Christmas Day), 26th December, All Saints Day (1st November), Victory Day (4th November), Patron Saints (25th or 26th February).

POLICE/FIRE/AMBULANCE: Police: Tel: 66044-66124.
Fire Brigade: Agrigento Tel: 26102-20222.
Ambulance: Tel: by day 66600; by night 66858.

TELEPHONES: No telephones available for placing on board.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank-washings, no compass adjusting etc.

SHORE LEAVE: Allowed. Shore passes are issued by Immigration.

AUTHORITY: Capitaneria di Porto – Porto Empedocle, Via Gioieni 55, 92014 Porto Empedocle, Italy. *Tel:* (0923) 66640 – 66469. *Telex:* 910638 Comppe. *Cables:* Compamare Porto Empedocle. *Contact:* Harbour Master.

PORTO TORRES (Sassari): 40.51 N. 08.24 E.

DOCUMENTS:
4 Crew Lists.
1 Passenger List.
1 Maritime Health Declaration.
1 Arrival Report.
1 Crew Declaration.

PILOTAGE: International Code Signals are used to call Pilot. Pilot station telegraphic address, Corpo Piloti Porto Torres, tel. P. Torres 514936. The pilot boats carry international pilot signals. The Pilot normally boards about 1 mile from port entrance. On request, vessel can be boarded 3 miles off port entrance. Also see "VHF".

ANCHORAGE: About 1 mile from the green light on head of West Mole in depths of 25 m.

RESTRICTIONS: The oil terminal is exposed to winds and swell from N.W. to N.E. Heavy N.E. swell may delay berthing of larger vessels. Vessels should be ready to leave the berth if necessary due to adverse weather conditions.

MAX. SIZE: Inner Port: Length 120 m., draft 7 m. Outer Port: Length 150 m., draft 8 m. West Mole: Length 150 m., draft 8 – 10 m.

ANIC Terminal: Pier A, length no limit, draft 9 m. Pier B, length no limit, draft 12 m. Pier C, length no limit, draft 15 m. Pier E, length no limit, draft 8 m.

HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio Pratique at present. Pratique not required for vessels arriving from Common Market countries.

RADIO: Coastal radio station, Porto Torres Radio P.T., call sign "IZN", operating on 2182 kHz. A continuous service.

VHF: Pilots work on Channel 12. Launch service from anchorage to Oil berths work on Channel 6. It is also possible to call Porto Torres Radio on VHF Channel 16 (Calling and Safety), with continuous service on Channels 25, 26 and 27.

Captain of the Port on VHF Channels 16, 12, and 9 and 14 from 0800 – 2000 hrs.

TUGS: Join vessel about 0.5 mile from port or from ANIC Piers. Ship's lines normally used. 3 tugs available.

BERTHING: Tankers are only permitted to berth between sunrise and sunset, but may unberth at any time.

Dry-cargo vessels may enter at any time.

There are two ports, viz. New Port and Old Port. The New Port is comprised of the ANIC Jetty, and the Old Port is that area bounded by the East and West Breakwater Moles, within which are the Inner and Outer Harbours. The Inner Harbour is composed of the general cargo wharves which have in service electrical cranes up to 10 tons capacity. The Outer Harbour has oil berths at the West Mole, and general cargo berths at the East Mole in depths of up to 8.23 m.

STEVEDORES: There are two ordering times each day. The first at 0800 hrs. and the second at 1330 hrs. It is possible to order gangs outside normal working hours through ship's Agents.

TANKERS: *New Port,* consisting of the ANIC Jetty with Berths A, B, C and E and depths of water varying to allow ship drafts of between 9 m. and 15 m.

There are two lines of 20 in. and 10 in. diameter for deballasting ashore.

Old Port, the West Mole which forms the seaward limit of the (Outer) port has tanker berths in a depth of 7 m.

MEDICAL: All facilities available. Nearest hospital located at Sassari, 18 km. away.

DENSITY: Salt water.

FRESH WATER: Can be supplied in limited quantities to vessels in port and in the roads. All berths are fitted with fresh-water connections, but supply is unreliable due scarcity. Advance notice is required for deliveries by barge or from tugs.

FUEL: All grades available by pipe-line at ANIC piers. Elsewhere, can be supplied by barge, subject advance notice of 12 hours.

CONSULS: No local consular representation. French and Costa Rican Consuls in Sassari.

REPAIRS: Only minor repairs can be effected locally.

GANGWAY/DECK WATCHMEN: Authorised shore service available.

OPENING/CLOSING HATCHES: Normally done by crew, can be done by stevedores on request.

CUSTOMS ALLOWANCES: 40 grammes tobacco per man. Normal daily consumption wine/spirits allowed.

REPATRIATION: Can be arranged through Agents.

AIRPORT: Nearest at Alghero-Fertilia, 34 km. away. Daily flights to main Italian cities.

TIME: GMT plus 1 hour. Summer-time, clocks advanced 1 hour between 29th March and 26th September.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); Liberation Day (25th April); Labour Day (1st May); Patron Saint (22nd May); Easter Day, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: Police tel. 514888; Fire, 31421; Ambulance, 54973. Sassari Fire Brigade, tel. 270521; Sassari Ambulance, tel. 242124.

SHORE LEAVE: Allowed. Shore passes are issued by Immigration.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Capitaneria di Porto di Porto Torres, Porto Torres, Italy. *Tel:* (079) 502258, 502159. *Telex:* 792091. *Cables:* Compamare Porto Torres. *Contact:* Giorgio Maria Pompei, Port Captain.

PORTO VESME (Sardinia): 39.11 N. 08.23 E.

(See Pla

LOCATION: Porto Vesme Harbour is located on the S.W. coast Sardinia (Lat. 39° 11′ 5″ N., Long. 08° 23′ 5″ E.) in the District Portoscuso. The harbour was built exclusively to serve the Porto Vesm Industrial Complex.

Porto Vesme is an artificial harbour sheltered by two breakwaters, th one to the North giving protection against N.W. sea and the other to th South giving protection against South and S.W. seas (see "Plan"). Th harbour is managed by the Sant'Antioco Maritime District Office whic maintains a local branch office at Porto Vesme for this purpose.

DOCUMENTS: See "Genoa".

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t.; moorin party services are compulsory for vessels over 400 g.r.t.

The Pilotage Authority for the area is at Sant'Antioco and is equippe with a VHF radio station. A pilot motor boat, equipped with VHF radi is stationed at Porto Vesme and is utilised for ferrying Pilots to and fro ships. As a rule, Pilot services should be requested by ship's Agent through the local branch of the Maritime District Office. Urgent reques can be made, however, directly by telephone or by VHF to the S. Antioc Pilotage Authority.

APPROACHES: The entrance channel to the harbour mouth is marke by 2 pairs of light beacons and 1 pair of light buoys and has bee dredged to a depth of 14 m. (45 ft. 11 in.) along its entire length. Th manoeuvring area within the harbour and the sea area alongside th Eurallumina Wharf have been dredged to a depth of 13 m. (42 ft. 8 in.

ANCHORAGE: Small and medium-size vessels generally anchor in th area off Ghinghetta Rock (Lat. 39° 11′ N., Long. 08° 22′ E.) just outsi the harbour approach channel, where depths vary from 12 m. to 20 (Area "A", see "Plan").

Deep-draft vessels usually prefer to await the Pilot or to anchor 2 miles North of Isola Piana (Lat. 39° 14′ N., Long 08° 19′ E.) (Area "B During settled weather periods, large-size vessels also tend to anch off Ghinghetta Rock (Area "A"); should S.W. or N.W. gales rise wh large size ships are riding at anchor in this area waiting to berth, Maste usually weigh anchor and lie either in the Gulf of Palmas (Area "C") on the Southern side of the Island of San Pietro (Area "D"). From thes anchorages, ships can subsequently either pick up the Pilot and procee directly to port or return to ride at anchor off Ghinghetta Rock or Isola Pian

MAX. SIZE: Max. Draft 12.0 m. Also see "Tankers".

RADIO/VHF:

Station	*Mode*	*Remarks*
Cagliari Radio	Radiotelegraphy Radiotelephony VHF	Italian Post and Telegraph, availabl to the general publi
Sant'Antioco & Carloforte Maritime District Offices	Radiotelephony 2182 kHz VHF: Channels 16 and 14	For Safety at Sea only
Sant'Antioco Pilot Office	VHF: Channel 12	
Pilot Boat, Porto Vesme	VHF: Channel 12	
Harbour tug, Porto Vesme	Radiotelephony 2182 kHz VHF: Channel 6	

TUGS: A 1,000 h.p. tug, equipped with VHF radio, is station permanently at Porto Vesme Harbour; if necessary additional tugs c be brought in from Cagliari Port, provided that sufficient warning is giv to the ship's Agent.

FRESH WATER: Available, but in short supply. Preferably vess should arrive with sufficient water on board in order to avoid the hea charges incurred in deliveries by tank lorries.

FUEL: Not available.

BERTHING: *Mooring Operations:* A mooring service equipped wit motor boat, is available at Porto Vesme Harbour to assist ships to be and unberth; this service can be requested either (i) through local s Agents or the Pilotage Authority, or (ii) directly. All ships at ancho the roadstead can contact their Agents by radio or by radio-telepho through the Italian Post Office radio-telephone network. At the sa time, the Sant'Antioco Pilotage Authority, the pilot boat and the stationed at Porto Vesme Harbour can also be contacted directly VHF radio or by radio-telephone for any details concerning anchora points, estimated time of berthing or departure, and any other informa relevant to ship's manoeuvre or safety while in the roadstead or at be

Eurallumina Wharf: The Eurallumina Wharf is provided with 2 ber *Northern Berth:* It is intended for unloading bauxite and caustic so bulk cargoes. This berth can accommodate ships up to 92,000 d. drawing up to 12 m. (39 ft. 4 in.)

Depth alongside berth : 13.0 m. (42 ft. 8 in.)
Length of berth : 250 m.
Bauxite unloader : One "Kocks" unloader wit liftable jib
Maximum free digging rate : Up to 1,200 tonnes/p.h.
Travel range of unloader along the wharf : 19.5 m.
Maximum travel range of grab : 24.50 m. from edge of wha fenders
Maximum height of grab, in "open" position : 17.70 m. above sea level
Operative height : 15 m.
Minimum height of grab, in "open" position : 10 m. below sea level

Note: It is necessary that the maximum height of the hatches coa above sea level is kept below 14 m. during unloading operations.

Southern Berth: It is intended for loading of alumina bulk cargoes and for unloading of caustic soda bulk cargoes. This berth can accommodate ships up to 32,000 d.w.t. drawing up to 12 m. (39 ft. 4 in.).

Depth alongside berth	: 13 m. (42 ft. 8 in.)
Length of berth	: 200 m.
Alumina loader	: One "Claudius Peters" loader with liftable, swivelling arm.
Maximum loading rate	: Up to 1,000 tonnes/p.h.
Travelling range of loader along the wharf	: 143.5 m.
Maximum height of the loading cone	: 9.50 m. above sea level
Minimum height of loading cone	: 10 m. below sea level
Maximum extension of the loading cone from the outer side of the fenders	: 23 m.
Stowage factor of alumina in bulk	: 1 cu.m./tonne (36 cu.ft./long ton)

Note: It is necessary that the maximum height of the hatch coamings above sea level is kept below 9.50 m. during loading operations.

Both berths are equipped with a flexible pipe – 6 in. in diameter with ASA 150 flanges – for connection to the tanker manifolds to unload caustic soda. All ships must be equipped in order to allow the connection of the above pipe.

A dock booster station is equipped with:
1 booster pump of 275 cu.m.p.h
1 booster pump of 125 cu.m.p.h.

Any of these pumps can be switched on as an aid to the ship's pumps.

Departure: Ships are requested to leave their berths immediately after completion of unloading/loading operations. The Eurallumina Wharf Superintendent may allow extra time at berth, provided that the delay is compatible with the wharf schedule.

Operating Hours: The wharf is operated on a continuous basis, day, night, 7 days a week (holidays included).

Damage: Should damage be caused to the ship by Eurallumina loading/unloading equipment, during unloading of bauxite and caustic soda or loading of alumina, the ship's crew is requested to deliver immediately a "damage report" to Eurallumina's shift foreman on duty to debate the claim as necessary.

TANKERS: Agent's Report: November 1989.

Berth	*Berth* No.	*Max. LOA* ft.	*Max. Draft* ft. in.	*Depth* ft. in.	*Products/Remarks*
Enel Jetty	4	656	27 06	28 00	Fuel and Petcoke
	5	590	20 00	20 06	Fresh Water and Gas Oil
Eurallumina Wharf					
N. Berth	6		†39 04	42 08	Bauxite and Caustic Soda
S. Berth	7		†39 04	42 08	Alumina and Caustic Soda † Max. draft on arrival.
Samin Jetty	8	393	28 00	29 00	Sulphuric Acid

Enel Jetty: Fuel oil/gas oil/fresh water discharge. The jetty is equipped with 3 lines. Two lines of 10 in. and 8 in. are used for the fuel oil and fresh water, the third line of 6 in. is used for gas oil.

Average discharging rates:		
	Gas oil	400 t.p.h.
	Fuel oil	800 t.p.h.
	Fresh Water	400/600 t.p.h.

Euroallumina Wharf: Caustic Soda Discharge – both Northern and Southern berths are equipped with a flexible hose for the connection with tankers' manifolds. A pumping station ashore is equipped with 1 booster pump of 275 cu.m.p.h. and another booster pump of 125 cu.m.p.h. One of these pumps could be used to assist vessel's pumps.

Average discharging rate 200 t.p.h. – 400 t.p.h.

Samin Jetty:
Length of berth: 40 m.
Max. LOA: 120 m. (to be checked when fixing).

The jetty is equipped with 2 flexible hoses of 4 in. diameter. All vessels must be duly equipped in order to allow connection of the above hoses.

Average loading rate: 450 tonnes.p.h. – 500 tonnes per hour.

IMPORTANT: Pilotage is compulsory for the transit of St. Peter's Channel.

Berthing/unberthing operations are only allowed after sunrise and before sunset, as, according to Harbour Master's order, port is closed during the night.

AIRPORT: Elmas, the airport of Cagliari, is only 1 hour by car from Porto Vesme Harbour and is connected to the major international airports on the mainland by several regular daily flights.

TIME: Local time at Porto Vesme harbour is GMT plus 1 hour, i.e. Central European Time. Summertime (GMT plus 2 hours) starts and ends, according to relevant EEC schedules.

WEATHER: *Tides:* Here, as elsewhere in the Mediterranean, the tidal range is very small; the highest tide is only 0.3 m. above the MLWS.

Currents: Since tidal currents are non-existent along the coast, the currents are exclusively wind and/or wave induced.

Wind: Prevailing wind directions are (in order of frequency): N.W. "Maestrale", 4th quadrant) S.S.E. and E. ("Scirocco" and "Levante", 2nd quadrant) and S.W. ("Libecco", 3rd quadrant); maximum recorded wind speed: 55 knots from the N.W. direction ("Maelstrale").

Visibility: Normally excellent; during the hot Summer months, visibility may occasionally be reduced by early morning mists.

Weather-Temperature: The ambient temperature practically never drops to 0°C during the winter months and rarely exceeds 32°C during the Summer; permanent breezes in the San Pietro Channel mitigate the heat of the Summer. Relative humidity is normally 60-70%; peak values of 100% high and 20% low have been recorded, but are extremely infrequent.

The yearly rainfall varies from a minimum of 350 mm. to a maximum of 500 mm.; rainy periods are more prevalent in Autumn and Winter and at the beginning of Spring.

More detailed information can found either in Italian Sailing Directions or in those issued by other maritime countries.

GENERAL: The town of Portoscuso, situated 1 km. to the North of harbour, has both telegraph and public telephone facilities linked to the national and international telegraph and telephone networks. Excellent roads connect Portoscuso to the nearby mining town of Iglesias and Carbonia; both Iglesias and Carbonia are within easy driving distance of Porto Vesme Harbour and have hospital facilities and local branches of central government departments.

Safety Provisions: The Pilot assisting a ship for berthing at the Eurallumina wharf will give the ship's Master any local navigational information which may be required for bringing the vessel safely into port and for docking it securely alongside the wharf; the wharf is provided with numerous bollards and is protected with rugged fenders.

The ship must be well secured to the wharf according to standard nautical practice and made fast with ropes of adequate strength and in good order.

Since the local Maritime District Office is not in a position to issue regular gale/storm warnings, Masters are advised to rely on their ship's radio for weather forecasts so that, in the event of a gale warning, sufficient time will be available for them to take the necessary steps to avoid damage to the ship, to the wharf, or to port installations.

Derricks, cranes, and any other hoisting equipment on board must be stowed so as not to interfere with unloading or loading operations; derricks shall not be lowered on the side facing the wharf. On request, the ship's hoisting equipment will be placed (fully manned) at the disposal of Eurallumina.

The ship's deck and holds must be adequately illuminated after dark, so that loading and unloading of ship's equipment (grab bucket, power shovel, hose connections) can be operated correctly and so that personnel shovelling away and sweeping up bauxite in the hold and on deck may work safely and efficiently.

All access to the wharf by truck or by any other means of transport for the loading and unloading of ship's store or equipment is subject to clearance beforehand by the Wharf Superintendent and will only be permitted if the presence of vehicles on the wharf does not in any way interfere with cargo operations.

Access to and from the ship and/or wharf will normally be restricted to the ship's gangway. The gangway, which should be run out immediately after berthing, must be easily accessible at all times, safe for public use, and adequately illuminated at night. If the ship's gangway is not hinged at the root, it must be equipped with an auxiliary footbridge of about 4 m. at the lower end to reach the wharf over the fenders.

It is remembered that spills, splashes or puddles of caustic soda could be found on the wharf during the unloading operations of the product, and be a danger to people.

All persons entering the wharf area are requested to follow the marked pedestrian throughways and to keep away from any equipment which may be operating at the time, or from caustic manifolds. If, for any reason, it should prove necessary to board the ship by passing through the cordoned-off area, all possible precautions must be taken to avoid accidents and/or damage and also to avoid treading on bauxite or alumina or caustic spillages.

The Eurallumina Wharf is equipped with a built-in fire extinguishing system which, if necessary, can also be used by ships lying at berth.

On the wharf, 2 safety anti-caustic showers and 2 eye-washing devices are available; they are easily identified by green ever-lighted lamps and red painting

SHIPMASTER'S REPORT: 1975 (Updated 1984).

Harbour: The harbour is protected by two moles between which there is a wharf. A channel marked by buoys leads to the entrance.

Documents: On arrival the following documents are required.
Declaration of Health.
2 Crew Lists.
1 Copy of last Port Clearance.
1 Copy Vaccination List.
2 Stores Lists.
2 Personal Effects Lists.
1 Valid Derat Certificate.
All other ship's documents.

Radio Pratique: Unavailable.

Pilotage: For ships arriving the Pilot boards at 39° 14′ N., 08° 19′ E., but in severe North-Easterly gales the Pilot will board in Palmas Bay, position 39° 00′ N., 08° 30′ E. When leaving Port the Pilot leaves the ship abeam of Ghingetta Is., 3 cables off, position 39° 11′ 05″ N., 08° 22′ 25″ E. There is no pilot vessel, the Pilot boards from a tug.

Radio: Cagliari (IDC). No VHF service for pilotage.

Tugs: Two permanent tugs of 1,750 h.p. are operating and other tugs are available from Cagliari when necessary, and advising 4 days before ship's ETA.

Mooring Boat: Available.

Depths of Water:		
	In the Channel	14 m.
	Eurallumina Quay	13 m.
	Alsar Pier	8.5 m.
	Trade Quay	8.25 m.

Berthing: Eurallumina Quay (unloading point of bauxite vessels). Length 442 m. Height on surface of water 3.6 m. Large rubber sprung fenders 150 ft. apart are fixed to the quay. Double bollards 150 ft. apart.

Vessels using this quay usually berth starboard side to using the port anchor which is let go well off the berth.

Bauxite Discharging Rate: 15,000 tonnes/day. Discharging by grab.

Fresh Water: Available at the Trade Quay by tank cars. At Eurallumina Quay available at 15 cu.m./hr. (Boiler water only). No fresh water available at Alsar Pier.

Bunkers: Available by barge from Sarroch, about 70 miles from Porto Vesme.

Repairs: Limited minor repairs only and giving notice by radio. For Radio and Radar available at Cagliari.

Ship Chandler: Available advising Agent.

Consuls: No foreign representation.

Laundry: Available advising Agent.

Provisions: Fresh foods available but notice must be given immediately on arrival.

Airport: Cagliari about 90 km. from Porto Vesme. International schedule flights and domestic flights over the Italy Area.
Medical: Qualified doctors available ashore and also equipped hospitals. In emergency doctor will board ship.
Repatriation: Arrangements must be made with Agent in advance by cable or immediately on arrival.

SHIPMASTER'S REPORT: December 1984.

Porto Vesme is the name of the port and industrial complex. The local town is called Porto Scuso which may be better known to postal and telephone authorities.

Pilotage: Black pilot launch with VHF. Pilot carries portable VHF.

In strong N.W. winds Pilot requests vessels remain stationary, at pilot station, for boarding. Pilot disembarks West of Ghingetta Island, heading 340° using starboard side ladder.

Max. Size: Eurallumina Quay: Up to 12 m. draft permitted. (December 1984).

Tugs: One tug, nominal 1,400 h.p., is available at Porto Vesme. Other tugs available on order from Cagliari, etc.

Berthing: Very active rolling on Eurallumina Quay, fenders effective but strip all paint from hull. Local ships insert rubber tyres between ship and wooden faces of fenders. Long leads required on mooring lines to prevent breaking while rolling.

Fenders project at least 2 m. from wharf face, very difficult to swing gangway ashore causing delay. A brow may be more easily placed at first. Gangway or brow must have efficient rollers on ground.

AUTHORITY: Officio Locale Marittimo, Molo Centrale, Porto Vesme (Portoscuso-Cagliari), Sardinia, Italy. *Tel:* 0781-509114. *Cables:* Locamare Portoscuso. *Contact:* Harbour Master.

QUILIANO TERMINAL: 44.17 N. 08.28 E. (See Plan)

LOCATION: The SARPOM Marine Terminal at Quiliano is located on the Western shore of Golfo di Genova in Rada di Vado about 3 miles S.S.W. of the town of Savona.

DOCUMENTS: *Required by Savona Port Authorities:*
2 copies Stores List.
2 copies Crew Manifest (See "Customs Allowances").
8 copies Crew List.
8 copies Passenger List.
1 copy Cargo Manifest.
Health Declaration. International Health Form to be filled out by Master on arrival.
Bills of Lading (original and copy).
Certificate of Origin (original and copy).
Ullage Report at the loading port.
Copy of Bill of Lading for the Agent.
Clearance – not required.

PILOTAGE: Pilotage is compulsory. VHF contact on Channel 13 should be established with the Pilot Station at Savona when within range. The pilot boarding position is 44° 17′ N., 8° 30.5′ E., approximately 2 miles South of Savona Harbour.

Two pilots are normally provided. One is in charge of piloting and the second, with less seniority, is on deck advising the officers and crew performing the mooring operation. The pilots bring with them their own VHF sets with which to communicate with tugs, mooring boats, and shore.

Pilot Ladder: Vessels are requested to have a proper pilot ladder securely rigged and long enough to reach the Pilot launch. During periods of darkness, adequate lighting must be rigged overboard for the pilot to approach the side of the vessel and climb the ladder safely.

If the vessel's freeboard exceeds 9.2 m. (30 ft.), the pilot ladder must be rigged in conjunction with the accommodation ladder.

Accommodation Ladder: When the vessel is berthed, the accommodation ladder is requested on the starboard side by the Port Authorities.

SARPOM Marine Terminal Supervisor: The vessel is boarded before the commencement of mooring operations by a SARPOM Marine Terminal Supervisor (SMTS) who is an experienced Master. He remains on board up to the end of the unmooring operations and acts as the coordinator of all ship/shore operations, providing local advice to the Master in any emergency that may arise. While at the berth, ship/shore communications are by portable VHF radio units used by the Marine Terminal Supervisor only.

ANCHORAGE: For vessels awaiting berth, the anchorage area is delimited by the following coordinates:
A – Lat. 44° 17.2′ N., Long. 08° 28.6′ E.
B – Lat. 44° 17.5′ N., Long. 08° 30.0′ E.
C – Lat. 44° 16.8′ N., Long. 08° 28.6′ E.
D – Lat. 44° 17.1′ N., Long. 08° 30.0′ E.

MAX. SIZE: Max. Draft 70 ft.

HEALTH: In addition to 36 hours notice of ETA prior to arrival, following messages are to be sent to:
(a) "Sanimare Savona" requesting Free Pratique.
(b) "Compamare Savona" (Harbour Master's Office) giving the following information:
Ship's Name
Flag
Call Sign
Length
Drafts
Cargo grade and quantity
ETA anchorage or pilot station.

RADIO/VHF:

Master to Radio "SARPOM Quiliano"

AAA	Bill of Lading quantity in long tons.
BBB	Slops, quantity water percentage, tank number.
CCC	ETA Quiliano upon departure last port.
DDD	Any ETA change exceeding 12 hours.
EEE	ETA Quiliano 72 – 24 hours prior arrival.
FFF	Draft of arrival at berth.

Ship-to-Shore Communications: Ship-to-shore communications, whi the ship is berthed will be by portable VHF radio units used by SARPO Marine Terminal Supervisor only. The use of the ship's radio statio (except VHF set) and/or battery charging equipment is prohibited f safety reasons during cargo-ballast transfer operations. In event normal ship-to-shore communications failure, an emergency system w be operated.

Free Pratique. See "Health".

Radio Messages: Local Agent will transmit the following standa messages to all inbound vessels:

Standard Message No.1

Vessels from 50,000 d.w.t. to 90,000 d.w.t.

Master S/T . . . .

Please advise ETA draft other requirements stop please urgently infor Agent and SARPOM Quiliano:

AAA	Have 2×16 in. ASA connections ready on starboard manifo stop All other flanges to be blanked and fully bolted st If 16 in. not available advise size manifold.
BBB	Have boom hoisted on starboard side able to work abreast main cargo manifold stop Boom must have a certified liftin capacity of not less than 10 tons.
CCC	Vessel will be moored at a seven buoy sea berth using bo anchors stop Anchors must have at least 9 shackles of cha each side.
DDD	Vessel must have at least 4 wires of 150 fathoms leng mounted on mooring winches comma two on poop deck an two on main deck aft stop Winches must be fitted with warpin drum in order to heave up and make fast to bitts termin preventer wires of each buoy stop Synthetic tails are accepted stop Have ready two synthetic lines on forecast and three on poop deck for tugs.
EEE	Accommodation ladder to be ready on starboard side arrival at berth for Port Authorities.
FFF	During entire stay at berth engine to be always on readines and steam on deck kept open.
GGG	Cargo ullages temperatures and water dip must be taken arrival by ship personnel jointly with terminal personnel st Have tanks depressurised in order to carry out abo measurements stop Besides depressuring of individual tan during or at the end of discharge is required to provide acce for tanks inspection.
HHH	Advise maximum discharging capacity available a estimated total discharge time considering terminal maximu receiving rate of 11,000 t.p.h. stop Cargo and slop quantitie with water percentage and total volume cargo grade and sl commingled stop Ballasting time.
III	VHF contact on Channel 13 must be established with pi station as soon as possible stop.

Failing to answer above details may result in operational dela accountable to vessel.

Agent. . . . .

Vessels from 90,000 d.w.t. to 150,000 d.w.t.

Item CCC	–	Substitute	11 shackles.

Vessels over 150,000 d.w.t.

Item CCC	–	Substitute	13 shackles.
item DDD	–	Substitute	6 wires (4 poop deck and 2 ma deck).
	–	Substitute	3 synthetic lines on poop for tugs.

Standard Message No. 2

Pollution

Master . . . .

Your attention is drawn to the serious view taken by Terminal and P Authorities for pollution of harbour waters by oil stop Please ensure Crew members conversant and comply with pollution regulations st Principle causes pollution due leaking sea valves comma overboa discharge valves and cargo/bunkering overflows stop Therefore recommend you check sea valves and overboard discharges bef arrival and review cargo/bunkering operations with Chief Officer/Ch Engineer stop Scuppers must be plugged on main and poop decks st On arrival Marine Terminal Supervisor will give all assistance necess but empowered take drastic action in event contravention pollut prevention requirements stop.

Agent. . . . .

This cable is sent only to time chartered and voyage chartered vess calling for the first time at Quiliano Terminal and to all vessels that du a previous call experienced oil spillage or disregarded the oil pollut prevention requirements.

Standard Message No. 3

Crude washing

AAA	Inert Gas System fully operational and tested.
BBB	Please inform on what tanks COW will be carried out com if these tanks are normally used for ballast comma if washing only will be carried out and also bottom washing
CCC	Each tank to be kept below 8 percent oxygen before during operations.
DDD	IGS Gas output to be continuously monitored and maintai below 8 percent oxygen.

EEE Indication of IGS output to be in control room to give instant abort if necessary.
FFF Pressure in cargo tanks must be available to control room personnel.
GGG All system to be permanent steel pipework and pressure tested.
HHH All tank openings to be sealed comma remote tank gauging system therefore essential.
III Responsible designated person to be in charge of operations.
JJJ Tanks to be crude washed must have previously been washed less than 6 months before stop please answer all points and add any additional ship requirements or comments.

Agent..............................

Standard Message No. 4

We would like to carry out crude oil sampling tests during discharge operation at Sarpom Terminal. These tests consist of the installation of automatic sampling equipment to your manifold flanges. The equipment will be operated by SGS Redwood inspectors. However, to ensure smooth operation we request the following assistance:

AAA Draining accumulated water from your deck air lines, by draining the compressed air reservoir of water and blowing out remaining water at the air connections on deck.
BBB Continuous minimum air pressure throughout discharge operation of 7 bar.
CCC Accommodation on board for one terminal representative, two Redwood engineers and 6 workers assisting connection/disconnection of hoses.

Your assistance will be most appreciated.

TUGS: Tugs are generally stationed in Savona Harbour. In view of required time to reach the Terminal Area (about 20 minutes time in good weather conditions) sufficient notice should be given.

The principal characteristics of tugs are:

Luigi Noli: Motor, 3,000 h.p. – 50 tons bollard pull (Kort nozzle). Fire equipment: Equipped with "Sourbel" fire-fighting articulated arms. 1 monitor fore mast, 23 m. above sea level; 2 monitors main mast, 16 m. above sea level, water/foam range 120/90 m.

Carmelo Noli: Motor, 1,700 h.p. – 20 tons bollard pull. 1 monitor fore mast – 12 m. above sea level. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Giuseppe Piaggio: Motor, 1,600 h.p. – 17 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Capo Vado: Motor, 1,250 h.p. – 15 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam.

Priamar: Motor, 2,500 h.p. – no monitors – fire hose only.

Riviera: Same characteristics as "Priamar".

Piemonte: Motor 2,500 h.p. – 36.5 tons bollard pull (Kort nozzle) – Variable pitch propeller – Bow thrust. Fire equipment: "Sourbel" fire-fighting articulated arms – 1 monitor on foremast 16 m. above sea level – 1 monitor on main mast 12 m. above sea level – Water/foam range 120/90 m.

Lombardia: Same characteristics as *Piemonte*.

BERTHING FACILITIES: The berth is a conventional buoy mooring consisting of 7 Lamgar buoys, each designed for a 125 ton mooring load. Each buoy is equipped with a 40 mm. diameter preventer wire. Vessels are berthed with 2 anchors ahead, in addition to buoy preventer wires and the vessel's mooring wires at the stern.

The berth is laid out to allow safe maximum draft of 21 m. (70 ft.). The sea bed at the berth is firm sand overlaid by 1.0 m. — 2.0 m. of mud. Moored vessels have their bow seaward, heading 155° true.

Ships will discharge through 2 strings of hoses, i.e.

String No. 1:	7 lengths 35 ft. × 20 in. diameter.
	2 lengths 25 ft. × 16 in. diameter.
	1 length 30 ft. × 16 in. diameter.
String No. 2:	8 lengths 35 ft. × 20 in. diameter.
	2 lengths 25 ft. × 16 in. diameter.
	1 length 30 ft. × 16 in. diameter.

The submarine pipeline system, connected by manifold to the above strings, consists of 1 × 32 in. diameter and 1 × 36 in. diameter line of about 3,470 m. length reaching the shore installation (SARPOM Terminal) which has, at present, the capacity of 360,000 cu.m. storage.

MOORING REQUIREMENTS: The vessel is required to have the following equipment:

Synthetic Lines: Synthetic mooring lines are not acceptable for any class of vessel.

Mooring Wires: All vessels must have winch-mounted mooring wires with minimum diameter of 36 mm. and minimum length of 150 fathoms, as follows:

Vessels between 50 – 150 k.d.w.t.	— 2 wires on poop deck — 2 wires on main deck aft
Vessels greater than 150 k.d.w.t.	— 4 wires on poop deck — 2 wires on main deck aft

Mooring Bitts: All vessels must have the following mooring bitts (for connection of Terminal supplied preventer wires):

Vessels between 50 – 150 k.d.w.t.	— 4 bitts on poop deck — 2 bitts on main deck aft
Vessels greater than 150 k.d.w.t.	— 5 bitts on poop deck — 2 bitts on main deck aft

Ship's Derrick: All vessels must have a 10 ton SWL ship's derrick for lifting hoses from sea bed.

Bow Anchors: All vessels must have 2 bow anchors with following scope of anchor chain:

Vessels between 50 – 90 k.d.w.t.	— 9 shackles
Vessels between 90 – 150 k.d.w.t.	— 11 shackles
Vessels greater than 150 k.d.w.t.	— 13 shackles

Simultaneous Ballast Capability: All vessels must be capable of simultaneous ballasting and cargo discharge in order to minimise the exposed wind area of the vessel while moored and maintain at any time minimum 30% of Summer deadweight.

Vessel Rejection: If in the opinion of the Harbour Pilot or of the SARPOM Marine Terminal Supervisor, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform the ship's Master and in such event the ship shall not be brought into the mooring until facilities, lines or gear, are deemed satisfactorily.

MOORING/HOSE CONNECTION:

Mooring Approach: Vessel will be boarded by the Harbour Pilots and SARPOM Supervisor off Savona Harbour Breakwater or at anchorage. All manoeuvring of ships proceeding to the Terminal and within the Terminal area will be done in accordance with the Harbour Pilot's advice. Vessels will proceed subsequently to Vado Bay on a course parallel to the coast, about 1.2 miles from the shore, up to the Terminal area.

Status of Vessel Equipment: The Master of the vessel shall notify the Pilot and S.M.T.S. of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or discharging the vessel.

It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berth. The pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Final Positioning: A starboard turn will be taken, steering on the "approaching range line", leading to the mooring buoys. Another range line, crossing with the above line, marks the position where the starboard anchor should be dropped. With the assistance of 3 to 4 tugs the vessel continues her starboard turn, drops her port anchor and backs into the berth. A spar buoy is provided to mark the position of the subsea manifold. The S.M.T.S. will give measurements to spar buoy for final positioning. Tugs are stationed close within the Savona Harbour and are also used for unberthing and for emergencies.

Depending on the current direction, the Pilot may do the anti-clockwise manoeuvre instead of above clockwise manoeuvre, in this case the first anchor to be dropped will be the port anchor.

Running of Lines: The arrangement of mooring lines and preventers, and the sequence of mooring operations that will take place will be agreed between Master, Harbour Pilot and Terminal Supervisor. Vessel must be moored to the entire satisfaction of the Pilot and SARPOM Marine Terminal Supervisor.

Status of Mooring: The safety of the moored vessel is the Master's responsibility under all circumstances. However in order to ensure safe cargo handling and avoid damage to the Terminal installation, the Terminal Supervisor will check the vessel's mooring periodically and when found unsatisfactory, he will request the Master to correct or adjust the moorings. In extreme cases the Terminal Supervisor may decide to suspend the cargo discharge.

Cargo Hose Connection/Disconnection: Raising, connecting, disconnecting and lowering of the hoses will be performed by shore personnel (normally 6 men), who will remain on board throughout discharging operations.

The vessel's crew is required to assist shore personnel by handling the boom winch and carefully inspecting their hose boom equipment before arrival.

DISCHARGING:

Notice of Readiness: Notice of Readiness will be accepted at the beginning of the final positioning (1st anchor dropped) when the ship proceeds directly from sea to berth (provided that the vessel is in all respects ready to commence discharging).

It is also accepted at the time the vessel anchors, in case the berth is occupied by another vessel, or in case there is a shortage of storage capacity in the shore tanks.

Vessel Turnaround: The vessel turnaround should be as short as possible. Delays caused by vessel equipment malfunction or vessel operations not associated with cargo discharge may result in charges being levied against the vessel's owner by the chartering party. The time sheet shall be accurately filled out by the Terminal Supervisor and signed by the vessel's Master. This time sheet will form the basis for any demurrage or delay claims.

Documentation and Inspection Before Discharging: An independent inspection, appointed by the owner of the cargo and witnessed by the Terminal Supervisor in conjunction with ship's personnel shall:

(a) Take and record ullage, temperature and measurements of all cargo tanks.
(b) Take a composite sample of each grade of cargo; the receipt for samples shall be signed by a responsible ship's officer and the Terminal Supervisor.
(c) Check arrival ship ullages as above, against ullages reported in ship's documents at loading port or last port of call, in order to ascertain if any unexplained movements of cargo have taken place.
(d) Obtain vessel experience factor from ship's log, or if not available request ship's personnel to determine an experience factor based on the last 5/6 loadings.
(e) Obtain the following from the vessel:
    i. Copy of Ullage Report at loading port.
    ii. Copy of Letter of Protest at loading port in case of excessive difference between ship's/Bill of Lading figures.
    iii. Samples from loading port. The receipt for these samples shall be signed by a responsible ship's officer and the Terminal Supervisor.

Discharge Procedure: The procedure for the intended operation must be pre-planned. They must be discussed and agreed upon by the ship and Terminal Supervisor prior to the start of the operations. The agreed arrangements shall be recorded on the Cargo Discharge Plan. The form shall be signed by a responsible ship's officer and the S.M.T.S. Any change in the apreed procedure that could affect the operation must be discussed by both parties and agreed upon. After agreement has been reached by both parties substantial changes must be laid down in writing as soon as possible and in sufficient time before the change in procedure takes place.

Discharge Regulations:

1. All bunker tanks will be ullaged by the independent inspector and checked for explosivity by the Terminal Supervisor before discharging. Contaminated tanks must be isolated to the satisfaction of the Terminal Supervisor before discharge can commence. If all tanks are contaminated, the vessel will be rejected.
2. S.M.T.S. will check to ensure that all sea suctions and overboard discharge valves (cargo/ballast) are closed and sealed. These valves must be kept closed and sealed throughout discharging operations and opened only in case of emergency or by authorisation of S.M.T.S.
3. Suitable drip trays and sawdust bags must be provided at the ship's manifold.
4. A responsible officer must always be available on deck in close contact with the S.M.T.S. for any occurrence. The S.M.T.S. will advise him in due time when the switching of shore tanks, changes in discharging rates, etc., are required by the shore installation operations and for any emergency.
5. When the first hose is connected, discharging can be started as instructed by the SARPOM Marine Terminal Supervisor.
6. Maximum pressure allowed at Ship's Rail: 150 p.s.i. (10.6 kg./sq.cm.) Maximum discharge rate allowed: 13,000 cu.m./p.h. (81,600 bbls./p.h.
7. Discharging must be carried out at the maximum rate achievable with the ship's equipment within the limits shown above.
8. On completion of discharge, open suitable filling lines to drain the hoses into ship's tanks.
9. Pumping air or gas into the cargo hoses is prohibited.
10. Because of the importance of ensuring that all cargo discharge regulations and procedures are fully understood, the letter concerning discharging information must be signed as received by a responsible ship's officer.

Documentation and Inspection After Discharging: Terminal Supervisor in consultation with ship's representative will witness and record the measurements of all ship's tanks (dip or ullage, temperature as applicable), including tanks containing cargo of another terminal, and determine the eventual oil remaining in ship's lines.

Before sailing, a Statement of Fact concerning the comparison between the vessel's gross volume discharged and gross terminal outturn received will be provided to the vessel.

Ballasting: Vessels calling at SARPOM Terminal are required to be capable of ballasting simultaneously while discharging, after the S.M.T.S. is satisfied that no sea pollution or cargo contamination might occur.

Ballast operations after completion of discharge, must be reduced to the minimum required for safe handling of the vessel out of the berth. In fair weather, the propeller should be submerged and the vessel trimmed 10 ft. by the stern. Ballast operations can continue at reduced speed during unmooring.

While the vessel is ballasting, the S.M.T.S. in agreement with the Master will start singling up by letting go all preventer wires and any other additional mooring lines not strictly required for a safe mooring, taking into consideration the environmental conditions.

Switching of Shore Tanks/Emergency Stop: The S.M.T.S. will advise the Cargo Officer or a responsible Officer in due time when the switching of shore tanks, changes in discharging rates, etc., are required by the shore installation operations and for any other emergency that may occur.

Crude Oil Washing: Crude washing during discharging is allowed if requested. Request from ship must be sent at least 10 days before arrival. Permission will be granted by Harbour Master and SARPOM Terminal providing that all operations are in line with items listed in Standard Message No. 3 (see "Radio/VHF").

POLLUTION: The Italian Government enforces strict measures to prevent sea pollution. It is the ship's Master's responsibility to ensure that no oil (crude, bunker, diesel, bilge, etc.) is pumped or spilled overboard from the vessel.

Because of the importance that the Quiliano Terminal places on the avoidance of pollution, the Master will be required to sign acknowledging receipt of the letter concerning sea pollution.

Lighting: The sea area around the ship shall be adequately lighted as frequent inspection will be made during discharging and ballasting, in order to avoid any pollution whatever.

Cargo Hose Connections: Cargo hose connections must be frequently inspected during discharging, drip-trays should be placed at all times under the manifolds, all unused cargo connections must be blanked and fully bolted, all scruppers must be securely plugged, and sea valves must be closed and sealed before starting discharge. When ballasting, pumps must be started before opening sea valves.

Discharging Material Overboard: It is strictly prohibited to throw any material, papers, waste or goods either solid or fluid overboard. The Master of the vessel in conjunction with the ship's agency, should make arrangements for disposal over land of such material, if required.

Excessive Smoke: Excessive smoke from the vessel's funnel and sootblowing are strictly prohibited.

Actions in Event of Pollution: In the event of pollution, immediate notification must be given to the Terminal Supervisor who will notify the local authorities and initiate the Terminal Oil Spill Response Plan.

The Terminal maintains a motor boat equipped with oil dispersant and in the event a vessel causes pollution the Terminal will start the oil spill clean up, pending the arrival of the port authority's anti-pollution brigade.

All expenses and damage costs incurred in connection with pollution due to the vessel, will be charged to the ship.

In the event of continued infringements of pollution prevention rules, the ship will be rejected until appropriate action is taken in order to avoid any further risk of pollution.

MEDICAL: Doctors and hospital facilities are available at Savona.

FUEL: Bunkers are supplied by barge which moors portside alongside the vessel. Bunker requirement must be radioed to local Agent at least 48 hours in advance. For vessels expecting to arrive on Saturday or Sunday, the requirement must be forwarded not later than Thursday afternoon.

CUSTOMS ALLOWANCES: Present regulations allow each seaman retain in his possession a maximum of 40 cigarettes or the equivale of tobacco or cigars, and 1 open bottle of spirits. The balance of smoking items and spirits must be collected, listed and locked, a included in the Stores List.

CONSULS: Consulates for most nations maintain offices in Geno (about 50 km. from Savona).

REPAIRS: Repair shops for minor repairs are available. For electron equipment repairs, notice should be sent to the local Agent in due tim

SERVICES: All kinds of stores and provisions are available locally. Laundry service is available on a round-the-clock basis.

WEATHER: The bay, although sheltered from the strongest wind blowing from the fourth quadrant by high mountains coming down clos to the coast, is subject to strong wind gusts from this quadrant, and th relative wind direction varies considerably in different parts of the ba at one time due to irregularities of the coastal heights.

The bay is open to Southerly winds and seas, and it is from th direction that seas and swells caused by strong wind between S.E. an South may interrupt marine operations. Delays in this area are main due to the impossibility of mooring a vessel under certain weath conditions than to withstand elements once she is moored. The ber current is part of the general offshore current stream and is not wi blown or tidal; its predominant direction is toward the S.W. and th maximum speed is 0.8 – 1 knots; generally currents do not excee 0.5 – 0.6 knots. The faster currents are likely to occur more frequen during the Winter period; occasionally they reverse and set N.W. wi a reduced velocity.

Tide is negligible and fog is rare.

In general, weather in the bay is seasonal. From May to October it very good. The worst period is from October to December when wind and seas from South cause the maximum number of port closures.

From December to May the strongest winds are experienced fro third and fourth quadrants but sea is usually smooth.

Weather Reports: 12 and 24 hour weather forecast data is available o request on a round-the-clock basis at the Terminal Office.

Broadcast weather reports for Mar Ligure, North Tirreno and Corsic are prepared by Navy Department of La Spezia and Air Force Weath Bureau. For Mar Ligure, they refer to Capo Mele (West of Vado Ba

Information concerning the weather is given on VHF through Gen Radio Station, Channel 16 and 25, at 0135, 0735, 1335, 1935 GM Special gale reports are provided on VHF Channels 16 and 25 and o wireless on 500 kHz at 15 minutes and 45 minutes after every hour.

Radiotelephone information can also be received on 2182 kHz (Gen Radio Station). Weather reports are also transmitted on 1722 kHz.

REPORT: November 1985.

Mooring: A 150 h.p. mooring boat with 5 men is usual for the moori operation. When the ship's stern is nearly positioned, the first lines a sent out, normally to Mooring Buoys No. 6 and 7 on the port side. Th remainder of the lines are sent to the buoys and made fast accordi to the Pilot's advice.

Synthetic lines are not allowed for mooring at Quiliano Sea Ber Minimum diameter required for mooring wires is 36 mm. and the leng of the wire should be at least 150 fathoms (274 m.).

To accommodate the shore preventers, all vessels should ha mooring bitts located as follows:

Vessel between 50,000 – 150,000 d.w.t.: 4 bitts on poop deck a 2 bitts on main deck aft.

Vessels over 150,000 d.w.t.: 5 bitts on poop deck and 2 bitts on ma deck aft.

Berthing: Ships are berthed assisted by tugs. Normally, 4 tugs are use for vessels up to 150,000 d.w.t. and 5 tugs for vessels over 150,0 d.w.t., 2 on the hook forward and 3 aft using ship's lines.

The Berth is approached on a range line and when in position, t starboard anchor is dropped and slacked out while the vessel procee to the port anchor drop position. The port anchor is then dropped a while the vessel continues its starboard swing, it is towed stern first i berth and positioned. A good spread of the anchors and sufficient cha on the bottom are essential for adequate holding power.

SHORE LEAVE: Launches are sailing from ENEL Pier (located abo 1 mile North of berth) and make regular runs to tankers berthed SARPOM's Berth.

During bad weather the service is performed from Porto Capo Vad

Sufficient personnel must be aboard at all times for letting go lines that the vessel can clear the berth whenever required. It is sugges that half the crew, evenly spread between deck and engine, be kept board. Regular watch for launch services is constantly maintained Channel 13.

AGENCY: SARPOM does not perform any vessel agency functio Owners of vessels calling at SARPOM Terminal must arrange their o ship's Agent.

RAVENNA: 44.25 N. 12.12 E. (See Plan)

(A) RAVENNA
(B) ENEL MARINE TERMINAL

(A) RAVENNA

LOCATION: The Port of Ravenna is located on the Adriatic coast of Italy about 50 miles South of Venice. The Ravenna-Porto Corsini Port Complex is extensive.

1. The ENEL Steel Platform (Terminal 1).
2. The ENEL Combined Buoy Mooring (Terminal 2).
3. The ENEL Oceanic Buoy 5 (Terminal 3).
4. The ENEL Rotating Platform (Terminal 4).
5. Five berths in the Inner Harbour:
   (a) Darsena SAROM, 2 berths.
   (b) Channel Baione Berth PIR.
   (c) Channel Candiano, Berth ANIC lato mare.
   (d) Channel Candiano, Berth ENEL.

Nos. 1 – 4 are located in the open sea E.S.E. of the Entrance Channel to Ravenna Porto Corsini about 3 and 10 miles from the coast. The berths in the Inner Harbour are reached via the narrow Entrance Channel to Porto Corsini.

Also see Part (B) – "ENEL Marine Terminal".

DOCUMENTS:

For Maritime Authority:
Ship Safety Certificates.
3 Crew Lists.
3 Passenger Lists.

For Customs:
1 Crew List.
1 Passenger List.
Cargo Manifest.
Bills of Lading.
1 Provisions List.
1 Customs Declaration of each Crew member.

For Maritime Health:
1 Crew List.
1 Passenger List.
Derat Certificate or Exemption.
Maritime Health Declaration.

For Police:
1 Crew List.
1 Passenger List.

PILOTAGE: Ordered by Agent in advance. Contact by radio telephone: Nos. 430453 and 430204 during office hours. Cables to Piloti del Porto, Marina di Ravenna. Pilot station and both pilot boats equipped with VHF, Channels 16, 9, 6 and 12. Pilot is embarked not less than 1 mile from head of breakwater. Vessel awaiting Pilot may anchor 1.5 miles from breakwater head. This anchorage is not secure in bad weather. Vessel bound for ENEL installation, embark Pilot at least 0.5 miles from the berths. Pilot launches have black hull with white band, white superstructure, 10 m. to 14 m. in length.

ANCHORAGE: Anchorage prohibited in vicinity of submarine pipe-lines and cables. Vessels waiting for a berth may anchor at a distance more than 1.5 miles from the outer breakwater head according to their draft and subject to weather conditions.

RESTRICTIONS: Berthing and mooring at ENEL Sea Berths allowed in daylight only. Unberthing and sailing can be carried out in darkness.

Berthing day and night from entrance to San Vitale Basin. Inner port daylight berthing only. The channel to the inner port is navigable one way only. Traffic signals are displayed to indicate when channel closed to incoming vessels.

MAX. SIZE: *Inner Port:* Draft limited from 17 ft. to 17 ft. 6 in. depending on vessel's beam.

San Vitale: Max. draft 28 ft. allowed from port entrance to San Vitale Basin.

ENEL (Oil Platform – No. 1): Length not limited, max. draft 36 ft.
ENEL (Oil Berth – No. 2): Length not limited, max. draft 36 ft.
SBM Terminal – No. 3: Length not limited, max. draft 44 ft.
ENEL (Oil Platform – No. 4): Length no limit, max. draft 70 ft.

HEALTH: Pratique given by radio, on request to Sanimare Ravenna. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO: Messages via Ravenna Radio, Ancona Radio, Venezia Radio, or Trieste Radio.

VHF: Ravenna VHF Radio Station operates on Channels 16, 25, 26, and 27.

The Ravenna Port Informer is in contact with Ships Agents and operates on Channel 9 from 0600 hrs. – 2200 hrs. every day including holidays.

TUGS: Tugs join vessel in outer port. Ship's lines are used.

There are 7 tugs stationed at Ravenna (2 of less than 1,000 h.p., 2×1,000 h.p. and 1×2,048 h.p. Voith Schneider type with 25 tons bollard pull). 4 of the tugs are equipped for fire fighting. The Harbour Authority lays down the number of tugs to be taken by each vessel according to size.

BERTHING: *Shipmaster's Report:* 1982.

It is advisable to keep vessel well secured when alongside as passing vessels have little consideration.

CRANES: Heavy lift floating crane to be located in the Candiano Canal.

STEVEDORES: To be ordered before 1030 hrs. for afternoon work, and before 1630 hrs. for following morning.

MEDICAL: All facilities available.

TANKERS: Sea Berths:

ENEL Steel Platform – Terminal No. 1:

Cautionary Advice: Vessels moored at this terminal as well as all other Sea Berths must always keep the engines ready in order to be in position to unmoor and leave immediately in case of emergency or in case in the Master's judgment the weather conditions suddenly get worse.

General: The No. 1 Terminal consists of 2 platforms of 15 m. diameter each supported by 36 tubular piles. Installed on the platform are: a white light, flashing twice every 5 secs. and a fog horn giving 3 long blasts every 20 secs.

Berthing and Mooring: The Berth is usually approached from the North, the 2 anchors are dropped, first the port anchor then the starboard anchor, and the vessel is swung assisted by 2 tugs, and towed into position in the berth with 7-8 shackles of chain out on each anchor. Occasionally a wire may be necessary and is made fast on the port bow connected with a fixed anchor.

The stern is moored with 4 wires supplied by the terminal and connected to 4 buoys. On completion of mooring the distance between ship and platform must be about 50 ft. heading East.

Cargo Connections: Products are handled at this berth through 1×12 in. flexible hose with 12 in. ASA connection to the vessel's stern discharge flange. Maximum pressure allowed is 12 kg./sq.cm.

Ballast Facilities: None available.

Gangway: Ship's gangway or accommodation ladder should be rigged on the starboard side for Authorities.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water can be supplied by barge.

ENEL Combined Buoy Mooring – Terminal No. 2:

General: This terminal consists of 4 buoys anchored in sea bottom. Distance from No. 1 Terminal is 500 m. towards South and from coast 6,100 m. The position is Lat. 44° 28′ 14″ N., Long. 12° 21′ 55″ E.

Berthing and Mooring: The mooring must be carried out with ship's bow towards East and taking up on the stern 4 steel wires supplied by ENEL and connected with the 4 buoys. The vessel must be anchored with 7 – 8 shackles of chain (port and starboard) and the forecastle port side also must be secured with steel wire connected with a fixed anchor.

Cargo Connections: There is only 1×16 in. flexible hose (ASA) to be connected, always on port side. The position of the hose is signalled by a small red marker buoy. When mooring is completed the red marker buoy must be located on the vessel's port side 30 m. apart.

Derricks: Vessels must arrive ready with port side derrick able to hoist the flexible hose weighing 5 tons.

Ballast Facilities: None available.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

ENEL Oceanic Buoy – Terminal No. 3:

General: No. 3 Terminal consists of 1 large anchored buoy on which are installed a red light, flashing twice every 5 secs., a fog horn (letter "C" every 20 secs.) and a radar Racon code "C". Distance from No. 1 Terminal is about 4,500 m. E.N.E. and from coast 10,300 m.

Berthing and Mooring: The mooring must be carried out with ship's bow towards North, and taking up 2 steel wires supplied by ENEL, connecting the stern of the ship to the large buoy, and 4 steel wires connecting the ship to 4 small buoys anchored in the proximity of the large buoy. The 2 steel wires on the stern must be secured in order to maintain the ship about 120 m. from the buoy. Vessel must be anchored with 7 – 8 shackles of chain (port and starboard) and the forecastle port side must also be secured with a steel wire connected with a fixed anchor.

Cargo Connection: There is only 1 flexible hose with 10 in. ASA flange to be connected, always on port side.

Derrick: Vessels must arrive ready with port side derrick able to hoist the hose weighing 5 tons.

Ballast Facilities: None.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

ENEL Rotating Platform – Terminal No. 4:

General: No. 4 Terminal consists of a rotating platform elastically connected with a fixed platform supported by 6 tubular piles of 48 in. diameter.

Its position is Lat. 44° 27′ 25″ N., Long. 12° 31′ 30″ E. Distance from shore is 18,300 m. Mooring is allowed for vessels with a max. draft of about 70 ft. The platform shows a white flashing light 3 times every 15 secs., also a fog horn code "U" and Racon code "U".

Berthing and Mooring: The vessel must approach the platform up to a distance of about 120 m. One vessel's synthetic rope will be connected with the assistance of the mooring boat with the steel wire supplied by ENEL. With the aid of the steel wire heaved up by vessel, vessel will approach the platform as far as a distance of about 65 m. and there the steel wire will be made fast.

The mooring operations will be carried out only in normal weather conditions. The unmooring operations can be carried out at any time day or night. One tug will assist at the stern in order to avoid collision with the platform.

Cargo Connections: There is a floating hose with 16 in. flange (ASA) to be connected on port side manifold. Before disconnecting, the floating hose (length of about 270 m.) must be filled with water. Max. pressure 8 kg./sq.cm.

Derrick: Vessels must arrive with port side derrick of 10 tons SWL.

Ballast Facilities: None.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

Also see Part (B) – "ENEL Marine Terminal".

Inner Harbour:

Darsena ENEL Berth:

Location: The ENEL Berths are located in the Darsena ENEL on the South side of Largo S. Vitale, the Ponente Berth on the West side and Levante on the East side of the Darsena.

Berthing and Mooring: The Inner Harbour is entered between the breakwaters protecting the entrance to Canale Baiona. 2 tugs are usually made fast on the hook, fore and aft, when abeam of the breakwaters and assist vessels through the channel. Vessels bound for the ENEL Berths proceed farther South through Canale Candiano and are swung (using 1 anchor) assisted by tugs in the Lago S. Vitale. They are then towed stern first into Darsena ENEL and moor starboard side alongside at the Levante Berth, and port side alongside the Ponente Berth. Head and stern lines are run in by mooring boats.

Wires are not accepted, wires with synthetic tails are accepted.

Preparations: A 2 ton SWL derrick is required for hose handling, and should be ready on arrival. There is no shore gangway and the vessel should have a gangway ready on starboard side for the Levante Berth and port side for the Ponente Berth. Ullages and temperatures are taken by terminal personnel.

Cargo Handled and Connections:
Berth Levante
Clean products: 1×8 in. ASA hose 8 kg./sq.cm.
Dirty products: 1×8 in. ASA hose 8 kg./sq.cm.
Berth Ponente
Gasoline: 1×8 in. ASA hose 8 kg./sq.cm.
Gasoil: 1×8 in. ASA hose 8 kg./sq.cm.
Dirty oils: 1×8 in. ASA hose 8 kg./sq.cm.

Ballast Facilities: Ballast facilities are available for unlimited quantities. Discharge rate 400 t.p.h.

Fire Fighting Facilities: There are 3 towers with foam/water monitors.

Oil Pollution – Clean Up: Facilities available.

Services: Bunkers and fresh water are available.

PIR Berth:

Location: The PIR Berth is located on the South side of the Canale Baiona about 1 mile from the port entrance.

Berthing, Unberthing and Mooring: Berthing allowed only by daylight, unberthing not allowed after 1 hour after sunset. The harbour is entered and tugs are made fast as per Darsena SAROM Berth. Vessels bound for PIR Berth, will be berthed with starboard side alongside, therefore vessel will be swung in the Turning Basin (junction – Canale Candiano – Canale Baiona) and then backed in position by tugs.

Cargo Handled and Connections:
Clean products: 2×8 in. flexible hoses with 8 in. ASA connections 5 kg./sq.cm.
Dirty products: 2×8 in. flexible hoses with 8 in. ASA connections.
Maximum pressure allowed: 6 kg./sq.cm.

Gangway: Ships must provide their own gangway.

Derrick: A 2 ton SWL derrick required on port side for hose handling.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water are available.

Fire Fighting: System installed.

Oil Pollution – Clean Up: The terminal has a quantity of oil dispersant and absorbent.

ANIC Berth "Lato Mare":

Cautionary Advice: The ANIC Berth is located on the West side of Largo S. Vitale about 0.5 miles North of the Darsena SAROM. It is a marginal berth and ships bound to and from Ravenna pass close by, and may cause a moored vessel to surge in the berth. It is, therefore extremely important that vessels are securely moored and that the mooring lines are properly tended and watched.

Berthing and Mooring: Vessels bound for the ANIC Berth enter the harbour and connect tugs as described per Darsena SAROM Berth and are then swung in the Largo S. Vitale and berthed head out with port side alongside.

Cargo Handled and Connections: This terminal handles various classes of oils or chemicals. Both jetties have the same facilities.
Solvents: 2×4 in. ASA flexible hose. 7 kg./sq.cm.
Chemicals: 2×6 in. ASA flexible hose. 7 kg./sq.cm.
Dirty oils: 2×8 in. ASA flexible hose. 7 kg./sq.cm.

For clean oils there are also 2 rigid arms 6 in. flange ASA. Max. pressure 8 kg./sq.cm.

Gangway: Ship should rig their port side gangway.

Derrick: A 2 ton SWL derrick required on port side for hose handling.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water are available.

Ballast: None at present. In future there will be possibility of dirty ballast discharge.

Oil Pollution – Clean Up: No facilities available.

Fire Fighting Facilities: Fixed foam/water monitors and mobile fire fighting men.

ENEL:

General: This terminal is on the North bank of Canale Candiano about 1.5 miles West of junction Canale Candiano/Canale Baiona. Handles exclusively boiler oils. The terminal consists of a jetty that can accommodate vessels up to 280 m. LOA with max. draft of about 28 ft.

Berthing and Mooring: Normally 2 tugs are used, and since the vessel must be moored port side alongside it is swung in proximity of confluence of Canale Candiano/Canale Baiona and then backed into position by means of tugs.

Wires not accepted.

Cargo Handled – Connections:
F.O.: 1×8 in. ASA flexible hose. 6 kg./sq.cm.: For larger vessels.
F.O.: 1×6 in. ASA flexible hose. 6 kg./sq.cm.: For smaller vessels.

Gangway: Vessels should rig suitable gangway.

Derrick: 2 ton SWL ready on port side.

Ullaging – Temperatures: Taken by terminal personnel.

Bunkering/Fresh Water: By barges.

Oil Pollution – Clean Up: No facilities available.

Fire Fighting Facilities: 4 foam/water monitors.

DENSITY: 1024.

FRESH WATER: Only available ex-wharf at San Vitale and at inner port piers. Barge available for deliveries to the Silos Piers and tanker terminals.

Shipmaster's Report: 1982.

Delivered by road tanker only at silo pier (Setramar) in lots of 8 tons.

FUEL: Available by barge.

FIRE PRECAUTIONS: Tankers are given copy of port fire regulatio on arrival. No repairs or gas freeing to be carried out without permissi of Port Authorities.

CONSULS:

France	Tel: 39.7.58.
Norway	Tel: 24.5.47.
Spain	Tel: 24.0.14.
Sweden	Tel: 22.6.39.

REPAIRS: Minor engine repairs can be effected. Floating dry-do available for up to 1,000 tons displacement.

GANGWAY/DECK WATCHMEN: Optional, can be employed fro shore if required.

OPENING/CLOSING HATCHES: Can be performed by ship's crew by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes per man for first day in po Wine/spirits, allowance is made for normal daily consumption on boa

REPATRIATION: Can be arranged.

AIRPORT: Forli Airport situated 25 km. away, with daily flights to Ro and Milan.

TIME: GMT plus 1 hour. From April to September, GMT plus 2 hou

POLICE/FIRE/AMBULANCE: Police, Tel: 22.4.66; Ambulance, 22.3.1 Fire, 22.2.22.

TELEPHONES: Can be installed on board at San Vitale Berths.

SHORE LEAVE: Allowed. Launch service available for vessels in th roads.

IDENTIFICATION CARDS: Shore passes given by police.

SHIP SUPPLY SERVICE: Contact: I.S.A.P. s.r.l. Impresa Serv Ausiliari Portuali via Circonvallazione Piazza d'Armi, 74 48100 Raven Service is rendered to the ships waiting at anchor in Ravenna Roa or to the tankers discharging at the refinery terminals located in Raven Roads.

Vessels: "Elisabetta Seconda", 17.15 m. LOA and 4.60 m. bread 2 engines 130 h.p. each able to transport 22 passengers.

"Francesca Romana", 17 m. LOA and 4.65 m. breadth 1 engi 240 h.p. able to transport 12 passengers.

DEVELOPMENTS: The access channel is to be deepened to 35 ft. a widened.

AUTHORITY: Capitaneria di Porto Ravenna, Via Antico Squero 9, 481 Ravenna, Italy. *Tel:* (0544) 32150, 32154, 22526, 31239. *Telex:* 5513 Compra I. *Cables:* Compamare Ravenna. *FAX:* (0544) 3257 *Contact:* Gregoria Riolo Vinciguerra, Port Captain.

(B) ENEL MARINE TERMINAL: 44.28 N. 12.24 E. **(See Pla**

LOCATION: The ENEL (ex-SONE Terminal) Marine Terminal is locat in position Lat. 44° 27′ 48″ N., Long. 12° 23′ 54″ E., about 8.5 km. fro the coast, and is used for unloading fuel and crude oil.

DOCUMENTS: *For Customs Purposes:*

If vessel arriving from an Italian Port:
Custom's Sailing Manifest.
Copy of Bill of Lading.
1 Crew List.
1 Passenger List (if any).

If vessel arriving from abroad:
Stores List.
Crew Property List.
Cargo Manifest.
Copy of Bill of Lading.
1 Crew List.
1 Passenger List (if any).

If vessel has to lighten, for Customs purposes, and in order to obta discharging permission prior to entering vessel at Customs Hous Master has to cable 30 hours before arrival to Agents, a sepa message giving:

Ship's Name/Flag/GRT/Cargo Quantity (Bill of Lading figures in me tons)/Quality/Density/Loading Port/Name of Shippers and Consigne Master's Name/Total Number of Crew/Expected Arrival Draft and To Quantity to be lightened to reach 11.50 m. Draft.

For Immigration Authorities:
1 Crew List.
1 Passenger List (if any).

VERY IMPORTANT: All vessels having on board arms and ammunitions not only as cargo but also as Ship's/Personal Equipme Property, entering Italian Waters/Ports must obtain a proper Licen from Italian Authorities.

Therefore to avoid serious problems and enable Agents to arra requested Licence Formalities, Master to telex soonest possible Agents informing if any arms/ammunitions are on board, giving t Details of the same.

For Harbour Master:
2 copies Arrival Reports (if forms not available on board, they a usually filled in by Agent on arrival).
1 copy Control List for Tankers (if forms not available on board, Mas to have ready a list showing details of Master's and all Deck/Eng Officers Certificates of Competency).
Description of Licence and Number.
Issued by.
Date of Issue.
Place/Country issued.
3 copies Crew List.
3 copies Passenger List (if any).

Following documents to be produced for Harbour Master:
I.O.P.P. Certificate and supplement.
Class Certificate, including last annual survey.
C.L.C. Certificate.
Oil Record Books, Part I and II (Memorandum of Paris).

If vessel has to lighten, all ship's Certificates (originals) to be ta to the Harbour Master by the Agent.

PILOTAGE: Generally Pilot boards vessels for berthing only, however Masters are requested to contact Ravenna Pilot Station soonest possible by VHF Channel 12 in order to obtain anchorage or berthing instructions.

All Pilot boats and Pilots are equipped with VHF operating on Channel 12.

Production platforms, well structures, submerged pipe-lines and cables exist in Ravenna Roads. Mariners should use caution when approaching and anchoring.

APPROACHES: *Exclusion Zone around the Terminal:* As well as observing the ban on anchoring and fishing which exists in the area, all ships and other vessels are forbidden to transit, stop, carry on any activity underwater, or of any nature, within a 700 m. radius of the terminal. Exception is made for the tankers heading for the terminal itself and for the ships or other vessels employed for the docking services or to assist any other vessel to whom authorisation has been issued.

ANCHORAGES: Position of anchoring depends on Ship's draft and having regard for existing restricted areas.

It is suggested that Master consults up-to-date sailing direction (Italian Vol. I – Adriatic Sea).

If vessel has to lighten, the area is within an area with the following co-ordinates:

(a) 44° 31′ 08″ N., 12° 24′ 00″ E.
(b) 44° 31′ 08″ N., 12° 28′ 00″ E.
(c) 44° 29′ 30″ N., 12° 24′ 00″ E.
(d) 44° 29′ 30″ N., 12° 28′ 00″ E.

RESTRICTIONS: Daylight berthing only.

MAX. SIZE: The terminal can be used by ship's of 160 m. – 270 m. LOA with a max. draft of 11.50 m.

RADIO: *Arrival Advice for Harbour Authority:* 36 hours before arrival, in order to obtain berthing authorisation, following cable/telex is to be sent to "Compamare Ravenna" (Telex No. 551366).

Quote
From M/V. ....
To COMPAMARE RAVENNA (Tlx. 551366).

Vessel/Call Sign/Name/Flag/LOA/GRT/DWT/Year Built/Arrival ETA Pilot Station or at Anchorage at Roads/Max. Draft on Arrival.

Cargo/Technical Name/Quantity to be Discharged and Transit/ Certificates/Safety Equipment/IOPP/All Valid otherwise point out if expired.

Paris Memorandum/Date, Place and Remarks of the Last Survey. Conditions of Hull, Engine, Manoeuvering Equipment, Safety and First Aid Service.

Also state following wording:

I declare to know Regulations concerning Safety Rules for the Carriage of Dangerous Cargo as per Ravenna Harbour Master Ordinances.

I guarantee all crew members to be qualified and trained to carry out discharging operations.

I undertake to inform Harbour Master about any fact which could involve ship and Safety Equipment and influence cargo handling .

Signed Master
Unquote

It is suggested that a copy of above telex also be sent to Agents.

In case vessel arrives with draft exceeding 11.50 m., and in order to obtain lightening permission, the following information to be passed to Agent in order to speed up formalities:

(a) Details of following Ships' Certificates (issued at/on/expiring/Place/ Date last Annual Survey):
  I.O.P.P.
  C.L.C.
  Safety Equipment.
  Class Certificate.
  Safety Construction.
  Load Line Certificate.
(b) Name/Rank on board of 2 Officers who will attend lightening operations.
(c) Master's Name.
(d) Classification Details.
(e) Cargo Tanks Total Capacity (Cubic Metres).
(f) Max. Allowable Pressure.
(g) Official Owners.
(h) Port of Registry.
(i) Total Crew.
(l) LOA.
(m) Beam.
(n) Arrival Draft.
(o) Expected Draft after Lightening.
(p) Expected Draft after Discharged Ravenna Cargo.
(q) Main Engine, Number and Type.
(r) Horsepower of Main Engine.
(s) Max. Speed when Vessel Fully Loaded.
(t) Vessel equipped with Bow Thruster or not.
(u) Mooring Winches.
  Fore: Type/No./Capacity.
  Midship: Type/No./Capacity.
  Aft: Type/No./Capacity.
(v) Cargo hose lifting facilities: No./Capacity.
(w) Cargo pumps: No./Type/Capacity cubic metres per hour each.
(x) Cargo Information:
  (1) Total Number of Cargo Tanks.
  (2) Total Capacity of Cargo Tanks.
  (3) Numbers of Tanks where Cargo is Stowed.
  (4) Total Capacity of Tanks in (3) in cubic metres.
  (5) Allowable Cargo Specific Gravity.
  (6) Name of Product.
  (7) Total Quantity of Cargo on Board (Bill of Lading – Tonnes).
  (8) Cargo Temperature.
(y) Ballast Information.
  (a) Numbers of Tanks for Ballast.
  (b) Numbers of Compartments presently with Ballast.
  (c) Type of Ballast: Segregated/Clean/Dirty.
  (d) Total Ballast Presently on Board in cubic metres.
  (e) Total Ballast Capacity in cubic metres.

Terminal Ready Communication: Before the ship is moored, the concessionery company of the terminal must inform the Technical Section of the Harbour Office of Ravenna of the date and hour when the terminal will be ready, otherwise mooring will not be permitted.

HEALTH: When applicable, Sanitary Free Pratique is granted by cable. Alternatively it may be granted by Health Authority who boards vessel on arrival.

Masters are to cable to "SANIMARE RAVENNA" 24 hours before arrival, requesting Sanitary Free Pratique.

VHF: The personnel on the terminal keep a constant listening watch on Channel 16 and simultaneously maintain a continuous VHF link with the ship during the mooring, unloading and unmooring operations.

TUGS: Tugs and mooring boats available.

Unmooring from Terminal allowed also during night time, in such a case only 1 tug is usually available.

BERTHING: *Description of the Structure:* The jetty 342 m. in length, is made up of a central unloading and control platform, 4 mooring dolphins and 2 approach dolphins, all connected to the main structure by catwalks.

All the structures are made of steel.

The height above sea level varies between 7.0 m. above MSL for approach dolphins, 9.0 m. above MSL for the mooring dolphins and 11.5 m. above MSL for the central platform.

Central Platform: On the central platform are positioned:

2 oleodynamic unloading arms of 12 in. diameter.
Firefighting equipment.
System for monitoring the speed of approaching ships.
Gangway.
Service crane.
Control room serving as shelter for the personnel.
Maritime signalling equipment.

Approach Dolphins: The elastic defence of the platform is guaranteed by 2 approach dolphins. The energy of the approaching ship is absorbed by the elastic deformation of the pile and by a system of fenders supported by the pile itself.

At the top of the pile there are 2 quick release slip hooks.

Mooring Dolphins: The mooring structures are made up of 4 dolphins situated along the longitudinal axis of the terminal.

There are 2 quick release slip hooks on the footpath level of the bridge.

Access to the terminal is guaranteed by 5 points:

Boat landing stage on the central platform and 4 vertical ladders on the BD1, BD2, MD1, MD4 dolphins.

Maritime Signalling: All the signalling equipment of the terminal is powered by accumulator batteries, which are recharged during the day by photovoltaic solar panels.

3 optical signals have been installed, as follows:

1 white light with a visibility of 6 – 10 nautical miles.
2 red lights with the same characteristics.
1 fog horn whose sound carries for up to 2 miles.

Firefighting System: The firefighting system is made up of 2 pumps, one electric and one diesel.

Each pump can guarantee a flow of 240 cu.m.p.h at a pressure of 9 bars.

The fluoroproteinic foam is stored in a tank with a capacity of 2,500 litres.

MOORING/UNMOORING: *Mooring and Unmooring Operations:* The mooring and unmooring operations at the terminal are only authorised when the sea and wind conditions are favourable, and when there is no impediment which might render the manoeuvre dangerous. The mooring operations can only be carried out during the daylight hours, while the unmooring can be carried out at night as long as the weather conditions permit.

Docking Service Assistance: As well as requesting a pilot and a large enough team of dockers, the ship's Master must request the assistance of a sufficient number of tugs to ensure the safety of the manoeuvre.

Casting off for Safety Reasons: The Master of the ship moored at the terminal, whose judgement is final, can order the immediate suspension of the unloading operations and the rapid unmooring from the terminal should any of the following occur:

A worsening of the sea conditions, strong electrical discharges, an increase in the wind's force any accident in the unloading systems, pollution or any other event likely to put human life or the safety of the ship in jeopardy.

Approach Operations Monitoring System: The visualisation of the ship's distance from the approach front as it draws near terminal is shown on 2 luminous displays situated on the central platform.

The ship's approach speed is signalled by 2 lights with green/yellow and red lights.

Preparations for Carrying out the Mooring and Unmooring Operations: Before carrying out the mooring and unloading of tankers at the terminal, the following cautionary measures must be carried out by the concessionary Company:

Inspect the winches and the slip hooks on the 4 mooring dolphins.

Inspect the system monitoring the speed and distance of the ship approaching the terminal.

Control the marine meteorological data acquisition systems.

Check that the maritime signalling equipment is functioning properly.

Inspect the 2 unloading arms and the on/off valves and check that they are working properly.

Control the cathodic protection.

Inspect and switch on the fire fighting devices and supplies: in particular, check that the fire fighting pumps, the storage and mixing systems for the foaming agent, the water-foam distribution system and for the remote-controlled monitor are all working properly.

CARGO OPERATIONS: The platform is connected to the onshore depot by means of 2×22 in. pipelines of approximately 13.5 km. in length.

The unloading operations are carried out using 2 completely automatic unloading arms.

Unloading System and Power Plant: The platform is equipped with 2 hydraulic unloading arms of 12 in. diameter. These arms are provided with an automatic release system. This system disconnects the arm from the ship should it (the ship) move out of the normal range of action of the arms for any reason. Max. discharge rate is 2,000 t.p.h. Max. pressure at manifold 12 kg./sq.cm., minimum pressure at manifold 7 kg./ sq.cm.

Before the disconnection is made, the 2 valves will be closed automatically to prevent any spillage of hydrocarbon into the sea: one valve is at the head of the outboard arm and the other is at the ship's manifold.

The electrical energy required for running the terminal is supplied by 2 generators situated on the MD4 dolphin at the Northern extremity of the terminal in a security zone.

Terminal Services: The services concerned with the working of the terminal are organised by ENEL who use their own employees on site.

The management of the unloading operations of the ship and of the connection and disconnection of the hoses is the joint responsibility of the ship's command and the receiving company or whoever is concerned with the unloading within the limits of their respective competences.

Personnel Employed at the Terminal – Logistics: There must be a team of at least 3 persons on the terminal to work on the system. They will be employees of the Company and will be part of the Company firefighting team. ENEL shall nominate a Terminal Chief from among these.

During the unloading operations at the depot, the Company firefighting team must be present.

The accommodation destined for personnel use must be kept clean and in good order, sufficiently lit, ventilated and heated.

MEDICAL: Medical assistance and hospitals are available, including helicopter service for emergency service.

FRESH WATER: No fresh water available at Terminal and no barge service available to supply fresh water in the roads. Only small quantities can be supplied by very expensive port tugs (subject tug availability).

FUEL: Most grades available by barge, at least 48 hours notice required. Replenishment subject to observance of Ravenna Harbour Master Ordinance.

REPATRIATION: Repatriation possible, subject to Immigration Visa/ restrictions, if any.

AIRPORT: Nearest airport is at Bologna (approximately 90 km.).

SHORE LEAVE: Shore leave permitted. Liberty boat available, subject to sea conditions. Latest trip from shore is usually 2200 hrs.

Seafarers Centre "Stella Maris" available in the town. (Via P.Costa 55. Tel: 30235).

GENERAL: *Re-provisioning and Loading Materials:* It is forbidden to load or unload heavy or bulky metallic materials. Any bunkering or loading of ship's stores, drinking water or other materials should always be done, if possible, when the ship is at anchor in the roads. These operations can also be carried out, in accordance with the procedures and measures laid down by the Harbour Office, when the ship is tied up at the terminal before or during the unloading, but not during the mooring, casting-off or ballasting.

Ban on going on to the Terminal: Only persons with express authority are allowed to go on to the terminal.

Access to the terminal is limited exclusively to the personnel working there.

OPERATOR: Ente Nazionale per L'energia Elettrica (ENEL), Via Trieste 383, 48100 Ravenna 1, Italy. *Tel:* (0544) 436527. *Telex:* 551188 Sone I. *FAX:* (0544) 436579, Ext. 28. *Contact:* Bruno Teston.

SALERNO: 40.40 N. 14.45 E. (See Plan)

DOCUMENTS: As for all Italian ports, i.e. all ship's documents in valid condition and Arrival Reports, to be filled upon arrival with the Port Authority's representative.

Shipmaster's Report: November 1988.

5 copies Crew List.
2 copies Ship's Information.
1 copy Application for Ship's Clearance.
1 copy Stores List.
1 copy Cargo Manifest.
1 copy Maritime Declaration of Health.
Oil Record Book.
Cargo Gear Certificates.

PILOTAGE: Pilot station keeps watch on Channel 16 VHF from 0600 – 2000 hrs., working Channel 14.

ANCHORAGE: Position of anchorage, about 1 mile W.S.W. of green flashing light.

RESTRICTIONS: Vessel cannot enter or sail from the harbour between 2100 hrs. and 0500 hrs.

MAX. SIZE: Vessel allowed to enter port should not exceed 220 m. in length or 30 ft. draft.

HEALTH: Free Pratique not obtainable by radio. Usual formalities on berthing.

RADIO: All cables should be sent via "Napoli Radio" call sign "IQH".

TUGS: Lines must be supplied by the ship.

BERTHING: 13 berths with depths from 21 ft. to 30 ft.

CARGO HANDLING EQUIPMENT:

16 mobile cranes with capacity up to 270 tons.
80 forklift trucks with capacity from 4 tons to 37 tons.
6 dumper trucks.
Hydraulic grabs.
Specialised terminals for cars and wheeled units, containers, fo products, steel products.
Ro/Ro facilities.
Handling and storage area: 250,000 sq.m.
Equipment for loading/discharging bananas, fruit, refrigerated a frozen cargoes in cartons.

STEVEDORES: Stevedores are to be informed 24 hours prior to vess arrival.

MEDICAL: Medical Service should be requested in advance. Hosp facilities are obtainable.

DENSITY: Average salinity inside port is 1025.

FRESH WATER: Fresh water available at all berths, ordered throu Agent.

FUEL: Bunkers may be supplied from Naples by truck or barge. If la quantities are requested supply will be effected by barge from Naple

CONSULS: No consular representatives exist in Salerno. Nearest Naples.

REPAIRS/DRY DOCKS: No dry dock exists. Only small worksho attending minor repairs.

SURVEYORS: Lloyd's Register in Naples. Tel: (081) 323714. R.I.N in Naples Tel: (081) 325644.

GANGWAY/DECK WATCHMAN: Contact Instituto La Vigile. T 239928.

CUSTOMS ALLOWANCES: Only 40 cigarettes on vessel's arrival. Th applies to officers and crew. The remaining stock will be sealed vessel's bonded store.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: The nearest airport is at Naples. Distance 60 km.

TIME: One hour ahead of GMT in Winter. Summertime (March September) GMT plus 2 hours.

HOLIDAYS: Other than the national festivities, September 21st, a lo holiday, being the Name Day of the town's Patron Saint.

TELEPHONES: Emergency telephone number is 113-112.

IDENTIFICATION CARDS: Crew I.D. cards issued by police on arr

GENERAL: *Garbage:* Collection is compulsory. Collected from vess at anchor and by truck if vessel at quay.

Ship Chandler: Montanari General Ship Chandlers, Tel: (089) 2375

Services: Radar, VHF and gyro service or repairs may be obtain through request to Agent prior to vessel's arrival.

DEVELOPMENTS: A container terminal is to be constructed w completion in 1992. The facility will have 2 berths, each 380 m. in leng and a depth alongside of 12.0 m. Two ship-to-shore container cran will be available.

AUTHORITY: Capitaneria di Porto Salerno, Molo Manfredi, 841 Salerno. *Tel:* (089) 224544, 224765. *Telex:* Compsa 7225 *Cables:* Compamare Salerno. *Contact:* Harbour Master.

SAVONA (including Vado Ligure): 44.18 N. 08.29 E. (See Pla

PORT LIMITS: One mile from Savona Port Breakwater.

DOCUMENTS:

Arrival Report for Port Authority.
Cargo Manifest.
Provisions and Crew Personal Effects Manifest.
8 Crew Lists.
Class Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Ship's Register – Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t. P ordered through Agent. Telegraphic address: Piloti Porto di Savona. P launch is black with white band. To call Pilot, use flag or light sign according to International Code. For vessels bound for Savona or Va Ligure, Pilot boards about 0.5 to 1 mile S.E. of the red light at Sav port entrance. Pilot station on VHF Channel 13 day and night.

ANCHORAGE: The Roads of Savona offer a safe and spac anchorage. Depths of 25 m.

Important limits: it is forbidden to anchor North of bearing 270° fr red light. It is forbidden to anchor East of bearing 360° from the w light between 15th May and 30th September.

Shipmaster's Report: April 1983.

In any season the limits are:
North Border – bearing 305° from red light "Frandgiflutti".
South Border – bearing 340° from Point Lat. 44° 18′ 30″ Long. 08° 29′ 27.5″ E.

RESTRICTIONS: Night entrance is considered for each case depend on type of mooring and vessel's draft. At Savona berths, vessels maximum draft berth in daylight at high tide. No restrictions unberthing.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique may be requested by radio from "Sani Savona" prior to vessel's arrival except for vessels coming fr countries subject to sanitary control, for which the Harbour Doctor m go on board in order to expedite Free Pratique. Free Pratiqu automatic for vessels entering after calling at another Italian port or other port belonging to E.E.C. – In the event of any disease or f contact Agents.

RADIO: Genova Radio or Roma Radio.

VHF: Pilot station on Channel 13, day and night. Harbour Master's office on Channel 16, day and night. Port Authority on Channel 13 (Tel. 80.20.21).

TUGS: Tugs join vessel in vicinity of Savona port entrance or at Vado Ligure just off the berth. Ship's line usually used. If tug line used, tariff plus 20% is charged.

BERTHING:

Inner Harbour; depth 17 ft., quay length 480 m.

Quay Nos. 1, 2, 3, 4, 5, 6, and 7, depth alongside quays – min. 23 ft., max. 32 ft., quay length 790 m.

Quay Nos. 8, 9, 10 and 11, depth alongside quays – min. 29 ft., max. 32 ft., quay length 417 m.

Quay Nos. 12, 13, 14, 15, 16, 16A, depth alongside quays – min. 23 ft., max. 36 ft., quay length 670 m.

Quay Nos. 31 and 32 (new deep water quays). Depth 51 ft. Quay Length 368 m.

Funiviaria Plant (Pier No. 22), depth 32 ft. 6 in., quay length 140 m.

Vado Ligure:

Porto Vado North, depth 34 ft., quay length 210 m.

Porto Vado South, depth 20 ft. to 23 ft., quay length 400 m.

Pier Italiana Coke S.p.A., depth 41 ft.

CRANES: The port is equipped with modern mobile cranes with the following capacities:

10 bridge cranes, capacity from 4.5 to 6 tons;
22 electric cranes, capacity from 1.5 to 20 tons;
18 mobile cranes, capacity from 15 to 150 tons;
2 mobile cranes, equipped with spreaders for handling containers.

SPECIALISED CARGO-HANDLING FACILITIES: Funiviaria Plant is equipped for quick discharging of cargoes in bulk (coals and ores) by means of 4 electric transporters capable of handling 1,300 t.p.h. It is directly connected to overhead wire railway, capable of carrying 400 t.p.h. to its storage, the capacity of which is 600,000 tons. Depth alongside 32 ft. 6 in.

Cereal Silo belonging to "Savona Silo S.p.A." with depth alongside of 35 ft. has a capacity of 60,000 cu. m., it is fitted with 2 pneumatic towers having an intake of 500 t.p.h. and one loading tower with capacity 300 t.p.h.

Steel Terminal of 12,000 sq.m. for the movement of metallurgical products. The terminal is equipped with adequate facilities for the storage and reloading of the goods.

A 14 storey parking house capable of containing 3,000 cars. Ro/Ro terminal available.

Parking yard of 12,000 sq.m. intended for the parking of vehicles to be loaded, with a capacity of 1,200 vehicles.

Container terminal in Savona Basin includes an area of almost 50,000 sq.m., for the storage and the shifting of the containers.

Stockyard for empty containers of 10,000 sq.m. with a capacity of 1,000 TEU with adequate handling facilities.

Terminal in Savona Basin for cellulose and forest products includes 550 m. of loading quays for ocean-going vessels; roofed warehouse of over 8,000 sq.m.; 60,000 cu.m. capacity for 20,000 tons of goods; it is served by 1,600 m. of railways, 300 m. out of which are roofed; over 200 trucks available for forwarding goods by road.

Single storey warehouse for general cargoes having a capacity of 12,000 cu.m.

Vado Ligure: Pier San Raffaele is fitted for discharging and loading large vessels with cargoes in bulk (coal for the Italiana Coke S.p.A.).

South Unloading Pier: Length 160 m. Depth 41 ft. 2 slewing grabs, unloading rate 10,000 tons per day. Berth accepts vessels up to 50,000 d.w.t.

North Loading Pier: Length 128 m. Depth 30 ft. 1 loader, rate 2,000 tons per day. Berth accepts vessels up to 30,000 d.w.t.

Cereal Silo belonging to Messrs. Ceres S.R.L. is capable of handling vessels up to 60,000 d.w.t. Depth alongside 40 ft. Storage capacity 65,000 tons; discharging rate 800 t.p.h.; re-forwarding rate 500 t.p.h.

Reefer Terminal: Length of berth 300 m. Unloading/loading plant for foodstuffs and other refrigerated cargoes at Porto Vado North. The plant consists of conveyor belts which from the holds load goods directly onto trucks, railway-cars and vice-versa. The rate is about 300 tons per line (4 lines) per shift. Packages weight: up to 35 kg. Packages size: up to 600 mm. × 500 mm. × 350 mm. Refrigerated storage capacity 1,600 tonnes at -2°C.

STEVEDORES: Ordered by ship's Agent, no separate ETA required.

MEDICAL: All facilities available.

TANKERS: *Esso Pier:* Length 345 m. Depth at head 33 ft. Discharge rate 1,000 t.p.h. Storage capacity 200,000 cu.m. Vessel moors to buoys and uses anchor.

Berthing and Mooring: Night berthing is not permitted.

Normally, 1 tug is used by vessels of up to 14,000 d.w.t. and 2 tugs are used for larger vessels. The tugs tow on the hook using ship's lines. 1 tug is used for unberthing.

Vessels approach the berth from a general Easterly direction and are swung off the head of the pier and backed stern first into the berth. Vessels berthing at the pier head use both anchors with about 7 shackles in the water and secure lines from the stern to 4 mooring buoys near the pier head.

Agip Agrimont Pier: Length 700 m. Depth at head 39 ft. Discharge rate 700 t.p.h. Storage capacity at Vadoil 300,000 cu.m. Vessel moors using ship's anchor and 5 buoys. There is a berth along the North side for tankers unloading sulphuric acid, unloading rate 300 t.p.h.

Industria Italiana Petroli Pier: Length 420 m. Depth at head 31 ft. Vessel moors to 4 buoys. Discharge rate 800 t.p.h. Storage capacity in excess of 100,000 cu.m.

Isaoil Pier: Length 435 m. Depth at Head 31 ft. Vessel moors using ship's anchor and 4 buoys. Discharge rate 250 t.p.h. Storage capacity 100,000 cu.m.

Berthing and Mooring: Night berthing is not permitted.

Normally, 3 tugs are used for berthing. The tugs tow on the hook using ship's lines. 1 tug is used for unberthing.

Vessels approach the berth from a general Southern position steering North. When about 500 m. off jetty head, starboard anchor is dropped. With tugs' help, the vessels are swung in order to present the stern to the head of the jetty. Port anchor is dropped. Normally 7 – 8 shackles of chain are used. The stern is moored with 2 lines on each of the 4 buoys. Vessels up to 15,000 d.w.t. can be moored, maximum draft is about 29 ft. Synthetic ropes are recommended.

Sarpom Buoyage: Approximately 1,340 m. from the Quiliano mouth there are the pipe-lines Quiliano-Trecate's buoys at a draft of 115 ft. for mooring tankers up to 260,000 d.w.t.

By means of its submarine piping they get a pumping rate of over 10,000 t.p.h. Its plant ashore contains a coastal storage from which goes a pipe-line 146 km. in length reaching the Sarpom refining mill (See "Quiliano Terminal").

DENSITY: 1025.

FRESH WATER: Can be supplied alongside the quay by hoses, rate of delivery 10 t.p.h. The cost amounts to 1,764 Lire per ton plus 10,695 Lire for the use of hose up to 50 m. long; plus 21,390 Lire for the use of hose up to 150 m. long; plus 32,085 Lire for the use of hose over 150 m. long. Possible to supply fresh water in roads, weather permitting.

FUEL: All grades available from major oil companies and supplied by barge only.

FIRE PRECAUTIONS: Tankers or vessels handling dangerous cargoes, are requested to use vigilance prevention fire service carried out by 2 men, one on board and the other ashore, supplied by the "Cooperativa S.Barbara III°" (fire brigade). No repairs or gasfreeing to be carried out without permission of Port Authority.

CONSULS:

Denmark	Tel. 828814		Netherlands	Tel.	821422
France	"	38451	Spain	"	821747
Malta	"	821404	Sweden	"	809471
Norway	"	821747			

REPAIRS: All types of repairs possible except drydocking.

In Savona the Classification Society is represented by the R.I.N.A. (Lloyd's Register of Shipping). The A.B.S., N.V., etc., are represented in Genoa (40 km. from Savona).

SURVEYORS: General cargo and bulk cargo Inspectors available at Savona or in case of need from Genoa. Petroleum Inspectors such as Saybolt-Van Duyn available at Siracusa with office in charge also for Savona.

Locally available only Italian Register of Shipping (R.I.N.A.) all other Classification Societies available from Genoa. The representative of Salvage Association available from Genoa.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

HATCHES: Opening/closing hatches normally carried out by crew, on request stevedores can be arranged.

CUSTOMS ALLOWANCES: Bond sealed. 50 cigarettes or the equivalent in tobacco per person for the first day in port, wine and spirit allowance is made for normal daily consumption on board.

REPATRIATION: All facilities available for crew changes, good railway connections.

AIRPORT: Genoa (Cristoforo Colombo) distance 40 km.; Milano (Malpensa and Linate) distance 210 km.; Torino (Caselle) distance 149 km.

TIME: GMT plus 1 hour. From April to September, GMT plus 2 hours.

HOLIDAYS: New Year's Day, (1st January); Town's Patron Saint, (18th March); Liberation Day, (25th April); Easter Monday; Labour Day, (1st May); Assumption Day, (15th August); All Saints Day, (1st November); Immaculate Conception Day, (8th December); Christmas Day, (25th December); Boxing Day, (26th December).

POLICE/FIRE/AMBULANCE: Police, Tel. 828868; Ambulance, Tel. 827272 (White Cross), Tel. 806868 (Red Cross); Fire, Tel. 33333 and 86244.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Station of Savona. Tel: (019) 386656 (Officer on duty 24 hours a day).

TELEPHONE: Can be connected on board.

SERVICES: Cleaning of holds can be carried out by Impresa "Pippo Rebagliati"; tank-washing is possible only if the washing water is kept on board. Compass adjusting performed by Prof. G. Manella, c/o Nautical Institute.

BANKS:

Banca D'America e D'Italia, Via Garibaldi, 5, 16100 Genova. Tel: 284141 (with automatic selection). Telex: Baigen 270023.

The above bank is a branch of Bank of America, San Francisco.

Banca Commerciale Italiana, Via Paleocapa, 121 r. Tel: 386407. Telex: 270059.

TARANTO: 40.29 N. 17.13 E. (See Plan)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Anchorage Dues.
Vaccination Certificates for sighting.

PILOTAGE: Pilotage is obligatory for vessels over 500 g.r.t., both for entry and leaving from Mar Grande. The Pilot boards arriving vessels at a distance of not less than 1 mile from the lighthouse of Capo S. Vito, and leaves on sailing when the line between the S. Vito and S. Paolo lights has been passed.

RESTRICTIONS: Entry allowed day and night.

In Mar Grande, the bottom slopes gradually upwards from the mouth (more than 30 m. at the centre) to the facing coastline (about 14 m.). In Mar Piccolo, the maximum depth of 12.5 m. in the first inlet and of 9.5 m. in the second inlet which slopes upwards towards the coast.

Vessels drawing more than 16 m. must pass to the West of the light buoy with radar reflector located about 1 mile to the South of the mouth of Mar Grande and which indicates the Western limit of two areas of 17 m. and 18 m. depth.

Passage through the navigable channel: Merchant vessels whose passage necessitates the opening of the swing bridge and all foreign flag vessels must obtain authorisation to pass through the channel from the Port Captaincy. Methods of passage are indicated in the Mediterranean Sailing Directions.

Prohibited Areas: To the South of the Islands of S. Pietro and S. Paolo is an area in which transit is prohibited.

MAX. SIZE: Tankers up to 72 ft. draft may berth at buoy mooring.

Also see "Berthing".

HEALTH: Free Pratique is automatic for vessels coming from E.E.C. countries. From other countries it may be obtained via radio, by applying to "Sanimare Taranto" between 12 and 6 hours before arrival.

Yellow fever vaccinations could be arranged by calling Bari port doctor to Taranto with two days' notice.

RADIO: Vessels at sea may communicate with Taranto by the follow means:

By R/T via Crotone Radio, listening continuously on 2182 kHz.

By VHF via Bari Radio, listening on Channel 16 from 0600 – 2400 h

By VHF via the Port Captaincy, listening continuously on Channel and the Pilot Station listening continuously on Channel 12 (Pilot serv and safety only).

Tankers: Tankers carrying/or to load over 2,000 tons of petrole products have to send a cable 36 hours in advance to "Compam Taranto" containing the following details:

Ship	Type/call sign/name/flag/g.r.t./n.r.t./d.w.t.
Age	Age of the ship/LOA/draft fore-amidship-aft.
Arr	ETA to pilot station.
Cargo	Type/quantity of cargo on board/or to be loaded.
Fire	If vessel equipped with inert gas system and efficiency.
Solas	Whether Safety Certificates issued according to Sol 1960 or Solas 74/Protocol 78 or Solas 74.
I.O.P.P.	Date/place/validity I.O.P.P. Certificate.
Paris	Date and place where carried out last 6 mont inspection in European ports in accordance w Paris 1982 Memorandum.
Poll	Date and place of issuance/validity of Certificate Insurance or other financial security in respect civil liability or oil pollution damage – not Tovalop
Remarks	Any news concerning deficiencies to hull/engin steering gear/safety equipment.

Tankers belonging to countries who are not signatories to the Sol 74/Protocol 78, will have to anchor in Mar Grande Roads and are subje to a visit by the authorities as per Memorandum of Understanding Port State Control.

TUGS: 6 tugs (1,000–1,920 h.p.), available. Compulsory for vessels ov 20,000 g.r.t., 2,000 g.r.t. carrying hazardous cargo and vessels whi have to pass through the navigable channel.

BERTHING: *Outer Harbour:* Quay Nos. 1/2, combined length, 1,050 (32 m.); max. draft, 26 ft. 3 in. (8 m.); Quay No. 3, length, 820 (250 m.); max. 27 ft. 10 in. (8.50 m.).

Italsider Pier: *Eastern side* (for discharge of ore, coal, steel scra length, 4,456 ft. (444 m.); depth alongside 52 ft. 6 in.; max. dr allowed 50 ft. Vessels up to 200,000 d.w.t. have berthed at Italsid Jetty No. 4. Length 1,353 ft. Depth alongside 80 ft. Discharge ra for iron ore (2 Dravo unloaders) 1600–2400 m.t.p.h. Discha throughout 24 hours.

Also see "Regulations".

Western side (for discharge and loading of finished goods): Leng 1,566 ft. (477 m.); depth alongside 33 ft.

Safety: During Winter time, berths are subjected to heavy swell whi may force vessels to leave same, as the breakwater effective protects only the Eastern side. However, work is now in progre to lay new breakwater, which should also render safe the Weste side.

Head of the Pier: Width, 448 ft. (136.55 m.); max. length of vess 459 ft. (140 m.) or up to 525 ft. (160 m.), subject to vessels layi at Western and Eastern sides being berthed at not less than 164 (50 m.) from head of pier; depth alongside, 32 ft. 8 in., (10 m.).

Cement Pier: Max. depth is 8.50 m.; suggested max. draft 8.20 (26 ft. 10 in.); max. vessel length acceptable, 120 m.; rate of loadi (in bulk): up to 280 mt.p.h.; (in bag): up to 35 mt.p.h.

BRIDGES: 1 bridge in Inner Harbour. Opening times: 0020 – 0420 hr 0830, 1510, 2110 hrs. Opening on Agent's request to Harbour Mas (24 hours' notice requested for day opening time). Max. speed in th canal, 6 knots.

STEVEDORES: Available. Normal working from 0700 to 1500 hrs. F work performed in overtime/and/or holiday, the "Tariffs to the Worke are increased as follows:

Day	*Shift*	*Increase*
Weekdays	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Saturday	1100–1500 hrs.	40%
	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Sunday	0700–1500 hrs.	50%
	1500–2300 hrs.	80%
	2300–0700 hrs.	100%

MEDICAL: Civil hospital and private clinics, also military hospital a ambulance service of Italian Red Cross.

TANKERS: *Aviation Gasoline Oil Jetty:* Tankers moor with 2 ancho and with stern made fast to 4 buoys. Connection by stern. Vessel li up hoses (9 in.) from the jetty (breadth 9 ft., length 1,476 ft.). Leng pipe-line from 0.5 to 1.5 miles.

Access to vessel by boat. No water or bunkers available. Max. dr 25 ft. Night crossing of Mar Piccolo up to and from jetty is not allow

Navy Oil Jetty: Pier, terminating in 2 quays, which may accommod 2 vessels each. Max. draft 33 ft., hoses 300 mm. Night moveme allowed.

Petroleum Pier: Exclusively used for handling petroleum products a 4 berths and is connected by several pipe-lines with Shell Ital Refinery, as well as with the bulk plants belonging to Agip, and Indus Chimiche de Gaeta, which are all located in the industrial area of Tara adjoining the petroleum port. Access to the pier is through a dock 350 long and 33 m. wide. The pier itself is 560 m. long.

Berth Nos. 1 and 2 (after berths), max. length of vessel, 175 (557 ft. 3 in.); max. draft, 9.50 m. (31 ft. 2 in.). Max. depth, 10 (32 ft. 9 in.). Bunkers from line, (8 in. hose, 10 in. pipe-line). Water barge. Loading arms, 2 of 10 in., 3 of 8 in.

Berth Nos. 3 and 4 (fore berths), max. length of vessel, 20 (682 ft. 5 in.); max. draft, 10.50 m. (34 ft. 5 in.); max. depth, 11.00 (36 ft. 1 in.). Bunkers and water, as per berths 1 and 2. Loading a 6 of 10 in.

Pier is fitted with 1 line for each product to be loaded (14 lines) and a 20 ft. line for ballast discharge. Any quantity of ballast may be received by the pier. Access to the pier for provisions only via boats.

Shell CBM: Shell Terminal for discharge of crude oil is situated in Mar Grande N.E. of St. Paul's Island. Distance 3,000 m., and bearing 048° from light at the head of St. Paul Breakwater. Vessels moor at Q Buoys with port anchor down. Buoys are equipped with intermittent red lights and quick-release hooks.

The hoses (2×12 in.) are signalled by marker floats and have to be lifted by vessel with derrick capacity at least 8 tons. The terminal is connected with the refinery by a 34 in. pipe-line, 5 km. long. Max. length acceptable 330 m., max. draft 72 ft., max. d.w.t. 200,000 tons.

2 tugs recommended for berthing with good weather and without North-westerly winds. Night mooring and unmooring allowed.

Agip/Anic Terminal: Vessels moor with 2 anchors and with stern made fast to 4 mooring buoys.

Maximum draft 26 ft. 3 in. (8 m.). Under rough weather conditions vessels may have to leave the terminal, position being exposed. No mooring at night allowed, while unmooring is permitted. Supplies, bunkers, water, and connections with vessel by barge.

For methanol, tank inspection is usually carried out in the roads, before berthing.

Pozzi Ferrandina SPA Terminal: 3 sea lines, the hoses of which must be lifted from the sea bottom by ship's gear. 1 sea line (6 in.) is used to load methanol and 1 (6 in.) to load soda. Third (3 in.) sea line is for water. Port side hose connection. Pipe-line length 0.25 miles.

Vessels moor with starboard anchor and made fast to 3 buoys astern and 1 port. Night movements are not allowed. Max. draft 22 ft. Max. length 85 m.

Industrie Chimiche Di Gaeta, G.I.D. Terminal: Situated further West of Pozzi Terminal, it has 3 sea lines with hoses of 6 in. and 10 in., which have to be lifted from sea bottom.

Vessels moor with port anchor and make fast to 3 buoys astern and 1 buoy forward starboard. Max. draft 22 ft. Night movements not allowed.

DENSITY: 1029 – 1031. Tides negligible. Maximum variation 1 ft.

FRESH WATER: Available at all quays from 0700 to 1700 hrs. Also available by barge of up to 190 tons capacity.

FUEL: Available by barges from Agip; Shell and Sincat. 48 hours' notice requested, aside from usual stemming. Also available at the tanker berths by pipe-line.

Lubricating Oil. Available from Shell, Mobil and Esso.

FIRE PRECAUTIONS: Performed by fire brigade and compulsory to all tankers undergoing repairs/dry docking. It is requested and paid for by the shipyard, which afterwards charge same directly to the Owners.

CONSULS: Spain, France, Panama and Norway.

REPAIRS: All major repairs undertaken.

DRY DOCKS: 2 floating docks owned by Stabilimenti Navali Societa per Azioni Taranto (Telex: 860020) with dimensions as follows:

	Dock No. 1	*Dock No. 2*
Length at support level	699 ft. 8 in.	808 ft. 4 in.
Length overall	765 ft. 4 in.	869 ft. 4 in.
Breadth at support level	121 ft. 3 in.	137 ft. 1 in.
Depth	29 ft. 8 in.	27 ft. 9 in.
Lifting capacities	28,000 tons	40,000 tons

Max. draft acceptable in channel leading to the shipyard is 33 ft.

GANGWAY/DECK WATCHMEN: Available. Hourly cost, lire 450 per watchman used (lire 500 on Sunday and holiday).

OPENING/CLOSING HATCHES: Usually carried out by crew, but stevedores also carry out this operation.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

REPATRIATION: Good facilities exist.

AIRPORT: Located at Grottaglio, 20 minutes by car from the city. It is served by 4 daily connections with Rome, and 1 to Naples.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Epiphany Day (6th January); Saint Joseph's Day (19th March); Liberation Anniversary (25th April); Easter Monday; Ascension Day (19th May); Corpus Domini Day (9th June); Labour Day (1st May); Republic Foundation's Day (2nd June); Saint Peter and Paul's Day (29th June); Assumption Day (15th August); All Saints' Day (1st November; National Unity Day (4th November); Immaculate Conception Day (8th December); Christmas Day (25th December); Saint Stephen's Day (26th December); Town Saint Patron's Day (10th May), at Taranto.

TELEPHONES: No facilities for placing telephones onboard. Vessels in the roads may make connection via VHF radio.

SERVICES: Compass adjusting, divers, frogmen, daily refuse collection, etc. available.

Slop collection: Societa Armatoriale, Taranto provide a slop collection service for ships passing by Taranto.

The slop-ship Panda (about 16,000 cu.m.) is equipped for removal of bilge water, dirty ballast and slops, having a loading rate of about 200 cu.m./hr., with oil/water separators capable of 150 cu.m./hr.

The company's mailing address is Societa Armatoriale Sri, Corso due Mari 18, 1-74100 Taranto, Italy. Telex: 860864 (AB: diver i).

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

GENERAL: The port area of Taranto comprises of areas:

Mar Grande:

(a) The commercial port defined to the East by the S. Eligio Mole and to the West by the first projection (S. Cataldo Mole).

(b) The industrial port defined to the East by the second projection and to the West by the fourth projection of the industrial sector, and also to the West by Punta Rondinella, beyond Mar Grande.

(c) The oil port constituted by the I.P. Pier (this also includes Agip and Montedison), by the pipe-line terminals of Agip and Anic-Liquichimica, together with the I.P. buoyed area.

(d) The military pier of Chiapparo as far as operations of merchant vessels are concerned.

Mar Piccolo:

(a) The Cariati and Garibaldi Berths.

(b) The berths and basins of the Taranto Shipyards.

(c) The Military Aeronautical Forces Pier as far as operations of merchant vessels are concerned.

The usages of the berths in the port of Taranto, apart from various contingent arrangements made by the Port Captaincy Command, are as follows:

Commercial Port: S. Eligio Mole: For bunkering from land to vessel, for restocking bunker deposits, for embarkation of port services: Pilots, mooring gangs, fire watchmen, for the launches of Customs and Police. In relation to the requirements of the port services at S. Eligio Mole, vessels carrying various cargoes may also berth.

S. Eligio Berth: For pontoons and tugs.

Wharf No. 1 (Commercial Berth): Intended for commercial traffic.

1st projection (S. Cataldo Mole): Intended for commercial traffic.

Wharf No. 2 (between the 1st projection of S. Cataldo Mole and the 2nd Italsider projection): Intended for commercial traffic.

Industrial Port: (Partly under concession to Soc. Italsider of Genoa for the Fourth Taranto Ironworks and partly to Soc. Cementir).

2nd Italsider projection: East Side: For discharging ore and coal. Head: For discharging Category C oil products; West side. For loading and discharge of metal products.

Wharf No. 3 (between 2nd and 3rd Italsider projections): For loading and discharging metal products.

3rd Italsider projection: East and West Sides: For loading and discharge of metal products. Head: For discharging Category C oil products.

Wharf No. 4 (between 3rd and 4th Italsider projections): For loading bagged cement.

4th Italsider projection: East Side: For discharge of iron ore and coal, and for loading bulk cement.

Italsider Mole (new port basin to the West of Punta Rondinella): West Side: For loading and discharging metal products.

Oil Port: (Under concession to the companies I.P., Agip, Montedison and Anic-Liquichimica). For loading and discharge of oil products of all hazardous categories and chemical products.

Cariati Berth: For motorised fishing vessels and small fishing craft.

Garibaldi Berth: For fishing vessels and laid-up craft.

REGULATIONS: *Safety Regulations for Coal Vessels:* Vessels arriving with coal for Taranto should follow the following safety procedures:

The Master has to cable (Prior to entering port) to the Harbour Master, Taranto (cable "compamare taranto", telex 813199 compta) stating:

1. a) Dangerous coal characteristics according to IMO Regulations, i.e. to which class does the coal belong.
   b) That crew shall adhere to IMO requirements in handling such cargo.
   c) That opening devices for hatch covers have been recently checked/maintained.
   d) That cargo does not show any sign of self-combustion.
   e) That hatch opening operation shall be carried out taking into due consideration every precaution suggested by the type of cargo.
2. Should all requirements as per No. 1 not be duly fulfilled, the Harbour Authorities shall order the vessel to be placed in a safe position and wait for the port chemist to attend on board.
3. Unloading operation is subject to previously opening and ventilating all holds and adjoining spaces which might contain gas.
4. In addition to all safety rules enforced by the Port Safety Regulations and competent authorities, safety regulations are to be followed during sea passage, while lying in roads or at port, i.e. signs must be displayed prohibiting smoking, use of naked flames, chipping or using any other ignition source close to the cargo spaces or any adjoining space.
   Any possible repair work must be authorised by Port Authorities.
   Similar signs must be shown under receiver's care on quay.
5. No incompatable activities can be carried out on board the vessel and/or on the quay. No repairing/maintenance work can be carried out within 15 minutes from holds opening.
6. All necessary precautions must be taken during discharging operations to avoid cargo spilling in sea to prevent any pollution.

SHIPMASTER'S REPORT: December 1988.

The following Information Sheet was supplied to the Master by the Agent on vessel's arrival.

VHF:

Commercial calls : Channel 16 via Bari Radio.
Harbour Master/Pilot : Channel 12.
Launch service : Channel 10.

All vessels anchored in the roads must keep watch on Channel 12 from the 15th to the 20th minute of each hour for the purpose of receiving orders, or news of their interest, if any, from the Harbour Master.

Pilotage/Linesmen/Towage: Pilotage and linesmen service are compulsory for all vessels over 500 g.r.t.; however vessels up to 2,000 g.r.t. may avail themselves of VHF Pilot service at a 60% reduced rate.

Towage service is compulsory for all vessels over 20,000 g.r.t. (at least 3 tugs up to 40,000 g.r.t. and then 4 tugs) whilst, for tankers, tugs are compulsory as follows:

2,000 to 5,000 g.r.t. : 1 tug (minimum)
5,000 to 15,000 g.r.t. : 2 tugs ''
15,000 to 30,000 g.r.t. : 3 tugs ''
over 30,000 g.r.t. : 4 tugs ''

Towage of vessels with inactive engines is subject to 40% increase.

Towage lasting more than one hour (two if canal crossing involved) is subject to 30% increase for each subsequent half an hour or portion thereof.

Robbery/Pilferage: Night watching service by crew members or authorised sworn watchmen is recommended in view of robberies having occurred in the past on board vessels berthed or anchored, especially concerning paints and ropes.

Safety in Roads: When a vessel is anchored in Mar Grande Roads, it should be borne in mind that the nature of bottom is mainly clay/mud and offers very bad holding ground; therefore, under strong S./S.E. winds (which occasionally blow in Taranto) the anchors may drag and consequently, danger to the vessel arises.

Bonded Goods: Upon arrival in port, Customs grant for crew consumption purposes, 50 cigarettes for each crew member and 1 bottle of spirits for every 10 crew members, which should be used within 48 hours of vessel's arrival.

Crew Lists: According to IMO International Convention 19/10/1971, upon arrival and departure, Harbour Master requires an updated Crew List on IMO approved forms.

Ship's Documents: We take the liberty to remind the Master that Outward Clearance granting, is subject to following certificates being valid:

Safety Equipment.
Safety Radio.
Safety Construction.
Load Line (including annual survey).
Deratting Exemption.

Launch Service: Vessel's launches cannot be used for connection with shore. Boat service is made available by an authorised firm at an official rate, which is increased by 70% from 1700 hrs. to 2400 hrs. weekdays and from 1200 hrs. to 1700 hrs. on Saturdays; by 100% from 0700 hrs. to 2400 hrs. on holidays and 1700 hrs. to 2400 hrs. on Saturdays; and by 200% from 0000 hrs. to 0700 hrs. any day.

Bunkering: Bunkering operations may be carried out only by barge. While bunkering, an engineer and a fire watchman (sent onboard by the Harbour Master on signing the bunkering authorisation) must stand-by and hose area must be properly lighted during night-time.

Any spillage on deck must be immediately cleaned up.

Water Pollution: Port Authority closely watches this matter and Masters are kindly invited to take all necessary steps to avoid any possible pollution. Also vessels discharging ore/coal are not allowed to wash decks in port (including roads).

Should any pollution be caused and vessel's responsibility proved, all expenses involved in carrying out the cleaning will be for vessel's account (to be paid for prior to departure) or Master shall be sued by Court.

Garbage Collection: Daily collection of garbage from vessels is compulsory and is carried out by the authorised firm (Nigromare) by means of a motorboat, and a supporting slip must be signed each time, even if no garbage is given.

Note: The service covers only galley and crew garbage collection. Disposal of other ship's waste is subject to a charge, to be agreed each time.

Water Supply: Water is only available by barge (except Pier No. 1 in Commercial Port). Minimum charge is for 25 tons. At least 24 hours notice should be given to Agent.

Provisions/Stores: Provisions and stores to be delivered by barge only.

Cash Money Request: Cash must be requested 24 hours prior to being needed.

No foreign currency available unless remitted directly to Master from abroad and sufficient notice is given to Agent to arrange collection in due time.

Repairs: Authorisation to carry out repairs of any kind is subject to an application to Harbour Master, on forms obtainable from Agent.

Hot work (involving naked flames) in the engine room, is always subject to Port Chemist's attendance.

Tankers, including OBO/OOC vessels, must also obtain a "Gas-free Certificate" for the area affected by the repairs (even if carrying iron ore/coal). When above vessels are performing loading/unloading operations, authorisation is also subject to Master's Declaration that vessel is always ready to shift with her own engines at any time.

Landing Spares: Any landing of spares for repairs and/or shipment must be authorised by Customs, through Agent.

Seamen Signing-off for Repatriation: Please note that, according to Italian law, seamen signing-off for repatriation are not allowed to take any bonded goods out of the harbour area. Inspection of baggage is usually carried out by Customs Officers when landing. Furthermore, owing to Italian Money Exchange Regulations, a crew member leaving the country, is not allowed to take abroad more than 200,000 Italian lire, while no limitation exists on foreign currency exportation, if crew member can provide valid evidence of how currency obtained.

AUTHORITY: Il Comandante Colonello di Porto. *Telex:* 813199 Compta I.

TORRE ANNUNZIATA: 40.45 N. 14.27 E. (See Plan)

DOCUMENTS and all General Information – refer to "Naples".

Arrival: An inspection is made on board by the Finance Guard (Customs Department) to check cargo documents in respect of goods and the composition of provisions on board. Then the Master of the vessel or his Representative (Ship's Agent) presents to Customs the manifest for arrived goods together with relative commercial documents. At the request of the Ship's Agent, the landing of goods is authorised on the "Discharge Copy" of the manifest which sets out each individual item to be landed.

Goods can be discharged into the Customs Warehouse or Private Warehouse to await Customs Clearance.

Departure: Prior to departure of vessel, the Customs releases a departure manifest, setting out a list of any goods in transit or destined for other Italian or foreign ports.

PILOTAGE: Pilotage is obligatory for vessels over 500 g.r.t., an effected by 2 Pilots of the Castellamare di Stabia Corps of Pilots. T 8717196. Pilots use a wooden pilot cutter 10 m. long and with a sp of 10 knots.

RESTRICTIONS: Entry permitted during daytime only for vessel excess of 80 m. LOA.

Mainly a fishing port with few facilities for larger vessels. Repo not to be suitable for larger vessels during winter months due to frequ high winds and heavy swell within the harbour.

MAX. SIZE: Length 472 ft., draft 30 ft.

VHF: Radio station of the Port Captaincy, with VHF unit opera between 0800 hrs. and 2000 hrs., listening out on Channel 16, a working on Channel 15.

TUGS: The port has no resident tugs available; if required, they can requested from Naples.

3 line boats available to assist with mooring.

BERTHING: *Calata Crocelle:* 1 berth only. Length 315 m. of wh 200 m. is in use. Depth alongside 6 m. – 7 m. Used for commer operations and by fishing vessels.

Molo di Levante: 1 berth only. Length 250 m. Depth 8.5 m. – 9 m. U for commercial operations; general cargo, cereals, iron pipes, 2 towers each with 2 suction pipes, rate of each tower 600 t.p.h. T silo is owned and operated by Societa Lavorazione Cereali Mezzogiorno (Tel: (081) 8615991).

CRANES: 1×20 ton quay crane, 1×40 ton mobile crane.

CARGO HANDLING FACILITIES: 1 grain silo, capacity 60,000 to loading rate 1,200 t.p.h. Loading onto rail trucks or lorries by gra using hoppers with overall delivery rate 250 t.p.h.

STEVEDORES: Working Hours: 0800 – 1200 hrs. and 1300 – 1700 h

MEDICAL: Port doctor available. Hospital with 100 beds.

FRESH WATER: Available.

FUEL: Available. By tanker or barges owned by Messrs. Garolla Naples.

SURVEYORS: None.

WATCHMEN: Not available.

AIRPORT: Naples Airport (Capodichino) is 23 km. away, and h domestic services to Rome, Milan, Bologna, Brindisi, Catania, Geno Palermo, Turin, with 2 international flights per week to London.

EMERGENCY CO-ORDINATION CENTRE: Comando in Capo Dipartimento Militare Marittimo del Basso Tireno (Military Naval H Command for Lower Tyrenia), Via Santa Lucia, Naples. Tel: (0 406244.

BANKS: Banca Commerciale Italiana, Corso Umberto I 153. T 8615100.

Credito Italiano, Corso Vittorio Emanuele III^{e} 307. Tel: 8615240.
Banca Nazionale del Lavoro, Via dei Mille. Tel: 8612003.

STORING: See "Prelims".

1. Yes, using own means of handling.
2. Yes.
3. Yes.
4. Yes.
5. See above.
6. Yes.

GENERAL: The port has no Ship's Agents, Forwarding Agents, or Na Suppliers.

Two road vehicle weighing bridges on the East Mole, one opera by Customs with a capacity of 40 tons, and one by SO.LA.CE.M. w a capacity of 80 tons.

There are ample electric train services to the rest of Italy from t town station. Torre Annunziata is connected by motorways (A3) w Naples and Salerno, and by main roads to Naples, S. Giovanni Teduc Salerno and Sorrento.

Post, telegraph and telephone offices are a short distance from t port in the town.

One lifeboat, 2 engined with a speed of 24 knots, 5.3 m. long, own by the State and operated by Circomare.

There is no Fire Brigade.

The port is subject to a slow siltation process due to the River Sa which comes into the sea 1 mile to the South.

The cross wind is from the West. The Scirocco and the Libeccio ca a strong dangerous surf for vessels berthed at the quays.

The tide brought up by the Libeccio sometimes comes right over t West Mole.

When works currently in hand are terminated, involving t construction of a small elbowed quay about 130 m. long in the W area of the port, this will supply a safe berth for fishing vessels, wh will also be advantageous for the nearby Calata Crocelle, which will r remain available for commercial operations only. There are good ar for future development.

DEVELOPMENTS: Calata Crocelle being extended by 35 m. W Breakwater being extended.

AUTHORITY: Ufficio Circondariale Marittimo di Torre Annunziata, Po di Torre Annunziata, 80058 Torre Annunziata. *Tel:* (081) 86118 8622978. *Contact:* Lieut. Pietro Lafata, Port Captain.

TRIESTE: 45.39 N. 13.45 E. (See Pla

PORT LIMITS: From Barcola (4 km. East of Capo Miramare) to Za in the Muggia Bay. The roadstead is 18/24 m. deep. If Readiness declared before 1200 hrs. laytime commences at 1300 hrs. If readin is declared between 1200 hrs. and 1700 hrs. laytime commences 0800 hrs. the following day. The declaration of "Readiness" is ma when the ship docks at the operative pier or when the ship ancho the roadstead.

DOCUMENTS:

For Customs:
2 Cargo Manifests.
1 Stores List.
1 Provisions List.
For Port Authorities:
Arrival Report.
2 Crew Lists.
3 Passenger Lists.
For Police:
1 Crew List.
1 Passenger List.
Shore Passes, provided by Agents.
For Port Health:
Maritime Declaration of Health.
Also see "Shipmasters Report".

PILOTAGE: Compulsory for vessels over 499 g.r.t. Location of pilot station for large tankers is in approximate position: Lat. 45° 37′ N., Long. 13° 43′ E. Call Pilot on VHF Channel 14, working Channel 10.

For smaller vessels Pilot boards in approximate position: Lat. 45° 39′ N., Long. 13° 44′ E.

ANCHORAGE: No Pilot required to anchor in roads. Normal anchorage for vessels awaiting entry is to the West of Luigi Rizzo Breakwater where the holding ground has been reported to be poor.

MAX. SIZE: Tankers up to 1,000 ft. LOA, draft 54 ft. 3 in. and 160,000 S.D.W.T. at SIOT Terminal Berth No. 3 and 1,076 ft. and 215,000 S.D.W.T. at SIOT Berth No. 4.

HEALTH: Free Pratique is granted by the Local Health Officers who board the vessels on arrival together with Port Authorities. The Pratique can also be requested by cable, addressed to "Sanimare – Trieste" and stating the port of origin, the number of crew and general health condition on board.

RADIO: Trieste Radio call sign IQX, operating continuously. Radio Telephony and/or telegraphy can be used. RTF Channels 8, 12, 16, and 500. ETA to be sent 48 hours in advance to Agent. Any change of ETA of more than 1 hour should be reported.

VHF: Harbour Master – call sign 'Compamare Trieste' on Channel 16. Also see "Pilotage" and "Tugs".

TUGS: 8 tugs available up to 3,000 h.p. 6 tugs also available up to 1,500 h.p. Tugs normally join vessel at pilot boarding station. Ship's lines used. Tug assistance is compulsory for tankers. Tugs equipped with VHF and foam fire fighting equipment. VHF working Channels 10/12.

BERTHING: Max. draft allowed at berths as follows:

Punta Franco, Vecchio, ore pier, 28 ft.; Other berths, 21 ft. Punto Franco, Nuovo, ore pier, 30 ft. silos, 31 ft. 5 in.; general cargo, 31 ft. Punto Franco, Scalo Legnami, 24 ft. Molo Martello, 30 ft., max. length of ship, 171 m. Italsider, berths, 45 ft.

Pontile Aquila, oil pier, 38 ft. Italcementi, berths, 30 ft. Vetrobel, berth, 30 ft. A.F.A., berth, 21 ft.

Mole No. 7 (Container Terminal), max. draft 52 ft.

SPECIALISED CARGO HANDLING FACILITIES: Wheat storage-bin for cereals and oil-seeds, capacity 30,000 tons, with 4 pneumatic unloaders. Auxiliary set, capacity 16,000 tons, with 3 pneumatic dockers.

Coal and ore discharge at Pier 5: 3×6 ton bridge cranes and 6×6 ton jib cranes. Discharge rate 200 tons per shift. Max. draft 9.5 m.

Coals and minerals plant, Molo V, with 7 cranes and 3 bridge cranes.

Coals and minerals plant Italsider pier with two 25-ton unloaders. Rate 400 tonnes/hr. for coal and 500 tonnes/hr. for iron ore.

Unloading, loading, alcohol and other liquid stowage plant, capacity 5,340 cu.m.

Maturity, conservation and disinfestation fruits and vegetables plant. Refrigerant, capacity 3,700 tons.

Container Terminal: Quay length 650 m., total area 20 ha. 4 rail-mounted 42 ton gantry cranes (portainer) and other modern and special installations for unloading/loading, moving and parking containers.

Roll-on/Roll-off: 3 ramps at Mole No. 7.

STEVEDORES: The working hours for the harbour operations are: 1st turn from 0730 to 1400 hrs. 2nd turn from 1400 to 2030 hrs. On Sundays and holidays the 2nd turn is limited to ferry boats, container ships, unloading/loading of live animals, and to perishable goods operations. Customers can take advantage of a possible 3rd turn in the labour days, Monday to Friday, from 2100 to 0330 hrs.

Night work, Sundays and holiday work, the 2nd turn of Saturday and the continuation of the turn is considered as overtime work.

MEDICAL: All facilities available. Preferable order in advance if required on holidays.

TANKERS: No slop discharge facilities; no repairs allowed to tankers at loading/discharge berths; no trucks or lorries allowed at Aquila Oil Pier which can only be approached by motor boats.

Restrictions: Night berthing is not permitted at the Aquila berth except for tankers under 3,000 d.w.t.

When the temperature is below 0°C, vessels calling at the Aquila berth, may, on occasions, not be berthed on account of ice layers forming on the surface of mooring buoys.

Berthing operations are also restricted at all terminals when wind exceeds 80 km./hr. (43 knots).

Cautionary Advice: The Bora is a violent Northeasterly wind, which in the Port of Trieste blows from a general East-Northeasterly direction. It is exceptionally strong from November through February and can, within a few hours, reach gale or hurricane force. The Bora is accompanied by a rise in barometric pressure and a drop in temperature, and freezing conditions can occur.

A very close watch on weather and moorings is therefore necessary at all berths in the harbour.

Tugs: Towage is compulsory for vessels over 3,000 gross tons.

Berthing Operations: Usual seamanship precautions must be taken approaching berths.

Wires are permitted after the vessel has been bonded using bonding wires.

Pilot/tug/mooring boat communications during berthing operations are carried out by walkie-talkie.

Two mooring boats are normally used.

Transalpine Pipe-line Terminal (SIOT).

The following are some of the regulations for vessels calling at SIOT.

REGULATIONS

Arrival of Vessels: No vessels may enter the SIOT port area except in strict compliance with instructions issued by SIOT.

Extraordinary Docking Conditions: Damaged vessels must report to SIOT well in advance of their date of arrival at the port area. Should SIOT consider a vessel to be unsuitable for discharge at the terminal, said vessel may be refused admission, or ordered to lay off, even after discharge operations have been started, or be admitted for discharge only on specially defined terms.

Docking and Sailing Manoeuvres: SIOT does not assume any responsibility for the docking or sailing manoeuvres of any vessel, including towage and mooring and for any pollution caused by the vessel. Pilotage and sufficient number of tug-boats with efficient power are compulsory.

Mooring Operations:

1. The right to assign a berth to incoming vessels for the discharge of cargo rests with SIOT.

2. All vessels must securely and tautly be moored at all times when at jetty. Masters' attention is drawn to the peculiar conditions of Bora wind which can blow with little warning and with extreme violence. Hawsers and mooring lines must be secured on quick release hooks and pulleys provided for the purpose.

3. Access to and from a vessel will be established by way of a SIOT gangway. The gangway will not be placed on board before the following conditions are met:

a) The vessel must be securely moored.
b) The vessel must be earthed to the jetty.

4. Access from the ship's deck to the gangway, if required, is to be provided by the vessel.

Traffic Within the Port Area:

1. Access to or from a vessel is not permitted until the vessel has been properly cleared by the appropriate Authorities.

2. Employees and Representatives of SIOT on duty must be granted access to the vessel to perform their tasks, the Master or his representatives shall furnish them with all pertinent data that SIOT may require and must give them permission to personally inspect all facilities necessary for handling cargo.

3. Passes provided by the Police must be issued by the Master to crew members and other for shore leave purposes.

4. Any person wishing to enter the SIOT port area must have in his possession a pass as prescribed by SIOT and the Authorities. Once in the port area he must report to the Pier Master for the necessary instructions regarding behaviour in the port area.

5. All traffic between the ship and shore as far as it must pass through the premises of SIOT is restricted exclusively to the tanker jetties and their access roads. Unless specially authorised no motor vehicles are allowed on the piers. All transportation will be performed by a special bus-service provided by SIOT.

Cargo Operations:

1. Before receipt of a cargo, SIOT, on behalf of the consignees will measure the contents of the tankers' cargo tanks at Trieste or may accept a measurement made prior to the arrival at Trieste and will take an average sample.

The binding determination of the quantity received by SIOT will be made by means of manual gauging in the storage tanks of Trieste Tank Farm or with the aid of automatic measuring device and according to the legal, Customs and fiscal requirements.

If the measurements in the storage tanks at Trieste Tank Farm show a difference exceeding 0.5% of the quantity in metric tons stated in the loading documents, SIOT will notify in writing the Master, if possible, advising at the same time the consignee.

2. All sea valves, overboard or other appropriate valves, isolating the cargo system from the sea, must be closed prior to the start of discharge operations and must be checked and where possible sealed. Where tankers are fitted with normal ballast system such sealed valves may only be opened with the consent of SIOT and providing alternative cargo isolating valves can be closed and sealed.

In all other cases valves must remain sealed and closed throughout discharge. Authorisation to open these valves must be obtained from SIOT prior to ballasting.

3. Discharge operations should be carried out as far as possible, without interruption and within the shortest possible time. The maximum pressure permissible on the shore gauge is 10 bar.

4. The completion of discharge shall be agreed by both, SIOT and the Master and if required by the Master or the consignee, both shall sign a "Qualified Certificate on the Petroleum Remaining On Board".

5. Should any complaint arise which may have a bearing on the quantity or the quality of the cargo, or on the discharge operations, SIOT will lodge a protest in writing, the receipt of which must be confirmed by the Master.

6. Inert cargo tanks and tank washing with petroleum:

a) Discharge of inerted ship tanks and tank washing with petroleum when agreed to by the Port Authorities will only be permitted when it is carried out in full accordance with the "Guidelines for Tank Washing with Crude Oil", latest edition, published jointly by: International Chamber of Shipping and Oil Companies International Marine Forum London.

b) In particular, inerted cargo tanks of vessels shall remain sealed and kept under positive inert gas pressure throughout the stay alongside except as required for cargo measurement and sampling.

Vessel Berth Occupancy:

1. The estimated discharge time and time for normal ballast operation shall be mutually agreed between SIOT and the Master or his authorised representative.

2. The pumping program shall be determined in agreement between SIOT and the Master. SIOT is entitled to interrupt discharging and have the berth cleared in case of emergency.

3. Upon completion of the discharge and ballast loading the vessel shall clear the berth subject to consideration of safety. Bunkering and fresh water loading, if required, shall, if possible, take place during discharge.

4. As berth occupancy time, tankers shall be allowed the running hours tabled below appropriate to the cargo quantity, Sundays and holidays included:

Cargo Quantity (1,000 tonnes)	*Max. Allowed Running Hours excl. COW*	*Max. Allowed Running Hours incl. COW*
up to 50	30	39
50 up to 100	33	42
over 100	36	45

It is expected that the unloading rate per hour will exceed 5% of the total cargo capacity of the respective vessel.

Running hours shall commence when the vessel has her first rope ashore and shall end when the unloading arms are disconnected on completion of discharge and the last rope ashore is off. If the unloading is prohibited and/or interrupted at the request of SIOT or by request of the Authorities, the running hours shall be extended by the same number of hours that the unloading was prohibited and/or interrupted unless the reason for prohibition and/or interruption is due to circumstances for which the Shipper and/or Master are responsible. Any period exceeding the above mentioned running hours requires special approval from SIOT. In exceptional circumstances SIOT has the right to request a vessel to vacate the berth.

5. SIOT will set up a list of vessels which have failed by their own fault to meet the berth occupancy time referred to above and reserve the right to refuse these vessels for future deliveries. SIOT can also refuse vessels which to SIOT's reasonable judgement may endanger its installations and/or increase SIOT's risk of liabilities towards third parties.

Special Services:

1. SIOT will provide a bus service between the berth and the entrance gate of SIOT port area, the costs of which will be charged to the ships via their Agents.

2. Connections for telephone service to ships will be provided by SIOT. This service and phone invoices will be charged through the ship's Agent.

3. Fees for any other special service rendered by SIOT to a ship, will be charged through the ship's Agent.

Safety Regulations:

1. All safety measures in the SIOT port area shall comply with the ISGOTT and the local safety regulations. In case of different requirements the most stringent ones have to be applied.

2. It is strictly forbidden within the SIOT port area to smoke, to carry any open fire or any equipment with glowing parts, or to use any fire-kindling devices or lighters other than those expressly admitted in special cases by the competent authorities or by SIOT.

3. No hot repair work is allowed whilst a vessel is alongside the SIOT jetties, unless, under exceptional circumstances permission has been granted by SIOT and the Port Authorities.

4. All other repairs whilst at the jetties, will only be permitted after consultation with SIOT and sanction obtained.

5. It is the responsibility of the vessel's Master to report a fire on his vessel to the SIOT Pier Master. The latter will inform immediately the Fire Brigade and the Harbour Master.

Every vessel is required to have a fire wire constantly adjusted to the water line forward and aft while on the berth. The ISGOTT Safety Check List shall be used on all vessels visiting the SIOT Marine Receiving Facilities. Failure to comply with this list may well cause cargo operations to be delayed.

6. Portable Walkie-Talkie sets should only be used for mooring and unmooring. It is strictly prohibited to use them during discharging and ballasting operations unless they are approved and intrinsically safe in compliance with the ISGOTT.

7. Vessels must not be immobilised without permission being obtained from SIOT and the Port Authorities.

Special Incidents:

1. Any incident affecting the safety of the vessel or jetty, any fire and serious accidents on board or caused by the vessel must be reported at once to SIOT.

2. Masters must ensure that as soon as any oil is spilt from their vessel all cargo operations will be stopped and may only resume operations if authorised by SIOT.

3. In case of imminent danger, and if the circumstances warrant, SIOT shall have the right to discontinue cargo operations and take any action considered necessary for the safety of the vessel and/or the terminal. As far as the safety of the vessel is concerned any such action shall be taken in consultation with the Master. If the danger results from the vessel the measures shall be taken at the vessel's expense. No claim will lie against SIOT for any damage resulting from any such measure taken reasonably.

GENERAL: SIOT Marine Receiving Facilities are owned and operated by SIOT (Societa Italiana per l'Oleodotto Transalpino). They are situated in Muggia Bay in postion Lat: 44° 36′ 36″ N., Long: 13° 46′ 36″ E. and fall under the administration of the Trieste Port Authority.

The Marine Receiving Facilities consist of 2 finger piers each with 2 berths, for oceangoing vessels, discharging crude oil and petrol products to the Trieste Tank Farm.

Approaches: The Marine Receiving Facilities are approached from North Adriatic Sea. A dredged channel joins the Gulf of Trieste to piers. The channel is 1 mile (1,852 m.) long and 200 m. wide.

It is marked by 3 buoys flashing green, 2 buoys flashing and 1 buoy flashing white.

Pilotage: Pilotage is compulsory.

Arriving vessels take a Pilot about 0.5 miles West of the Northern of Luigi Rizzo Breakwater.

Anchorage: The anchorage place is indicated by the Pilots.

Normal anchorage for vessels awaiting entry is to the West of L Rizzo Breakwater where the holding ground has been reported to be

Communications: When within range vessels should maintain cons communications with the Agent via Radio Trieste.

Radio Trieste will provide vessels with up to date information in reg to movements and other matters possibly affecting their passage to port area.

ETA shall be given 48 hours in advance. Any change in ETA of m than 1 hour should be reported.

Minimum Manoeuvring Draft: Pilots require sufficient ballast for manoeuvring. The propellers should be covered. The trim of the ves should not exceed 10 ft. by the stern.

Water Depth: The dredged depth in the harbour approaches to the p and the depth alongside Berth Nos. 2, 3 and 4 are not less than 17. at Mean Sea Level (MSL), at Berth No. 1, 16.9 m.

Tides: Water levels may be raised or lowered as much as 0.6 m. to the tide in respect to MSL. Higher tide excursions are exceptio Additionally a deviation of 0.6 m. can be expected from predicted heig due to meteorological conditions.

Tugs: There are sufficient tugs available on prior request, to assis berthing any size of vessels.

The tugs vary in power, from 750 kW (1,000 h.p.) to 2,000 (2,600 h.p.)

All are equipped with VHF multi-channel communication and provided with foam fire fighting equipment.

The tugs, tow ropes should normally be used for berthing. The num of tugs employed will vary according to the size of vessel and prevailing weather conditions.

Berths and Max. Size of Tankers: The finger piers are orienta 067.5° – 247.5° (T) in the direction of the prevailing Bora wind. Cur do not affect the berths appreciably.

(a) Berth Nos. 1 and 2 (No. 1 finger pier 1,561 ft. = 476 m. overall leng
Min. Size of vessel acceptable: LOA 525 ft. = 160 m.
Min. Summer deadweight 16,500 d.w.t.
Max. size of vessel acceptable: LOA 950 ft. = 290 m.
Max. allowable draft at Berth No. 1 at MSL 52 ft. 6 in. = 16
Max. allowable draft at Berth No. 2 at MSL 54 ft. 3 in. = 16.5
Max. Summer deadweight 100,000 d.w.t.

(b) Berth No. 3 (finger pier 1,610 ft. = 491 m. overall length).
Max. size of vessel acceptable: LOA 1,000 ft. = 305 m.
Max. allowable draft at MSL 54 ft. 3 in. = 16.5 m.
Max. Summer deadweight 160,000 d.w.t.
Min. size: As per pier No. 1.

(c) Berth No. 4 (finger pier 1,610 ft. = 491 m. overall length).
Max. size of vessel acceptable: LOA 1,076 ft. = 328 m.
Max. allowable draft at MSL 54 ft. 03 in. = 16.5 m.
Max. Summer deadweight 215,000 tons.
Min. Size: As per Pier No. 1.

The breasting dolphins at each berth are designed to withstand impact forces of the maximum size tankers acceptable when fully la and approaching at a maximum angle of 2° – 3° to the berthing lin a maximum velocity of 15 cm./s. (approx. 0.25 knot).

On dolphins "A1" and "A2" of both piers there are installed red (abo and green (below) warning lights each having a visibility of 2 miles

Crude and Product Handling Facilities: Discharge of Crude Products is via 3×16 in. diameter articulated unloading arms at B Nos. 1, 2 and 3 and via 4×16 in. diameter arms at Berth No. 4.

The shore lines are 36 in. diameter up to the root of the pier enlarge into 42 in. diameter for a further 6 km. to the Trieste Tank Fa

Discharge rates of up to about 9,000 cu.m.p.h. are possible.

Maximum permitted pressure at the shore gauge is 150 p.s.i. bar. Each pair of lines is provided with a valved cross-over near unloading platform and all the lines are provided at shore with and valved cross-over manifold which permits the use of any idle lin unload a tanker through more than one line.

Bunkers and Fresh Water: Fuel oil and marine diesel bunkers available at all berths through 10 in. diameter loading arms situated each side of the discharge rack. Fresh water supplies are availab all berths and should be ordered through the Agent or the Master.

Bunker fuel is not supplied directly by SIOT and must be ordered in advance via Agent. Bunker fuel by barges is not permitted along the jetties, unless under special exceptional circumstances permission of Port Authority and SIOT. In no case bunkering by ba is permitted during ballast or ullaging of tanks.

Mooring Arrangements: See "Plan".

It is ship's responsibility to provide safe and proper mooring in o to prevent tankers drifting off the berth and exceeding the opera envelope of the unloading arms.

Mooring lines must be carefully tended to hold the vessel in pos and close to the pier at all times.

2 shore breast wires are provided at Berth Nos. 1 and 2 each 3 shore breast wires at Berth Nos. 3 and 4 each, and it is recommen that vessel should make use of them.

The mooring dolphins F and G, at each side of Pier No. 2 combined to an arch-type mooring point, located at 10.55 m. above

A similar arch-type structure exists in axis F at Pier No. 1.

Mooring patterns and characteristics are dependent on architecture and weather conditions as well as lines material.

Mooring patterns shown in the "Plan Section" have been des as examples for standard vessels under worst experienced conditions.

Assuming that tankers are securely moored with mooring lines and equipment in good condition, and that moorings are properly tended, it should not normally be required to restrict the freeboard of tankers to reduce the exposed windage area when alongside the berths. However, should any limitation be considered necessary it will be arrived at by consultation between the Master and the SIOT Pier Master.

Masters' attention is drawn to the peculiar conditions of Trieste where winds can blow with little warning and with extreme violence. Attention is also directed to the "Mooring Guidelines".

Fire Protection: The fire fighting system of the Marine Receiving Facilities consists of elevated and tele controlled monitors. On the piers there are 4 monitors at each jetty. 2 monitors are located on the platform of each pier, other 2 monitors facing seawards are located each at the catwalks and 2 monitors facing shorewards are located each above the access road.

Each monitor, located at the catwalks or above the access roads, has a capacity of 6,000 litres per minute of water-foam compound mixture with a throw of 70 m.

Each monitor located on the platform has capacity of 3,000 litres per minute of water-foam compound mixture with a throw of 60 m.

The foam compound used is fluoroproteinic liquid. All monitors are independently fed with sea water by means of an electric motor driven pump, and a diesel motor driven pump.

All monitors are telecontrolled from the root of each pier.

A main line of 24 in. supplies the water on the main trestle. From the root of the piers, where are located the foam mixer stations, start 4 lines (2×8 in. and 2×10 in.) (reinforced glass fibre) located on the sea bottom. These lines supply the water-foam compound to all monitors.

Each elevated monitor is water cooled.

A 8 in. water-foam line is provided on each pier.

Besides the sea and shoreward located monitors, these lines supply 4 water-foam hydrants along each pier. 6 water-foam hydrants are on each platform.

Portable fire extinguishers, dry powder extinguishers of 10 kg. and 50 kg. capacity are available.

Further, all tugs are fitted with fire fighting monitors for water and foam. During loading and discharging operations firemen certified by local Fire Brigade are present on the pier.

Medical: Any medical requirements should be made through the vessel's Agent before or on arrival.

Only first aid facilities are available 24 hours per day at the Marine Receiving Facilities.

Internal Communications: Internal telephones are located at each pier's platform as well as external telephones on board each vessel moored alongside.

To use the ship's telephones do the following:

1. To call Terminal
   dial 30 for Pier Master
   dial 25 for Pier Master Assistant
2. To call Outside
   dial 0 and then the required outside number
   (also international calls are possible)
3. Ships are connected with following phones
   Berth No. 1 – Internal 21 – Outside 82 84 55
   Berth No. 2 – Internal 22 – Outside 82 84 56
   Berth No. 3 – Internal 23 – Outside 82 84 57
   Berth No. 4 – Internal 24 – Outside 82 33 70
   incoming and outgoing calls possible.
4. Telephone Operator No. 20.

Pollution: A combined system of floating and pneumatic barrier is installed. Whilst floating barriers are laid underneath the longitudinal axis of each finger pier and the main trestle, a plastic pipe with nozzles anchored with concrete weights on the sea bottom, connects dolphin B1 with dolphin A2, thus protecting Berth Nos. 2 and 3. A similar plastic pipe nozzle surrounds the sea bottom area occupied by vessels moored at Berth Nos. 1 and 4. Along each berth spot lights are installed in order to allow detection of oil spill, at night time. In the case of oil spillage, air compressors, supplying, via a 6 in./4 in. air supply system, the respective air bubble oil barrier, are started by remote control.

Air bubbles emerging from the pipes on the sea bottom form a water dam able to contain oil within the encircled area.

All expenses in connection with anti-pollution measures, skimming barges and bubble barriers included, will be totally charged to the responsible ship.

Agents: Most shipping Agents visit all vessels on arrival and several times during the duration of the vessel's stay.

The Agent's offices are all situated in the town of Trieste and Master would be well advised to ensure they have the office and the home telephone numbers of the Agent's clerk dealing with their vessels.

Transportation: SIOT provides transport from the platform to the entrance gate. Ship's personnel are recommended, to order a taxi either using the ship-shore telephone or from the watchman's office

Walking through the SIOT port area is not permitted.

Taxis and private cars are not allowed within SIOT port area.

Trieste centre is about 5 km. by road.

Crude Washing: Crude washing is allowed under the prescriptions and following the procedures contained in "Ordinance No. 928/82 – 1st June 1982", issued by the Port Captaincy of Trieste.

Copy of the above Ordinance No. 928/82 can be obtained through the Ship's Agents.

MOORING GUIDELINES: See "Plan".

In order to prevent damage to the loading arms, and possible pollution of the harbour, it is of the utmost importance to ensure that a vessel is not permitted to move off the berth and exceed the operating envelope of the unloading arms.

The advice contained in these Mooring Guidelines has the objective of ensuring that any tendency for the vessel to "drift off" and cause damage to the loading arms and pollution is avoided.

Mooring Examples: The following, as well as the mooring plans, are based on the theoretical calculations according to OCIMF standard and on worst wind conditions.

Wind loads corresponding to gusts of 92 knots or maximum winds *of 78 knots from E.N.E. (Bora) and to gusts of 65 knots or maximum winds* of 55 knots from all other directions.

*Winds of a duration of minimum 30 seconds.

All the lines considered to be wires (steel lines) with MBL (minimum breaking load) of: 83 tons (36 mm. dia.) for ships with more than 100,000 d.w.t. MBL 66 tons (32 mm. dia.) for ships with less or equal to 100,000 d.w.t.

The windage area and the tankers' architecture as used in this example, especially as far as hawse-holes positions are concerned, have to be regarded as typical for the various classes of vessels calling at Trieste, but cannot be considered always applicable.

The Masters' attention is called on the fact that these guidelines have to be regarded as examples only and must be implemented accordingly depending on quality of lines used, MBL of the same, vessel windage area as well as forecast of weather conditions.

In particular we recall the Master's attention on:

a) If lesser breaking load mooring lines are used vessels should endeavour to provide additional lines (together with any shore wires which are available), as nearly equivalent restraint capability as possible. Mixed mooring of wires and synthetic should be avoided.

b) If mixed moorings of wire and synthetic or natural fibre are used, it is important that, due to the differing elasticity of these materials, their use in the same direction of restraint shall be avoided. If possible, wires shall be used as breast lines. In addition, 2 shore breast wires are provided at Berth Nos. 1 and 2, and 3 breast wires at Berth Nos. 3 and 4, and it is recommended that vessels should make use of them.

c) The discharging arms are vulnerable to damage should vessels range or move off the berth. It is essential that a vessel is held securely alongside throughout the discharge.

Special care has to be taken in providing lines which must not have excessive elasticity to ensure sufficient transverse restraint.

d) Full steam pressure must be maintained and be available to all mooring winches throughout the period vessel is alongside.

e) As soon as a vessel is secured, brakes on all mooring winches must be secured. Winches shall not be left on automatic tensioning.

f) Masters shall ensure that mooring lines are in good condition and free of visible defects. Winch brakes or securing devices should be in efficient operating order. In case of vessels in excess of 100,000 d.w.t. winch brakes should be capable of withstanding a load of 60% of the MBL and this should be supplemented in strong wind conditions by ensuring winches are put in gear with power applied in the heave position.

g) An efficient watch must be maintained throughout the vessel's stay alongside.

h) SIOT is entitled to stop operations and/or summon tugs if it appears that vessel's movement will endanger the discharging arms, or in the absence of an alert and efficient deck watch. All pertinent expenses will be charged totally to the vessel.

Action Guidelines for Adverse Weather Conditions: The following guidelines are drawn up in order to assist SIOT's and vessel's personnel in determining the course of action to be taken during stages of weather deterioration, when wind threatens to blow the vessel off the berth.

Masters are cautioned to use them only as a guide, as the physical characteristics of individual vessels may vary according to the type of vessel and the nature of the mooring used. Any limitation considered necessary will be arrived at by consultation between the Master and the SIOT Pier Master.

Valid for All Berths and All Wind Directions:

Discharge can continue regularly in wind Forces up to 7 (30 knots or 15 m./sec.).

Discharge to be stopped* if the wind is in the ranges from Force 7 (30 knots or 15 m./sec.) to Force 8 (37 knots or 19 m./sec.) and the cargo on board is less than 30% of the summer d.w.t.

Discharge to be stopped* independently from the quantity of cargo on board if winds over Force 8 (37 knots or 19 m./sec.).

*When stopping discharge for wind conditions loading arms should be drained and disconnected, the crews and engines kept on standby and tugs alerted if necessary.

Weather Forecast: Weather forecasts are not available at the piers, but the local Meteorological Institute may provide them on a phone call. The accuracy of this service cannot be guaranteed and Masters should be alerted for conditions which may differ from those provided in the general forecast and ensure the safety of the vessel and the Marine Receiving Facilities. Masters will be aware of the fact that the prevailing wind blowing at Trieste has an E.N.E. direction, can blow with little warning and gusts can reach 100 km./h. or more in an extremely short time.

SIOT MARINE RECEIVING FACILITIES:

	Berth No. 1	*Berth No. 2*	*Berth No. 3*	*Berth No. 4*
Water depth at Mean Sea Level	55 ft. 4 in. (16.9 m.)	57 ft. (17.4 m.)	57 ft. (17.4 m.)	57 ft. (17.4 m.)
Raising or lowering of water level on predicted heights due to meteorological conditions 0.6 m.				
Maximum allowable draft (dependent on water level)	52 ft. 6 in. (16.0 m.)	54 ft. 3 in. (16.5 m.)	54 ft. 3 in. (16.5 m.)	54 ft. 3 in. (16.5 m.)
Min. size of vessel (d.w.t.)	16,500	16,500	16,500	16,500
Max. size of vessel (d.w.t.)	100,000	100,000	160,000	215,000
Min. length of vessel (m.)	160	160	160	160
Max. length of vessel (m.)	290	290	305	328
Max. discharge rate (cu.m./h.)	9,000	9,000	9,000	9,000

Bunkering arms (with flanges ASA 150)	2×10 in.	2×10 in.	2×10 in.	2×10 in.
Max. pressure permitted at shore gauge	10 bar	10 bar	10 bar	10 bar

Operator: Societa Italiana per l'Oleodotto Transalpino S.p.A., Piazza Unita d'Italia, 7, Casella Postale 544 I-34121 Trieste/Italy. Tel: 040-69 121, 040-827003. Telex: 460126. Code: Talin.

New San Sabba Terminal:

The terminal is located about 600 m. Eastward of the SIOT Pier No. 1 and is used for products discharge. It consists of a concrete finger pier, aligned in an East-Northeasterly direction with a berth on each side. Berth No. 1, facing S.E., is used for larger ships, while Berth No. 2 can accommodate vessels of up to 18,000 d.w.t.

Cautionary Advice: The breasting facilities at Berth No. 1, particularly forward, are poor and a very close watch on moorings is necessary, especially during the Bora season.

Berthing Procedures: Tugs are usually made fast with ship's lines just inside the breakwater. Ships bound for Berth No. 1 are swung seawards of the berth and backed onto the berth, dropping the port anchor with 6-7 shackles in the water and mooring starboard side alongside.

Ships bound for Berth No. 2, steer directly for the berth and moor starboard side alongside. Port anchor is not normally used for this manoeuvre, but should be ready for use in an emergency.

Gangway: There is no shore gangway, ship should rig a safe gangway.

Cargo and Bunker Connections:

Dirty products:

1 × 12 in. hard arm (ASA type), at Berth No. 1.

1 × 10 in. hard arm (ASA type), at Berth No. 2.

Clean products and gas oil:

1 × 8 in. hard arm (ASA type), at Berths No. 1 and No. 2.

Bunkers:

1 × 6 in. flexible hose at both berths.

Deballasting Facilities: There are no deballasting facilities.

Stores: By barge only.

Aquila Berth: This terminal is located on the South shore of Vallone di Muggia. The berth is aligned in a Northeasterly direction and consists of a concrete T-head type jetty with buoys for all but the spring moorings. Vessels moor starboard side to.

Berthing Procedures: The manoeuvring space off the berth is limited. 2 tugs are normally made fast on the hook, using ship's lines, when the vessel is inside the breakwater. On approaching the berth, the vessel is turned slightly to port and the port anchor is let go and slacked off to about 4 shackles. The vessel is then pushed on to the berth by the tugs, while the chain is slacked out to about 7 shackles in the water. The moorings are taken to the buoys by the mooring boat and made fast.

Gangway: There is no shore gangway and vessels should rig their own gangway.

Cargo Connections, Handling and Ballast: The Aquila refinery receives crude via the SIOT installations so only products and lubes are handled at this berth.

Dirty products are handled via 1 × 8 in. flexible hose. Clean products and gas oil are handled via 2 × 8 in. flexible hoses, and lubes and bunkers via 1 × 6 in. flexible hose. All are with ASA flange connections.

Dirty ballast can be discharged at a rate of 150 t.p.h.; maximum storage capacity is 3,500 tons.

Old San Sabba Pier:

This berth is used by small ships. Because of the very confined manoeuvring space. 2 tugs are normally used to assist vessels berthing. Ships berth port side to and the starboard anchor is used to assist in leaving the berth.

General: *Pollution:* The port pollution sensitivity is very high.

Each vessel alongside is surrounded by a floating barrier. Furthermore, the following equipment is available in the port:

3 skimming barges (speed 16 knots), 3 cu.m. capacity.

1,000 m. floating barrier.

20 tons of absorbent powder.

Fire Fighting Facilities: All berths are well equipped with high level fire fighting facilities including remotely controlled fire pumps and foam monitors. Moreover, all tugs are equipped with 2 or 3 water foam monitors.

Security: Shore leave is permitted. Shore passes are issued by the Port Captaincy and crew members' and visitors' identities are checked at the gate or boarding point.

Bunkers, Lubricants, Hydraulic Oil: Fuel and diesel oil are supplied by pipe with no restrictions on maximum quantity. Minimum quantity delivery by pipe: Fuel oil 100 tons, diesel oil 30 tons. Simultaneous bunkering and discharge is allowed.

Lubricants, hydraulic oils, etc., are generally available, but 3 days' notice is required. They are suplied in drums by barge.

Fresh Water: Drinking water is available by pipe. No restrictions on quantity.

Distilled Water: Not available.

Repairs: Repair facilities available. Immobilisation of main engine not allowed at the berths.

Allowed at roads with tug attendance.

No tank cleaning and gas-freeing facilities available.

Stores: Laundry, provisions and stores area available with advance notice.

Telephone: Can be installed on board.

Special Regulations: For vessels discharging at TAL, SIOT Terminal cargo measurement and sampling may be required both before and after discharge. To facilitate these measurements and to avoid excessive venting when alongside, ships with an operating inert gas system are asked to reduce the system pressure to the safe minimum operational level (100-150 mm. WG.) immediately prior to the Pilot boarding for berthing. Detailed requirements for the safe measurement access to inerted tanks and for repressurisation and operation of the inerted gas system during actual discharge will be handed to and discussed with inerted ships on berthing.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No barges available.

FUEL: All grades available, loading rate about 250 t.p.h. 48 hours no required. Also see "Shipmaster's Report".

REPAIRS: All kinds of hull, deck and engine repairs can be carried by Arsenale San Marco and other yards.

DRY DOCKS: 5 dry docks available.

Shipmaster's Report: January 1985.

There is a new dry dock, located at Arsenale San Marco. Our ve was the first to use it, our dimensions being:

LOA: 255.0 m.
Moulded breadth: 35.3 m.
Moulded depth: 19.0 m.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Optional, but stevedores usu perform this operation for convenience.

CUSTOMS ALLOWANCES: 50 cigarettes for each man and one bo wine/spirits between 5 men. Only one allowance given while vesse port.

REPATRIATION: No facilities.

AIRPORT: 15 miles distant. Two flights daily to Venice/Milan and Ro for international connections.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th Ap Labour Day (1st May); Good Friday, Easter Monday, Assumption B Maria (15th August); All Saints' Day (1st November); St. Giusto (November); Immaculate Conception (8th December); Christmas D (25th December); Boxing Day (26th December); Cargo work can arranged on the above days.

POLICE/FIRE/AMBULANCE: Police, tel. 113; Fire, 2222; Ambulan 68888.

TELEPHONES: Can be installed on board.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes are issued by local police

DEVELOPMENTS: Ro/Ro terminal with 70,000 sq.ft. storage un construction.

Timber yard to be extended.

SHIPMASTER'S REPORT: May 1981.

Documents/Fuel: If anchoring off Trieste for bunkers only the follow are required: 5 Crew Lists, 2 Stores Lists, 2 Crew Declaratio No Pratique required if coming from Koper, Yugoslavia. Vessel does have to pay anchorage dues.

SHIPMASTER'S REPORT: August 1989.

If repatriating any crew members who require transit visa, then Ag requires full name, passport number, place/date of birth, date/pla passport issued, in advance.

Vessels pay extra for use of tug lines.

At SIOT berths it is easier to take stores by boat. Shore gangwa available.

In arrival message, Agent requests time vessel will commence CO this is so Inspector can board vessel to check equipment and certifica before start of COW.

Vessels normally berth heading outwards.

DOCUMENTS: Minimum number of ship's papers required upon arr

By Port Health:

2 copies Passenger List.

2 copies Crew List.

By Police:

2 copies Passenger List.

2 copies Crew List.

By Ship's Agents:

2 copies Passenger List

2 copies Crew List.

2 copies Cargo Manifest.

By Customs:

2 copies Cargo Manifest.

2 copies Provisions and Stores List.

PILOTAGE: Pilot boards 2 miles from breakwater. Master can co Pilot by VHF Channel 13.

ANCHORAGE: Anchorage for large tankers will depend upon Master's discretion. However there is a good anchorage in position:
Lat. 45° 26′ 02″ N., Long. 12° 20′ 23″ E.

RESTRICTIONS: Advisable to enter during daytime and with favourable tide.

Access: North: At Lido with channel depth of 11.0 m.
South: At Malamocco with channel depth of 14.50 m. This channel at Southern end of Lido Island, first leading to San Leonardo tanker berth and then North to Marghera
Also see "Tankers".

HEALTH: Health Officer boards as soon as vessel is berthed. Pratique can be obtained by radio prior arrival. Radio request to "Sanimare Venice" through Trieste Radio.

TUGS: Tugs are available and will join vessel at breakwater and/or off Lido when proceeding to S. Nicolo. Ship's lines have to be used.

BERTHING:

CRANES:

Marittima: 29 × 1.5 – 3 tons
8 × 3 – 6 tons
4 × 6 – 12 tons
1 × 30 tons

Marghera: 15 × 3 – 6 tons
2 × 13 – 30 tons
2 × 22 – 30 tons
2 × 12 tons
4 × 6 tons (Bridge Unloaders)
2 × 330 t.p.h. (Bridge Unloaders), 30 tons SWL.
2 × 1,500 t.p.h. (Bridge Unloaders), 34 tons SWL.
5 × 300 t.p.h. Grain Elevator

Equipment: Handling equipment for general use in yards, in sheds and in holds in the commercial port areas of Marittima and Marghera.

Mobile cranes:
14 × 1.25 – 20 tons
11 × 30 – 40 tons
2 × 90 tons
2 × 100 tons
2 × 150 tons

Rail-wagon moving tractors:
7 × 31 – 35 h.p.
7 × 54 h.p.

Fork lifts:
90 × 1 – 3 tons
17 × 4.8 – 8.1 tons
11 × 12 – 35 tons

Tractor trucks:
5 × 132 h.p.

Trailers:
8 × 40 tons

Wheeled shovels:
16 × 1.5 – 5.4 tons

Tracked shovels:
2 × 1.4 tons

Lorries:
4 × 8 tons

Tank truck:
1 × 7.6 tons

Sweepers:
5 × 0.8 – 76 h.p.

Wheeled transpallets:
5 × 1 ton.

CONTAINER HANDLING FACILITIES: Container and Ro/Ro facilities in the port.

Marittima: Ro/Ro Terminal at the Isonzo Quay: 2 Berths. 45,000 sq.m. marshalling area.

Ro/Ro Terminal at S. Marta Quay: 3 Berths.

Ro/Ro Terminal at S. Basilio Quay: 2 Berths. 1 Passenger Terminal.

Marghera:

Container Terminal at the Emilia Quay:
3 berths (alongside 550 m. quayside), of which one is also a Ro/Ro berth.

On quay:
3 portainers of 48 tons capacity.
1 portainer of 40 tons capacity.

On yard:
2 rail-mounted gantry cranes of 40 tons capacity.
6 rubber-tyred gantry cranes of 34 – 40 tons capacity.
4 mobile cranes of 40 tons capacity under spreader.
7 fork-lifts of 12 – 35 tons capacity.
15 tug-masters of 40 tons truck-capacity.
20 trailers.
180,000 sq.m. stacking area.

Ro/Ro Terminal at the Friuli and Cadore Quays: 2 Berths, 57,000 sq.m. marshalling area.

Ro/Ro Terminal at the Aosta Quay: 4 Berths. 70,000 sq.m. marshalling area. 24,000 sq.m. stuffing sheds. 1 Passenger Terminal.

BULK HANDLING FACILITIES: Bauxite discharging at Montecatini and Molo Commerciale in Porto Marghera.

Discharge by crane grabs at rate of 2,000 tons per day at Montecatini, and 1,500 tons per day at Molo Commerciale. Vessels up to 28 ft. draft can be accommodated.

Coal discharged at ENEL jetty and Mole "A". Discharge rates 6,000 tonnes per day and 6,500 tonnes per day respectively.

STEVEDORES: The Provveditorato al Porto Venice are exclusively entitled to manage all the commercial work in the harbour including stevedores. Vessel should en route ETA cable to Agent at least 48 hours prior vessels arrival to arrange gangs.

MEDICAL: Hospital facilities always available. No notice required in advance.

TANKERS: Tank washings cannot be disposed of inside port. Diameter of loading/discharge lines 8 in. to 12 in.

One berth for tankers at San Leonardo can accommodate vessels up to 85,000 d.w.t. Max. draft is 45 ft. 3 in. Good discharging and no back-pressure. Speedboats up to Venice take about 40 minutes.

Discharging Berths for Tankers at Porto Marghera:
Darsena IROM, length 570 m., depth 30 ft.
Esso Pier: Depth alongside 26 ft.
Shell Pier: Depth alongside 26 ft.

Port entrance of Malamocco, at South point of the Island of Lido, has been reopened where a canal 12 m. deep leads to Port of Marghera. This canal allows large tankers to proceed to coastal storage tanks without passing through urban centre of Venice.

Esso/IP:

Berthing: Ships bound for Darsena Esso/IP proceed along the Malamocco channel, with the assistance of 2 tugs, up to Bacino di Evoluzione No. 1 where 2 additional tugs are made fast aft. They are swung in Bacino di Evoluzione and proceed along the Canale Vittorio Emanuele stern first. They then enter Darsena Esso/IP stern first. Ships are always starboard side to Berth 3M and portside to Berth 2M and to the Esso/IP berth.

Moorings are taken ashore by mooring boats. The minimum number of mooring lines required for each berth is as follows:
Berths 2M, 3M and Esso/IP
2 head lines,
4 breast lines (2 fwd. – 2 aft),
6 spring lines (3 fwd. – 3 aft),
2 stern lines.
The use of wires is not permitted.

I.R.O.M. Brentelle, Berth 4B:

Cautionary Advice: This berth is located at the junction of Canale Vittorio Emanuele and Canale Brentelle. Vessels are berthed starboard side alongside. The facilities are used by I.R.O.M. for clean and dirty products. There is heavy traffic in this area and care must be taken that ship's lines are always tight. Moreover, when a ship over 3,000 d.w.t. is entering or leaving Canale Brentelle, the loading/discharging operations are discontinued and the tanker moved off the berth. Maximum draft is about 22 ft.

Darsena I.R.O.M., Berths 2M and 3M:

Berthing: Ships bound for Darsena I.R.O.M. are swung with the assistance of 4 tugs in Bacino di Evoluzione No. 1. They navigate Canale Vittorio Emanuele stern first for about 4 cables and then enter Darsena I.R.O.M. bow first. Ships are always starboard side to Berth 2M and port side to Berth 3M. Due to the heavy traffic in Canale Vittorio Emanuele care must be taken that ship's lines are always tight. Vessels up to about 18,000 d.w.t. or 20,000 d.w.t. are berthed.

DENSITY: Average salinity of water inside port 1020.

FRESH WATER: Available.

FUEL: All grades available and delivered by barge.

CONSULS: Following are Consulates maintaining their offices at Venice.

Argentine
Austria
Belgium
Bolivia
Brazil
Colombia
Denmark
Finland
France
Germany F.R.
Greece
Ivory Coast
Lebanon
Liberia
Luxembourg
Mexico

Switzerland
United Kingdom

REPAIRS/DRY DOCKS: There are ample facilities for repairs. Following are particulars of Venice dry docks:

Minore	*Maggiore*	*Principe*	
298.8 ft.	526.3 ft.	820.3 ft.	extreme length
58.4 ft.	79.8 ft.	117.8 ft.	breadth of entrance
1.0 ft.	1.0 ft.	3.1 ft.	height of sill above bottom dock
19.7 ft.	29.6 ft.	36.0 ft.	depth on sill at high water.

SURVEYORS: R.I.N.A., Lloyd's Register, Germanischer Lloyd, A.B.S., Norske Veritas, N.K.K. and U.S.S.R. Register of Shipping.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: The Customs require from the ship a complete list in duplicate of Provisions and Stores. It is particularly important that the quantities of items such as tobacco, cigarettes, spirits, coffee, matches, pepper, salt, spices, cars, chocolate, should be given accurately. Customs Officers will supervise the issue while ship is in port. Amount of tobacco allowed out of Bond: 50 cigarettes per man for all foreign vessels except British and U.S.A. flags. 20 cigarettes per day per man on British and American flag vessels.

AIRPORT: International Airport Marco Polo about 10 km. from Porto Marghera. Served by regular airlines.
TIME: GMT plus 1 hour. Summer Time from March to September, GMT plus 2 hours.
HOLIDAYS: The public and port holidays are the following: 1st January; 6th January; 19th March; 25th April; Monday after Easter Day; 1st May; Ascension Day; Corpus Christi Day; 2nd June; 29th June; 15th August; 1st November; 4th November; 21st November; 8th December; 25th December; 26th December.
TELEPHONES: Telephones will be placed aboard the ship.

SHIPMASTER'S REPORT: Porto Marghera. November 1979.
Pilotage: Pilot station works on Channel 13 VHF. Speaks very good English. Pilot launches are built to the same specification as the new Trinity House high speed launches, there are five in number. Black hull with white superstructure. Pilot ladder to be 3 ft. feet above the water line. Pilot boards from the rigging. In favourable weather pilot station about 0.5 miles East of the Fairway Buoy, in adverse weather conditions vessel proceeds in on leads and Pilot embarks inside the moles.
Anchorage: Good anchorage for small vessels especially during the Bora from the N.E. in 6 fathoms of water with Porto di Lido Northern Mole Light bearing 280° × 1.5 miles.
Stevedores: Port works 5 days a week in 3 shifts Monday to Friday: 1st shift 0800 to 1430 hrs.; 2nd shift 1430 to 2100 hrs.; 3rd shift 2100 to 0200 hrs.
2 shifts worked on Saturdays 0800 to 1430 and 1430 to 2100 hrs.
Possible to work Sundays 0800 to 1430 hrs.
Container Berth: Berth relatively new with good fenders – room for two vessels. Two container cranes. Ample straddle loaders. Upper berth suitable for Ro/Ro if berthed port side to.
Tugs: For vessels over 100 m. in length it is necessary to engage a tug for turning.
Speed in Canal: Maximum speed through Venice and up the canal to Porto Marghera 6 knots. heavy fines can be imposed for excessive speeds.
Cash Drawn: Customs have to approve any cash drawn and it is essential that any excess must be paid back to Agent before departure. Unable to land at any other port.
Customs: When proceeding from one Italian port to another the Clearance is placed on board together with one copy of 'Manifesto di Partenza'. Most important that Master has this copy on demand at subsequent port.

AUTHORITY: Overall supervising (Military) authority:
Capitaneria di Porto di Venezia, Tronchetto 1401, I-30135 Venezia, Italy. *Tel:* (041) 5203044. *Telex:* 410242.
The commercial port areas managing (Public) authority:
Provveditorato al Porto di Venezia, Zattere 1401, I-30123 Venezia, Italy. *Tel:* (041) 5334111. *FAX:* (041) 5334200. *Telex:* 410344 Portve I. *Cables:* Provviporto. *Contact:* Commercial and Marketing Department.

NOTES

Please also advise Shipping Guides Ltd.

Ivory Coast

ABIDJAN: 05.18 N. 04.00 W. (See Plan)

PORT LIMITS: The pilotage zone is limited by a circle with a 3.5 mile radius centred on the pier lighthouse of the West jetty of the entry canal.

DOCUMENTS: All ships calling at Abidjan to discharge cargo will have to supply on arrival altogether 13 sets of Cargo Manifests and 4 sets of Freighted Manifests for each port of loading (IMO class code for all hazardous cargoes), as the administration no longer accepts reproductions of documents supplied by the Agents. Furthermore, Masters are reminded to hand to Agents on arrival, 6 Crew Lists, 4 Stores Lists, 4 Bonded Stores Lists, 4 Crew Declarations, 6 Passenger Lists (even if nil), 5 Animal Lists (even if nil), 5 Narcotics Lists (even if nil), Arms and Ammunition List, (even if nil), 5 Lists of Ports of Call and 1 Vaccination List. Furthermore, the attention of Masters is drawn to the fact that the Customs Services are strictly enforcing the control regulations on incoming vessels and very heavy fines are imposed in cases of omission or mistakes in Declarations of Slop Chests, Stores Lists etc.

All Manifests and Bills of Lading should refer to the IMO class code for hazardous cargoes.

It should also be noted that hazardous cargo found and not mentioned in above documents will have to remain on board.

Also see "Notice".

PILOTAGE: About 1 hour before arrival ships equipped with VHF shall confirm to the Pilot station, on Channel 12 or 16, their correct hour of arrival off the Roads; then the boarding time for Pilot shall be communicated. It is essential that these times are clearly understood both by ship and Pilot station.

Ships shall stay in a position so they keep across the swell and the wind which both generally come from the South and they shall put the pilot ladder on the lee side, i.e. Port if steering Eastward, Starboard if steering Westward.

Pilotage is compulsory, except for shifting alongside quays. For ships leaving harbour or shifting within harbour limits, request for a Pilot should be made at the Harbour Master's Office at least 3 hours before sailing or shifting. For a night sailing or shifting, request must be made before 1700 hrs.

Warning: When embarking Pilot, keep well clear of sandbank extending from entrance to Vridi Canal.

ANCHORAGE: Vessels may anchor on the outer road in 20 m. to 30 m. of water, firm sandy bottom, also to the South and to the West of the West jetty of the Vridi Canal.

RESTRICTIONS: Ships may enter or leave Abidjan only between certain time limits. These limits can be obtained from the pilot station on Channel 12 or from the local Agent no more than 3 or 4 days ahead of time.

MAX. SIZE: Until now the largest vessel admitted was 243 m. in length. Vessels with a length of 250/260 m. may be able to be admitted ultimately. At the present time, the maximum permissible draft is 33 ft. For drafts over this limit, a special request should be addressed to the Port Authorities, who, after taking the tide and current into consideration, will decide whether or not the vessel should enter.

HEALTH: Request for Free Pratique is given by the Agent to Port Health Authority, who will board vessel on arrival.

RADIO: Masters must radio through Abidjan – Radio their ETA and draft, 24 hours and again 6 hours before their arrival, to the Port Commandant (COMPORT) or in his absence, to the consignee. For a night arrival, the telegram must arrive at the station before 1700 hrs.

When at anchorage off Vridi Canal, vessels should watch for signals from Vridi Signal Station, which keeps continuous watch, and advise them regarding the time the Pilot will board their ship. Port Captain's office and Vridi Signal Station keep a permanent watch on 156.6 MHz. and 156.8 MHz. Agents may be obtained through Abidjan Radio on 2182 kHz. Abidjan Radio answers on 1813 kHz.

VHF: Channels 16 and 12 are used: 16 for security and 12 for general traffic. It is strongly advised to use Channel 12. This Channel is strictly reserved for the harbour traffic and ships wishing to talk to each other should do so on a ship to ship Channel 8.

RADAR: Installed in the Harbour Master's office. Vessels can contact port radar by calling "Comport Abidjan" on VHF Channels 16, 12 and 11, or through Abidjan Radio, which keeps watch on Channel 16.

BERTHING:

Bananier Quay: (Banana Carrier Quay): Length 350 m., 2 berths, depth 7 m.

North Quay: Length 775 m., 5 berths (Nos. 1–5) from East to West, depth 10 m.

West Quay: 1,525 m., 10 berths Nos. 6 to 15 from North to South, depth 10 m.

South Quay: 1,145 m., 6 berths Nos. 16 to 21 from North to South, depth 11.5 m.

Roll-on/Roll-off Berth: Length 200 m. Depth 12.5 m.

A temporary Roll-on/Roll-off berth is located at the North Quay of the fishing harbour, length of the quay 350 m., depth 7 m.

A quay 90 m. long, situated on the South bank of the lagoon between the access canal and the discharge canal (Bietri Canal) extended by a system of piles, permits the mooring of vessels 140 m. long and with 26 ft. draft. This Quay is called 'Siveng Quay' and is reserved for the Company of the same name.

2 oil wharfs situated on the East bank of the access canal accommodate large vessels of more than 200 m. with a max. draft of 31 ft.

A "sea line" buoy situated off Port-Bouet can accommodate vessels having a length of 270 m., and a draft of 46 ft. and not exceeding 75,000 d.w.t. (See "Tankers").

Mooring buoys lined up in the North part of the port (Banco Bay) are used by vessels taking on timber.

The Quays of the port are not equipped with cranes, so loading and unloading operations are undertaken by vessels own gear.

TUGS: Tugs join vessel at the port entrance. Towing lines are provided by the tug. Tugs work on VHF Channel 8.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: 4 Berths (No's 22, 23, 24 and 25) each 200 m. length are in service. A study with regard to equipping these quays with gantry cranes is being undertaken. The area of the container park is 60,000 sq.m. Loading and unloading of the containers is by ship's gear. Transport on the quays is made by trailers.

Ro/Ro berth: This berth has a park of approximately 40,000 sq.m.

Details of the ramp of the temporary berth, situated on the North quay of the fishing harbour are as follows: Width 17 m., height above chart datum 1.5 m., permissible loading 20 tons by pulley. The height of the quay above datum is 1.8 m.

Vessels arriving with cereals destined for "Grand Moulins D'Abidjan" are received at Berth No. 1, or they are given a berthing priority. Handling is by means of suckers and conveyor, average rate of discharge 150 t.p.h. The capacity of the silos is 30,000 tons. The "Grand Moulins" are also equipped to load pellets in bulk at this berth. They can also receive cereals for third parties; in this case the transporting vessel still benefits from the mooring priority.

The handling companies Transafric and Socopao are also equipped with suckers (Vigan pumps) for discharge of cereals. Evacuation is then made either by tipper lorries (Transafric) or by direct discharge under hangar (Socopao). The vessels are then directed to the ordinary berths and do not benefit from any mooring priority. The rates of discharge are in the order of 50 to 70 t.p.h.

Palm oil is usually taken on board at Berth No. 16 where 2 pipe-lines come from the oil depots. The diameter of these pipe-lines are 4 in., and the flow rate is 250/280 t.p.h. Vessels mooring at this berth do not have priority. These oils may be taken on board at any other berth by tankers.

Wine in bulk is also received at the ordinary berths and also discharged by tankers.

The timber yard is situated in the North part of the port. It is bordered by a quay of 380 m. from which the timber is put in the water or loaded on barges before being towed to the vessel on which it is to be loaded. The equipment of this park (yard) is as follows: 1 gantry crane of 20 tons and 1 of 10 tons, 1 derrick of 20 tons, 3 fork lifts of 16 tons, 1 fork lift of 7 tons.

The park for discharged timber is situated between the West quays and the fishing port; it is bordered by a quay of 350 m. called "Quai de Chalandge" (Lighterage Quay), depth 2.5 m. The equipment for this park comprises: 5 fork lifts of 10 tons and 1 of 12 tons.

The port has 2 floating cranes: one with 150 tons capacity and one of 25 tons capacity.

Mooring of tankers at the wharves of the Vridi Canal is made at slack water and departure at the end of high tide. It is also to be noted that, in spite of reinforced moorings, the mooring to these wharves is sometimes rendered impossible because of the heavy swell which builds up in the canal.

Prime materials for manufacture of fertilizers are received in bulk at the "Siveng Quay" where discharge is by derricks and suckers.

The banana carrier quays are provided with air conditioned and stocking hangers as well as necessary equipment for loading.

SOGIP Shipping: Private quay for fishing vessels. Cold room with capacity of 2,200 tonnes at −20°C.

STEVEDORES: Gangs must be ordered before 1700 hrs. on the previous day.

MEDICAL: All medical services and hospitalisation can be arranged without difficulty. Crew members are obliged to have valid certificates against yellow fever.

TANKERS: (Also see "Berthing".)

Shipmaster's Report: The Sea Line Berth at Port Bouet near Abidjan.

(a) Introduction: Vessel ordered to part discharge 21,000 tons of crude. With a max. draft of 48 ft. 6 in., this was the largest vessel to use these facilities; the previous largest being about 60,000 d.w.t. (1973).

(b) Approach from sea: Coast line is low with few distinguishing marks. Outline picked up at about 18 miles range (using Marconi Raymark), at about the same time as 100 fathom line was crossed. Coast is very steep-to with a pronounced rift in sea bed leading to canal entrance in Abidjan.

(c) Anchorage: Vessel anchored about 2 miles from sea line terminal at Port Bouet. The usual anchorage is to West of canal, which would permit a more suitable approach to the berth.

(d) Berth: The sea berth is situated about 1 mile S.S.E. of Port Bouet light. According to chart prepared by terminal authorities Societe Ivoirienne de Raffinage (SIR), the depths of water in the berth are 16 m. aft and 19 m. for'd, at chart datum. Members of the diving team and terminal representatives are of the opinion that there is greater than 1 m. more water than indicated; this is backed up by observed soundings of for'd depth of 21 m., with a rise of tide of 0.5 m.

Moorings consist of four 6 in. shore wires from buoys aft; 4 similar wires for'd, 2 from buoys, 2 from the sea bed; both anchors are used with about 8 or 9 shackles of cable on each.

Hoses are connected on port side, 2×12 in. leading to a 1×24 in.×5 km. sea line. Back pressure is limited to 7 kg./sq.cm. (about 100 lb./sq.in.). Berth is aligned to head into the prevailing Southwesterly wind. Unfortunately this places the vessel beam on to the current which is unpredictable in both magnitude and direction. After 9 years' experience at the berth, the diving team are unable to predict for a particular time if the current will run at all, or in what direction or at what strength. Current velocities of up to 2.5 knots are normal. If the current starts to run at this strength at an early stage of a berthing operation it is probable that the operation will have to be abandoned.

(e) Berthing: Approach to the berth is made on a heading of 145° in line with buoys A and B on SIR chart. During much of the approach the vessel is within 5 cables of the shore, but, with one exception, the depth of water is adequate.

When the vessel was between 1 and 2 ship's lengths from Buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h., which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

Notice: *Information for the attention of the Masters of tankers mooring at the S.I.R. sea-line of Port Bouet:*

The conditions at this sea-line necessitate the presence on board of the following personnel during operations of mooring and connection of the hoses:

1 Superintendent who combines the duties of Mooring Master, Loading Master and chief diver.
2 Divers who also assist in the mooring and the connecting operations.
2 Seamen for the refinery's launch.
2 Assistants for the mooring and connecting operations.

These personnel will be present until pumping starts. We would be glad if you would provide meals for them during this period (from 8 to 12 hours normally).

Usually the Superintendent and the refinery's representative eat in the officers' mess and the rest in the crew's mess.

Once pumping has started the following personnel stay on board. The Superintendent; the refinery's representative; 2 seamen; 1 assistant.

We would be grateful if you can provide cabins and meals in the officers' mess for the Superintendent and refinery's representative and sleeping quarters and meals for the 3 other persons until the tanker's departure.

The refinery's launch the "Sirius" helps during the mooring and connecting operations and serves as a liaison launch between the tanker and the refinery. Would you reserve a mooring berth on the starboard side of the tanker with pilot's ladder for access aboard? The mooring ropes are provided by the refinery and should be reserved for the launch "Sirius". The Agent's launch or any launch other than the "Sirius" should moor forward of this berth and should be provided with its own pilot's ladder.

We thank you in advance for your kind cooperation in this matter and wish you a satisfactory stay on the sea-line.

Signed: General Manager, Societe Ivoirienne de Raffinage.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

CONSULS: The following countries are represented locally:

Algeria
Argentina
Austria
Belgium
Benin
Brazil
Canada
Central African

Zaire
Zambia

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

WATCHMEN: Services of shore watchmen are recommended. See "Notice".

PIRACY: February 1988: Whilst at anchor overnight awaiting berth, vessel was boarded by armed pirates who threatened crew and stole stores and crew effects.

Vessel berthed in morning and worked from 0730 hrs. – 1930 hrs. During the night, whilst alongside, the vessel was again boarded and plundered.

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at Quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction. See "Notice" below.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

DEVELOPMENTS: The port extension project of the Locodjro site (West bank of the Bay of Banco) to be constructed. Facilities to include container terminal, mineral terminal, additional fishing port, clinker berth and additional general cargo berths. 2×40 ton gantry cranes to be installed.

NOTICE: Agent's Notice to Masters: 1986.

REF: DOCUMENTS – SECURITY – WARNINGS.

In order to comply with the various local regulations and meet the different Port of Abidjan Authorities requirements, we give below, the necessary instructions, information and warnings.

(A) *Documents:*

Upon arrival you will have to hand over the following documents to the corresponding authorities:

1. *To the Agent:* 4 Crew Lists, 4 Ports of Call Lists, 4 Passenger Lists, 1 Store List, 1 Animal List, 1 Crew Declaration List, 1 Drugs List, 1 Arms and Ammunition List, 2 full sets of Inward Manifests.
2. *To the Customs Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Store List, 1 Crew Declaration List, 1 Drugs List, 1 full set Inward Manifest.
3. *To the Police Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Arms and Ammunition List.
4. *To the Health Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Vaccination List.
5. *Remarks:* We must stress that all these above documents must be correctly and accurately completed, your attention is especially drawn to the documents given to the Customs Officers: Store List, Crew Declaration List, Drugs List, which will be thoroughly checked and any discrepancies could lead to heavy fines to the vessel.

   Customs Regulations require that any item which is not absolutely necessary to the functioning of the ship must be declared. This concerns mainly any television, radio, video, or other electrical apparatus belonging to the ship which have to be mentioned on the Store List together with all items usually declared.

   Also for exchange control operations, Customs require that any amount of foreign currency which is either personal to a crew member or belonging to the ship's funds in excess of CFA150.000 per man (approx. U.S.$335.00) must be declared on the Provisions or Crew Declaration List.

(B) *Security:*

Your are hereby advised that security wise, Abidjan Port is quite unsafe these days, and Master must protect his ship against the following:

Robberies and Pilferage of Cargo and Vessel Property: Police Officers watch is compulsory on vessel discharging foodstuffs. However, additional watchmen (private or police) are recommended to avoid robberies and pilferage of cargo. Please discuss this matter with your Agent who can order the necessary watchmen at your request and for your account.

It is further recommended to keep all cabins closed and keep a watch at the entrance to the living quarters.

Prostitution: Even though they are not allowed to enter the port area, prostitutes board vessels either from shore or lagoon side.

You are hereby informed that such practices are strictly prohibited and vessel will be prosecuted and fines levied by police in case prostitutes are found on board your vessel.

(C) *Warnings/Smuggling:* We draw your attention on the strictness of the local Customs Regulations and hereby warn you and your crew of the heavy risks taken in case of any attempt at smuggling.

We strongly warn crew members not to deal with anyone trying to sell local produce (such as cocoa or coffee) or to buy any part of your cargo or personal effects (such as radios, televisions, videos, watches, sugar, rice, fish, etc.). Please note that some of these "dealers" are "Agent Provocateurs" and the Customs usually prosecute the vessel with fines out of all proportions.

You are also reminded that crew members are not allowed to carry in and out the port any personal effects or provisions of any value.

SHIPMASTER'S REPORT: October, 1983.

Documents: Customs are very strict on Crew Declaration and Crew Lists. Fines in case of differences are very high.

In case you are notified of a fine you should contact your P & I Club through your Agent.

Yellow Fever Certificates not compulsory.

Anchorages: Many ships that have had to anchor inside the harbour have been boarded by armed thieves – it is preferable to wait 30 miles off coast drifting rather than anchoring inside harbour waiting for berth.

Radio: "Comport" must be advised 24 hours prior to arrival. Arrival departure is governed by Vridi Channel. Navigational opening times advised by Agent. Inward bound ships are advised to arrive 30 minutes after advertised opening times as outward ships have Pilot Priority.

Berthing: Max. draft at Banana Loading Pier is 7.5 m. We always berth port side to using starboard anchor. 140,000 boxes fruit usually loaded in a 40 hour working period. Labour works as cargo is available. For bananas/pineapples, holds are pre-cooled to +8°C for survey.

Average rate of general/frozen cargo discharge at General Cargo Piers is max. 15 t.p.h. depending on transport available.

Fresh Water: No difficulties at General Cargo Quays, but only available at Banana Quay by barges (whose services are unreliable). Always preferable to give as much notice as possible.

Watchmen: 2 ships' watchmen on duty at night plus 2 shore watchmen. The latter are regulars appointed by Ship's Master.

Regulations: Please note that security net under gangway is compulsory. The lack of it would result in a heavy fine from the Port Authority.

If unauthorised persons are allowed on board this may result in heavy fines by the Port Authority.

Crew Safety: It is advisable to take a taxi when proceeding ashore.

It cannot be too stongly emphasised that NO person should venture ashore on his own either by day or night.

SHIPMASTER'S REPORT: February 1985.

Customs: It is advisable to declare all valuable goods such as television sets, video-recorders, video tapes, radios and binoculars, also soft drinks and beer, as it is common for Customs to impose fines of $1,000 - $2,000 if incorrect declaration is made.

The Ship's Stores List/Provisions List must also be correct otherwise fines will be imposed.

AUTHORITY: Port Autonome D'Abidjan, BP. V85, Abidjan, Ivory Coast. Tel: 32-01-66, 33-14-24. *Telex:* 22778 Dgpaa CI. *Contact:* Director General.

AGENT: Socopao Cote d'Ivoire, 01 B.P. 1297, Abidjan 01, Ivory Coast. Tel: 32-02-11, 32-71-47. Telex (Shipping): 23562, 23745, 23755, 23413 Freight CI. Cables: "Freight Abidjan". FAX: 32-92-05, 32-71-47.

SAN PEDRO: 04.44 N. 06.38 W. (See Plan)

LOCATION: The Port of San Pedro is located at the old mouth of the river bearing the same name. The river has been diverted and now comes into the sea to the East of the hill on which a light is located.

DOCUMENTS:

3 copies Crew List.
3 copies List of Ports of Call.
1 copy Passenger List.
1 copy Declaration of Arms and Ammunition.
3 copies Kroo List.
1 copy Health Declaration.
6 copies of Manifest.
2 copies Bills of Lading.
3 copies List of Hazardous Cargo, disembarking or in transit.

APPROACHES: *In Clear Weather:* The first recognisable Port characteristics are:

1. The lighthouse to the N.E. of the Port on a hill (Lat. 4° 44′ 55″ N., Long. 6° 36′ 00″ W.) – which is a four-sided pylon 26.8 m. high on the top of which is a square metal shelter with horizontal red and white stripes and on its middle part on the Southern side is a white sphere. The height of the light is 160.3 m.

2. Hertzien Relays: Cylindrical telecommunications tower, grey in colour and 59.3 m. high. It is located 1,100 m. – 268° from the light of the Eastern Jetty on a hill dominating the Port. Its height in relation to sea level, is 127 m. At the top of it is a metal aerial mast.

In Misty Weather: There is an aeronautical radio beacon (Lat. 4° 46′ 12″ N., Long. 6° 38′ 58″ W.) operating during the day from 0730 hrs. to 1830 hrs. and at night on request (frequency 330 A1 call sign "SAP".). The request for night operation must be made to ASECNA at Abidjan.

PILOTAGE: Pilotage is compulsory for entering and leaving and for moving within the pilotage limits, defined by a circle of 4 miles radius centred on the base of the Western Jetty (Pointe Quiquerez).

All vessels wishing to enter the pilotage area of the Port must send at least 24 hours prior to arrival, a telegram or a telex stating ETA, overall length, draft, nature and tonnage of goods to be loaded or unloaded.

The telegram or telex should be sent for the attention of the Port Commandant, or otherwise to the Consignee.

The pilot boat is a cutter which has a black hull and white superstructures marked "Pilote San Pedro". The usual summoning signals for the Pilot are also supported by 2 long and 1 short (G) audible signals on the siren.

Pilotage is available day and night for leaving the port and for movements at the quay. Berthing at the buoys only possible during daylight hours. Departures are announced at the daily port conference.

Pilot service not available 24th & 31st December (1800 – 0800 hrs.).

Three hours before sailing, the ship's Agent must confirm or modify the time for sailing as is expected.

The vessel must confirm again its departure 1 hour before sailing (by VHF or by any other means if the vessel does not have VHF).

RESTRICTIONS: Tides impose no restriction. However vessels drawing 34 ft. (the authorised maximum) operate during HW to facilitate their movements.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)
Oil Berth	90	5.5
Berth No. 1	155	10.5
Berth No. 2	200	10.5
Berth No. 3	190	10.2
Berth No. 4	195	10.5
Berth No. 5	140	10.5
Berth No. 6	150	8.5
South Quay	150	8.5
West Quay	586	10.5

RADIO: Vessels anchored can communicate with the Port Captaincy on VHF (Channel 16 and 12 with permanent watch). There is permanent radiotelephone watch on 2182 kHz, as well as communication by light signals.

TUGS: One tug of 1,300 h.p.

BERTHING: The port protection structures comprise of a Western breakwater 265 m. long and a breakwater to the East of 145 m. length. Access is by means of a 120 m. wide channel dredged to 12.50 m. The entrance passage is 200 m. wide. A heading of 291.5° leads to the port.

The channel gives access to a manoeuvring basin of 400 m. diameter dredged to 11.8 m. depth.

South Quay: Length 155 m., depth 9 m.
West Quay: Length 181 m., depth 11 m. and 405 m., depth 12 m.
Service Quay: Length 109 m., depth 4 m.

There are 5 loading points at buoys for loading timber: 2 to the North of the Western Quay, and 3 to the North of the Eastern Breakwater, which can take vessels with a maximum length up to 140 m. at 3 buoys and 200 m. at 2 buoys. Depth 11 m.

Cement Handling Berth: Length 200 m. Vessels berth against dolphins and secure to buoys fore and aft. Depth of water 11 m.

There is also inside the Port a small tanker berth for vessels not exceeding 100 m. on the Eastern Breakwater. The areas located to the North and East of these berths are used for storing timber.

Also see "Max. Size".

STEVEDORES: Work around the clock.

MEDICAL: There is a hospital with limited facilities at San Pedro. For serious cases, patients are taken by medical plane to Abidjan (which is 1 hour's flight away).

EQUIPMENT: No quay cranes, cargo handled by ships gear.

One mobile crane, capacity 60 tons. One 30 ton "Challenger" for handling containers. Lighters of 200 ton and 300 ton capacity.

FRESH WATER: Available at the quays, rate 30 t.p.h. Also available at the buoys by barge, capacity 300 tons, rate 25 t.p.h.

FUEL: Available alongside at the quays by road tanker.

CONSULS: France.

REPAIRS: There are several workshops for effecting small repairs. The Port Authority also undertakes repairs, contact Harbour Master.

T.S.M. workshop: Welding painting, engine maintenance, etc. Tel. 71-16-65.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

AIRPORT: Daily air link with Abidjan

TIME: GMT.

HOLIDAYS: *Public:* December 7th, (Independence Day); May 1st, (May Day).

Legal Holidays: The following legal holidays are considered public holidays with pay unless they fall on a Sunday:

January 1st; End of Muslim's Lent (Ramadan); November 1st, All Saints' Day; Ascension Day; Assumption; Easter Monday; Whit Monday; December 25th.

It should also be noted that when December 7th and May 1st fall on a Sunday the following day is considered a public holiday. The same when December 7th falls on a Tuesday or Friday, the preceeding or following day is considered holiday.

POLICE/AMBULANCE/FIRE: Police Tel: 71-13-43; Ambulance Tel: 71-10-25; Hospital Tel: 71-11-21 and 71-16-01.

GENERAL: *Tides & Currents:* The maximum tidal range is 1.5 m. (about half an hour ahead of the tidal times at Abidjan).

The slight S.W'ly current at the Port entrance of 0.5 to 1 knot is negligible inside the Port.

There is a slight tidal rip at the South Quay. But in the whole port and particularly at the South Quay, there is a considerable undertow between the months of June and September.

Weather: The tropical climate with tradewinds is rather mild (maximum 30°C, minimum 20°C, the absolute minimum being registered in January 15°C).

The rain seasons go from May to August; the region is irrigated by tornadoes from April to May and September to October. The average rate of rainfall reaches 1,600 mm./year.

Fresh Food: Only available in small quantities.

Roads: A tarmacadam road connects with Abidjan, distance 450 km.

Port Officials: The Port Captaincy, the pilotage and tug control are all in the Captaincy building which is a two storey structure, raised on a circular dias located at Pointe Quiquerez. The Customs are within the Port to the South of the Western Quay.

DEVELOPMENTS: By 1990, in order to cater for increased exports and imports, the Port will have 4 anchorage points and 7 quay berths, one of which will be multi-purpose. This will involve extending the Port to the North and enlarging the Northern Dock, creating an Inner Port, extension of dredging, creation of open storage areas and construction of quays. In all, the plan, from a long term aspect, is to have 10 km. of quay, 500 hectares of port industrial area and 200 hectares of commercial areas.

AUTHORITY: Port Autonome de San Pedro, B.P.340, San Pedro, Ivory Coast. *Tel:* 71.20.80 or 71.14.79. *Telex:* 99102,99112 Comport-CI. *Cables:* Comport San Pedro. *Contact:* Mr. Ogou Attemene, Director General. Captain Guy Lambert, Harbour Master (VHF Channel 16 or 2182 kHz). Tel: 71-16-65.

AGENT: Socopao Cote d' Ivoire, B.P. 370, San Pedro, Ivory Coast. Tel: 711133, 712232. Telex: 99104 Freight CI. Cables: "Freight San Pedro".

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:
2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration
2 Passenger Lists.

For Agent
Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine
1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft. elsewhere there is adequate swinging room for the largest vesse

At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side.

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft. concrete ramp. There is a floating barge/ramp at Berth No. 8. Full container facilities are available at Berths 9, 10 and 11; and in addition there are approx. 50 acres of terminal area with storage space for 5,000 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handling bulk cargo. However, when necessary, consignees make their own discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port with dangerous cargo/goods on board are required through the Master or Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before the vessel's ETA and must include:
(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbour Master for permission to go alongside for the purpose of discharging same. The application must include:
(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 ft. and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open MacGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited:* National Gypsum and Quarries Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates a wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. - 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.
FRESH WATER: Fresh water available at berth. Average delivery rate 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days' notice required.
Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.
DRY DOCKS: Dry dock facilities available.
SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. MacGregor hatches handled by crew.
CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.
CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.
CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.
REPATRIATION: Facilities available for effecting crew changes.
AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.
POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.
TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.
SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.
SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.
IDENTIFICATION CARDS: No Identification Cards required.
REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.
DELAYS: Normally there are no delays to vessels calling at the port.
GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.
Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.
Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.
AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437. *Contact:* Captain S.H. Willers, Director. Captain H.C. De Lisser, Harbour Master. Captain E.R. Myers, Deputy Harbour Master.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".
ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.
RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.
BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.
CONSULS: No consular offices in Montego Bay. See "Kingston".
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
DENSITY: Average density 1026.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
FUEL: All grades (viscosities) available. At least 4 days notice required.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:

2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration

2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft elsewhere there is adequate swinging room for the largest vesse At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft concrete ramp. There is a floating barge/ramp at Berth No. 8. Fu container facilities are available at Berths 9, 10 and 11; and in additio there are approx. 50 acres of terminal area with storage space for 5,00 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handlin bulk cargo. However, when necessary, consignees make their ow discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port wit dangerous cargo/goods on board are required through the Master o Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before th vessel's ETA and must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbou Master for permission to go alongside for the purpose of dischargin same. The application must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 ft and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open MacGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited:* National Gypsum and Quarries Limited operates a wharf at Harbou Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. - 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.
FRESH WATER: Fresh water available at berth. Average delivery rate 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days' notice required.
Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.
BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.
CONSULS: No consular offices in Montego Bay. See "Kingston".
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
DENSITY: Average density 1026.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
FUEL: All grades (viscosities) available. At least 4 days notice required.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

When the vessel was between 1 and 2 ship's lengths from Buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h., which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

Notice: *Information for the attention of the Masters of tankers mooring at the S.I.R. sea-line of Port Bouet:*

The conditions at this sea-line necessitate the presence on board of the following personnel during operations of mooring and connection of the hoses.

1 Superintendent who combines the duties of Mooring Master, Loading Master and chief diver.
2 Divers who also assist in the mooring and the connecting operations.
2 Seamen for the refinery's launch.
2 Assistants for the mooring and connecting operations.

These personnel will be present until pumping starts. We would be glad if you would provide meals for them during this period (from 8 to 12 hours normally).

Usually the Superintendent and the refinery's representative eat in the officers' mess and the rest in the crew's mess.

Once pumping has started the following personnel stay on board. The Superintendent; the refinery's representative; 2 seamen; 1 assistant.

We would be grateful if you can provide cabins and meals in the officers' mess for the Superintendent and refinery's representative and sleeping quarters and meals for the 3 other persons until the tanker's departure.

The refinery's launch the "Sirius" helps during the mooring and connecting operations and serves as a liaison launch between the tanker and the refinery. Would you reserve a mooring berth on the starboard side of the tanker with pilot's ladder for access aboard? The mooring ropes are provided by the refinery and should be reserved for the launch "Sirius". The Agent's launch or any launch other than the "Sirius" should moor forward of this berth and should be provided with its own pilot's ladder.

We thank you in advance for your kind cooperation in this matter and wish you a satisfactory stay on the sea-line.

Signed: General Manager, Societe Ivoirienne de Raffinage.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

CONSULS: The following countries are represented locally:

Algeria
Argentina
Austria
Belgium
Benin
Brazil
Canada
Central African Rep.
Chile
Colombia
Congo
Denmark
Egypt
Ethiopia
Finland
France
Gabon
Germany F.R.
Ghana
Guinea
Guinea Bissau
India
Israel
Italy
Japan
Korea
Lebanon
Liberia
Mali
Mauretania
Morocco
Netherlands
Nigeria
Norway
Poland
Romania
Senegal
Spain
Sudan
Sweden
Taiwan
Tunisia
U.S.S.R.
United Kingdom
U.S.A.
Upper Volta
Vietnam
Yugoslavia
Zaire
Zambia

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

WATCHMEN: Services of shore watchmen are recommended. See "Notice".

PIRACY: February 1988: Whilst at anchor overnight awaiting berth, vessel was boarded by armed pirates who threatened crew and stole stores and crew effects.

Vessel berthed in morning and worked from 0730 hrs. – 1930 hrs. During the night, whilst alongside, the vessel was again boarded and plundered.

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at Quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction. See "Notice" below.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

DEVELOPMENTS: The port extension project of the Locodjro site (West bank of the Bay of Banco) to be constructed. Facilities to include container terminal, mineral terminal, additional fishing port, clinker berth and additional general cargo berths. 2×40 ton gantry cranes to be installed.

NOTICE: Agent's Notice to Masters: 1986.

REF: DOCUMENTS – SECURITY – WARNINGS.

In order to comply with the various local regulations and meet the different Port of Abidjan Authorities requirements, we give below, the necessary instructions, information and warnings.

(A) *Documents:*

Upon arrival you will have to hand over the following documents to the corresponding authorities:

1. *To the Agent:* 4 Crew Lists, 4 Ports of Call Lists, 4 Passenger Lists, 1 Store List, 1 Animal List, 1 Crew Declaration List, 1 Drugs List, 1 Arms and Ammunition List, 2 full sets of Inward Manifests.
2. *To the Customs Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Store List, 1 Crew Declaration List, 1 Drugs List, 1 full set Inward Manifest.
3. *To the Police Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Arms and Ammunition List.
4. *To the Health Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Vaccination List.
5. *Remarks:* We must stress that all these above documents must be correctly and accurately completed, your attention is especially drawn to the documents given to the Customs Officers: Store List, Crew Declaration List, Drugs List, which will be thoroughly checked and any discrepancies could lead to heavy fines to the vessel.

   Customs Regulations require that any item which is not absolutely necessary to the functioning of the ship must be declared. This concerns mainly any television, radio, video, or other electrical apparatus belonging to the ship which have to be mentioned on the Store List together with all items usually declared.

   Also for exchange control operations, Customs require that any amount of foreign currency which is either personal to a crew member or belonging to the ship's funds in excess of CFA150.000 per man (approx. U.S.$335.00) must be declared on the Provisions or Crew Declaration List.

(B) *Security:*

Your are hereby advised that security wise, Abidjan Port is quite unsafe these days, and Master must protect his ship against the following:

Robberies and Pilferage of Cargo and Vessel Property: Police Officers watch is compulsory on vessel discharging foodstuffs. However, additional watchmen (private or police) are recommended to avoid robberies and pilferage of cargo. Please discuss this matter with your Agent who can order the necessary watchmen at your request and for your account.

It is further recommended to keep all cabins closed and keep a watch at the entrance to the living quarters.

Prostitution: Even though they are not allowed to enter the port area, prostitutes board vessels either from shore or lagoon side.

You are hereby informed that such practices are strictly prohibited and vessel will be prosecuted and fines levied by police in case prostitutes are found on board your vessel.

(C) *Warnings/Smuggling:* We draw your attention on the strictness of the local Customs Regulations and hereby warn you and your crew of the heavy risks taken in case of any attempt at smuggling.

We strongly warn crew members not to deal with anyone trying to sell local produce (such as cocoa or coffee) or to buy any part of your cargo or personal effects (such as radios, televisions, videos, watches, sugar, rice, fish, etc.). Please note that some of these "dealers" are "Agent Provocateurs" and the Customs usually prosecute the vessel with fines out of all proportions.

You are also reminded that crew members are not allowed to carry in and out the port any personal effects or provisions of any value.

SHIPMASTER'S REPORT: October, 1983.

Documents: Customs are very strict on Crew Declaration and Crew Lists. Fines in case of differences are very high.

In case you are notified of a fine you should contact your P & I Club through your Agent.

Yellow Fever Certificates not compulsory.

Anchorages: Many ships that have had to anchor inside the harbour have been boarded by armed thieves – it is preferable to wait 30 miles off coast drifting rather than anchoring inside harbour waiting for berth.

Radio: "Comport" must be advised 24 hours prior to arrival. Arrival departure is governed by Vridi Channel. Navigational opening times advised by Agent. Inward bound ships are advised to arrive 30 minutes after advertised opening times as outward ships have Pilot Priority.

Berthing: Max. draft at Banana Loading Pier is 7.5 m. We always berth port side to using starboard anchor. 140,000 boxes fruit usually loaded in a 40 hour working period. Labour works as cargo is available. For bananas/pineapples, holds are pre-cooled to +8°C for survey.

Average rate of general/frozen cargo discharge at General Cargo Piers is max. 15 t.p.h. depending on transport available.

Fresh Water: No difficulties at General Cargo Quays, but only available at Banana Quay by barges (whose services are unreliable). Always preferable to give as much notice as possible.

Watchmen: 2 ships' watchmen on duty at night plus 2 shore watchmen. The latter are regulars appointed by Ship's Master.

Regulations: Please note that security net under gangway is compulsory. The lack of it would result in a heavy fine from the Port Authority.

If unauthorised persons are allowed on board this may result in heavy fines by the Port Authority.

Crew Safety: It is advisable to take a taxi when proceeding ashore.

It cannot be too stongly emphasised that NO person should venture ashore on his own either by day or night.

SHIPMASTER'S REPORT: February 1985.

Customs: It is advisable to declare all valuable goods such as television sets, video-recorders, video tapes, radios and binoculars, also soft drinks and beer, as it is common for Customs to impose fines of $1,000 - $2,000 if incorrect declaration is made.

The Ship's Stores List/Provisions List must also be correct otherwise fines will be imposed.

AUTHORITY: Port Autonome D'Abidjan, BP. V85, Abidjan, Ivory Coast. *Tel:* 32-01-66, 33-14-24. *Telex:* 22778 Dgpaa CI. *Contact:* Director General.

AGENT: Socopao Cote d'Ivoire, 01 B.P. 1297, Abidjan 01, Ivory Coast. Tel: 32-02-11, 32-71-47. Telex (Shipping): 23562, 23745, 23755, 23413 Freight CI. Cables: "Freight Abidjan". FAX: 32-92-05, 32-71-47.

SAN PEDRO: 04.44 N. 06.38 W. (See Plan)

LOCATION: The Port of San Pedro is located at the old mouth of the river bearing the same name. The river has been diverted and now comes into the sea to the East of the hill on which a light is located.

DOCUMENTS:

3 copies Crew List.
3 copies List of Ports of Call.
1 copy Passenger List.
1 copy Declaration of Arms and Ammunition.
3 copies Kroo List.
1 copy Health Declaration.
6 copies of Manifest.
3 copies Bills of Lading.
3 copies List of Hazardous Cargo, disembarking or in transit.

APPROACHES: *In Clear Weather:* The first recognisable Port characteristics are:

1. The lighthouse to the N.E. of the Port on a hill (Lat. 4° 44′ 55″ N., Long. 6° 36′ 00″ W.) – which is a four-sided pylon 26.8 m. high on the top of which is a square metal shelter with horizontal red and white stripes and on its middle part on the Southern side is a white sphere. The height of the light is 160.3 m.

2. Hertzien Relays: Cylindrical telecommunications tower, grey in colour and 59.3 m. high. It is located 1,100 m. – 268° from the light of the Eastern Jetty on a hill dominating the Port. Its height in relation to sea level, is 127 m. At the top of it is a metal aerial mast.

In Misty Weather: There is an aeronautical radio beacon (Lat. 4° 46′ 12″ N., Long. 6° 38′ 58″ W.) operating during the day from 0730 hrs. to 1830 hrs. and at night on request (frequency 330 A1 call sign "SAP".). The request for night operation must be made to ASECNA at Abidjan.

PILOTAGE: Pilotage is compulsory for entering and leaving and for moving within the pilotage limits, defined by a circle of 4 miles radius centred on the base of the Western Jetty (Pointe Quiquerez).

All vessels wishing to enter the pilotage area of the Port must send at least 24 hours prior to arrival, a telegram or a telex stating ETA, overall length, draft, nature and tonnage of goods to be loaded or unloaded.

The telegram or telex should be sent for the attention of the Port Commandant, or otherwise to the Consignee.

The pilot boat is a cutter which has a black hull and white superstructures marked "Pilote San Pedro". The usual summoning signals for the Pilot are also supported by 2 long and 1 short (G) audible signals on the siren.

Pilotage is available day and night for leaving the port and for movements at the quay. Berthing at the buoys only possible during daylight hours. Departures are announced at the daily port conference.

Pilot service not available 24th & 31st December (1800 – 0800 hrs.).

Three hours before sailing, the ship's Agent must confirm or modify the time for sailing as is expected.

The vessel must confirm again its departure 1 hour before sailing (by VHF or by any other means if the vessel does not have VHF).

RESTRICTIONS: Tides impose no restriction. However vessels drawing 34 ft. (the authorised maximum) operate during HW to facilitate their movements.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)
Oil Berth	90	5.5
Berth No. 1	155	10.5
Berth No. 2	200	10.5
Berth No. 3	190	10.2
Berth No. 4	195	10.5
Berth No. 5	140	10.5
Berth No. 6	150	8.5
South Quay	150	8.5
West Quay	586	10.5

RADIO: Vessels anchored can communicate with the Port Captaincy on VHF (Channel 16 and 12 with permanent watch). There is permanent radiotelephone watch on 2182 kHz, as well as communication by light signals.

TUGS: One tug of 1,300 h.p.

BERTHING: The port protection structures comprise of a Western breakwater 265 m. long and a breakwater to the East of 145 m. length. Access is by means of a 120 m. wide channel dredged to 12.50 m. The entrance passage is 200 m. wide. A heading of 291.5° leads to the port.

The channel gives access to a manoeuvring basin of 400 m. diameter dredged to 11.8 m. depth.

South Quay: Length 155 m., depth 9 m.
West Quay: Length 181 m., depth 11 m. and 405 m., depth 12 m.
Service Quay: Length 109 m., depth 4 m.

There are 5 loading points at buoys for loading timber: 2 to the North of the Western Quay, and 3 to the North of the Eastern Breakwater, which can take vessels with a maximum length up to 140 m. at 3 buoys and 200 m. at 2 buoys. Depth 11 m.

Cement Handling Berth: Length 200 m. Vessels berth against dolphins and secure to buoys fore and aft. Depth of water 11 m.

There is also inside the Port a small tanker berth for vessels not exceeding 100 m. on the Eastern Breakwater. The areas located to the North and East of these berths are used for storing timber.

Also see "Max. Size".

STEVEDORES: Work around the clock.

MEDICAL: There is a hospital with limited facilities at San Pedro. For serious cases, patients are taken by medical plane to Abidjan (which is 1 hour's flight away).

EQUIPMENT: No quay cranes, cargo handled by ships gear.

One mobile crane, capacity 60 tons. One 30 ton "Challenger" for handling containers. Lighters of 200 ton and 300 ton capacity.

FRESH WATER: Available at the quays, rate 30 t.p.h. Also available at the buoys by barge, capacity 300 tons, rate 25 t.p.h.

FUEL: Available alongside at the quays by road tanker.

CONSULS: France.

REPAIRS: There are several workshops for effecting small repairs. The Port Authority also undertakes repairs, contact Harbour Master.

T.S.M. workshop: Welding painting, engine maintenance, etc. Tel. 71-16-65.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

AIRPORT: Daily air link with Abidjan

TIME: GMT.

HOLIDAYS: *Public:* December 7th, (Independence Day); May 1st, (May Day).

Legal Holidays: The following legal holidays are considered public holidays with pay unless they fall on a Sunday:

January 1st; End of Muslim's Lent (Ramadan); November 1st, All Saints' Day; Ascension Day; Assumption; Easter Monday; Whit Monday; December 25th.

It should also be noted that when December 7th and May 1st fall on a Sunday the following day is considered a public holiday. The same when December 7th falls on a Tuesday or Friday, the preceeding or following day is considered holiday.

POLICE/AMBULANCE/FIRE: Police Tel: 71-13-43; Ambulance Tel: 71-10-25; Hospital Tel: 71-11-21 and 71-16-01.

GENERAL: *Tides & Currents:* The maximum tidal range is 1.5 m. (about half an hour ahead of the tidal times at Abidjan).

The slight S.W'ly current at the Port entrance of 0.5 to 1 knot is negligible inside the Port.

There is a slight tidal rip at the South Quay. But in the whole port and particularly at the South Quay, there is a considerable undertow between the months of June and September.

Weather: The tropical climate with tradewinds is rather mild (maximum 30°C, minimum 20°C, the absolute minimum being registered in January 15°C).

The rain seasons go from May to August; the region is irrigated by tornadoes from April to May and September to October. The average rate of rainfall reaches 1,600 mm./year.

Fresh Food: Only available in small quantities.

Roads: A tarmacadam road connects with Abidjan, distance 450 km.

Port Officials: The Port Captaincy, the pilotage and tug control are all in the Captaincy building which is a two storey structure, raised on a circular dias located at Pointe Quiquerez. The Customs are within the Port to the South of the Western Quay.

DEVELOPMENTS: By 1990, in order to cater for increased exports and imports, the Port will have 4 anchorage points and 7 quay berths, one of which will be multi-purpose. This will involve extending the Port to the North and enlarging the Northern Dock, creating an Inner Port, extension of dredging, creation of open storage areas and construction of quays. In all, the plan, from a long term aspect, is to have 10 km. of quay, 500 hectares of port industrial area and 200 hectares of commercial areas.

AUTHORITY: Port Autonome de San Pedro, B.P.340, San Pedro, Ivory Coast. *Tel:* 71.20.80 or 71.14.79. *Telex:* 99102,99112 Comport-CI. *Cables:* Comport San Pedro. *Contact:* Mr. Ogou Attemene, Director General. Captain Guy Lambert, Harbour Master (VHF Channel 16 or 2182 kHz). Tel: 71-16-65.

AGENT: Socopao Cote d' Ivoire, B.P. 370, San Pedro, Ivory Coast. Tel: 711133, 712232. Telex: 99104 Freight CI. Cables: "Freight San Pedro".

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:

2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration

2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.

B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.

C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.

D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.

E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft. elsewhere there is adequate swinging room for the largest vessel. At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side.

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft. concrete ramp. There is a floating barge/ramp at Berth No. 8. Full container facilities are available at Berths 9, 10 and 11; and in addition there are approx. 50 acres of terminal area with storage space for 5,000 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handling bulk cargo. However, when necessary, consignees make their own discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port with dangerous cargo/goods on board are required through the Master or Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before the vessel's ETA and must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbour Master for permission to go alongside for the purpose of discharging same. The application must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 ft. and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open MacGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited:* National Gypsum and Quarries Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates 1 wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. - 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.

FRESH WATER: Fresh water available at berth. Average delivery rate 200 t.p.h.

FUEL: All grades (viscosities) available. At least 2 days' notice required.

Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.

FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.

CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.

DRY DOCKS: Dry dock facilities available.

SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.

GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.

OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. MacGregor hatches handled by crew.

CERTIFICATES:

Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.

CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.

CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.

REPATRIATION: Facilities available for effecting crew changes.

AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.

TIME: Local time is GMT minus 5 hours.

HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.

TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.

SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.

SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.

IDENTIFICATION CARDS: No Identification Cards required.

REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.

DELAYS: Normally there are no delays to vessels calling at the port.

GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.

Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.

Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.

AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437. *Contact:* Captain S.H. Willers, Director. Captain H.C. De Lisser, Harbour Master. Captain E.R. Myers, Deputy Harbour Master.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".

ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.

RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.

MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.

CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.

BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.

STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.

MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.

CONSULS: No consular offices in Montego Bay. See "Kingston".

REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.

DENSITY: Average density 1026.

FRESH WATER: Can be supplied from the dock. 30 t.p.h.

FUEL: All grades (viscosities) available. At least 4 days notice required.

FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.

SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.

AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.

POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.

IDENTIFICATION CARDS: Recommended for crew.

AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:

2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration

2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 f elsewhere there is adequate swinging room for the largest vesse At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's sid

Ro/Ro facilities are located at Berth No. 1, where there is an 80 f concrete ramp. There is a floating barge/ramp at Berth No. 8. Fu container facilities are available at Berths 9, 10 and 11; and in additio there are approx. 50 acres of terminal area with storage space for 5,00 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handlin bulk cargo. However, when necessary, consignees make their ow discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port wi dangerous cargo/goods on board are required through the Master o Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before th vessel's ETA and must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbou Master for permission to go alongside for the purpose of dischargin same. The application must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 f and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can hand similar size containers.

Developments: Rails on Berth 11 have been extended by 200 f Adjacent to this extension it is proposed to erect a 100 ft. berthin platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtai accurate ETA from vessels. Time: 1200 hrs. the working day befor vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates

Stevedores normally rig and open, but crew open MacGregor hatches All necessary gear supplied by stevedores except rain tents and specia lifts requiring special gear, which vessel must supply. Average unloadin rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited* National Gypsum and Quarries Limited operates a wharf at Harbou Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 f beam are normally loaded. Bulk rock loading facilities capable of loadin crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newpor East for loading and unloading lumber, corn and animal feed ingredients

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft. × 60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculatio required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates 1 wharf which is situated at Harbour Head and is known as the Easter Terminal. The jetty is 325 ft. long and will accommodate vessels up t 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used fo receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft – 31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleu from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 f (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. - 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loadin and unloading packaged and drummed lubricating oil on freighters fo export to various countries throughout Central America and th Caribbean.

Other materials exported here are lubricating oil in bulk and vario grades of asphalt in drums.

DENSITY: Average density 1026.
FRESH WATER: Fresh water available at berth. Average delivery rate 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days' notice required.
Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

Spanish Consul	22856
Swedish Consulate	36737
Swiss Consulate General	23347

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.
DRY DOCKS: Dry dock facilities available.
SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. MacGregor hatches handled by crew.
CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.
CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.
CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.
REPATRIATION: Facilities available for effecting crew changes.
AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.
POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.
TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.
SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.
SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.
IDENTIFICATION CARDS: No Identification Cards required.
REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.
DELAYS: Normally there are no delays to vessels calling at the port.
GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.
Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.
Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.
AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437. *Contact:* Captain S.H. Willers, Director. Captain H.C. De Lisser, Harbour Master. Captain E.R. Myers, Deputy Harbour Master.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".
ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.
RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.
BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.
CONSULS: No consular offices in Montego Bay. See "Kingston".
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
DENSITY: Average density 1026.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
FUEL: All grades (viscosities) available. At least 4 days notice required.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

When the vessel was between 1 and 2 ship's lengths from Buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h., which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

Notice: *Information for the attention of the Masters of tankers mooring at the S.I.R. sea-line of Port Bouet:*

The conditions at this sea-line necessitate the presence on board of the following personnel during operations of mooring and connection of the hoses.

1 Superintendent who combines the duties of Mooring Master, Loading Master and chief diver.

2 Divers who also assist in the mooring and the connecting operations.

2 Seamen for the refinery's launch.

2 Assistants for the mooring and connecting operations.

These personnel will be present until pumping starts. We would be glad if you would provide meals for them during this period (from 8 to 12 hours normally).

Usually the Superintendent and the refinery's representative eat in the officers' mess and the rest in the crew's mess.

Once pumping has started the following personnel stay on board. The Superintendent; the refinery's representative; 2 seamen; 1 assistant.

We would be grateful if you can provide cabins and meals in the officers' mess for the Superintendent and refinery's representative and sleeping quarters and meals for the 3 other persons until the tanker's departure.

The refinery's launch the "Sirius" helps during the mooring and connecting operations and serves as a liaison launch between the tanker and the refinery. Would you reserve a mooring berth on the starboard side of the tanker with pilot's ladder for access aboard? The mooring ropes are provided by the refinery and should be reserved for the launch "Sirius". The Agent's launch or any launch other than the "Sirius" should moor forward of this berth and should be provided with its own pilot's ladder.

We thank you in advance for your kind cooperation in this matter and wish you a satisfactory stay on the sea-line.

Signed: General Manager, Societe Ivoirienne de Raffinage.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

CONSULS: The following countries are represented locally:

Algeria
Argentina
Austria
Belgium
Benin
Brazil
Canada
Central African Rep.
Chile
Colombia
Congo
Denmark
Egypt
Ethiopia
Finland

U.S.S.R.
United Kingdom
U.S.A.
Upper Volta
Vietnam
Yugoslavia
Zaire
Zambia

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

WATCHMEN: Services of shore watchmen are recommended. See "Notice".

PIRACY: February 1988: Whilst at anchor overnight awaiting berth, vessel was boarded by armed pirates who threatened crew and stole stores and crew effects.

Vessel berthed in morning and worked from 0730 hrs. – 1930 hrs. During the night, whilst alongside, the vessel was again boarded and plundered.

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at Quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction. See "Notice" below.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

DEVELOPMENTS: The port extension project of the Locodjro site (West bank of the Bay of Banco) to be constructed. Facilities to include container terminal, mineral terminal, additional fishing port, clinker berth and additional general cargo berths. 2×40 ton gantry cranes to be installed.

NOTICE: Agent's Notice to Masters: 1986.

REF: DOCUMENTS – SECURITY – WARNINGS.

In order to comply with the various local regulations and meet the different Port of Abidjan Authorities requirements, we give below, the necessary instructions, information and warnings.

(A) *Documents:*

Upon arrival you will have to hand over the following documents to the corresponding authorities:

1. *To the Agent:* 4 Crew Lists, 4 Ports of Call Lists, 4 Passenger Lists, 1 Store List, 1 Animal List, 1 Crew Declaration List, 1 Drugs List, 1 Arms and Ammunition List, 2 full sets of Inward Manifest.
2. *To the Customs Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Store List, 1 Crew Declaration List, 1 Drugs List, 1 full set Inward Manifest.
3. *To the Police Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Arms and Ammunition List.
4. *To the Health Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Vaccination List.
5. *Remarks:* We must stress that all these above documents must be correctly and accurately completed, your attention is especially drawn to the documents given to the Customs Officers: Store List, Crew Declaration List, Drugs List, which will be thoroughly checked and any discrepancies could lead to heavy fines to the vessel.

   Customs Regulations require that any item which is not absolutely necessary to the functioning of the ship must be declared. This concerns mainly any television, radio, video, or other electrical apparatus belonging to the ship which have to be mentioned on the Store List together with all items usually declared.

   Also for exchange control operations, Customs require that any amount of foreign currency which is either personal to a crew member or belonging to the ship's funds in excess of CFA150.000 per man (approx. U.S.$335.00) must be declared on the Provisions or Crew Declaration List.

(B) *Security:*

Your are hereby advised that security wise, Abidjan Port is quite unsafe these days, and Master must protect his ship against the following:

Robberies and Pilferage of Cargo and Vessel Property: Police Officers watch is compulsory on vessel discharging foodstuffs. However, additional watchmen (private or police) are recommended to avoid robberies and pilferage of cargo. Please discuss this matter with your Agent who can order the necessary watchmen at your request and for your account.

It is further recommended to keep all cabins closed and keep a watch at the entrance to the living quarters.

Prostitution: Even though they are not allowed to enter the port area, prostitutes board vessels either from shore or lagoon side.

You are hereby informed that such practices are strictly prohibited and vessel will be prosecuted and fines levied by police in case prostitutes are found on board your vessel.

(C) *Warnings/Smuggling:* We draw your attention on the strictness of the local Customs Regulations and hereby warn you and your crew of the heavy risks taken in case of any attempt at smuggling.

We strongly warn crew members not to deal with anyone trying to sell local produce (such as cocoa or coffee) or to buy any part of your cargo or personal effects (such as radios, televisions, videos, watches, sugar, rice, fish, etc.). Please note that some of these "dealers" are "Agent Provocateurs" and the Customs usually prosecute the vessel with fines out of all proportions.

You are also reminded that crew members are not allowed to carry in and out the port any personal effects or provisions of any value.

SHIPMASTER'S REPORT: October, 1983.

Documents: Customs are very strict on Crew Declaration and Crew Lists. Fines in case of differences are very high.

In case you are notified of a fine you should contact your P & I Club through your Agent.

Yellow Fever Certificates not compulsory.

Anchorages: Many ships that have had to anchor inside the harbour have been boarded by armed thieves – it is preferable to wait 30 miles off coast drifting rather than anchoring inside harbour waiting for berth.

Radio: "Comport" must be advised 24 hours prior to arrival. Arrival departure is governed by Vridi Channel. Navigational opening times advised by Agent. Inward bound ships are advised to arrive 30 minutes after advertised opening times as outward ships have Pilot Priority.

Berthing: Max. draft at Banana Loading Pier is 7.5 m. We always berth port side to using starboard anchor. 140,000 boxes fruit usually loaded in a 40 hour working period. Labour works as cargo is available. For bananas/pineapples, holds are pre-cooled to +8°C for survey.

Average rate of general/frozen cargo discharge at General Cargo Piers is max. 15 t.p.h. depending on transport available.

Fresh Water: No difficulties at General Cargo Quays, but only available at Banana Quay by barges (whose services are unreliable). Always preferable to give as much notice as possible.

Watchmen: 2 ships' watchmen on duty at night plus 2 shore watchmen. The latter are regulars appointed by Ship's Master.

Regulations: Please note that security net under gangway is compulsory. The lack of it would result in a heavy fine from the Port Authority.

If unauthorised persons are allowed on board this may result in heavy fines by the Port Authority.

Crew Safety: It is advisable to take a taxi when proceeding ashore.

It cannot be too stongly emphasised that NO person should venture ashore on his own either by day or night.

SHIPMASTER'S REPORT: February 1985.

Customs: It is advisable to declare all valuable goods such as television sets, video-recorders, video tapes, radios and binoculars, also soft drinks and beer, as it is common for Customs to impose fines of $1,000 - $2,000 if incorrect declaration is made.

The Ship's Stores List/Provisions List must also be correct otherwise fines will be imposed.

AUTHORITY: Port Autonome D'Abidjan, BP. V85, Abidjan, Ivory Coast. Tel: 32-01-66, 33-14-24. *Telex:* 22778 Dgpaa CI. *Contact:* Director General.

AGENT: Socopao Cote d'Ivoire, 01 B.P. 1297, Abidjan 01, Ivory Coast. Tel: 32-02-11, 32-71-47. Telex (Shipping): 23562, 23745, 23755, 23413 Freight CI. Cables: "Freight Abidjan". FAX: 32-92-05, 32-71-47.

SAN PEDRO: 04.44 N. 06.38 W. (See Plan)

LOCATION: The Port of San Pedro is located at the old mouth of the river bearing the same name. The river has been diverted and now comes into the sea to the East of the hill on which a light is located.

DOCUMENTS:

3 copies Crew List.
3 copies List of Ports of Call.
1 copy Passenger List.
1 copy Declaration of Arms and Ammunition.
3 copies Kroo List.
1 copy Health Declaration.
6 copies of Manifest.
2 copies Bills of Lading.
3 copies List of Hazardous Cargo, disembarking or in transit.

APPROACHES: *In Clear Weather:* The first recognisable Port characteristics are:

1. The lighthouse to the N.E. of the Port on a hill (Lat. 4° 44′ 55″ N., Long. 6° 36′ 00″ W.) – which is a four-sided pylon 26.8 m. high on the top of which is a square metal shelter with horizontal red and white stripes and on its middle part on the Southern side is a white sphere. The height of the light is 160.3 m.

2. Hertzien Relays: Cylindrical telecommunications tower, grey in colour and 59.3 m. high. It is located 1,100 m. – 268° from the light of the Eastern Jetty on a hill dominating the Port. Its height in relation to sea level, is 127 m. At the top of it is a metal aerial mast.

In Misty Weather: There is an aeronautical radio beacon (Lat. 4° 46′ 12″ N., Long. 6° 38′ 58″ W.) operating during the day from 0730 hrs. to 1830 hrs. and at night on request (frequency 330 A1 call sign "SAP".). The request for night operation must be made to ASECNA at Abidjan.

PILOTAGE: Pilotage is compulsory for entering and leaving and for moving within the pilotage limits, defined by a circle of 4 miles radius centred on the base of the Western Jetty (Pointe Quiquerez).

All vessels wishing to enter the pilotage area of the Port must send at least 24 hours prior to arrival, a telegram or a telex stating ETA, overall length, draft, nature and tonnage of goods to be loaded or unloaded.

The telegram or telex should be sent for the attention of the Port Commandant, or otherwise to the Consignee.

The pilot boat is a cutter which has a black hull and white superstructures marked "Pilote San Pedro". The usual summoning signals for the Pilot are also supported by 2 long and 1 short (G) audible signals on the siren.

Pilotage is available day and night for leaving the port and for movements at the quay. Berthing at the buoys only possible during daylight hours. Departures are announced at the daily port conference.

Pilot service not available 24th & 31st December (1800 – 0800 hrs.).

Three hours before sailing, the ship's Agent must confirm or modify the time for sailing as is expected.

The vessel must confirm again its departure 1 hour before sailing (by VHF or by any other means if the vessel does not have VHF).

RESTRICTIONS: Tides impose no restriction. However vessels drawing 34 ft. (the authorised maximum) operate during HW to facilitate their movements.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)
Oil Berth	90	5.5
Berth No. 1	155	10.5
Berth No. 2	200	10.5
Berth No. 3	190	10.2
Berth No. 4	195	10.5
Berth No. 5	140	10.5
Berth No. 6	150	8.5
South Quay	150	8.5
West Quay	586	10.5

RADIO: Vessels anchored can communicate with the Port Captaincy on VHF (Channel 16 and 12 with permanent watch). There is permanent radiotelephone watch on 2182 kHz, as well as communication by light signals.

TUGS: One tug of 1,300 h.p.

BERTHING: The port protection structures comprise of a Western breakwater 265 m. long and a breakwater to the East of 145 m. length. Access is by means of a 120 m. wide channel dredged to 12.50 m. The entrance passage is 200 m. wide. A heading of 291.5° leads to the port.

The channel gives access to a manoeuvring basin of 400 m. diameter dredged to 11.8 m. depth.

South Quay: Length 155 m., depth 9 m.
West Quay: Length 181 m., depth 11 m. and 405 m., depth 12 m.
Service Quay: Length 109 m., depth 4 m.

There are 5 loading points at buoys for loading timber: 2 to the North of the Western Quay, and 3 to the North of the Eastern Breakwater, which can take vessels with a maximum length up to 140 m. at 3 buoys and 200 m. at 2 buoys. Depth 11 m.

Cement Handling Berth: Length 200 m. Vessels berth against dolphins and secure to buoys fore and aft. Depth of water 11 m.

There is also inside the Port a small tanker berth for vessels not exceeding 100 m. on the Eastern Breakwater. The areas located to the North and East of these berths are used for storing timber.

Also see "Max. Size".

STEVEDORES: Work around the clock.

MEDICAL: There is a hospital with limited facilities at San Pedro. For serious cases, patients are taken by medical plane to Abidjan (which is 1 hour's flight away).

EQUIPMENT: No quay cranes, cargo handled by ships gear.

One mobile crane, capacity 60 tons. One 30 ton "Challenger" for handling containers. Lighters of 200 ton and 300 ton capacity.

FRESH WATER: Available at the quays, rate 30 t.p.h. Also available at the buoys by barge, capacity 300 tons, rate 25 t.p.h.

FUEL: Available alongside at the quays by road tanker.

CONSULS: France.

REPAIRS: There are several workshops for effecting small repairs. The Port Authority also undertakes repairs, contact Harbour Master.

T.S.M. workshop: Welding painting, engine maintenance, etc. Tel. 71-16-65.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

AIRPORT: Daily air link with Abidjan

TIME: GMT.

HOLIDAYS: *Public:* December 7th, (Independence Day); May 1st, (May Day).

Legal Holidays: The following legal holidays are considered public holidays with pay unless they fall on a Sunday:

January 1st; End of Muslim's Lent (Ramadan); November 1st, All Saints' Day; Ascension Day; Assumption; Easter Monday; Whit Monday; December 25th.

It should also be noted that when December 7th and May 1st fall on a Sunday the following day is considered a public holiday. The same when December 7th falls on a Tuesday or Friday, the preceeding or following day is considered holiday.

POLICE/AMBULANCE/FIRE: Police Tel: 71-13-43; Ambulance Tel: 71-10-25; Hospital Tel: 71-11-21 and 71-16-01.

GENERAL: *Tides & Currents:* The maximum tidal range is 1.5 m. (about half an hour ahead of the tidal times at Abidjan).

The slight S.W'ly current at the Port entrance of 0.5 to 1 knot is negligible inside the Port.

There is a slight tidal rip at the South Quay. But in the whole port and particularly at the South Quay, there is a considerable undertow between the months of June and September.

Weather: The tropical climate with tradewinds is rather mild (maximum 30°C, minimum 20°C, the absolute minimum being registered in January 15°C).

The rain seasons go from May to August; the region is irrigated by tornadoes from April to May and September to October. The average rate of rainfall reaches 1,600 mm./year.

Fresh Food: Only available in small quantities.

Roads: A tarmacadam road connects with Abidjan, distance 450 km.

Port Officials: The Port Captaincy, the pilotage and tug control are all in the Captaincy building which is a two storey structure, raised on a circular dias located at Pointe Quiquerez. The Customs are within the Port to the South of the Western Quay.

DEVELOPMENTS: By 1990, in order to cater for increased exports and imports, the Port will have 4 anchorage points and 7 quay berths, one of which will be multi-purpose. This will involve extending the Port to the North and enlarging the Northern Dock, creating an Inner Port, extension of dredging, creation of open storage areas and construction of quays. In all, the plan, from a long term aspect, is to have 10 km. of quay, 500 hectares of port industrial area and 200 hectares of commercial areas.

AUTHORITY: Port Autonome de San Pedro, B.P.340, San Pedro, Ivory Coast. *Tel:* 71.20.80 or 71.14.79. *Telex:* 99102,99112 Comport-CI. *Cables:* Comport San Pedro. *Contact:* Mr. Ogou Attemene, Director General. Captain Guy Lambert, Harbour Master (VHF Channel 16 or 2182 kHz). Tel: 71-16-65.

AGENT: Socopao Cote d' Ivoire, B.P. 370, San Pedro, Ivory Coast. Tel: 711133, 712232. Telex: 99104 Freight CI. Cables: "Freight San Pedro".

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:

2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration

2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft elsewhere there is adequate swinging room for the largest vesse At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft concrete ramp. There is a floating barge/ramp at Berth No. 8. Fu container facilities are available at Berths 9, 10 and 11; and in addition there are approx. 50 acres of terminal area with storage space for 5,000 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handling bulk cargo. However, when necessary, consignees make their own discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port with dangerous cargo/goods on board are required through the Master or Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before the vessel's ETA and must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbour Master for permission to go alongside for the purpose of discharging same. The application must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 ft. and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open MacGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited:* National Gypsum and Quarries Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates 1 wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. – 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.
FRESH WATER: Fresh water available at berth. Average delivery rate 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days' notice required.
Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.
DRY DOCKS: Dry dock facilities available.
SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. MacGregor hatches handled by crew.
CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.
CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.
CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.
REPATRIATION: Facilities available for effecting crew changes.
AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.
POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.
TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.
SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.
SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.
IDENTIFICATION CARDS: No Identification Cards required.
REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.
DELAYS: Normally there are no delays to vessels calling at the port.
GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.
Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.
Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.
AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437. *Contact:* Captain S.H. Willers, Director. Captain H.C. De Lisser, Harbour Master. Captain E.R. Myers, Deputy Harbour Master.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".
ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.
RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.
BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.
CONSULS: No consular offices in Montego Bay. See "Kingston".
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
DENSITY: Average density 1026.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
FUEL: All grades (viscosities) available. At least 4 days notice required.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:

2 Crew Declarations.
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration

2 Passenger Lists.

For Agent

Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine

1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the Pilot Office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:

A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft. elsewhere there is adequate swinging room for the largest vessel. At Berths 1 – 8 there are the following:

4,725 ft. of berth frontage	3,247,000 sq. ft. of open storage
467,000 sq. ft. transit shed	67,000 sq. ft. of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side.

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft. concrete ramp. There is a floating barge/ramp at Berth No. 8. Full container facilities are available at Berths 9, 10 and 11; and in addition there are approx. 50 acres of terminal area with storage space for 5,000 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handling bulk cargo. However, when necessary, consignees make their own discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port with dangerous cargo/goods on board are required through the Master or Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before the vessel's ETA and must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbour Master for permission to go alongside for the purpose of discharging same. The application must include:

(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20 ft., 35 ft. and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 - 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open MacGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited* National Gypsum and Quarries Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700 t.p.h. – 1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates 1 wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25 ft. - 27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.
FRESH WATER: Fresh water available at berth. Average delivery rate 20 t.p.h.
FUEL: All grades (viscosities) available. At least 2 days' notice required.
Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.
A hydrant system with outlets at each berth provides a complete range of bunkers.
Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.
Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.
FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.
CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.
DRY DOCKS: Dry dock facilities available.
SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. MacGregor hatches handled by crew.
CERTIFICATES:
Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.
CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.
CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.
REPATRIATION: Facilities available for effecting crew changes.
AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.
POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.
TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.
SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.
SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.
IDENTIFICATION CARDS: No Identification Cards required.
REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.
DELAYS: Normally there are no delays to vessels calling at the port.
GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.
Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.
Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.
AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437. *Contact:* Captain S.H. Willers, Director. Captain H.C. De Lisser, Harbour Master. Captain E.R. Myers, Deputy Harbour Master.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".
ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.
RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.
MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a minimum depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.
CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.
BERTHING:
Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.
Berth No. 2 – 600 ft. long, 34 ft. minimum depth alongside, 7.5 ft above water line.
Berth No. 3 – 588 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.
Berth No. 4 – 387 ft. long, 25 ft. minimum depth alongside, 6.5 ft. above water line.
These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.
Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.
STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.
MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.
TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.
CONSULS: No consular offices in Montego Bay. See "Kingston".
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
DENSITY: Average density 1026.
FRESH WATER: Can be supplied from the dock. 30 t.p.h.
FUEL: All grades (viscosities) available. At least 4 days notice required.
FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.
SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: *Operator:* Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

OCHO RIOS: 18.25 N. 77.07 W.

REYNOLDS PIER

GENERAL: Reynolds Jamaica Mines act as Agents for all cargo vessels using the pier at Ocho Rios. *(a)* Tel. Ocho Rios 603. *(b)* Cable address is "Mines" Ocho Rios, Jamaica. *(c)* 72 hour and 24 hour ETA requested. *(d)* Radio telephone 2738 kHz open when calls expected at 0700, 1100, and 1500 hrs. local zone time.

PILOTAGE: Compulsory. Pilot meets vessel 1 mile N.E. of Sea Buoy. On rare occasions when a local Pilot is not available expenses and detention must be paid for an outside Pilot.

MAX. SIZE: Max. LOA 850 ft. Depth alongside pier 38 ft. Recommended draft 35 ft.

FRESH WATER: 50 c. per ton supplied from pipe-lines on the pier.

FUEL: Bunker "C" Fuel Oil – daily prevailing rate Kingston Harbour. Diesel Fuel Oil – per oil company suppliers Kingston.

REGULATIONS: (1) If any Master of any vessel or any other person shall throw or deposit, or permit to be thrown or deposited *(a)* any rubbish, earth, mud, stone, sand, ballast or other similar matter; or *(b)* any oil or mixture containing oil or oil residues, in any channel leading into or out of any harbour, or in any place within the limits of any harbour other than such place therein as shall be set apart for such purpose he shall be liable to a penalty not exceeding one thousand dollars.

(2) No siren or steam whistle shall be sounded on any vessel in any harbour except for the purpose of making signals as laid down in the regulations for preventing collisions at sea, provided that any vessel may sound one warning blast of not more than five seconds duration before sailing. Any person committing a breach of the rules is liable for a penalty not exceeding 1,000 Dollars.

CARGOES: The Reynolds Jamaica Mines Pier is occupied about twice each week by ore carriers for 8 to 12 hours and about twice a month by sugar ships for indefinite periods.

CRUISE SHIP PIER

LOCATION: Lat. 18° 24′ 26.4″ N., Long. 77° 06′ 44.3″ W.

PILOTAGE: Compulsory.

ANCHORAGE: Anchorage can be arranged depending on length and draft of vessel.

MAX. SIZE: Max. LOA 650 ft., depth alongside pier is 35 ft. (MLW). Recommended draft for vessel 35 ft.

TUGS: Not available.

CLEARANCE: Customs, Health and Immigration Offices are maintained at Port.

BERTHING: Used principally by cruise ships.

FRESH WATER: Fresh water available.

SECURITY: 24-hour patrols in Port area by private security guards. There is also a Police Post in the Terminal Building.

IDENTIFICATION CARDS: Recommended for crew.

AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, Kingston, Jamaica. *Tel:* 92-20290/8. *Telex:* 2386 Portops Jamaica. *FAX:* 92-49437.

PORT ANTONIO: 18.11 N. 76.27 W. (See Plan)

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: See "Kingston".

PILOTAGE: Compulsory. 24 hours' notice to be given via Agent.

The Pilot boarded from a small outboard motorboat about 2 miles N.E. of Folly Point. There is a VHF but on this occasion it was not working. The Pilot identified himself by flashing the word 'Pilot' by light.

Ladder normally required on the starboard side on arrival and port side on departure.

The Pilot is extremely competent and experienced.

ANCHORAGES: No anchorage outside harbour due to depth of water.

MAX. SIZE: Banana Pier (Boundbrook Wharf): LOA 511 ft. 2 in., beam 70 ft., draft 25 ft.

HEALTH: Quarantine examination when alongside.

RADIO: Kingston Radio.

VHF: Pilot uses Channel 16 (not operational June 1983).

TUGS: None available or required.

BERTHING: *Boundbrook Wharf:* The entrance channel (0.65 miles long) is very narrow, all navigational lights were lit. Least depth 29.5 ft. Rise of tide, 1 ft. 4 in. When clear of the channel the ship is headed towards the South end of the wharf and the port anchor let go in such a position that, when the ship is alongside, 7 shackles of cable will have been veered. When approaching the wharf the cable is used to swing the ship.

A boat takes the headrope to a bollard on the South face of the wharf. When the ship has swung sufficiently the boat then takes the stern rope to a bollard on the North face.

The pier is only 300 ft. long, it may be necessary to use a pilot ladder for access to the vessel should the stern overhang the pier. Vessels can berth and unberth 24 hours a day.

In the summer months the winds are generally light and from the South but in the winter they are Northerly and strong with a consequent swell in the harbour and, in those conditions it is considered that berthing at Boundbrook wharf would be difficult.

When unberthing, moorings are singled in to one stern rope to North face of the wharf. The ship is then moved, whilst still alongsi so that the North knuckle of the wharf is abreast the lower gang platform, it is necessary to have a fender handy in this position. T anchor cable is then hove in swinging the ship's head off the wharf the same time a steady strain is maintained on the stern rope so t the ship pivots about the knuckle and the stern swings into the cut the North side of the wharf. When nearly at right angles to the wharf t engine is moved ahead with the rudder to starboard thus swinging t stern clear of the knuckle, the stern rope is cast off and the anch weighed so that the ship moves clear of the wharf and continues swing to port so as to be heading more or less for the channel.

The Pilot disembarks in a position abeam of Folly Point with the sh head North.

CRANES: None. The pier is fitted with portable conveyors for loadi bananas through side doors. Ship's gear is not required for riggi conveyors.

SPECIALISED CARGO HANDLING FACILITIES: Boundbrook Wha used solely for loading bananas. No facilities for Ro/Ro vessels. Forkli available for handling of pallets of bananas. However, there inadequate storage space for palletised cargo.

STEVEDORES: Adequate numbers for loading bananas.

MEDICAL: Doctor and hospital available.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Not available.

CONSULS: Nearest Consuls at Kingston.

REPAIRS: Small repairs can be undertaken.

DRY DOCKS: None.

SURVEYORS: Nearest Lloyd's Surveyor at Kingston.

AIRPORT: At Kingston.

GENERAL: *Provisions:* Small amounts of fresh provisions availab No groceries or meat available.

Laundry: No service available.

AUTHORITY: Port Authority of Jamaica.

PORT ESQUIVEL: 17.53 N. 77.08 W. (See Pla

GENERAL: Vessels proceed through a dredged channel approximat 1.5 miles long with a minimum depth of 39 ft. The wharf is situated i basin at the inner end of the channel and can take vessels up to 650 long with a maximum draft of 36 ft.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.

Customs Documents:

4 Stores Lists.
Crew's Manifest of Declaration outside of Personal Effects.
4 Load Line Certificates.
4 Small Parcels Lists.
4 Customs Clearance from last port of call.
Fire Arms List.
Narcotics List.
List of live animals and meats on board vessel.

Health Documents:

International Certificate of Vaccination of all Crew members.
Maritime Declaration of Health.
Crew's Declaration of Health.
6 Manifests.
4 Bills of Lading.

Ship's Documents:

3 Stowage Plans of Cargo.
2 Deadweight Surveys (Bulk carriers only).
Charter Party and any other specific documents of instructions relati to the loading or discharging of cargo.

Also see "Shipmaster's Report".

PILOTAGE: Pilotage compulsory. Compulsory pilotage limit 2 miles seaward of line drawn from Polink Point to Bare Bush Cay to Portlan Cay to Portland Point. Cable advice 48 and 24 hours ahead of vesse ETA at pilot station must be sent to vessel's Agent at Kingston, Jamai

One pilot boat *Silver Spray,* launch equipped with ship-to-shore rad communication: (One General Electric VHF – FM 30-watt output mu channel set).

VHF shore set manned 24 hours per day. Contact with Port or laun can be made on three international Channels – 16, 2 and 6.

Also see "Shipmaster's Report".

ANCHORAGES: *(a)* Seaward to East of pilot station, depth in exce of 38 ft. *(b)* Leeward of Pigeon Island – depth 38 ft. min. *(c)* Eastwa of entrance of main channel – depth 38 ft.

RESTRICTIONS: Restriction of permissible draft to max. of 36 ft MS

MAX. SIZE: Max. permissible length 650 ft. and draft 36 ft.

HEALTH: Pratique procedure requires presentation of undermention health documents: *(a)* International Certificate of Vaccination of all cre members. *(b)* Maritime Declaration of Health. *(c)* Crew's Declaratio Health. In event any suspected communicable disease or fever on boa Master required to advise Agents in advance.

RADIO: JAMINTEL "KNRDO 6YI".

TUGS: Pilot boat will be on standby during berthing operations of vessels to assist in placing ship's lines on to pier if requested by Pilot.

RTHING: *Western Berth:* Bulk loading alumina – vessels max. length ft., breadth of 92 ft., max. draft 36 ft. Length of Bulk Wharf 630 ft. of water 39 ft. MSL. Average tide 12 in.

imum depth of water in Channel and/or approaches 39 ft. MSL. alumina vessels still given priority on Western Berth.

tern Berth: General Cargo – max. length of vessel 650 ft., breadth ft., max. draft 36 ft. Length of General Cargo Wharf 950 ft. Depth of ter 39 ft. MSL. Average tide 12 in.

ipment available:

a) Shiploader – Travelling Gantry Type – part of conveyor system for ding bulk alumina only.

Max. travel 415 ft. – maximum outreach for loading purposes 48 ft. earance height from wharf level 28 ft. from water level 35 ft. Rate of ding per hour = 1,000 long tons.

b) One Galion crane and one 660 P & H crane. Forklift trucks. Launch vice.

There is no extra charge for the use of shore equipment during ertime hours and will remain at a flat rate for all hours worked.

ECIALISED CARGO HANDLING FACILITIES: Eastern and Western rths equipped to handle receival of bulk cargoes, e.g. grain, soya eal, soya beans, salt, sulphur, etc., by using shore crane with grabs, ssel discharging by grabs. Bulk liquid chemicals handled as shown der "Tankers". Additional berth on Southwestern shoreline now being ed to handle small bulk grain, soya meal and soya bean carriers, and n be utilised for handling of Ro/Ro traffic and containerised cargo.

EVEDORES: Cable advice to Agents in Kingston, Jamaica, 48 and hours ahead of vessel's ETA at pilot station for arrangements to vide stevedore and dock labour.

DICAL: Agents to be advised 48 hours ahead of vessel's ETA pilot tion of medical attention required, details of inoculations, vaccination/ er certificates, etc. Free ambulance service provided. Nearest spital approximately 15 miles.

NKERS: Both sides of pier equipped to handle receival and delivery Bunker "C" oil, caustic liquor, sulphuric acid and molasses. Diameters he load/discharge lines are:

Bunker C Oil	8 in.
Caustic liquor	10 in.
Sulphuric acid	4 in.
Molasses	12 in.
Water	4 in.

ax. permissible draft 36 ft. below MSL.

te: For vessels loading and discharging fuel oil and caustic/liquor x. length 650 ft., breadth 92 ft., max. draft 36 ft.

NSITY: 1025 subject to slight variation during heavy rainfall.

ESH WATER: Max. of 300 metric tons available. Delivery made from rage tank at a rate of 40 to 50 metric t.p.h.

EL: Bunker "C" fuel oil is available from dock. Application to be made Shell Company (W.I.) Ltd., through ship's Agent for supply of bunkers. mping rate approx. 130 metric t.p.h.

ecification:

) API 9.0 min – 10.0 max.
) Ash percent wt. 0.12 max.
) Flash point pmcc 150°F. min.
) Viscosity SSF at 122°F. 120 min. – 200 max.
) Pour point 60°F. max.
) Vanadium ppm 475 max.

E PRECAUTIONS: Strategically located fire hydrants throughout t and on pier. No special precautions apart from "No smoking" rule. e fire truck located at Port Esquivel.

NSULS: No consuls are available. Consular Offices are located in gston approximately 30 miles away.

PAIRS: Limited repairs may be undertaken.

Y DOCKS: None.

NGWAY/DECK WATCHMEN: Service of watchman optional but not cessary. During time vessel is in port there is Customs guard on pier d strict security measures are carried out by port Security Force on rsonnel entering or leaving port compound which is surrounded by a ain-link security fence.

ENING/CLOSING HATCHES: For bulk alumina vessels, opening d closing of hatches is done by crew members. For general cargo ssels, opening and closing of hatches may be done by crew members on request to Agents, by stevedores.

IP CERTIFICATES:

oad Line Certificate.
Registration Certificate.

STOMS ALLOWANCES: Tobacco: Each crew member including p's officers, normally allowed by local customs authority 2 oz. of acco or 2 pk. of 20 or 25 cigarettes per day released from bond. ne and/or Spirit: No limitations to use of wine on board. For spirits ch crew member is allowed a part bottle per man.

RGO GEAR: Local Agents provide necessary cargo gear. These are ted every 6 months in accordance with Factory Law and certificates ued for respective maximum lifting capacities.

PATRIATION: Upon request, local Agents arrange crew changes d any necessary repatriation.

ME: GMT minus 5 hours.

LIDAYS: New Year's Day (1st January); Ash Wednesday (in cordance with calendar); Good Friday (in accordance with calendar); ster Monday (in accordance with calendar); Labour Day (23rd May); dependence Day (first Monday in August); National Heroes Day (third nday in October); Christmas Day (25th December); Boxing Day (26th ecember). These holidays are sometimes subjected to change in cordance with Government Proclamations.

1. No work is carried out on Good Friday and Christmas Day.
2. Work on vessels loading bulk alumina and discharging Bunker C l and caustic liquor is usually carried out on other public holidays.
3. For general cargo vessels work is optional on public holidays cept Good Friday and Christmas Day, and only carried out on Master's quest or in accordance with Terms of Charter Party.

AIRPORT: Norman Manley International Airport approximately 40 miles away.

POLICE/AMBULANCE/FIRE: Old Harbour Constabulary Tel: 983-2255; Old Harbour Fire Brigade Tel: 983-2276. Port Esquivel also has its own fire brigade. An ambulance service is available for any crew member requiring medical attention. Several qualified doctors within a 6-mile radius of port. There is also a fire station.

TELEPHONES: Facilities do not exist for placing of telephones on board ship other than Magneto telephones. Telephones mounted on both sides of pier for easy access. International telephone services available and scale of rates is as per schedule listed in Jamaica Telephone Company's Directory.

SERVICES: Special services are limited. Arrangements can be made through vessel's Agents for the port or local contractors to undertake these jobs.

SHORE LEAVE: Crew members usually granted shore leave by Immigration Authority for period vessel remains in port. Immigration Authority can, however, withdraw permission of shore leave to any individual crew member who, in their opinion, may be a security risk.

IDENTIFICATION CARDS: Not necessary as the Passport will serve this purpose. Also see "Shipmaster's Report".

REGULATIONS: No unusual regulations.

DELAYS: The normal delays in berthing, loading or discharging or bunkering can be expected when the two berths are occupied.

GENERAL: Port normal working days Monday-Friday 0800 – 1630 hrs. Overtime in excess of 8 hours per day or 40 hours per week, Monday-Friday at time and a half normal rate; Saturday between midnight and midnight time and a half normal rate, double time for hours worked on Sundays and two and one half times for hours worked on public holidays, between midnight and midnight. Rail facilities exist on Western side of the pier. Distance from fender to centre of rail line 17 ft. 9 in. Ship chandlering or any other requirements may be acquired through local Agents.

SHIPMASTER'S REPORT: November 1986.

Pilot: The pilot station is off Buoy Nos. 1 and 2, however, Pilot normally boards off Port Esquivel Fairway Buoys. Only at the request of the ship's Master, will the Pilot board at pilot station, which might be the case when no proper charts are on board.

Entrance to Portland Bay, through the fairway, proved not to be difficult, as the leading line on Pigeon Island was very useful and all the buoys were in place (and all alight).

Made entrance, as well as departure, during daylight. The front leading light tower on Pigeon Island proper was visible, however, the rear leading light structure on the reef, North of Pigeon Island, was less discernible, due to the chimneys of the power plant on the main shore.

Formalities: Papers required:

Customs:
1 Clearance from Last Port.
1 Stores List.
1 Crew's Effects List.
1 Crew Cigarettes/Liquor List.
1 Crew List.

Quarantine:
1 Maritime Declaration of Health. (Preferable on Jamaica Form, otherwise on International Form.)
1 Vaccination List.
1 Crew List.
1 Ship's Declaration on Meat and Livestock. (On Jamaica Form, otherwise on self made form).

Agents:
2 Crew Lists.
1 Stores List.
1 Crew's Personal Effects List.
Manifests and other available cargo papers.

Both the Agent and the Custom's Officer require the date of expiry of the International Load Line Certificate only. No copies of said Certificate were required.

No ship's papers (Certificates) were taken ashore for presentation to the Authorities.

All the Authorities were very friendly and with all the required papers ready upon arrival, clearance was obtained within 15 minutes of boarding.

A paper had to be signed that 3 meals a day (and also a midnight snack) had to be provided for 1 Custom's Officer. However, the Custom's Officer made no use of this.

Bonded stores are placed under seal.

Identification Papers: Not required to take passport ashore. Crew members wishing to go ashore will be given a shore pass at the gate. A copy of the ship's crew list is posted at the gate by the Agent. The shore pass will be collected on returning from shore to the vessel.

PORT KAISER: 17.52 N. 77.37 W.

DOCUMENTS:
6 Crew Lists.
4 Stores Lists.
Declaration of Crew Personal Effects.
Customs Clearance from Last Port.
Maritime Declaration of Health.
Vaccination Certificates for all crew members.
Cargo Documents.

PILOTAGE: Compulsory. Pilot boards about 1 mile seaward of the jetty. International Code Pilot Signals used.

ANCHORAGE: Recommended 1.5 to 2 miles off end of finger pier from South to S.W.

MAX. SIZE: Tankers up to 40 ft. draft.

HEALTH: Pratique granted by Customs Officers who board on arrival, after Master has completed Maritime Declaration of Health, and Crew's Declaration of Health. All crew members require valid Vaccination Certificates. In event of suspected disease or fever on board Agent should be advised full particulars by radio before arrival.

RADIO: "KNRDO 6Y1."

TUGS: None available.

BERTHING: Tanker berth at the end of a finger pier. Pier head is adequately fendered and a holding off buoy is utilised if necessary because of swell. Vessels berth portside to the jetty. Both anchors used.

Finger pier is 610 ft. long. The berth is being dredged to 50 ft. depth.

TANKERS: Fuel and gas oil discharged, 8 in. hoses. No slop facilities.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Nearest at Kingston.

CUSTOMS ALLOWANCES: 25 cigarettes and part bottle spirits per day per man.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: October 1978.

Documents:
6 Crew Lists.
3 Store Lists.
2 Curio Lists.
1 Vaccination List.
1 Maritime Declaration of Health.
Load Line Certificate.
Derat Certificate.
Clearance from Last Port.
4 Notices of Readiness.

Pilotage: Pilot available and compulsory. Pilot station 1 mile S.W. of Pier.

Restrictions: Day and night berthing possible.

Max. Size: LOA, 650 ft. Beam 90 ft. Max. draft 36 ft.

Tugs: No tugs available. In an emergency nearest tugs at Kingston.

Berthing: Length of pier 700 ft. 1 shiploader, max. outreach 90 ft. and max. clearance under loader 46 ft. 2 chutes load 1 hatch (port and starboard). Loader movable along dock for 600 ft. Max. loading rate 1,100 short t.p.h. or 25,000 tons daily for bulk carriers. Loading carried out 24 hours a day.

Berth not very satisfactory in heavy swell and ship's side rails are very prone to damage when loaded as large fenders (tractor tyres doubled up) hang over main deck and damage rails. Stevedores refuse to accept this damage.

Vessel only broke 1 mooring rope. Shore gangway used, of light aluminium construction which must be tended throughout. A hazard to get ashore or onboard.

When strong Westerly current running and Easterly winds blowing, Pilot informed me that it sometimes takes up to 7 hours to berth ships. When very heavy seas running, it is best to leave berth and return when weather improves.

Medical: 2 hospitals at Mandeville but seamen usually sent to Nursing Home.

Tankers: Fuel oil, diesel oil, sodium sulphate, caustic soda and sulphuric acid handled at the tanker berth.

Density: 1025 – 1026.

Fresh Water: Not available.

Fuel: Not available.

Time: GMT minus 5 hours. Except during Daylight Saving Time GMT minus 4 hours.

Repatriation: Reliefs and repatriation can be arranged through Kingston which is about 87 miles away by road. Reliefs flying out through Miami all lost their luggage for a while as it was booked right through to Jamaica. Advisable to book luggage to Miami, collect and clear through Customs and then re-check it in. U.S. visa also required even for transit through U.S.A.

Current: Usually Westerly at 2.5 to 3 knots.

The current runs at right angles to the steel girder type berth on stilts and makes it difficult to get the stern alongside so a powerful tug would have been of great assistance.

Tidal Range: 1.5 ft.

Publications/Charts:
B.A. 260 Pedro Bank to the South Coast of Jamaica.
B.A. 258 Ports and Anchorages on the South Coast of Jamaica.
B.A. 446 Jamaica.
USA 26124 Portland Bight to Great Pedro Bluff (with plan of Port Kaiser).
NP 70 West Indies Pilot (N.W. Part) Vol. 1 with Supp. No. 4.

Working Hours: Office hours 0800 – 1600 but 24 hours when vessel in port.

Officials: Customs, Quarantine and Immigration Officials boarded on arrival. The Quarantine Official lives on board whilst vessel in port to ensure nothing is thrown into the sea.

Survey: Holds surveyed before loading for cleaniness and Certificate o Cleanliness issued. Draft survey taken before and after loading (6 ft. swell and rough seas at the time).

Laundry: Can be arranged but takes 2 – 3 days.

Provisions: Fresh provisions available from nearest country market a Mandaville. Market days – Wednesday, Friday and Saturday. Mai stores can be ordered from Kingston but very expensive and trucking charge $150.

VHF: Channel 16 said to be monitored in Agents office at Port Kaiser, pilot boat and Dock Office Port Kaiser but not able to make contact whe inward bound.

AUTHORITY: Port Authority of Jamaica.

PORT RHOADES, Discovery Bay: 18.29 N. 77.24 W.

(See Plan)

DOCUMENTS:
5 Crew Lists.
2 Stores Lists.
1 Customs Clearance from last port.
2 Declaration of Crew Personal Effects.
1 Maritime Declaration of Health (available on arrival).
Vaccination Certificates for all crew members.
1 Copy of each cargo document.

PILOTAGE: Compulsory. ETA's should be cabled to "Kaisbaux Discovery Bay", 48, 24, and 12 hours before arrival.

Pilot will board vessel on arrival 2 miles outside channel, if berth is available.

ANCHORAGES: No designated anchorage. If berth is occupied, vesse will remain within a 3-mile area of the channel until berth is available. Docking instructions are given by VHF.

The area around the harbour to a depth of 60 m. is a marine reserve for study. Positively no anchoring on surrounding reefs.

RESTRICTIONS: Entry may be at any time of day or night throughou the year.

MAX. SIZE: Max. permissible length, 700 ft.
Max. permissible breadth, 92 ft.
Max. permissible draft, 37 ft. 6 in.

PRATIQUE: Pratique inspection and clearance given on berthing. Noti "Kaisbaux, Discovery Bay" as soon as possible before arrival full details of any suspected disease or fever on board.

There is no Radio Pratique.

RADIO: Route all ETA's and cables via Kingston Radio or nearest radio station.

VHF: Channel 16, 24 hours a day. Channels 12, 13, 26 and 28 also available. Range 30 miles.

TUGS: None available. Pilot launch will assist in taking ship's lines during docking if required.

BERTHING: One finger pier, (Position 18° 28′ 45″ N., 77° 24′ 20″ W.) adequate fenders, used by bauxite ships and tankers alike.

Ships loading bauxite must dock with the top of the hatch covering o the first hold to be loaded not more than 35 ft. above sea level.

Bauxite loading rate 4,000 t.p.h.

All loading hatches to be opened for inspection if weather permits.

Gangway to be rigged ready for lowering immediately on berthing safety net must be attached to the gangway.

Hawse pipes to be securely sealed as soon as berthing is completed. Draft reading and other ladders are to be kept hauled up at all times while the ship is berthed.

Rat guards to be installed on lines at all times when at berth. Washboards are to be installed over starboard wing tank outlets, so as not to discharge on pier.

STEVEDORES: All arrangements are made by Kaiser Bauxite Company for unloading/loading any general cargo.

MEDICAL: Medical facilities and hospital available in the vicinity.

TANKERS: Two fuel lines, hose 8 in. (pipe-line 12 in.) diameter. Back pressure 150 lb. One gas oil line, hose 8 in. (pipe-lines 6 in.) diameter. Back pressure 150 lb.

Tankers use same berth as bauxite vessels. It may be necessary at times for tankers to wait on bauxite vessels loading, or arriving, and tankers may have to vacate the berth before completion of discharging to make way for bauxite vessels which have absolute priority.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Not available.

FIRE PRECAUTIONS: Usual non-smoking precautions with respect to tankers. Portable fire extinguisher available on pier.

CONSULS: Nearest Consuls are in Kingston, 80 miles distant.

DRY DOCKS: No facilities in Jamaica for other than the smaller types of vessel (e.g. tug).

GANGWAY/DECK WATCHMEN: To be provided by vessel.

OPENING/CLOSING HATCHES: To be done by ship's crew.

CERTIFICATES:
Load Line Certificate.
Registration Certificate.
Derat Exemption Certificate.

CUSTOMS ALLOWANCES: Tobacco: Each crew member, including officers, normal allowance 2 oz. tobacco or 2 packets of 20 cigarettes per day released from bond. Wine: no limitations on use of wine on board. Spirits: Officers only are allowed part bottle.

REPATRIATION: Can be arranged through ship's Agent.

AIRPORT: Montego Bay, 40 miles away; Kingston, 90 miles away.

Both are international airports, with several scheduled flights per day to U.S.A. and Europe.

TIME: GMT minus 5 hours.

TELEPHONES: No arrangements for ship-board connections.

IDENTIFICATION CARDS: Not required.

GENERAL: *Buoyage:* IALA system "B".

SHIPMASTER'S REPORT: March 1984.

SatCom has been used successfully in giving the 48, 24 and 12 hour ETAs.

Call on Channel 16 VHF when 20 miles off.

Pilot will board about 1.5 miles to the N.E. of the entrance. Some Pilots do not like to dock vessel at night and delays may be encountered.

If awaiting berth drifting 8 – 12 miles off to the N.N.E. seems to be the most satisfactory. There is about a 0.5 knot West drift depending on weather conditions.

This vessel has a 93.2 ft. beam and is loaded without difficulty but a close eye must be kept so as not to get a starboard list that will be very hard to correct.

When docking, the approach will be at right angles to the dock. At about 200 yards away the port anchor will be let go and 2 lines sent to the farthest inshore bollard at the head of the dock. The vessel will then be worked alongside using small kicks ahead until it is fast alongside, starboard side too. All vessels dock starboard side in a very sheltered berth. When fast alongside there will be 6 – 7 shackles out on the anchor. When making the approach have the 2 headlines married with a gantline and the pilot boat will have an easier time. Docking with strong offshore winds can be very difficult.

When departing the vessel heaves up on her anchor pulling herself into the channel. Care must be taken not to speed so as to squat the vessel when going out loaded, especially in swells. There have been reports from other Masters of touching bottom in the channel and the divers in the local marine laboratory have confirmed anti-fouling paint on the reefs on the channel bottom.

Limited diving work can be arranged through Kaiser from the Marine Laboratory located in Discovery Bay.

Port officials are very friendly and helpful. Vessels bound for the States must keep a sharp watch for stowaways and smugglers.

AUTHORITY: *Operator:* Kaiser Bauxite Company, Discovery Bay, P.O., St. Ann, Jamaica, W.I. *Tel:* 973-2221/5. *Telex:* 7404. *Cables:* Kaisbaux. *Contact:* Evon L. Clarke, Shipping Supervisor.

SALT RIVER: 17.50 N. 77.10 W.

DOCUMENTS: Health Certificate. Crew List. Manifest. Bills of Lading and other ship's papers for cargo shipped, prepared by Wisco Wharves Limited, a subsidiary of The West Indies Sugar Company Limited.

PILOTAGE: Latest 12 hours prior arrival off pilot station. Cable "Monymusk Lioneltown" giving name of vessel, ETA, date of arrival. Pilotage – optional, Barebush Cay; Compulsory, Pigeon Island; pilot boat at Salt River.

ANCHORAGE: Lat. 17° 49.58′ N., Long. 77° 08.40′ W.

RESTRICTIONS: No restrictions.

MAX. SIZE: Draft 30 ft.

HEALTH: Customs grant Pratique.

RADIO: Cable Agents via Kingston Radio/6YI.

TUGS: Not applicable.

BERTHING: No berthing facilities.

STEVEDORES: 48 hours notice prior arrival of vessel. Commodity bulk sugar. Loading rate approximately 1,800 tons per day.

MEDICAL: No advance notice required.

FRESH WATER: Can be arranged if given sufficient notice.

FUEL: None available at port but can be arranged.

CONSULS: None.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMEN: Customs guards.

OPENING/CLOSING HATCHES: Normally done by crew.

SHIP CERTIFICATES: Registered Tonnage Certificate on first call. Master's and Chief Engineer's Certificates of Competency, also Load Line Certificate.

CUSTOMS ALLOWANCES: Tobacco, determined by Customs. Wine and/or Spirit, determined by Customs.

REPATRIATION: Can be arranged.

AIRPORT: Palisadoes International approximately 50 miles away and served by regular airlines.

TIME: GMT minus 5 hours.

HOLIDAYS: New Year's Day; Ash Wednesday; Good Friday; Easter Monday; Labour Day (23rd May); National Heroes Day; Independence Day; Christmas Day (25th December); Boxing Day. Work can be arranged on all public holidays except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police Vere 233; Ambulance Vere 337; No port fire brigade.

TELEPHONES: Radio communication ship to wharf can be arranged.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Not required.

DELAYS: Delays can be expected.

GENERAL. (See Plan)

KANMON KAIKYO: Traffic Advisory Service/Reporting Procedures: (See Plan)

Traffic Advisory Service: Kanmon Kaikyo Traffic Advisory Service provides information and traffic control for vessels entering, leaving or navigating within the Kanmon Kaikyo area and its approaches.
Call: Kanmon MARTIS.
Location: Traffic Advisory Service Centre (33° 53.63′ N., 130° 55.27′E.).
Telephone: 093-372-0099.
FAX: 093-381-4499.
Telex: 7123 28 KMTASC.
Telegraph: KANMON KAIKYO TASC TLX 7123 28.
Frequency: VHF Channels 16, 14 and 22.
Hours: 24 hours.

Procedure: The following procedures apply to vessels of 3,000 g.r.t. or more, intending to navigate within the Kanmon Kaikyo area (1,000 g.r.t. if intending to navigate the Tobata Fairway).

(1) Advance Report:

(a) Vessels of 3,000 g.r.t. and over, intending to navigate within the Kanmon Radar Service Area should send, to the Centre, a report 3 hours before crossing the first reporting line. Vessels leaving a port or weighing anchor within the area, 3 hours before departure. Vessels of 1,000 g.r.t. and over, intending to enter or leave Seitetsu-Tobata Hakuchi through Tobata Fairway, should send report by 1200 hrs. of the previous day.

Additionally vessels over 300 g.r.t. entering or leaving the Wakamatsu or Okudokai Fairways should report to the Wakamatsu Port Control Office. Vessels over 3,000 g.r.t. may send this report through the Centre.

(b) Reports may be made by VHF through Moji MSA Station, in writing to Kanmon Kaikyo Traffic Advisory Service Centre, Mutsubara 2 chome 11-11, Moji-ku, Kita-Kyushu-City, or by Telephone, Telex, Telegraph (see above). Any changes of more than 15 minutes, to previously notified times, should be reported immediately by those vessels over 1,000 g.r.t. intending to enter or leave Seitetsu-Tobata Hakuchi, through the Tobata Fairway, together with any other amendments. All other vessels should report changes of more than 15 minutes to estimated time of crossing first reporting line (or weighing anchor within the area), and any other changes as soon as possible. All reports of changes should be prefixed by the word "Amendment".

(c) The report should include the following information:

1. Name of addressee.
2. Name of vessel and g.r.t.
3. Call sign.
4. LOA.
5. Max. draft.
6. Description of dangerous cargoes and amounts (if any).
7. Port of departure.
8. Port of destination.
9. Name of position reporting line.
10. ETA and date of crossing (9).
11. Intended channel (fairway) to be navigated.
12. ETA channel (fairway) or ETD berth.
13. Scheduled anchorage (and ETD anchorage).
14. Estimated speed.
15. Means of communication with MSA.
16. Pilotage arrangements.
17. Name and address of message sender.
18. Remarks.

(2) All vessels should maintain a continuous listening watch on VHF Channel 16 within the Radar Service Area from 3 hours before crossing the first reporting line (or on leaving a berth), until they leave the area (vessels should listen on 500 kHz or 2182 kHz if Channel 16 is not available).

(3) All vessels are requested to report their position on crossing the first reporting line in the Radar Service Area (or on leaving a berth in the Kanmon Port area) stating:
(a) Name of vessel.
(b) Time of crossing reporting line (or time of departure from berth) (Japanese Standard Time).
(c) Identity of reporting line (MN, SS, etc.) (or code number of berth).

Reporting Points:

Name of Reporting Line	*Abbreviation*	*Description*
North of Mutsure Shima	MN	A line bearing 000°×6,930 m. from Mutsure Shima Lt. (33° 58.5′ N., 130° 52.2′ E.) thence 90° to Kurumi Se Lt. Bn. (34° 02.2′ N., 130° 53.8′ E.).
South of Aino Shima	AS	A line joining the South point of Aino Shima (33° 58.94′ N., 130° 49.41′ E.) with North point of Kata Shima (33° 57.96′ N., 130° 50.88′ E.).
South of Shira Su	SS	A line bearing 180° from Shira Su Lt. (33° 58.82′ N., 130° 47.65′ E.) to the shore.
North of Wakamatsu	WN	A line bearing 310° from Wakamatsu Dokai Entrance Breakwater Lt. (33° 56.28′ N., 130° 51.18′ E.) to the Kanmon Harbour limit (N.E. of Lt. Buoy No.6). A line joining the above light and the following points (all bearing and distance from the light) 159°×730 m.; 233°×1,680 m.; 223.25°×1,780 m.; 221.25°×1,630 m. and 152°×1,050 m., thence to the point bearing 087°×580 m from the Sunatsu Breakwater Lt. (33° 53.42′ N., 130° 53.78′ E.).
South of Kanmon Fairway	KS	A line from Moji Saki Lt. (33° 57.54′ N., 130° 57.93′ E.), following the Southern limit of the Kanmon Fairway to a point 144.5°×1,185 m. from Kanenotsuru Misaki Lt. (33° 54.47′ N., 130° 54.79′ E.)
North of Kanmon Fairway	KN	A line from a point 219°×405 m. from Hino Yama Signal Station (33° 57.89′ N. 130° 57.83′ E.) following the Northern lin of the Kanmon Fairway to a point 240.25°×365 m. from Daiba Hana Lt. (33° 56.77′ N., 130° 52.56′ E.).
Centre of Kanmon Fairway	KC	A line from a point 135°×95 m. from Shimonoseki Front Leading Lt. (33° 57.51′ N., 130° 57.38′ E.) to a point 135°×525 m. from the above light.
North of Shin Moji	SN	A line from Takeno Hana (33° 54.13′ N., 131° 00.50′ E.) to a point 90°×2,150 m. from Shin Moji Hakuchi Breakwater Lt. (33° 52.20′ N., 131° 00.75′ E.).
East of Shin Moji	SE	A line from a point 90°×2,150 m. to a point 90°×8,150 m. from Shin Moji Hakuchi Breakwater Lt. (33° 52.20′ N., 131° 00.75′ E.).
South East of He Saki	HS	A line from a point 90°×8,150 m. from Shin Moji Hakuchi Breakwater Lt. to a point 215°×3,950 m. from Ryuo San Triangulation Point (33° 57.18′ N., 131° 10.24′ E.).
West of Onoda	OW	A line from a point 215°×3,950 m. to a point 240°×4,350 m. from Ryuo San Triangulation Point.
South of Chofu	CS	A line joining Manju Shima Lt. (33° 59.51′ N., 131° 01.74′ E.), and the Southern point of Kanju Shima (33° 59.43′ N., 131° 00.65′ E.).
North of Tanoura	TN	A line from He Saki Lt. (33° 57.36′ N., 131° 01.52′ E.) to a point 10.5°×820 m. from the light, thence to a point where a line 315.5° from the light intersects with the port limit, thence to a point where a line 67.5° from Moji Saki Lt. (33° 57.54′ N., 130° 57.93′ E.) intersects the port limit, thence to the Moji Saki Lt.

Information Broadcasts: On 1,651 kHz, every H + 00 to H + 15 and H + 30 to H + 45 (comprising information about transit of large and other vessels, weather warnings, meteorological information, fishin activities, alterations to navigational aids and construction works. Special broadcasts are also made in the event of a maritime accider or other restriction to navigation within the area. Navigational informatio may also be obtained by telephone (093-372-3399). Passag information is provided on VHF to those vessels who already have mad a position report.

Radar Service Area: Covers the whole of Kanmon Kaikyo, includin the Western and Eastern approaches, together with the area North an East of Mutsure Shima.

Radar Assistance: Available on request from the Traffic Advisor Centre as follows:

(1) Own vessel's position: Report vessel's approximate position to th Centre. Position of vessel will be given by bearing and distanc from radar conspicuous objects within the area.
(2) Position of another vessel: Vessel should report own position an approximate bearing and distance of vessel for which informatio is requested. Information given comprises relative position, cours and speed, and, if known name, tonnage and destination. If vess is involved in construction work, details will be given.
(3) During periods of limited visibility, information on the relativ positions of other vessels, their course and speed, is provided.

Warning Service: The Traffic Advisory Centre provides information o VHF to vessels which have previously submitted a position report, i the event of any of the following:

(1) To prevent collision: If there appears to be a danger of collisio vessels will receive the following details:
    (a) Approximate position.
    (b) Name, type, g.r.t. and destination of other vessel.
    (c) Estimated time and location of possible collision.
(2) To warn a vessel proceeding with incorrect course and/or speed
(3) To warn a vessel approaching a dangerous area (shoal water, s of a recent accident, etc.).

Advice will also be provided from the Centre for those vess anchoring in the area East of Mutsure Shima.

Restrictions: *Restrictions on Vessels in Inland Sea/Kanmon Chann* Japanese maritime safety authorities have agreed that restrictions, t vessels sailing through the Inland Sea/Kanmon Channel, will b enforced as from 10th August 1990.

The aim is to reduce collisions, and other accidents, in these heav congested waters.

The restrictions apply to all foreign flag vessels, which are o transiting the Inland Sea/Kanmon Channel en route to or from Japane Pacific Coast ports, and will oblige these vessels to sail South of Kyush Island.

For example, a vessel, en route to Nagoya from the South Korean port of Busan, will in future have to sail South of Kyushu Island, instead using the Kanmon Channel, thus saving pilotage costs for transiting the Kanmon Channel/Inland Sea and through to the Bungo Channel, because Nagoya is not in the Inland Sea area.

Ships bound for ports on the Inland Sea will proceed as before.

The restrictions are in accordance with Article 14 of the International Convention on the Territorial Sea and the Contiguous Zone, and Article 1 of the Japanese Law on the Territorial Sea.

Owners are advised to inform their Masters accordingly.

RADIO PRATIQUE: Procedures to obtain Radio Pratique:

A. *Sanitary Certificates:*

a. A vessel intending to obtain Radio Pratique should apply for issuance of Sanitary Certificate to Quarantine Office through Agents.

b. Accepting the application, Quarantine Officers will attend the vessel for Sanitary Inspection while the vessel is in the port in exactly the same manner as the inspection of Derat.

c. When the vessel has passed the Sanitary Inspection, the Quarantine Officer will issue the Sanitary Certificate and give the Issuance Number to the Master. But in general respects, the inspection is rather severe.

d. The Sanitary Certificate is valid in all ports of Japan, and its term of validity is only for one year.

B. *Application for Radio Pratique:*

a. When the Master requires Radio Pratique, he should cable the Head of the Quarantine Station via Agents in accordance with the quarantine rule which stipulates that it must be done within 36 hours to 12 hours prior to the respected arrival port.

b. The items to be reported by cable are enumerated in clause (f) hereunder.

c. When Agents receive the telegram from the Master, the Agents submit the Radio Pratique Application Form together with a copy of the cable sent by the Master.

d. After checking and inspecting all telegrams and papers submitted by the Agents, the quarantine authorities will grant the Radio Pratique if everything is in order and issue the Free Pratique certificate and term of validity.

e. The Master who has received the cable advising issuance of the Free Pratique from the Authorities should submit the necessary documents, Crew List and Passenger List to the Authorities on his arrival.

f. ★Items to be reported by cable to the Authorities are as follows:

(1) Notification that this cable is the information provided by Item-2, Clause-17 of the Law concerned. This identification should be noted on the top of the body as abbreviation of "RPM".

(2) Name and nationality of the vessel (the item is unnecessary in this cable).

(3) Full number of Sanitary Certificate indicated with a number of seven (7) figures.

(4) Name of port of departure and its date.

(5) Name of ports of call and sailing date during 15 days before arrival.

(6) Name of port and ETA at destination of the vessel.

(7) Derat Certificate – name of the authorities issued, date of issue and kind of derat.

(8) Number of crew and passengers.

(9) Whether or not the vessel had transferred any passengers and/or goods from another vessel or aircraft on her voyage during 15 days before arrival. In case this is affirmative, details of which should be described.

(10) Whether there are any patients onboard or not, taken ill during 15 days before the arrival. In case this is affirmative, detailed conditions of illness must be given.

(11) Whether there has been any death of persons (with the exception of deaths caused by accident) during 15 days before arrival, and if this is affirmative, details of it, i.e. name and age of the person and/or present condition of the person.

(12) Whether rats were caught and whether there was any danger of the outbreak of black plague, and whether or not rats died abnormally.

(13) Whether there is or not goods on board tainted by any virus of quarantine epidemics.

(14) Whether or not there is a doctor on board.

(15) Name of Master of the vessel.

★An example for Cable:

RPM 084005 New York 1st Dec Honolulu 16th Dec
(1) (3) (4) (5)
Tokyo 25th Dec. 1000 Yokohama 1st Nov 81 Derat Crew 35 Pax 3
(6) (7) (8)
9 to 13 None AI Taro Yamada
(9 – 13) (14) (15)

Shipmaster's Report: February 1989.

If the inspected vessel is found, as far as sanitary matters is concerned, in excellent condition, the letter "E" is added to the seven figures of the issuance number.

In this case, the certificate is valid for two years with the sole obligation to have fresh water laboratory test every 12 months.

POLLUTION: Effective 1975, the Marine Pollution Prevention Law requires any tanker of 150 tons gross and above which is loaded with an oil cargo to have materials for oil removal either on board, or aboard escort boats, or at a depot base. Depot bases are understood to have been established, and in this connection Owners, Time Charterers, or Masters are strongly recommended to contact their Agents at least 10 days prior to vessels' arrival Japan.

Pollution Reports by Radio:

1. Vessels navigating in Japanese coastal waters are requested to notify the Japan Maritime Safety Agency (JMSA), through the nearest coast radio station, in cases of discharge of oil, noxious liquids or other harmful substances in container/packaged form.
Reports should include the following details:
(a) Time, date and place of discharge.
(b) Type, quantity and condition of dispersion.
(c) Type, quantity and condition of the containers/packaging.
(d) Condition of wind and sea.
(e) Measures already taken to prevent maritime pollution.
(f) Name, type, g.r.t. and port of registry of vessel.
(g) Name or title and address of vessel's owner.
(h) Type and quantity of oil, etc., loaded on vessel.
(i) Type and quantity of containers/packages loaded on vessel.
(j) Type and quantity of materials carried on board for the prevention of marine pollution.
(k) Location and extent of damage to the vessel if this was the cause of discharge.

2. When a collision, grounding, engine failure or other maritime accident occurs, and results in the possibility of oil, noxious liquid substances or harmful substances discharging, the Master must notify the JMSA of the following:
(a) Items (f), (g), (h) and (j) of the preceding list.
(b) Time, date and place of the accident.
(c) Area likely to be affected by discharge, spillage, etc.
(d) Condition of wind and sea.
(e) Action to be taken to prevent marine pollution.
(f) Type and quantity of containers/packages loaded on the vessel (in the case of imminent discharge of harmful substances).

3. Vessels discovering dispersed oil slicks, etc., must report the fact to the JMSA without delay.

PILOTAGE: *Compulsory Pilot waters surrounding Japan:* Pilot compulsory ports, channels and straits:

I-A. Harbour: Vessels over 300 G/T. Hibikinada, Kawasaki, Kobe, Kokura, Moji, Naha, Sasebo, Shimonoseki, Tobata, Wakamatsu, Yawata, Yokohama, Yokosuka.

I-B. Harbour and Bay: Vessels over 10,000 G/T. Chiba, Funabashi, Kisarazu (Kimitsu), Tokyo and Tokyo Bay, Mizushima.

II. Channels and Straits: Vessels over 10,000 G/T. Kanmon Kaikyo (Strait), Uraga Suido (Channel), Akashi Kaikyo (Strait), Bisan Seto, Irago Suido, Kurushima Kaikyo (Strait). (Large vessels, oil tankers, liquefied gas tankers and vessels carrying dangerous cargo should arrange for watching-boats to guard their course until their safe navigation is confirmed even after they leave the traffic route.)

The Maritime Safety Agency has requested that all foreign flag vessels and vessels carrying dangerous cargo employ Pilots in order to maintain the safety of shipping traffic in the above-mentioned waters surrounding Japan.

The Agency has also requested that vessels take Pilots on board when they navigate the Yura Seto (Tomogashima Suido).

CREW JOINING:

Requirements of Travelling Documents to Japan for Crew/Superintendent:

Crew Joining vessel Max. Stay ashore	Travelling Document	Visa	Remarks
(1) Ordinary Case			
within 5 days	Seaman's Book or Passport	No	Special Landing Permit issued but valid for crew travelling direct to port where crew join ship.
over 5 days	Passport	Req'd	See names of Countries for which visa exempted
(2) New building			
within 30 days	Seaman's Book or Passport	No	See (1) Remarks
over 30 days	Passport	Req'd	See names of Countries for which visa exempted
(3) Purchase/Delivery			
Crew arrival before ownership changed within 10 days	Seaman's Book or Passport	No	Max. 10 days stay ashore permitted subject to Agents' submission of Sale of Contract and Export Licence. See (1) Remarks
Crew arrival before ownership changed over 10 days	Passport	Req'd	See names of Countries for which visa exempted
Crew joining ship before ownership changed	Passport	Req'd	See names of Countries for which visa exempted
Crew arrival after ownership changed		Same as (1)	Ordinary case
Superintendent *(4) All cases*	Passport	Req'd	See names of Countries for which visa exempted

Names of countries for which visa not required:
Within 30 days: New Zealand.
Within 90 days: Argentina, Bangladesh, Belgium, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, El Salvador, Finland, France, Greece, Honduras, Iceland, Iran, Israel, Italy, Luxembourg, Malta, Netherlands, Norway, Pakistan, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Tunisia, Turkey, Uruguay, Yugoslavia.
Within 180 days: Austria, Federal Republic of Germany, Ireland, Mexico, Switzerland, United Kingdom.

Remarks: The above schedule is made out by Dodwell Tramp Agencies on general understanding with Immigration Authorities. However, the above details are not expressly stated in the text of the law but based on Immigration Control Order Article 16 which reads:

Article 16. Permission for landing for Re-shipping.

1. The Immigration Inspector may, in case an alien crewman desires to pass through Japan in order to re-ship on board another vessel in another port of entry in Japan, upon application of the carrier operating the vessel on which the alien crewman has arrived, and in case the alien crewman desires in order to become a crewman of a vessel in Japan, to land from another vessel, etc. and pass through Japan, upon application of the carrier operating the vessel in Japan, permit the landing for re-shipping respectively.

2. In case the permission provided for in the preceding paragraph is given, the Immigration Inspector shall issue a permit for landing for re-shipping to the crewman concerned.

3. In case the permission provided for in paragraph 1, is given, the Immigration Inspector may impose upon the crewman such restrictions regarding period of stay in Japan, route to be followed in transit, and any others which he may deem necessary in accordance with Ministry of Justice Ordinance.

In view of the foregoing, the contents of the schedule is not absolute and may be altered. In order to ensure that crew members are permitted to land Japan to join ships, please send Agent information well in advance on personal data of crew member such as Full Name, Rating, Date of Birth, Passport or Seaman's Book Number together with Flight No. and Ship's ETA/calling port.

SAFETY: The following telex was received from Japan regarding safety regulations for LPG carriers at Japanese ports.
Quote:
The Receiving Terminal Clause (LPG Tankers).

In order to prevent marine pollution by oil and ensure safety in cargo operations, Owner, Master and Crew shall abide by international and/or national laws and regulations.

Especially at discharging port(s) in Japan, Owner, Master and Crew shall observe "Marine Pollution and Marine Disaster Prevention Law" and other relevant law(s).

Moreover, Owner, Master and Crew are strongly requested to observe and/or take actions in accordance with the clauses stipulated hereunder.

(a) Before arrival at the first discharging port, the vessel shall complete undermentioned operations:

1. The following pumps and lines shall be flushed and kept clean:
   Vessel's pumps: fire pump and G.S. pump
   The lines: bilge lines in engine room
   fire lines and G.S. lines.
2. Reliquefaction units shall be checked to see whether they are in good working condition.
3. Cargo handling equipment on board shall be tested in accordance with the instructions given by Charterer; especially, the pressure test of cargo and vapour lines shall be done with a pressure of more than 5 kg./sq.cm. Lubricating lines for cargo pumps (if equipped) and other lines connected with above mentioned lines shall be tested at working pressure prior to the vessel's arrival at the discharging port.
   Safety valves of cargo tanks and cargo lines shall be checked to see whether they are in good condition.
4. Upper deck shall be kept clean and free from oil.
5. The faces of manifolds for connecting with shore lines shall be kept clean.
6. Mooring winches, derricks, cargo control equipment and engine (main engine, generator, boiler, etc.) shall be checked to see whether they are in good working condition.
7. Vessel shall send the Charterer the result of the operations stipulated in this clause (from items (a)-1 to (a)-6) by radio in accordance with Charterer's instructions 3 days or more prior to ETA at the first discharging port.

(b) During berthing operation and while the vessel is alongside the pier, the vessel shall comply with the terminal safety regulations hereunder:

1. While the vessel is alongside the pier, the following work shall be prohibited:
   i. Transferring of bunkers.
   In a case of emergency, however, such work shall be done after obtaining permission from the terminal representatives by checking the work to be done.
   ii. The operations for which fire is used and those which are likely to cause fire.
   iii. The work which will make the vessel unable to move under its own power.
2. During cargo operation, necessary numbers of watchmen for ensuring safety shall be on deck, besides Officers on duty, so that they may watch the vessel and the adjacent areas to eliminate any type of accident.
3. While the vessel is in port, the boil off gas shall not be exhausted.
4. The pressure of the lubricant oil at the stern tube after seal shall be kept lower than that of sea water outside the vessel.
5. While the vessel is alongside the pier, gas detection shall be made at regular intervals in the following places:
   i. Around the valves of each tank dome.
   ii. Around the manifolds.
   iii. Around the compressor room.
   The Crew of the vessel shall be prepared for cargo leakage and/or gas leakage which might happen aboard the vessel.

(c) If there is any indication of cargo leakage and/or gas leakage during cargo operation, the vessel shall stop all pumping operations and notify the Terminal Representatives and/or Charterer's Supervisor(s) to that effect.
The vessel shall not resume cargo operation unless a thorough investigation is made, appropriate remedies are taken, and permission from the Terminal Representatives is obtained.

(d) When Charterer sends their Supervisor(s) to the vessel to check the vessel or to assist cargo handling operation in the case of necessity, Owner, Master and Crew shall agree to cooperate with him or them.
At all times, however, the full responsibility for cargo operation shall still lie with the vessel.

(e) Owner shall send the Safety Marine Supervisor(s) to the vessel to attend the vessel's cargo operation at all times and he or they shall also be requested to attend the meeting for securing safety which is held prior to commencement of cargo operation.

Unquote.

REPORT: 1984.
Providing information of an anchored vessel at time of the approach of a typhoon in Tokyo Bay.

The Regional Maritime Safety Headquarters and the relative authorities have issued a notice, the contents of which is summarised as follows:

In Tokyo Bay, there are 2 congested areas with anchoring vessels at the time of the approach of a typhoon and cases of dragging anchor and collisions will occur. We, therefore, will try to provide the following information concerning the situation of anchoring vessels when a typhoon approaches these areas of Tokyo Bay for the time being, make effective use of the anchorage and prevent accidents to anchoring vessels.

1. Office to provide information . . . Tokyo Wan Traffic Advisory Service Centre (Tokyo MARTIS or VTS Tokyo)

2. Time of commencing/ending information provision . . . The time when the recommendation of refuge is established/withdrawn by Captains of the Ports in Tokyo Bay.

3. Individual information . . . The number of anchoring vessels at 10 minutes to every hour will be informed in English and Japanese by VHF (Call by Channel 16, communicate with Channel 14 or 22) or telephone (Telephone Number: 0468-43-8622-8624) upon request of vessels.

Anchoring vessels in Tokyo Bay are requested to pay careful attention to the following subjects when stormy weather such as a typhoon is expected.

– Anchoring vessels are requested to keep watch continuously on VHF Channel 16.

– Vessels should keep the main engine on standby-by at all times.

SHIPMASTER'S REPORT: August 1978.
It is possible to have the latest changes in ETA relayed by VHF to Inland Sea Pilot stations, for:

1. Wadamisaki via Kobe Port Radio on Channel 16, call "Kobe Port", or Osaka Port Radio on Channel 16, call "Osaka-Port".
2. Sekisaki via Oita Port Radio on Channel 16, call "Oita-Port".
3. Hesaki, via Shimonoseki Port Radio on Channel 16, call "Shimonoseki Port".

These stations are very co-operative and they immediately give the latest information concerning boarding-time and place, as well as requirements concerning the pilot ladder.

AIOI: 34.46 N. 134.28 E. (See Plan)

PORT LIMITS: A line drawn between Kama-Saki and Kane-Ga-Saki defines the seaward limit of the port.

DOCUMENTS:
Ship's Register.
2 Voyage Memorandum (List of ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare: Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels of 10,000 g.r.t. and over, and recommended for smaller vessels in view of number of islands and difficult channels causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination. *Note:* VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 34.09′ N.; 135° 11′ E. Telegraphic address: "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N.; 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N.; 131° 03′ 12″ E.

Aioi Dock Master not licensed to pilot vessels from outer harbour and boards at anchorages outside Aioi Bay.

ANCHORAGES: 9 anchorages outside Aioi Bay and 2 anchorages inside the Bay as follows:

North: True bearing 342° from Kasamatsu Iwa, distance 1,340 m.

South: True bearing 335° from Kasamatsu Iwa, distance 860 m.

MAX. SIZE: See "Berthing".

HEALTH: Pratique to be obtained at another Port prior arrival Aioi.

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Normally join vessel at anchorage inside Aioi Bay. Tug's lines always used without charge.

BERTHING:

Wharf No.	*LOA* (m.)	*Max. Draft at LW* (m.)
1	266	7.0
2	175	5.5
3	Usually not used	
4	284	5.5
5	100	5.5
6	Usually not used	
7	340	7.0
8	340	5.5
9	290	6.5
10	340	5.5
11	230	5.5
12	350	7.5

MEDICAL: Full hospital facilities available without prior notice.

TANKERS: Must be fully gas-freed before entering the port. No facilities for tank cleaning or gas freeing in the port. Barge for slop disposal can be arranged by Agents.

DENSITY: Average 1025/1026 Winter, and 1018/1020 Summer.

FRESH WATER: Available from jetty/dock.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.

CONSULS: None.

DRY DOCKS:

Restrictions: Vessels may anchor any time day or night. Draft and trim to be adjusted to enter dry dock per dockyard recommendation as follows:

Name of Dock	*Max. Draft at L.W.*	*Max. Trim*	*Min. Trim*
No. 1 D.	5.50 m.	$\frac{L(m)}{200}+1.50$ m.	$\frac{L(m)}{200}+0.10$ m.
No. 2 D.	4.50 m.	$\frac{L(m)}{200}+1.50$ m.	$\frac{L(m)}{200}+0.10$ m.
No. 3 D.	5.50 m.	$\frac{L(m)}{300}+1.50$ m.	$\frac{L(m)}{300}+0.10$ m.

Deeper draft available at HW.

Max. Size: Max. size of ships to be accommodated as follows:

	LOA	LBP	Breadth	d.w.t. (LT)
No. 1	238 m.	230 m.	33 m.	73,000
	780 ft. 9 in.	754 ft. 7 in.	108 ft. 3 in.	
No. 2	156.1 m.	145 m.	19.8 m.	14,000
	512 ft. 1 in.	475 ft. 8 in.	63 ft. 11 in.	
No. 3	341 m.	328 m.	54.5 m.	300,000
	1120 ft.	1076 ft. 1 in.	178 ft. 10 in.	

REPAIRS: Dockyard port. All repairs available. Specialist technicians obtainable from Kobe/Osaka area.

SURVEYORS: Lloyd's Register, N.K.K. and A.B.S. have offices in the I.H.I. Shipyard. Other surveyors available from Kobe.

CUSTOMS ALLOWANCES: Only allowed cigarettes for personal use, but no spirits.

AIRPORT: Osaka (Itami).

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110 or Aioi 2–0740; Ambulance/Fire 119 or Aioi 2–7128.

EMERGENCY CO-ORDINATION CENTRE:

Marine Safety Agency, Himeji Branch office: Tel: 0792 - 34 - 1016.

Marine Safety Agency, Kobe Office: Tel: 078 - 331 - 0111. Call sign: GD/Kobe Hoan.

TELEPHONES: Placed aboard at IHI shipyard.

SERVICES: No special services at Aioi, but available from Kobe/Osaka.

SHORE LEAVE: There is no restriction on crew's shore leave if they carry shore pass issued by local immigration office.

AUTHORITY: Kamigori Doboku (Public works) Office, 500 - 5, Aza Marugami, Kamigori, Kamigori-Cho, Ako-Gun, Hyogo Pref. *Tel:* (07915) 2 - 0083.

AGENT: See "Himeji"

AKITA: 39.45 N. 140.03 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration. Cargo Manifest and Cargo Manifest in transit using specific forms. Ships Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory but recommended. Boards at 39° 46′ N., 140° 00′ E. (1 mile 270° from Akita lighthouse) or off Funakawa mile 140° from breakwater end light if required. 2 Pilots board if ship's gross tonnage exceeds 18,000. Cost 170% of pilotage.

ANCHORAGE: Off Akita, 2 miles 270° – 280° from Akita Lighthouse. Depth exceeds 20 m. Bottom – soft clay with mud. No buoys.

MAX. SIZE: See "Berthing". Min. depth at extreme low water – In fairway – 10.0 m. At Anchorage – 20.0 m. Tidal range 20 cm. – 30 cm.

HEALTH: Quarantine anchorage 39° 51′ N. 139° 53′ E. When impossible to inspect at Funakawa, i.e. during bad weather, officers attend off Akita.

RADIO: Niigata Radio when ship coming from South. Sapporo Radio when ship coming from East/North. Choshi Radio if long distance.

VHF: VHF Channel 16 – 156.8 MHz. VHF Channel 12 – 156.6 MHz. Operated by Regional Maritime Safety Headquarters (Harbour Master).

TUGS: 1 tug 2,000 h.p. available owned by local government. 4 tugs (200 – 800 h.p.) available, privately owned.

BERTHING:

STEVEDORES: Working time 0830–1630 hrs. every day.

Grain in bulk: 150–170 t.p.h. by shore crane, 40–60 t.p.h. by ship's gear.

Logs/lumbers: 200,000 BM per gang per day (Nanyozai), 80,000–100,000 per gang per day (Beizai).

Potash in bulk: 150–180 t.p.h. by shore crane, 50–60 t.p.h. by ship's gear.

Fertiliser in bag: 250–300 tons per day per gang.

Zinc concentrate in bulk: 300–350 t.p.h. by shore crane, 40–60 t.p.h. by Ship's gear.

MEDICAL: Hospital and treatment available.

TANKERS: See "Berthing".

DENSITY: 1020–1021.

FRESH WATER: Available at every wharf. Rate 30 t.p.h.

FUEL: Domestic bunkers available. If bonded bunkers required, brought from Hakodate, Niigata.

CONSULS: No Consuls, but 2 notary public offices.

REPAIRS: Minor repairs only.

GANGWAY/DECK WATCHMEN: Not compulsory, but available if required.

OPENING/CLOSING HATCHES: Stevedores open and close hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting charges.

CERTIFICATES: Ship's Register to show Customs Inspector to check ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance seems poor.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.

REPATRIATION: Possible.

AIRPORT: Flights to Tokyo/Osaka/Nagoya/Hakodate/Sapparo 1–4 times per day. 20 km. from port.

TIME: GMT plus 9 hours. No alterations during year.

HOLIDAYS: Local holidays: January 2nd, 3rd, August 13th, 14th, December 30th, 31st. 1st, 3rd and 5th Sunday of each month also non-working.

POLICE/AMBULANCE/FIRE: Contact through Agents.

SERVICES: Provisions – Available. Hold Cleaning – Available. Surveyor – Available from Niigata.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days.
AUTHORITY: Akita Port Administration Office, 7-1 Nishi 1-Chome, Tsuchizaki Minato, Akita City. *Tel:* (0188) 45-2021/0042/0652.

FRESH WATER: Available at any time.

	Kobe Steel Works Wharfs	*Public Wharf*
Methods	Shore line	Shore line
Sunday, Holiday	Daytime 40% up	40% up
	Before midnight 50% up	50% up
	After midnight 100% up	50% up

Daikyo Oil Jetty. Only available by barge from Kobe.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Bunkering at Oil Jetty prohibited.
CONSULS: No consulates in Amagasaki area.
REPAIRS: No dockyard. Minor repairs can be carried out on vessel alongside wharf.
GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

Compulsory for tankers working cargo at oil jetty.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
REPATRIATION: Possible.
AIRPORT: International airport Osaka, 15 miles from Amagasaki.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
HOLIDAYS: Kobe Steel (Ore/Coal) Nil. Public Wharf (Scrap) 20th July.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.
TELEPHONE: No telephone installation service on board.
SERVICES: Compass adjustment can be carried out at anchorage.
SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.
AUTHORITY: Amagasaki Port Administration Office, 21, Doi-cho 7-chome, Amagasaki City, Hyogo Pref. *Tel:* (06) 412-1361/5.

AGENT: Dodwell Tramp Agencies, Osaka. (see "Osaka".)

ANAN (Tachibana): 33.52 N. 134.40 E.

DOCUMENTS: and all general information, refer to "Shimotsu".
PILOTAGE: Not compulsory. Pilot can be arranged through Agent if required.
MAX. SIZE: Max. draft 10.50 m., limited by channel depth.
HEALTH: Closed port. If arriving directly from abroad, vessel should proceed to Shimotsu for health clearance. Immigration authorities attend from Komatsushima if required.
TUGS: One tug of 2,000 h.p. available.
BERTHING: Nippon Denko Wharf, length 200 m., depth alongside 11 m. Unloading capacity 500 t.p.h.
FRESH WATER: Available from shore hydrants only.
FUEL: By barge from Hanshin area only.
AUTHORITY: Anan Doboku (Public Works) Office, Aotani, Tomioka-cho, Anan City, Tokushima Pref. *Tel:* (08842) 2-3111.

AGENT: See "Niihama".

AOKATA (Kamigoto): 32.59 N. 129.02 E.

LOCATION: The sea berth, in position Lat. 32° 59′ 13″ N., Long 129° 01′ 48″ E., is for receiving crude oil for the Japanese government for stockpiling.

The stockpile base is located at Aokata Port at the Northern end of Goto Island, in the Kyushu District.
PILOTAGE: Pilotage is rendered by Nagasaki Pilot Association. The Pilot boards in a position 243° at a distance of 3 miles from Shugen-Shima.
HEALTH: Sasebo Quarantine Station conduct inspection onboard at Aokata.
TUGS:

Vessel Size d.w.t.	*No. of Tugs* Required*
under 30,000	2
under 80,000	3
under 200,000	4
over 200,000	6

*Number of tugs required is based on a capacity of 3,000 h.p. for each tug.
BERTHING: *Kamigoto Oil Storage:*

Capacity: 5 floating tanks, each with a capacity of 880,000 cu.m. and dimensions 390 m. × 97 m. × 27.6 m. deep.

Berthing: Vessels berth starboard side alongside.
GENERAL:
Customs: Nagasaki Customs Office conducts inward and outward clearance onboard at Aokata.
Immigration: Under the jurisdiction of Nagasaki Immigration Office.
M.S.A.: Under the jurisdiction of Nagasaki Maritime Safety Office.

AOMORI: 40.52 N. 140.45 E.

DOCUMENTS: Documents and all general information, refer to "Hachinohe".
PILOTAGE: Not compulsory. Harbour Pilot available at Quarantine Anchorage.
RESTRICTIONS: Day and night entry possible.
HEALTH: Free Pratique granted at the anchorage.
TUGS: 1×1,680 h.p. and 1×70 h.p.
BERTHING:

CRANES: 2×35 tons, 2×18 tons and 1×13 tons.
TANKERS: *Bridgestone Pier:* Max. LOA 260 m., max. draft 12.0 m. Product handled: LPG, 1×12 in. line, discharge rate 1,200 t.p.h.
FRESH WATER: Available ex-wharf.
FUEL: Can be supplied by barge from nearest stock port (Hakodate).
REPAIRS: Small repairs possible.
AUTHORITY: Aomori Port Administration Office, 5-5, Hon-cho 4-chome, Aomori City. *Tel:* (0177) 34-4101.
AGENT: See "Hachinohe".

ATSUMI: 34.40 N. 137.04 E.

DOCUMENTS, and all general information: refer to "Yokkaichi".
PILOTAGE: Compulsory; Pilot boards at the point 300° – 7 miles from Kamishima Lighthouse.
Also see "Nagoya" – "Pilotage: Shipmaster's Report".
RESTRICTIONS: No possibility of passage through Nakayama Suido after sunset. However, vessels under 9 m. draft able to enter from Nojima South Passage.
MAX. SIZE: *Dolphin Pier:* 70,000 d.w.t., LOA 240 m., max. draft 12.50 m.
SBM: 210,000 d.w.t., max. draft 13.00 m.
CLEARANCE: *Quarantine:* Quarantine Office opened at Atsumi.
Immigration: Immigration Officials attending from Toyohashi.
TUGS: Minimum 2 tugs required for mooring/unmooring due to strong current.
BERTHING: *Dolphin Pier:* Lat. 34° 39′ 36″ N., Lat. 137° 04′ 54″ E. 2.5 km. from installation.
SBM: Lat. 34° 39′ 47″ N., Long. 137° 03′ 56″ E. 2 km. from installation.
Shoreline: Dolphin Pier: 2×12 in., discharge rate 3,000 t.p.h.
SBM: 2×16 in., discharge rate 7,500 t.p.h.
FRESH WATER: At Dolphin Pier: ex pipe-line (boiler water only).
At SBM: by barge.
FUEL: Bunkering permissible only at anchorage by barge.
DENSITY: 1025 at both berths.
AUTHORITY: Chubu Electric Power Co. Inc., No. 1 Toshin-Cho, Higashi-Ku, Nagoya, 461-91 Japan. *Tel:* (052) 951-8211. *Telex:* 444-4405 Chuden J.
AGENT: Chubu Port Service Co. Ltd. (Subsidiary company of Port Authority).

CHIBA (including Yahata): 35.36 N. 140.07 E.

(See Plan)

DOCUMENTS:
Ship's Register. Last Port Clearance. 3 Crew Lists including Passport Numbers, 3 Passenger Lists. 1 Stores List. 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).
Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Harbour Pilots are available at the anchorage.
Pilot not available after sunset.
Also see "Pilotage" in "Japan – General".
ANCHORAGES: Quarantine anchorage on Northern part of Tokyo Wan. Chart No. 1061, published by Maritime Safety Agency.
SIGNALS: Following signals exhibited at Chiba Lt. and Chiba Signal Station.

	By Night	*Remarks*
Chiba Route	W. flash 2 secs.	Over 500 GT outwards — STOP.
	R. flash 2 secs.	Over 500 GT entering — STOP

HEALTH: Radio Pratique available, requested through Agent. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agents advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage) 2100 – 0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).

	Lub. Oil	6 in.×1	500

Berthing at Sea Berth: Berthing is limited to daylight hours only. Vessels always berth with the bow towards the N.E. end of the berth. In the normal berthing manoeuvre the vessel is brought parallel to the berth, at a distance of about 200/300 m., and then warped alongside. While approaching the berth, Pilots check the speed with shore targets and radar distance. Vessel is required to maintain the 3 cm. radar in operation. When coming alongside, speed is monitored by a Sonar doppler installed at the berth. The Pilot is advised by walkie-talkie if the berthing velocity exceeds the safety limits. The speed of approach for vessels up to 260,000 d.w.t. must be less than 15 cm./sec.

When berthing, sliding along the berthing dolphins should be avoided so as not to damage the rubber cell fenders.

The normal mooring configuration is:

4 head lines
3 breast lines forward
3 back springs forward
3 back springs aft
3 breast lines aft
4 stern lines

It is advisable to have ready a certain number of synthetic ropes.

The breasting dolphins are located quite close and the breasting lines are short and are at a steep angle.

A Terminal Port Captain remains on board during the entire operation and should be consulted with regard to mooring arrangements. Caution should be exercised for wash caused by passing ships.

Close co-ordination is maintained between the Terminal and the shore throughout the operation.

No repairs are permitted alongside. IOTTSG Safety and Pollution check lists are strictly observed.

Operator's Report: 1983.

Keiyo Sea Berth (Discharging Terminal): Operated by Keiyo Sea Berth Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime, weather or other circumstances permitting. Terminal will not be closed due to any holidays.

Location: Lat. 35° 30′ 30″ N., Long. 139° 56′ 25″ E.

Pilotage: Compulsory.

Anchorage: 236°, 5,000 m. and 305°, 3,200 m. off from centre of Keiyo Sea Berth.

Restrictions: Max. draft 19.2 m. but vessels whose draft exceeds 18 m. are tide controlled (full flood required when ships made fast).

Berthing: West Berth, starboard side alongside. East Berth, port side alongside.

Cargo Rates: Maximum rate 12,000 kl./hr. Maximum pressure 9 kg. sq.cm. at manifold.

ANCHORAGE: See "Restrictions".

RESTRICTIONS: Controlling depths (MLW) are as follows: entrance 20 m.; channel 17 m.; anchorage 17 m.; berth 15 m.; The mean tidal range is 3 m. Nature of bottom is mud. Velocity of current: entrance 1 knot; channel 1.5 knots; anchorage 0.5 knots; berth 0.5 knots. Vessels may berth at any stage of the tide during the day.

MAX. SIZE: 30,000 – 80,000 d.w.t. and 120,000 d.w.t. with half cargo. Max. LOA 185 m. – 273 m. Depth 15.5 m. Max. draft 14.0 m. according to tidal conditions.

HEALTH: Available during daytime only in Kure or Iwakuni Quarantine Anchorage. Quarantine Officers inspect galley, pantry and food stores. Pilot ladder used for boarding.

RADIO: Shimonoseki – Kobe.

TUGS: Five available and advised for berthing and unberthing. One forward and one aft, 3,000 h.p.

MEDICAL: Doctor available.

TANKERS: Pilot berths/unberths vessel.

It is dangerous to navigate at night.

Moorings: Forward	3 headlines	Aft 3 sternlines
	2 breast lines	2 breast lines
	2 spring lines	2 spring lines

Connections: 2×12 in. connected and disconnected by shore gang booms not necessary. Max. pressure required by shore is 7 kg./sq.cm.

Pumping Rate: 5,000 k/l per hour expected.

Pipeline: Length 131.6 m.; 2×24 in.

Gangway: Pilot ladder used as not sufficient room for gangway.

Pollution: Berth is closed by floating pollution retain. Dimension 320 m.×56 m.

Ballast: During ballast operations shore personnel remain on board to check for dirty ballast and a motor-boat watches for same purpose. There are no slop tanks or facilities for dirty ballast ashore.

Storage Capacity: Crude oil, 22,000 k/l × 5 tanks; 21,300 k/l × 3 tanks; (total crude oil 173,900 k/l).

DENSITY: Summer 1020, Winter 1025 average.

FRESH WATER: Available, any quantity, by water barge from Kure, 4 days' notice required.

FUEL: Available.

FIRE PRECAUTIONS: Standard regulations.

REPAIRS: Facilities available – shore steam and electricity available.

DRY DOCKS: Available, lifting capacity 500,000 tons.

STORES: Laundry and provisions available.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits and some beer.

Customs Officers inspect crew cabins.

AUTHORITY: C.I. Oil Terminal Ltd., 5-1, Kita-Aoyama, 2-Chome, Minato-Ku, Tokyo, Japan. *Tel:* Tokyo 03-497-8147. *FAX:* Tokyo 03-497-8144. *Contact:* M. Suzuki, Director.

Etajima Oil Supply Terminal, 3639-3 Etajima-Cho, Aki-Gun, Hiroshima, Japan. *Tel:* (0823) 42-3131/5.

FUKUYAMA: 34.29 N. 133.26 E. (See Plan)

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio and/or Choshi Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of two pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 07.54′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed shelter as near as possible having due regard to safety, to Sekisaki pilot station.

APPROACHES: Main approach channel (leading to raw material discharging berths and pipe loading berth). Depth 16 m. (52 ft. 6 in). Width 350 m. (1,148 ft.). Distance from quarantine anchorage to "A" berth, 9,500 m.

Pilot undertakes berthing vessels at "A", "B", "M" or "L" berths, with draft up to 16 m. Vessels drawing over 15.5 m. may berth at high tide.

Branch channel (leading to loading berths except pipe berth). Depth 11 m. (36 ft.). Width 300 m. (984 ft.). Distance from quarantine anchorage to Export berth No. 1: 11,500 m.

ANCHORAGES: Quarantine anchorage position: Lat. 34° 22.5′ N. and Long. 133° 26.3′ E., an area of 750 m. radius.

RESTRICTIONS: Inland Sea (Setonaikai):

1. *Akashi Strait and Bisan Seto:* All vessels, over 200 m. LOA shall navigate on Bisan Seto in daytime only and also vessels over 250 m. LOA have to have an escort boat when navigating on Akashi Strait and Bisan Seto respectively in accordance with the Maritime Regulations. Permissible draft on arrival 16 m., but 12 m. on departure.

2. *Kurushima Strait:* The vessels, over LOA 200 m. shall navigate on Kurushima Strait at slack water in daylight and vessels over LOA 250 m. and up to 300 m. have to have an escort boat when navigating on Kurushima Strait.

The draft restrictions are as follows: The permissible draft for LOA from 200 m. up to 250 m. shall be less than 13 m. and LOA from 250 m. up to 300 m. shall be less than 11 m.

Escort Boat: 2 escort boats with VHF available. Max. speed 24 knots, cruising speed 18 knots.

MAX. SIZE:

Berth	*Max. LOA (m.)*	*Max. draft (m.)*
"A"	305	16.0
"B"	285	16.0
"F"	180	11.0
"E"	210	13.0
"L"	350	16.0

Also see "Berthing".

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.

VHF: "Fukuyama Port Radio" on Channel 16 (0600 – 2000 hrs.).

TUGS: 5 tugs (3,200 h.p.) available in the Fukuyama Harbour. Additional tugs are available from other Inland Sea terminals.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Berthing/unberthing not carried out during hours of darkness.

Nippon Kokan K.K. – Fukuyama Works. Private Berths.

Raw Material Berths (Discharging Berths).

Berth	*Length and depth in metres*	*Max. size of vessels acceptable in d.w.t.*	*Cargoes discharged*	*Remarks*
"L"	315 17.3	200,000	Coal and Ore	2 gantry cranes each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"M"	250 17.0	200,000	Coal and Ore	Iron Ore 1,200 tons with 1 crane. Coal 800 tons with 1 crane.
"A"	300 17	150,000	Coal and Ore	4 gantry cranes (available for both "A" and "B" berths) each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"B"	280 16	100,000	Coal and Ore	Iron Ore 950 tons with 1 crane. Coal 700 tons with 1 crane. Normally 2 cranes are used for a vessel
"E"	210 14	75,000	Mainly Coal	2 gantry cranes each with 750 t.p.h. discharging capacity. Average discharging rate: Coal 600 t.p.h. with 1 crane.
"F"	180 11	20,000	Mainly Coal for coastal vessels	2 level-luffing cranes each with 300 t.p.h. discharging capacity. Average discharging rate: Coal 500 t.p.h. with 2 cranes.
"S"	249.5 12(max.draft)	35,000	Pig Iron and Scrap for discharging and loading	3 level-luffing cranes each with 15 tons lift capacity. Average discharging rate per hour: Pig Iron 350 tons with 3 cranes. Scrap 300 tons with 3 cranes.

Steel Product Loading Berths:

Name	Berth No.	Length (m.)	Depth (m.)	Capacity (d.w.t.)	Cranes (tonnes)	Remarks
Dom-	1 – 2	200	5	2,000	1×40, 1×250 (Derrick)	Construction

	4	250	13	35,000	1×20, 1×30 (Gantry)	
	5	130	13	35,000	2×40 (LLC)	
Pipe	P	399	11.5	35,000	1×20, 1×50 (Gantry)	Pipe
Slag	1	181	7	5,000	1×600 tonnes/p.h. (Ship Loader)	Slag

STEVEDORES: Stevedores available at all times for loading steel products and discharging raw materials.

For a berth term contract on loading, at least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA.

If stevedores cannot commence loading at time notified by the Agents, the orderers must pay for waiting time. Discharging for all raw materials is on "Free In/Out" basis. Therefore, stevedorage is to receivers account. Loading/unloading is carried out by shore cranes. Ship's gear is not used.

MEDICAL: No advance notice required except on Sundays, holidays and in an emergency.

DENSITY: Summer 1016 – 1022. Winter 1025. The density not much affected by tide, which is maximum 3.84 m.

FRESH WATER: Available at any berth. Supply capacity about 11 t.p.h. Water barge also available, capacity 150 tons.

FUEL: Bunkers by lighter from Kobe, Mizushima, Tokuyama or Moji area. Advance notice required.

CONSULS: None.

REPAIRS: Only minor repairs.

DRY DOCK: None. Available at Innoshima or Mukayima and Tsuneishi.

GANGWAY/DECK WATCHMEN: Not specially required unless valuable cargo on board. Steel Mill's guard are on watch at all gates.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches for loading steel products. Charge is assessed according to tariff. Recommend request stevedores for this work unless crew can complete it before berthing. For discharging raw materials opening/closing hatches must be carried out by ship's crew before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Nearest airport is Okayama (70 km.), but Tokyo and/or Osaka are preferable due to convenience of traffic.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Guardmen's office located at Middle Gate of Nippon Kokan.

TELEPHONES: No arrangements for placing telephone on board. Private telephones connecting with offices in the compound of the Fukuyama Works are placed at each of the raw material berths.

For vessels alongside export berths, private telephone available at foremen's office located on berth.

SERVICES: Hold cleaning.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days.

GENERAL: Fukuyama is a local and new port, developed along with the expansion of Nippon Kokan, Fukuyama Steel Works.

Ship repairs (except small ones) for machinery, radio, radar, etc., are all arranged by firms located in Tokyo, Osaka and Kobe.

AUTHORITY: Fukuyama Public Works Office, 286-2 Miyoshi-Cho, Fukuyama City, Hiroshima Pref. *Tel:* (0849) 21-1311.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nissan Senpaku Ltd., Port Bldg., 1, Kokan-cho, Fukuyama-shi, Hiroshima-ken. Cable address: Nissan Fukuyama. Domestic Telex: 6436-11; 6436-12 Nissan J. Tel: Fukuyama (0849) 41-0535.

FUSHIKI: 36.49 N. 137.03 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 029°, 2 miles off leading light, thence takes vessel to Quarantine Anchorage ground. Due to many fish-nets on both sides of fairway if requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fish-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot boat painted yellow. No particular light or sound signals required.

ANCHORAGE: Safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.

RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour.

MAX. SIZE: Length 180 m., draft 31 ft. in Summer and 30 ft. in Winter. However, depth of port not always definite, being a river port and dredging operations always carried out to keep depth all year round. Tidal range is maximum 0.45 m. Dredging to 10.0 m. depth underway.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: (Also see "Pilotage".) Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at port entrance, but sometimes in Outer Harbour for large vessels. Narita-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. Used only when Pilot on board.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	Length (m.)	Capacity (g.t.)	Cranes
Left No. 1 Wharf	160	10,000	2×5 T
Left No. 2 Wharf	150	10,000	
Left No. 3 Wharf	185	10,000	
Left No. 4 Wharf	185	10,000	
Left No. 5 Wharf	90	1,000	
Right No. 1 Wharf	220	2×3,500	1×5 T
Right No. 2 Wharf	220	2×3,500	
Right No. 3 Wharf	185	15,000	1×8 T
Right No. 4 Wharf	175	10,000	
Right No. 5 Wharf	130	5,000	

Note: Depth becomes shallow with every rainfall. Therefore recommended to contact the port authorities prior to vessel's call. See "Max. Size".

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density between 1015 and 1019 in all seasons.

FRESH WATER: Available, from left Wharf No. 1, 2 and 3, average 45 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. Bunkers will be lightered from the nearest bunker port at maximum 7 days' prior notice.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry docks. Nearest available in Toyama.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Toyama Airport about 35 km. distance. 2 regular services a day. ANA only.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 1st May and New Year's Day.

POLICE/AMBULANCE/FIRE: Police, Fushiki Police Station, Takaoka (0766) 44-1500; Ambulance, Fushiki Fire Station, Takaoka (0766) 44-1122; or 119; Fire, Fushiki Fire Station, Takaoka (0766) 44-1122.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Hold cleaning available.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
DEVELOPMENTS: Right No. 4 Wharf reconstructed, now 175 m. long, 10 m. deep, also Right No. 5 Wharf, 130 m. long, 7 m. deep. Left No. 1 Pier under reconstruction, when completed will be 185 m. length, 10 m. depth. Left No. 2 Pier to be reconstructed and completed to same size as Left No. 1.
AUTHORITY: Fushiki Port Administration Office, 5-15, Fushiki Minato-machi, Takaoka City, Toyama Pref. *Tel:* (0766) 44-0277.
AGENT: Sub-agents of Dodwell & Co. Ltd., Toyko. Fushiki Kairiku Unso Co. Ltd., 6-6, Fushiki-Minato-machi, Takaoka-shi, Toyama-Ken. Tel: Takaoka (0766) 44-130019. Telegraphic address "Fushikikairiku Fushiki". Telex: 05155-571/572.

HACHINOHE: 40.33 N. 141.33 E. (See Plan)

DOCUMENTS:
5 Crew Lists including Passport Numbers.
4 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage (only first port of call in Japan).
1 Maritime Declaration of Health (for Quarantine on specific form).
1 Vaccination List of Crew (for Quarantine).
Ship's Register and Port Clearance from previous port (Presentation only). Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest for discharge and Cargo Manifest in transit using specific forms.

PILOTAGE: Not compulsory but arrangeable at Master's request. Pilot is generally arranged by Agent if Master requires, and vessel has to inform Agent ETA at latest 24 hours before arrival. Pilot comes on board from tug which flies flag "H". Tug has no facility to communicate with vessel, therefore vessel must constantly keep in close communication with Agent in order to advise Pilot.

When vessel approaches Hachinohe, VHF (Channel 16) belonging to Harbour Master is available for communication with Agent and Pilot.

Pilot boards at vicinity of Quarantine Anchorage (Lat. 40° 33′ N., Long. 141° 33′ E.). Pilot operates from 0630 hrs. till sunset.

ANCHORAGES: Open sea anchorage with a sandy bottom. Depth of water 12 m. – 16 m.
RESTRICTIONS: Pilot arrangeable only in daytime for entry.
MAX. SIZE: See "Berthing".
HEALTH: At first port of call in Japan, vessel should obtain Free Pratique, thus unnecessary further Pratique procedure at another port in Japan.

Quarantine Inspector boards vessel on arrival at Quarantine Anchorage (005.5°, 2,790 m. from Northern Breakwater Light) but occasionally boards upon berthing unless berth congested.

Master should submit to the Inspector the Maritime Declaration of crew, Vaccination List of crew, Vaccination Cards and Derat Exemption Certificate.

In case of vessel coming from an infected area, Master to report health condition of crew and passengers, number of crew and whether supplied with any provisions or water, also names of crew or passenger landed there.

If there is sick person on board, Master to report to quarantine office the illness condition in detail through ship's Agent thereafter Master should obey instructions of quarantine office.

RADIO: Masters' telegrams from Westbound vessel via Choshi Radio and Northbound vessel via Nagasaki Radio are passed on to Agents.
Call sign: Choshi Radio JCS, JCT, JCU and JDC
Nagasaki Radio JOS, JOT, JOU and JDB.

VHF: VHF available but it belongs to Harbour Master (Channel 16). If no emergency in effect, Harbour Master will pass simple messages to Pilot, Quarantine or tugs.
RADAR: No shore radar service however harbour tug-boat is equipped. Consequently tug-boat has been used by Quarantine and Pilot in foggy season.
TUGS: Pilot boards from tug-boat in vicinity of Quarantine Anchorage and escorts the vessel to inner harbour. Tug-boats always supply tug line free of charge.
BERTHING: In addition to berths mentioned below there are facilities with lesser depths for small vessels.
Public **Wharves:** Controlled by Aomori Pref.

CRANES:

Name of berth	*Crane*	*Nos.*	*Capacity (in case of Zinc concentrates)*	*Max. height*
Hattaro B-berth Hattaro C-berth	Unloaders	2	Each 315 K/T per hr.	14 m.
Hattaro E-berth	Unloader	1	630 K/T per hr.	19 m.
Hattaro F-berth Hattaro G-berth	Mobile tower cranes	2	Each 100 K/T per hr.	6 m.

No heavy-lift facilities.

STEVEDORES: Stevedores arranged upon receiving Master's ETA information.

Main Cargo		*Rate of works (average)*	
Nickel Ore		6,000 K/T per day	Discharging
Zinc Lead	Concentrates	3,000 K/T	”
Logs		2,100 CM	”
Woodchips		10,000 K/T	(24 hrs. work)
Canned goods		230 K/T	Loading

MEDICAL: 3 General Hospitals and Medical Specialists available. No advance notice required unless urgent.

TANKERS: See "Berthing".
DENSITY: About 1025.
FRESH WATER: Available from wharf and water barge. 50 t.p.h. by barge and 40 t.p.h. from wharf.
FUEL: All grades of domestic oil obtainable by oil barge. Bonded oil being brought from Yokohama, Chiba, Kashima, Sendai and Tomakomai with sufficient notice beforehand.
CONSULS: None.
REPAIRS: Minor repairs possible.
DRY DOCKS: Only for small vessels in 1,000/2,000 tons G.T. class, 2 dry-docks and other floating dock.
SURVEYORS: No Classification Society at this port except Marine Surveyor "Nippon Kaiji Kentei Kyokai" licensed by the Japanese Government. Surveyors of NK, Lloyd's, ABS and NV normally come from Hakodate, Tokyo or Yokohama.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Ship's option.
CUSTOMS ALLOWANCES: Customs allow 200 cigarettes and 1 bottle of spirits.
CARGO GEAR: See "Cranes".
REPATRIATION: All facilities available for crew changes.
AIRPORT: Misawa Airport, distance Hachinohe/Misawa about 50 km.
TIME: GMT plus 9 hours.
HOLIDAYS: Official holidays; New Year's Day (1st Jan.), Adults' Day (15th Jan.), Foundation Day (11th Feb.), Vernal Equinox Day (21st Mar.), Emperor's Birthday (29th Apr.), Constitution Memorial Day (3rd May), Children Day (5th May), Respect-for-the-Aged Day (15th Sept.), Autumnal Equinox Day (23rd Sept.), Health & Sports Day (10th Oct.), Culture Day (3rd Nov.) and Thanksgiving Day (23rd Nov.).

Work can be arranged on above days except New Years' Day but can not arrange 2nd & 3rd Jan., May Day (1st May), Hachinohe Festival (21st Aug.), Stevedores Year End Holiday (31st Dec.) and 1st, 3rd and 4th Sunday of every month.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.
TELEPHONES: It is not possible to place telephones on board.
SERVICES: Marine Survey, Tally, Hold Cleaning (Cargo vessels), Notary Public.
SHORE LEAVE: Immigration issue shore-passes for ship's stay if crew have valid Passport or Seaman's Book (Valid 3 days, with possible extension).
IDENTIFICATION CARDS: Not required.
REGULATIONS: Vessel may sail anytime.
DELAYS: No delay normally but sometimes due to congestion of a specific berth.
DEVELOPMENTS: Fairway in Hattaro Area including Hattaro E-Berth will be dredged to −13 m. in future and Hattaro D-Berth to be constructed together with large shore-crane, also Hattaro Pier No. 2 is being planned and will be constructed in the vicinity of Hattaro F&G- Berth. Moreover two long breakwaters will be constructed outside the harbour, however this is presently under negotiation with Fishermen's union in respect of fishery. (Length of Breakwater 3,700 m.).

SHIPMASTER'S REPORT: 1975
Pilotage: Compulsory. The Quarantine Anchorage is position Lat. 40° 32.9′ N., Long. 131° 32.7′ E., bounded by a circle radius 2.5 cables. In view of the considerable new development vessels should obtain Japanese chart No. 65 if possible. Vessels navigating on B.A. charts can be met by Pilot at a position 2 miles North of Same Kaku Lighthouse, by prior arrangement.
Restrictions: Vessels may sail any time.
Max. Size: Draft 9.5 m. LOA 170 m. breadth no restriction (June 1975).
Health: Radio Pratique can be obtained by all vessels holding valid Japanese Sanitary Inspection Certificate. (This rule applies to all Japanese Ports).
Tugs: A number of tugs are available.
Berthing: A number of new berths are now available. Dredging is in progress and available drafts can be expected to increase.
Airport: Two flights per day.
Developments: Reclamation, expansion, dredging etc., in progress.

AUTHORITY: Hachinohe Port Administration Office, 1 – 131 Kitanuma, Kawaragi, Hachinhoe City, Aomori Pref., Japan. *Tel:* (0178) 28–2105. *Contact:* General Manager.

AGENT: Narasaki Sangyo Co., Ltd., Hachinohe Branch, 10-4, Aza Kaigan, Oaza Kawaragi, Hachinohe-shi, Aomori-ken. Cable Address: Narasaki Hachinohe. Telex: 0822960 Nara J. Tel: (0178) 20-1651.

HAKATA: 33.36 N. 130.24 E. (See Plan)

DOCUMENTS:
Customs: When vessel arrives direct from foreign port, Customs Officials will board vessel for search. The following documents are to be submitted.

Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member), Arms and Ammunition List, Narcotics List, List of Ports of Call on Current Voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:

Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will no attend on board, except special case. The Master or Agents are to atten at Customs House for entry formalities with the following documents:

Discharging Cargo Manifest, Through Cargo Manifes Declaration Inward/Outward, Ship's Registry, Last Po Clearance, Documents entrusted with the Master at previous po

On vessel's departure, a clearance is issued by Customs, afte confirming payment of tonnage dues.
Immigration: Immigration Officials board vessel on her arrival in port t examine passports, discharge books and/or other equivalent trav documents and provide a 72-hour landing pass for crew members an passengers. 1 copy each of Crew List and Passenger List are require by them. Providing vessel's Agents with a Crew List beforehand will b a great help in expediting immigration business on vessel's arrival. Whe vessel stays in port more than 72 hours, the landing passes will b extended every 72 hours on application.

In the event that crew members, without entry visas, are to be lande for repatriation or transfer, Immigration will not permit their landing unles passage, by either sea or air, ensuring the prompt departure from Japa (within 72 hours) of these men have been booked, or unless the vesse to which they are to be transferred, arrive in Japan within 5 days.
PILOTAGE: Not compulsory, but necessary unless Master we acquainted with locality. Pilot embarks at Quarantine Anchorage position Lat. 33° 38′ N., Long. 130° 19′ 30″ E. Request for Pilot mad through ship's Agent, Master reporting ship's ETA by radio givin accurate time of arrival at least 24 hours prior arrival, also an subsequent change. Pilot on VHF Channel 16, 11 and 12. In the even of rough sea, harbour tug-boat will be used.
Shipmaster's Report: 1982

The Hakata Pilot is available on request off Genkai Island (La 33° 42′ N., Long. 130° 15.5′ E.).

ANCHORAGE: No anchorage in port.
RESTRICTIONS: No restrictions if vessel in Free Pratique and draft les than 10 m. No tide.
MAX. SIZE: No restrictions of length, breadth. Draft 11.10 m.
HEALTH:
(a) Quarantine Station: Sea area surrounded by the following lines.
1. The line connecting between the top of the Nokono-Shima an point "A" which is located on the sea in the direction of 90° an at the distance of 2,540 m. from the top of the Nokono-Shima (The parallel of 33° 38′ 00″ N.)
2. The line connecting between point "A" and point "B" which i located on the sea in the direction of 000° and at the distance o 1,750 m. from point "A". (The Longitudinal line o 130° 20′ 00″ E.).
3. The line drawn towards the Nokono-Shima in the direction of 270 from point "B". (The parallel of 33° 37′ 06″ N.).
4. The coast line of the Nokono-Shima.
The centre of the Quarantine Anchorage: Lat. 33° 37′ 30″ N. Long. 130° 19′ 30″ E.

(b) Quarantine service is rendered from sunrise to 1 hour before sunse
(c) "Q" flag should be hoisted until Free Pratique is granted.
(d) When vessel arrives from plague infected or suspected area withi 10 days after she left such place, a 24-hour special quarantine i required. All sanitary scuppers must be closed and garbage no thrown overboard after vessel reaches 60 miles off inland sea areas
(e) Radio Pratique is applicable.
RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi and Northbound t contact Nagasaki Radio respectively.
VHF: Hakata Port Radio on Channels 11, 12, and 16. Power 50 wat 24 hour operation.
TUGS: 2×2,400 h.p. and 1×2,600 h.p.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Normal working hours: 0800 to 1700 hrs.

Overtime work is possible by applying to Customs at the following fees:

0000–0500 hrs.	350 Yen per hour
0500–0830 hrs. 1700–2200 hrs. and Sundays and Holidays	300 Yen per hour
2200–2400 hrs.	350 Yen per hour

No work can be arranged for on 31st December to 3rd January.

MEDICAL: No advance notice required unless urgent.

DENSITY: About 1024.

FRESH WATER: No water barge available. Hydrants: at Central, Hakozaki and Suzaki Pier. Rate of delivery: 30 t.p.h.

FUEL: Bonded bunker oil is not available at this port, but is to be lightered from other port. An adequate notice should be given to the suppliers in order to avoid delay in replenishment. The rate of delivery from oil barge is 80 – 100 t.p.h.

FIRE PRECAUTIONS: Modern chemical fire service boat "Hiryu Maru" (30 tons).

CONSULS:

Hon. British Consulate, Kitakyushu Tel: 093-331-1311
American Consulate General, Fukuoka Tel: 092-751-9331
Republic of China Consular Agency, Fukuoka Tel: 092-761-3458
Republic of Korea Consulate General, Fukuoka Tel: 092-771-0461

REPAIRS: Local workshop (fishing-boat repairs) available only for small repairs, so Agent for ocean-going vessel in Hakata arranges repairs from Moji or Tobata.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport: Distance: about 20 minutes from Hakata Port by car. JAL Domestic regular airline for Tokyo and Osaka. ANA Domestic regular airline for Tokyo, Osaka. Also, Cathay and JAL airlines for Taipei, Hong Kong 4 times a week. Korean and JAL airlines for Seoul and Pusan daily except Sunday.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police/Ambulance Tel: 110; Fire 119.

TELEPHONES: May be placed on board if 7 days notice given.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days, but 7 days extension possible if ship stays longer, good for any Japanese port.

AUTHORITY: Hakata Port and Harbour Bureau – Fukuoka, 13-13, Sekijo-Machi, Hakata-ku, Fukuoka-city, Japan. *Tel:* (092) 291-0561.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Holme Ringer & Co. Ltd., Hamachi Building, 2nd Floor, 10-17 Kamiya-cho Hakata-ku, Fukuoka-shi Fukuoka-ken. Cable Address: "Ringer Fukuoka". Telex: 0726496 Ringer J. Tel: (092) 271-1292/1260.

HAKODATE: 41.47 N. 140.42 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but in practice is necessary. Pilots available 24 hours a day and vessels able enter and leave port day and night. Pilots board about 1.5 miles S.W. of Breakwater Lighthouse. Pilot boat is small boat carrying flag "H".

The limit of Hakodate Piloting District is the sea area surrounded by a line drawn from Obana Misaki to Kattoshi Misaki and the coastline.

ANCHORAGES: Quarantine Anchorage outside breakwater and care should be taken not to foul fishing nets. Good anchorage inside breakwater at East side of Section 3 – depth 11 m. to 13 m.

RESTRICTIONS: Quarantine and Customs business between 0800 and 1700 hrs. only.

MAX. SIZE: Tankers up to 75,000 d.w.t. at SBM. Max. draft 14.5 m. Max. LOA 260 m.

Also see "Berthing".

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 1×500 h.p., 2×800 h.p., 1×1,100 h.p., 1×2,000 h.p. and 1×3,200 h.p. Tug line generally used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	Length (m.)	Depth (m.)	Permissible Draft (m.)	Capacity (g.t.)
North Wharf (North Side)	130	7.0	6.5	3,500

(North Side No. 1)	171	9.0	8.5	8,000
(North Side No. 2)	165	9.0	8.5	8,000
(South Side)	133	8.0	7.0	6,000
Bandai Wharf (Front Side)	185	9.0	8.5	8,000
(South Side)	130	7.5	7.0	6,000
No. 1 Buoy		9.0	8.0	8,000
No. 2 Buoy		10.0	9.5	10,000
No. 3 Buoy		10.0	9.5	10,000

CRANES: Hakodate Dock own 1×200 ton and 1×50 ton floating crane.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage) 2100 – 0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: *Single-Buoy Mooring:* Asia Oil Company, sea berth suitable for up to 75,000 d.w.t. and max. draft 14.5 m. at Imodco Buoy.

Position: Lat. 41° 48′ 08″ N., Long. 140° 40′ 57″ E.

Soundings: At site 15.5 m. In approaches to site, more than 15.5 m. The approach to terminal is free from obstructions.

There is one 20 in. crude line running 2,000 m. from shore to the buoy, and about 500 m. from shore line to the storage tanks.

Mooring: There is no night mooring. Unmooring is carried out from 0600 till 2400 hrs., and may be done by the Master of the ship without a Pilot.

A mooring/unmooring gang is provided for by Agent. Two launches and one tug are in attendance at the mooring. One launch will keep the hose clear while the other handles the lines. The tug is standing by and only pushes against bow or near the stern to keep the head of the vessel in position whilst mooring.

At least 6 good mooring lines are required, preferably each line to its own bollard. The lines are run single to the buoy. The position of the ship's bow from the buoy is about 40 m., when the distance from the buoy to ship's manifold is about 360 ft.

When mooring, it is requested that the propeller is completely stopped or otherwise turned astern.

Both bow anchors are to be hove well up in the hawse pipe and properly secured before reaching the buoy. Anchors are never to be used while on the buoy. They may foul the buoy's mooring cables and pipe-line on the bottom if released.

Floating Hose: There is one set of 12 in. floating hose for the discharge of crude only. The floating hose is about 600 ft. long from the buoy's manifold. The last two lengths are floating in doughnut-shaped plastic floats. The end is marked with an unlit marker buoy.

The hose connections are always made to the port manifold and are lifted with ship's gear. The hose when full of cargo and equipment weighs over one and a half tons. Information is required of the distance from ship's bow to ship's manifold, and the distance from ship's side to ship's manifold prior to arrival.

Standard flanges are used on the hose. OD 19 in. diameter of bolt-circle 17 in. with 12 bolt-holes size 0.875 in.

Discharging: The discharging should be arranged in such a way as to be able to take sufficient ballast into ship's tanks, when about half way during discharge; to be able to get the ship's head down to prevent the vessel from veering too widely, and run over the hose near the buoy, in case of unfavourable conditions.

Maximum allowed back pressure by shore is about 10 kg./sq.cm. During the discharge the main engine must not be immobilised as it may be used to keep the vessel clear of the buoy.

Stand-by Men: While on the buoy, the vessel will be required to provide sleeping quarters for four men, this includes the foreman who will remain on board throughout the entire operation. It is requested that the discharge officer be provided with meals. The other men are supplied with food from shore.

Discharge Rate: 1,800 k/l per hour.

DENSITY: Average 1025.

FRESH WATER: Available at piers ex-hydrants and by barge at anchorage. Supplier, Hakodate Municipal Office.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Fuel supplies for Hakodate are generally lightered from Tokyo Bay area and delays can be caused by weather conditions.

CONSULS: None.

REPAIRS: Hakodate Dockyard Co., undertakes hull and engine repairs.

DRY DOCKS: No. 1. Capacity 15,000 g.t., length 180 m., breadth 22.45 m. depth 6 m. No. 2. Capacity 9,000 g.t., length 140 m., breadth 8 m., depth 6 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Custom Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

AIRPORT: Distant 20 minutes by car.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau, Hakodate City, 4-19 Suehiro-cho, Hakodate City, Hokkaido. *Tel:* (0138) 22-3101.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co., Ltd. c/o Kyoei Unyu Co., Ltd., No. 5-22, Kaigan-cho, Hakodate, Hokkaido. Cable address: "Funekyoei Hakodate". Domestic Telex: 09925-64. Tel: Hakodate (0138) 42-4121.

HIBIKINADA: 33.57 N. 130.50 E. (See Plan)

LOCATION: The Port of Hibikinada is located in position Lat. 33° 56.7′ N., Long. 130° 49.9′ E. and is only protected by a breakwater. It has no other shelter and is exposed to strong winds from the North. The strongest winds are from the NW and if accompanied by swell, causes a dangerous surge in the port.

PILOTAGE: Kanmon Strait and Harbour Pilotage Association.

Pilotage compulsory. Pilot boards inbound vessel at Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 52′ 48″ E. or at He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: *Coming from West:* Mutsure Anchorage: Lat. 33° 59.5′ N., Long. 130° 51.7′ E. Depth 23 m.

Coming from East: He Saki Anchorage: Lat. 33° 56′ N., Long. 131° 03′ E. Depth 12.5 m.

If gale force winds blowing, it is possible with Coast Guard permission to shift to Mutsure Anchorage.

RESTRICTIONS: Berthing and unberthing only during daylight hours. Berthing undertaken at slack water only. Unberthing at any stage of the tide.

Vessels are permitted to transit Shimonoseki with a max. draft 30 ft. 6 in. at anytime and with a max. draft of 32 ft. 10 in. at HW.

Also see "Report".

Controlling Factors:

	Controlling Depth (MLW) (m.)	Mean Tidal Range (m.)	Velocity Current (knots)	Nature of Bottom
Entrance	20	1.0	3 max.	Mud
Channel	13.5	1.0	3 max.	Mud
Anchorage	21	1.0	3 max.	Mud
Berth	13.5	1.0	nil	Mud

MAX. SIZE: *Wharf A-1:* Max. LOA – 350 m. Max. draft 13.0 m. Ma 150,000 d.w.t. Beam of vessel determined by hatch width.

HEALTH: Radio Pratique available if vessel in possession of val sanitary Certificate.

RADIO: Nagasaki Radio "JOS" and Choshi Radio "JCS".

VHF: "Shimonoseki Port Radio" and "Kitakyushu Port Radio" o Channel 16. Working frequency for berthing information is Channel 14

TUGS: There are 3 tugs available each 3,500 h.p. Use of all 3 tugs i advisable when docking and undocking.

BERTHING: Vessels always dock port-side-to. Ship's gangway used

Vessel berthed at A-1 Wharf. Heading 247° true. Max. LOA 350 m Max. draft 13 m. Depth at LW 13 m. Beam of vessel determined b hatch width. Cargo handled coal.

Moorings: FORWARD: 3 headlines, 1 breast line, 2 springs.

AFT: 3 stern lines, 1 breast line, 2 springs. Vessel berths again spring roller fenders.

Cranes: 3 unloaders available, 2 × 34 ton capacity and 1 × 45 to capacity.

MEDICAL: Doctor available.

FRESH WATER: Available.

FUEL: Available (No oil barges available).

REPAIRS: Possible.

DRY DOCK: Available.

SERVICES: Laundry and provisions available.

CHARTS: BA 1578, BA 532, BA 127.

DEVELOPMENTS: Port will reclaim land of 590 ha. for redevelopmen industrial use, and for waste disposal. 2 berths on the domestic trad quay will also be improved.

REPORT: June 1985: It was found that, whilst the weather was seve and from a North/Northwesterly direction it was not abnormally seve Had the vessel been able to moor in a symmetrical fashion, she woul have been in no difficulty.

The berth was extended in 1976 to accommodate two vessel simultaneously. As a result, the vessel that moors to the Eastern en of the jetty can, depending upon the size of the two vessels on the jett overhang with their after end. The effect of this, as can be seen fro the plan, is that vessel has nowhere to put out proper stern moorin lines except to a shore mooring post (see "X" on "Plan"). On our vesse the mooring lines were in the order of 130 m. long, and some four time the length of the headlines. It is well known that mooring lines shoul be symmetrical at either end of the vessel.

The only place for the larger vessel on the "Plan" to moor safely i some 50/60 m. ahead of her diagrammatical position. It is, of cours perfectly feasible for a vessel to moor ahead of that shown in the pla If this was the case, we would consider her to be perfectly safe.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaiga 1-chome, Moji-Ku, Kitakyushu City, 801 Japan. *Tel:* (093) 321-594 *FAX:* (093) 321-5915.

HIMEJI (including Hirohata, Shikama, Mega and Aboshi) 34.47 N. 134.41 E. (See Pla

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera wrist watch, radio, firearms/swords, etc. (only at first port of call i Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Carg Manifest and Cargo Manifest in transit using specific forms. Therefor ship's Agent should be provided with necessary information about detai of cargoes in advance.

PILOTAGE: See "Kobe". Vessels take Inland Sea Pilot off Wada Hesaki or Sekisaki; or from ports of Inland Sea. No exact pilot statio and no checking point at port of Himeji (Mega, Shikama, Hirohata an Aboshi) but Agents arrange Pilot when vessel approaches upo receiving cable giving 24 hours advance notice. Pilot boarding position as follows: Mega Lat. 34° 44′ N., Long. 134° 42′ 15″ E. Shikama La 34° 45′ N., Long. 134° 39′ E. Hirohata Lat. 34° 44′ N., Long. 134° 37′ E Aboshi Lat. 34° 44′ N., Long. 134° 34′ 10″ E.

No strict location of anchorage for vessel awaiting a Pilot in Hime area, but should be as close as possible to port according to draft an communication.

ANCHORAGE: No strict boundary areas for anchorages. Anchor a close as possible to the port according to draft.

RESTRICTIONS: At ports of Mega, Shikama and Aboshi, no Pil boarding between sunset to sunrise. Hirohata Pilot will board fro sunrise to 2200 hrs. for vessels less than 10,000 d.w.t. for entry, an less than 15,000 for departure, for Pier Nos. 4, 5, 6, 7, 9 and 10 b other berths only from sunrise to sunset.

MAX. SIZE: Draft restrictions as follows:

Mega 11.80 m., Shikama 10.0 m., Hirohata 13.0 m. (80,000 d.w.t. o 110,000 d.w.t. part load) for Central Pier, 7.50 m. for Kamota Pier (Pi Nos. 1 – 7), 9.45 m. for Tsuruta Pier (Pier Nos. 10 – 14). 16 m. (160,00 d.w.t. or 270,000 d.w.t. part load) for No. 18 Pier. Aboshi 9.0 m.

Sea buoy mooring, max. draft 19.2 m. Max. 254,000 d.w.t.

HEALTH: No Quarantine Office at Himeji. At first port of call in Japan, essel must obtain Free Pratique. Quarantine Officers will attend vessel nly from daylight to sunset and Master to show all Vaccination Cards. Derat Exemption Certificate. In case vessel arrives from cholera-infected rea within 10 days, Master must advise crew and passengers health ndition to respective Quarantine Office through ship's Agent prior to rival and close all soil pipes before entering port.

ADIO: Recommended Master communicates with Agent through hoshi Radio or Nagasaki Radio which cover all ports in Japan. pecifically Westbound vessel to contact Choshi and Northbound to ntact Nagasaki Radio respectively.

UGS: Tug(s) normally join vessel when approaching, or at anchorage. lways use tug's lines without charges.

ERTHING: No specific requirements. Pilot boarding time will be notified y ship's Agent mainly by radio.

TEVEDORES: At least 24 hours prior notice excluding Sundays and olidays required in order for Agent to arrange stevedores. Vessel must onstantly keep her Agent advised of ETA. If stevedores cannot ommence loading/unloading at time notified by the Agent, the orderers ust pay for waiting time. If cargo gear not rigged on berthing, tevedores will do same for ship's crew at additional cost. Overtime urcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 0830 hrs. next morning 130% additional; Sundays/holidays 100% dditional.

EDICAL: No advance notice required unless urgent.

ERTIFICATES: Ship's Register to show Customs Inspector ship's egistered gross and nett tonnages. Valid Cargo Gear Certificates ometimes required by stevedores when cargo gear's maintenance ppears to be poor.

USTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore t no spirits.

UEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, saka Bay and Kanmon Port. At all other ports bunkers will be lightered om the nearest bunker stock ports at maximum 7 days prior notice.

ANGWAY/DECK WATCHMEN: Not specially required unless assenger or valuable cargo on board.

ANKERS: Idemitsu Kosan Co. Ltd., Himeji Oil Jetty where 1 berth only nd max. draft 11.8 m. allowed. Shore discharging facilities 3×12 in. ameter hose connections which connect to 18 in. diameter line for tank oses. Acceptable max. 5 kg/sq.cm. on hose gauge, discharge rate abt. 000 l/t per hour.

ote: Idemitsu Kosan Co. Ltd., Himeji, require following information prior arrival for smooth berthing and connecting hoses: Height from sea to eck; Length from vessel's side to underneath of hose connections; eight from deck to connection of line; Diameter of connection.

perator's Report: 1983.

Idemitsu Kosan Hyogo Sea Berth (Discharging terminal) is operated Idemitsu Kosan Co. Ltd.

SBM Berth. Berthing equipment to OCIMF standard.

SBM operates 24 hours per day, 7 days a week. Ships moored and nmoored at daytime, weather and other circumstances permitting. BM will not be closed due to any holidays.

Area around the SBM with radius of 410 m. is an open port for ustoms' Regulations. Therefore supplies, disembarkation, etc. should handled by related regulations.

ocation: Lat. 34° 42′ 37″ N., Long. 134° 39′ 54″ E.

lotage: Not compulsory.

nchorage: Himeji port is not an open port. Ships can anchor at the llowing points.

Point "A" Lat. 34° 42′ 58″ N., Long. 134° 39′ 02″ E., depth 21 m.
Point "B" Lat. 34° 42′ 10″ N., Long. 134° 40′ 48″ E., depth 21 m.
Point "C" Lat. 34° 41′ 30″ N., Long. 134° 41′ 00″ E., depth 23 m.

Anchorage "A" and "B" are for tankers of less than 18.5 m. draft.

Restrictions:

(a) Berthing Master comes on board 3 miles South from the line joining Kurakake Id. and Kami Id.
(b) Ship's Master has to arrange tug boats both sides and aft (total of 3 tugs).
(c) Ship proceeds at moderate speed taking into consideration tide and wind and any other circumstances. When approximately 1,000 m. from SBM vessel reduces her speed to avoid risk of touching SBM.
(d) Ship has to stop completely 200 m. from the SBM.

Max. size:

Maximum draft 19.20 m.
Maximum d.w.t. 254,000 tons

Berthing:

From bow to manifold 145 m.-186 m.
Derrick capacity SWL in excess of 10 tons.

Mega:

Berth	*Depth* (m.)	*Pipe-Lines*
Idemitsu Jetty No. 1 – Berth No. 1 – No. 4	5.0 – 7.0	4×8 in.

REPATRIATION: Possible.

AIRPORT: About 60 km. to Itami Airport. Regular services.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: At Aboshi, no work on 1st and 3rd Sunday. At Shikama, shore crane, no work on 1st and 3rd Sunday but gangs available for discharging and loading.

POLICE/AMBULANCE/FIRE: Police (Shikama) Tel: 35-1441; Ambulance (Shikama) 119 or 35-0119; Fire (Shikama) 119 or 35-0119.

TELEPHONE: No facilities for placing telephones on board.

SERVICES: Tally, laundry, daily provisions by ship chandler available locally. All other service from Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, but 3 days extension possible if ship stays longer.

GENERAL: No quarantine available at port of Himeji, therefore pratique to be obtained at other ports.

AUTHORITY: Himeji Port Administration Office, 294, Suka, Shikama-ku, Himeji City, Hyogo Pref. *Tel:* (0792) 35-0176.

AGENT: Sub-agents of Dodwell & Co., Tokyo. Shikama Kaiun Co. Ltd., Minato-machi, Shikama-Ku, Himeji-shi. Tel. Himeji (0792) 35-0912. Telegraphic address "Shikamakaiun Himeji". Telex: 05772211 Sikama J.

HIROSHIMA: 34.20 N. 132.25 E. See Plan

DOCUMENTS: See "Yokohama".

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

CRANES: 6 floating cranes, 40 ton – 450 ton.

1 container crane (available at berth which is 260 m. long and 7.5 m. depth).

STEVEDORES: Working hours: 0830 – 2100 hrs.

TIDES: Max. (spring tide) 3.9 m. Min. (neaps) 0.57 m.

Rate of current at flood tide generally 0.25 knot to N.E.; 0.5 knot at ebb tide to S.W. South area of Togeshima and Kannonsaki 0.25 knot at flood to S.S.E., and 0.5 knot at ebb tide to N.N.W.

FRESH WATER: By water barge (capacity: 330 tonnes available). Additional charges made for overtime i.e. after 1700 hrs., and Sunday, holidays and Saturday afternoon.

FUEL: Most grades of domestic and bonded oil available, delivered by barge.

CONSULS: No consuls in Hiroshima. Nearest Osaka or Kobe. Marine note of protest can be attested by local notary public.

REPAIRS: All types of deck, electrical and engine repairs.

DRY DOCKS: Largest dry dock Taibi Dry Dock, Mitsubishi-Hiroshima Works, length 154 m., breadth 22.00 m., 10,300 g.r.t. Kanawa Dry Dock and Ujina Dry Dock available for 3,500 g.r.t. and 1,500 g.r.t. respectively.

AIRPORT: Hiroshima Airport. Only domestic airlines every hour to Osaka and Tokyo.

POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119; Fire 119.

TELEPHONE: No arrangements for placing telephones on board.

SERVICES: Any navigational apparatus can be serviced on request. Cargo holds cleaning services can also be carried out, but tank-cleaning and other services are to be arranged from Kobe.

REGULATIONS: Many seaweed and oyster beds near anchorages, therefore oil pollution precautions strictly observed.

AUTHORITY: Hiroshima Port Administration Office, 23-53, Ujina Kaigan 2-chome, Minami-ku, Hiroshima City. *Tel:* (082) 251-7117.

No. 1	230	5.80	
No. 2	250	6.80	

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. (60%) additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.

FRESH WATER: Available from dock, 20/30 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest stock ports at maximum 7 days' prior notice.

CONSULS: No local representatives.

REPAIRS: None.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Nearest, Miyazaki Airport about 2 hours drive from Hososhima. JAL and ANA lines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for 15 days when Hososhima is first port of call in Japan.

AUTHORITY: Hososhima Port Administration Office, No. 17371-2 Shinkai, Hichiya, Hyuga City, Miyazaki Pref., Kyushu, Japan. *Tel:* 09825-2-5366. *Cables:* Port Authority Hyuga. *Contact:* Mr. Ogata.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Hakko Unyu Co. Ltd., No. 731, Kaigan-dori, Hososhima, Hyuga-shi, Miyazaki-ken (883). Cable Address: "Ringer Hyuga". Domestic Telex: 0776677 HakkoHJ. Tel: Hyuga (09825)2-2185.

IHO: 34.45 N. 134.46 E.

NO VESSELS CALLING AT THE PRESENT TIME – FACILITIES NOT IN USE SINCE 1973.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transiting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 14″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Closed Port. Agent will arrange anchorage position for discharging, with Authorities, but usual position Iho Signal Station, bearing 215° distant 3,000 m. (Signal Station Lat. 34° 44′ 58″ N., Long. 134° 46′ 12″ E.).

HEALTH: Pratique must be obtained at another port before calling Iho.

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Not required. Discharging at Outer Anchorage.

TANKERS: Port is operated for oil discharging only. Discharge is into barges through 6 in. hoses at either side of vessel.

DENSITY: Average density is between 1025 and 1026 in Winter season and between 1018 and 1020 in Summer season.

FRESH WATER: Not available.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunker will be lightered from the nearest stock ports at maximum 7 days prior notice.

REPAIRS: Not available.

DRY DOCK: Nearest dockyard at Aioi.

AIRPORT: Nearest airport at Osaka.

TIME: GMT plus 9 hours, no alterations.

POLICE/AMBULANCE/FIRE: Police tel. 07944/2-3377; Ambulance, 119 or 2-2101; Fire 119 or 2-2101.

SERVICES: None. Nearest services available at Kobe/Osaka area.

AGENT: See "Himeji"

IMABARI (Imahuru): 34.04 N. 133.00 E. (incl. Mategata). (See Plan)

DOCUMENTS:

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

MAX. SIZE: Temposan Wharf: Length 110 m., breadth no limit, draft 7 m. Mategata (open road): Length no limit, breadth no limit, draft 10 m.

ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels. To discharge logs only Temposan Wharf available for vessels alongside berth where holding ground is good and depth of water is 7.50 m.

Vessels drawing over 7 m.: Vessel can enter Mategata (open road) deemed to be most fitted place for vessels entry to discharge logs. Port of Mategata faces Aki-Nada and located near West entrance of Kurushima Channel; Lat. 34° 06′ N., Long. 132° 55′ E., where holding ground good and depth of water 12 m. – 20 m. is kept.

RESTRICTIONS: No entry after dark.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 6 tugs available, 1,050 h.p. – 4,000 h.p. Temposan Wharf: join vessel at sea anchorage, using tug's line with charge. Mategata (open road): no tug required in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".

Kurashiki Wharf:

Section	*Length* (m.)	*Depth* (m.)
1	165	9.0
2	140	7.5
3	180	5.5
4	270	5.5

Toryu Wharf:

Section	*Length* (m.)	*Depth* (m.)
1	180	5.5

CRANES: Floating crane available from Kure.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Temposan Wharf 1015. Mategata 1015.

FRESH WATER: Fresh water available by barge from Onomichi.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

CONSULS: See "Kobe".

REPAIRS: Only minor repairs.

DRY DOCKS: Not available at this port, the nearest ones are Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima; and Mukaishima; dimensions of these docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. It is not in action yet for ships to repair. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dock, Dock No. 1 for 20,000 d.w.t. vessel. 175 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel. 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard; Dock No. 1 for 3,000 d.w.t. vessel. 86.18 m.×13.60 m. ×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel. 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel. 175 m.×29 m.×9 m.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest airports are Matsuyama and Takamatsu where are All Nippon Airways.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: None.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

GENERAL: Mategata is a closed port. To conform with regulations, vessel obtains permission from Shikoku Maritime Bureau to enter.

Customs request vessels calling Mategata to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival of vessel. Application undertaken by Agent.

No quarantine available. Nearest station Matsuyama. No Immigration. Officer comes from Niihama.

AUTHORITY: Imabari Port Administration Office, 2 Katahara-cho 1-chome, Imabari City, Ehime, Pref. *Tel:* (0898) 22-4120.

AGENT: See "Matsuyama".

IMARI: 33.18 N. 129.49 E.

PILOTAGE: Pilots are available. Boarding stations at 33° 26.4′ N 129° 42.7′ E. and quarantine anchorage, see "Health".

RESTRICTIONS: Entry/departure possible day and night.

HEALTH: Formalities will be carried out at anchorage. Quarantin Station is 096° 1,300 m. (200 m. circle) from Uranosaki Lighthouse i position 33° 20′ 06″ N., 129° 48′ 32″ E.

TUGS: 1×2,000 h.p. Additional tugs available from Sasebo an Nagasaki.

BERTHING:

Name	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t.)
Buoy No. 1	10.0	8.0	15,000
Buoy No. 2	12.0	10.0	30,000
Buoy No. 3	14.0	12.0	60,000
Kubara Wharf	10.0	8.0	10,000

STEVEDORES: 12 gangs available for logs.

TANKERS: LPG tankers – see "Shipmaster's Report".

FRESH WATER: Available from barge only (capacity 180 tons).

FUEL: Domestic oil is available; bonded oil will be brought from Moji o Nagasaki with sufficient notice, when required.

REPAIRS: The shipyard is capable of carrying out all kinds of fitting-ou and repair work.

SHIPMASTER'S REPORT: November 1984.

Location: The terminal is a fairly new facility situated deep within Ima Bay on the N.W. coast of Kyushu – some 12 miles or so North of Sasebo It is owned by Kyushu L.P.G. Fukushima Terminal Company Limite and was built in August 1982.

It is used solely for LPG discharge and there is a coastal tanker loadin berth immediately adjacent.

Approaches: BA. 1527 is the only British chart to cover the area from the South and is barely adequate. Japanese Charts 166 and 1256 wi give a better indication of the geography of the bay and immediat approaches.

On this occasion we arrived from the Arabian Gulf and chose t approach to the East of the Goto Retto, through Aizaki Seto and thenc North to pass between Azuchi O Shima and Taku Shima, i.e. throug Oshima Seto.

Navigation presents no problem with the high land providing excellen radar returns. Because of the strong tidal streams it will be necessar to time the passage of Aizaki Seto on the flood; if this cannot be manage then passage through to the East of Eno Shima is recommended.

There are the usual huge concentrations of fishing vessels in the area and, on arrival, the Pilot advised strongly against attempting anothe passage of Oshima Seto. (We had transited on a Sunday morning an the passage was entirely clear. On departure, however, it was thick wit fishing vessels). A passage to the North of Azuchi O Shima is therefor recommended.

From Safety Regulations:

(i) Master should proceed carefully in Imari Bay to prevent groundin in shallow water (from Aoshima S.E. 1.3 miles, depth 12.4 m.- 13.8 m., Nohtori Asase depth 15.5 m.).

(ii) Under keel clearance shall be kept to more than 10% of maximu ship's draft.

(iii) Entering bay is prohibited under the following conditions:
1. Wind force is forecasted to increase to more than 10 m./sec
2. Wave height is forecasted to be more than 1.0 m.
3. Visibility is forecasted to decrease to less than 1.0 mile.

(iv) Boil-off gas blowing is prohibited in Imari Bay.

(v) Master shall be requested to proceed through Imari Bay durin period from sunrise to sunset.

(vi) Master will be requested to keep ship's speed less than 8 knot while proceeding in Imari Bay.

(vii) The vessel should keep a good lookout by radar and sight.

Pilotage: Pilot compulsory for LPG tankers over 10,000 gross tons. Th pilot boarding position is 33° 29′ N., 129° 40′ E., although this is no marked on the BA charts. The Pilot boarded from a tug and require the pilot ladder 2.0 m. from the water. Boarding daytime only. The vesse is then escorted to her berth by 2 or 3 tugs, one of which stations itse over a shoal (12.0 m.) patch within the bay as a marker. There is 4 knot speed restriction in this area. Pilot guarded Channel 16 an worked Channel 6 VHF.

Length of pilotage about 1.5 hours to quarantine anchorage an thence to berth.

Restrictions: See "Approaches" and "Berthing".

Max. Size: 70,000 d.w.t., max. draft 15.5 m.

Health: If the vessel has a valid Sanitary Certificate the quarant anchorage may be dispensed with and the vessel will be cleare alongside.

VHF: See "Pilotage".

Tugs: See "Pilotage".

Berthing: Vessels may berth either side alongside although they pre to berth port side to, presumably to save time on arrival. Local regulatio prohibit the connection of cargo lines after sunset.

Normal mooring configuration of 3, 3, 2, with lines on quick releas hooks. Mooring boats in attendance.

A shore gangway is provided, length 15 m., extension ability 5 m.- 9 m., can operate to 33° above horizontal and to 17° below horizon

The following restrictions apply to berthing:
1. Max. wind force allowed: less than 10 m./sec.
2. Max. wave height allowed: less than 1.0 m.
3. Visibility allowed: over 1.0 sea mile.
4. Max. docking speed allowed: less than 10 cm./sec.
5. Max. docking angle allowed: less than 6°.

From Safety Regulations:
1. Should be port side alongside in principle.
2. Should use tugboat for berthing and unberthing.
3. Should keep berthing speed less than 10 cm./sec., berthing angle less than 6°.
4. Should use line boat for berthing.
5. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N" so as to be easily distinguished by the Terminal Berth Master on the jetty.
6. Should be careful not to damage the berth facilities.

Discharging: Normal cargo survey procedure. However, the shore carry out their own determination of cargo S.G. and will use this figure for their own calculations.

Normal Japanese Safety Inspections and procedures. There is supposed to be a 4 hourly safety check throughout discharge.

The discharge presented no problems with a rate of 1,200 t.p.h. being achieved with 4 pumps.

A back pressure of 3.0 bar was stipulated but we worked constantly at about 3.2 bar without any complaint, tonnage rate apparently being their main consideration at the time.

Chiksans are purged with Nitrogen on completion.

Cargo Operation Specifications:

	Propane (Liq.)	*Propane (Vap.)*	*Butane (Liq.)*	*Butane (Vap.)*
Receiving capacity (cu.m./hr.)	2,000	2,700	2,000	2,300
Allowable max. pressure kg./sq.m.	10	10	10	10
Allowable temperature (°C)	−45	−45	−10	−10
Hose flange size from		All 150 ASA		
shoreside (inches)	12	10	12	10

Remarks: Unloading cargo operation of Propane and Butane shall be carried out at the same time.

Chicksan Arm Arrangements: From left to right looking shoreward: Propane vapour, Propane liquid, Butane liquid and Butane vapour. This being the usual Japanese configuration of V.L.L.V. with dedicated lines.

Shore Vapour Blower Capacity:

Propane:	Max. pressure 2,400 mm. Aq. Max. quantity 5 t.p.h.
Butane:	Max. pressure 2,400 mm. Aq. Max. quantity 5.8 t.p.h.

Shore Tank details:

for Propane:	Tank capacity 40,000 tons×2 Tank pressure 0.15 kg./sq.cm. Tank temperature −45°C
for Butane:	Tank capacity 40,000 tons×2 Tank pressure 0.15 kg./sq.cm. Tank temperature −10°C

Nitrogen Supply:

Tank capacity:	27 cu.m. (in liquid)
Supply rate:	3,000 cu.m./hr.
Flange size:	1.0 in.
Flare capacity:	3,500 cu.m./hr.×1

Communications: Communication is by means of a telephone placed on board in the CCR. Level of English rather poor and an Agent is invariably in attendance to assist.

Ship's Tel. No.: 380.

Shore Cargo Control Room Tel. Nos.: 350, 351, 352.

Fresh Water: Available from the berth but a minimum of 7 days' notice was quoted for this service.

Tank capacity 350 cu.m, supply rate 17.5 cu.m./hr., Hose flange size 2.5 in.

Water may also be taken by barge (prohibited during cargo operations).

Fuel: Available by barge and must be taken at anchor.

Repairs: The main engines and other equipment for ship's manoeuvring shall be in an operable condition and in a state of immediate readiness while alongside the berth.

There are a number of contractors available for minor repairs, with the usual restrictions on hot work and the movement of large metal objects. There is a large shipyard within the area which could presumably handle emergency repairs.

Surveyors: Nearest Lloyd's Surveyors are at Nagasaki and Moji.

Gangway/Deck Watchmen: Whilst alongside at the terminal berth, responsible member of crew shall be stationed at the ship's gangway to advise visitors of safety regulations and to check visitors and crew members.

Storing: Stores may be loaded from the quay but not whilst working cargo.

Shore Leave: Ship's crew and visitors shall take the route through the terminal shown on the map in the terminal information booklet.

Ship's crew should carry Landing Permit which is issued by Japanese Immigration Officer.

No smoking shall be allowed in the terminal.

When taking photographs of the terminal, permission should be obtained from the Terminal Representative.

Regulations: Following are extracts from the Terminal Safety Regulations.

Cargo handling operation shall be stopped and the vessel shall be shifted to a safe anchorage under such conditions as follows:
1. When Harbour Master or Maritime Safety Agencies order ship's Master to shift vessel.
2. Wind force is forecasted to increase to more than 15 m./sec.
3. Wave height is forecasted to be more than 1.0 m.
4. Visibility is poor (less than 200 m.).
5. Thunderstorm is forecasted to be approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chicksan arms are being connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side bow and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than sea water pressure.

AUTHORITY: Imari Doboku (Public Works) Office, 122-4 Shinten-Cho, Imari City, Saga Pref., Japan. *Tel:* (09552) 34151.

INNOSHIMA: 34.17 N. 133.11 E.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

Kanmon Pilot boards at Mutsure (Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.) for passing Shimonoseki Strait to Hesaki where Pilot will be changed to Inland Sea Pilot.

Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: No. 1, 14 m. deep, 1.4 miles off Hyakkan Island 180°. No. 2, 9 m. deep, 1.5 miles off Hyakkan Island 290°.

RESTRICTIONS: In general, mooring/unmooring and/or dry-docking in-and-out carried out in daytime only.

MAX. SIZE:

	Length	*Breadth*	*Draft*
(1) For mooring only	320 m.	× 50 m.	× 7 m.

(2) Max. draft for entering port: 9 m.
(3) Max. draft for mooring: 5 m. – 7 m. according to quay.

Current is N.E. at high tide, and S.W. at low tide at max. 2.5 knots.

HEALTH: In event vessel proceeding Innoshima direct from foreign port, vessel to receive Pratique at Quarantine Anchorage Kobe or Saganoseki (Lat. 33° 15′ N., Long. 131° 52′ E.) or Mutsure (Lat. 33° 59′ N., Long. 130° 53′ E.).

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 6 tugs available, 320 h.p. – 3,500 h.p. Ship taken into port by Dock Master who joins ship at anchorage with tug-boat. Usually tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

IWAKUNI, Yamaguche Bay: 34.10 N. 132.14 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory. Pilots available at Quarantine Anchorage, when required.

Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Cable address "Ansin Moji". Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000, g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels las port of departure and at Master's discretion. Pilotage availab throughout 24 hours and 72 hours' advance notice preferred, thereafte advising any alterations. Most Inland Sea Pilots also act as Harbou Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat.. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, miles South of Sekisaki Lighthouse (vessels transittin Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard t safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.
ANCHORAGES: 2 anchorages, for "Quarantine" and repairing, etc. other for discharging logs.

(a) Quarantine, Lat. 34° 10′ 28″ N., Long. 132° 16′ 43″ E. minimum depth 27 m.
(b) Discharging area, Lat. 34° 11′ 12″ N., Long. 132° 14′ 21″E minimum depth 10 m.

Nature of bottom mud. Minimum bottom width no limit.
RESTRICTIONS: Day and night entry possible.
HEALTH: Radio Pratique available. At first port of call in Japan vesse must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Dera Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers healt condition to respective Quarantine Office through ship's Agent prior t arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent throug Choshi Radio or Nagasaki Radio which cover all ports in Japan. I specifically Westbound vessel, to contact Choshi, and Northbound t contact Nagasaki Radio respectively.
TUGS: Tugs normally join vessel at Quarantine area. Tug's lines to be used free of charge. 6 tugs available, 4×3,000 h.p. and 2×2,500 h.p.
BERTHING: No berthing from sunset to sunrise. At least 2 hours notice arrival necessary to reach berth, in event of direct arrival from foreign country.

AGOSHIMA: 31.35 N. 130.33 E. (See Plan)

ESCRIPTION: Port situated in Kagoshima Bay, the Southern part of yushu and consists of 6 sections as follows:

Old Harbour (Honko): Divided into Inner Harbour sheltered by reakwaters which can accommodate up to 3,000 tonners, and Outer arbour, (open roads) where large size vessels lie at anchor.

New Harbour: Adjacent to Main Harbour on the South. This section so sheltered by breakwaters and a 10,000 tonner can be ccommodated.

South Harbour: Located about 6 km. away from old harbour on South de and used for small coasters.

Lumber Harbour: Located about 7 km. away from old harbour on outh side and used for log carriers, a 15,000 tonner can be ccommodated.

OCUMENTS:

ustoms: When vessel arrives direct from foreign port, Customs Officials oard for search. Following documents to be submitted:

Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual crew member).
Stores List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.

Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will not attend on board, except in special case. Master or Agents to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.

Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: Not compulsory, but necessary unless Master well cquainted with locality. Pilot embarks at quarantine anchorage (see "Health"). Request for Pilot made through Agent. Master to report by adio accurate ETA at least 24 hours prior to arrival.

ANCHORAGE: Ample good holding anchorage available in Outer Harbour. Depth: Over 9 m.

RESTRICTIONS:

Wharf	*Location*	*Length* (m.)	*Depth* (m.)

Grain Dolphin in Taniyama District No. 1 for private quay. (65,000 tonners can be accommodated)		171	12.0

HEALTH: Radio Agent for Free Pratique not less than 5 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

1. A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
2. If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Quarantine:

(*a*) Quarantine Station: Sea area within radius of 1,000 m. from centre, position Lat. 31° 33′ N., Long. 130° 35.5′ E.

(*b*) Quarantine service rendered from sunrise to 1 hour before sunset.

(*c*) "Q" flag should be hoisted until Free Pratique granted.

(*d*) When vessel arrives from plague-infected or suspected area within 10 days after she left such place, 24-hour special quarantine required.

All sanitary scuppers must be closed and garbage not thrown overboard after reaching 60 miles off Japanese coast.

RADIO: Recommended Master contacts Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If Westbound via Chosi and Northbound to Nagasaki respectively.

TUGS:

"Wakashio Maru No. 2"	twin diesel vessel 3,200 h.p.
"Kinko Maru"	twin diesel vessel 3,000 h.p.
"Sanko Maru"	twin diesel vessel 3,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by Agent mainly by radio.

New Port (Kagoshima-Shinko). Sheltered harbour with main entrance 150 m. wide between S. breakwater (350 m.) and N. breakwater (150 m.). Sheltered anchorage in depth of 5.5 m. – 9.0 m. No mooring buoy. Berthing outside breakwater in depth of 9.0 m. and inside breakwater in depth of 5.5 m. – 9.0 m.

Piers: South Pier (in foreign trade zone):
165 m. long with 9.0 m. alongside, will take one vessel of about 10,000 g.r.t.
260 m. long with 7.5 m. alongside, two vessels less than 5,000 g.r.t.
120 m. long with 4.5 m. alongside, two vessels less than 500 g.r.t.

North Pier (for inbound vessels):
125 m. long with 7.5 m. alongside will take one vessel of about 3,000 g.r.t.
160 m. long with 5.5 m. alongside two vessels less than 1,000 g.r.t.

Taniyama Pier No. 1 (Taniyama-ko 1-ku 1-go wharf)
250 m. long with 12.0 m. alongside, 2 vessels less than 50,000 g.r.t.

Taniyama Pier No. 2 (Taniyama-ko 1-ku 2-go wharf)
260 m. long with 7.5 m. alongside, 2 vessels less than 5,000 g.r.t.

Taniyama Pier No. 6 (Taniyama-ko 2-ku 6-go wharf)
260 m. long with 7.5 m. alongside, 2 vessels less than 5.000 g.r.t.

Taniyama Pier No. 7 (Taniyama-ko 2-ku 7-go wharf)
390 m. long with 7.5 m. alongside, 3 vessels less than 5,000 g.r.t.

Note: Taniyama Harbour: Located 11 km. from Old Harbour on South and used for large vessels.

STEVEDORES: Maximum 10 gangs available. Working hours: 1 labour shift.

Normal working hours: 0800 to 1700 hrs. Overtime work possible, until about 2000 hrs. by applying to Customs at following hours: 1700 – 2200 hrs., 0500 – 0830 hrs. Also Sundays and holidays 2200 – 0500 hrs. All night work is impracticable. No work can be arranged for 30th December and during New Year holidays (1st to 3rd January).

MEDICAL: Imakyurei Hospital, Chou Hospital, Fukusaki Hospital, Yotsumoto Dental Plant. Igo Oculist. No advance notice required unless urgent.

TANKERS: No tanker berths at Kagoshima, but Central Terminal Station (C.T.S.) in Kagoshima Bay. See "Kiire".

FRESH WATER: One 200 ton water barge available. Hydrants at wharves in main harbour. Rate of delivery: 50 t.p.h. from barge; 20 – 30 t.p.h. from hydrants.

FUEL: Not available. Lightered from another port. Ample notice so that necessary lighterage can be arranged.

REPAIRS: Hull/engine repairs are available at Kagoshima Dockyard and Iron Works and Kikukawa Iron Works.

GANGWAY/DECK WATCHMEN: Not specifically required unless passengers or valuable cargo on board.

2 sets of shore gangways (10 m. long) with platforms (3 m. high) also English speaking watchmen are available but advance notice is required.

OPENING/CLOSING HATCHES: Stevedores open/close hatches. Cost per hour depending on type of cargo. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears poor.

CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible.

AIRPORT: Kagoshima International Airport. Located to the North, 50 minutes' drive from centre of Kagoshima city.

TIME: GMT plus 9 hours. No alterations to clocks during year.

HOLIDAYS: See "Tokyo" (Also see "Stevedores").

WIND/TIDE: N.W. wind prevails in Winter season and Easterly wind in Summer. Wet seasons in April and July. Average tidal range 2.74 m. In the outer harbour, flood tide sets to North and ebb to South. Maximum speed of current 2 knots. Current in inner harbour is less than 0.25 knots.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 day extension possible if vessel stays longer. Also see "Regulations".

REGULATIONS: Immigration Officials board vessel on arrival to examine Passports, Discharge Books and/or other equivalent travel documents and provide 72 hour landing passes for crew members and passengers. 1 copy each of crew list and passenger list required by them. Providing ship's Agent with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes may be extended 72 hours on application. In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men has been booked, or unless vessels to which they are to be transferred, arrive in Japan within 5 days.

SERVICES: Cargo Survey. Provisions and Stores. Fumigation – Toyo Fumigation attend from Moji on request.

AUTHORITY: Kagoshima Port and Harbour Office, 18-16 Izumi-Cho, Kagoshima City, 892 Japan. *Tel:* (0992) 23-3277.

AGENT: Sub-agents of Dodwell & Co. Tokyo. Kyoshingumi Co. Ltd., Agency Department, Zisaki, Zyonan-cho, Kagoshima-shi, Kagoshima-ken. Cable address: Kyoshingumico Kagoshima; Domestic Telex: 07822-46. Tel: (0992) 26-7124, 26-7115.

KAKOGAWA: 34.42 N. 134.50 E. **(See Plan)**

Port is for sole use of the Kobe Steel Co. Ltd. Declared open port as of 1st May 1970, but vessels should first call off Kobe to obtain Free Pratique, Customs clearance and Pilot.

Also see "Shipmaster's Report" dated June 1985.

DOCUMENTS:

Ship's Register.

Last Port Clearance.

3 Crew Lists including Passport Numbers.

3 Passenger Lists.

1 Stores List.

1 Declaration of Crew's Baggage, i.e. tobacco wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

Also see "Shipmaster's Report" dated June 1985.

PILOTAGE: Pilot will board off Kobe when calling for Free Pratique and Customs clearance. Pilot will be arranged by Agent subject advance request and usual ETA advices.

Also see "Shipmaster's Report" dated June 1985.

RESTRICTIONS: Mooring/unmooring conducted daylight hours only.

MAX. SIZE: Kobe Steel, Berth No. 4: 165,000 d.w.t. (or 250,000 d.w.t. with part load).

HEALTH: Vessel must call off Kobe for Free Pratique. At first port call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

BERTHING:

	Length	*Depth*	*Max. Size*
Pier W-5	240 m.	11.90 m.	35,000 d.w.t.
Pier W-6	275 m.	11.90 m.	35,000 d.w.t.
LPG Dolphin	77 m.	16.00 m.	70,000 d.w.t.
Scrap Pier	250 m.	11.10 m.	25,000 d.w.t.
South Pier	450 m.	6.80 m.	—

Depth at low water is 17 m. in the fairway which is 400 m. wide.

Kobe Steel:

Berth	*Length* (m.)	*Depth* (m.)	*Max. LOA* (m.)	*Max. Draft* (m.)
No. E-4	400	17.0	300	16.0
No. E-2	200	14.5	190	12.5
No. E-3	300	14.0	239	14.5

Products Handled Coal and ore.

Cranes: 4 × 1,500 t.p.h. at E.4; 1×700 t.p.h. at E.3; 2×35 ton at West Wharf (No. 5) and 2×35 ton at West Wharf (No. 6).

MEDICAL: Treatment has to be arranged from Kobe.

FRESH WATER: Available from quay. Rate 50 – 80 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

REPAIRS: Arranged from Kobe.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPATRIATION: Possible, through Kobe.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

SHIPMASTER'S REPORT: When the vessel anchors off Kobe in the Roads, "Kobe Harbour Control" will call on VHF Channel 16 and ask for anchoring time and position from Kobe Headlight.

The maximum draft at Higashi Harima is 15.5 m.

Vessels always berth port side alongside. The gangway should be lowered as soon as possible to let the officials aboard.

The vessel loaded 112,000 metric tons in 60 hours, previously the same amount had been loaded a little quicker.

Bilge water, oil or garbage should never be thrown overboard because owners have to pay compensation to the Fishermen's Union.

Berthing takes place 2 hours before high water.

SHIPMASTER'S REPORT: June 1985.

Pilotage/Sanitary Inspection: If vessel in possession of valid Japanese Sanitary Inspection Certificate and has been granted Radio Free Pratique, the Inland Sea Pilot boards 5 miles S.S.W. of Kobe Lt. This Pilot berths the vessel at Kakogawa.

Customs clearance and other formalities, in this event are carried out after berthing at Kakogawa.

Pollution: Penalties and mandatory compensation are particularly severe for any form of pollution. A floating save-all barrier is placed around the ship. This would appear to be as much for identifying offenders, as for preventing the spread of pollution.

When discharging coal, petroleum-coke or ore at the West Wharf (Kobe Steel Co.), scuppers must be efficiently plugged to prevent overside pollution in the event of rain or ballasting overflows. One selected scupper outlet is connected to a shore drainage hose.

Shore Leave: At West Wharf and LPG Jetty, ship's personnel are not permitted to traverse the wharf or any other roadway or part of the steelworks on foot.

Kobe Steel Co. does not provide any form of transport inside the complex. However, a taxi schedule can be arranged through the Agent, between ship and Kakogawa (JNR) railway station. Frequent trains to Kobe – about 35 minutes. Kakogawa, itself has reasonable shopping facilities in the vicinity of the railway station.

AUTHORITY: Kakogawa Doboku (Public Works) Office, 97-1, Tenjingi, Jike-machi, Kakogawa City, Hyogo Pref. *Tel:* (0794) 21-1101.

AGENT: See "Himeji".

KAMAISHI: 39.16 N. 141.55 E. **(See Plan)**

DOCUMENTS:

Ship's Register. Last Port Clearance. 6 Crew Lists including Passport Numbers. 4 Passenger Lists. 1 Stores List and 2 Lists of Ports of Call.

1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot not compulsory, but arrangeable at Master's request. Pilot arranged by Agent and vessel required to radio Agent ETA 24 hours before ship's arrival. Pilot boat has no facility to communicate, nor particular light or sound signals, but flies Pilot flag "H". Pilot boards at Lat. 39° 16′ N., Long. 141° 59′ E. About 1 mile N.N.E. of Osaki Point. No alternative area in event bad weather.

ANCHORAGE: Up to 4×30,000 d.w.t. vessels can safely anchor. Max. size at anchorage 120,000 d.w.t. Depth of water: 31 m. – 43 m. at Quarantine Anchorage.

RESTRICTIONS: Vessel free in and out anytime.

MAX. SIZE: Draft 14 m. and LOA 300 m. (915 ft.) Breadth no restriction.

HEALTH: *Quarantine Anchorage:* Located in Western semi-circle of 500 m. radius with centre at Lat. 39° 15′ N., Long. 141° 55′ E. This area is also used for urgent anchorage.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Chosi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs (2) join vessel at anchorage and tugs' lines used free of charge.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

NSC No. 4	Old	230	8.7	8.7	20,000	2×7 T, 1×17 T
	New	288	14.0	13.0	160,000	Unloader 700 and 900 t.p.h.
North Pier						

NSC Nos. 1 & 2 not suitable for the vessel more than 5,000 g.r.t.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Winter 1026-1027. Summer 1023-1024.

FRESH WATER: Available from wharf by hose. Rate of delivery: about 10 t.p.h. – 15 t.p.h. No water barge.

FUEL: Domestic diesel oil (Bunker A) is available. Bonded oil will be brought from Sendai, Yokohama and Kashima with sufficient advance notice.

CONSULS: None.

REPAIRS: Minor repairs such as welding, piping, lathing works, etc. only.
DRY DOCKS: None.
CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.
OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.
CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.
REPATRIATION: Possible.
AIRPORT: Hanamaki, distance 100 km. (2 hours by car). Toa Domestic Airlines (TDA); 3 flights between Hanamaki/Tokyo everyday, 2 flights between Hanamaki/Osaka everyday and 1 flight between Hanamaki/Sapparo every day.
TIME: GMT plus 9 hours. No alterations made to clocks during year.
POLICE/AMBULANCE/FIRE: Police 2-4536 (Headquarters) and 2-3828 (Water Police Station); Ambulance 119; Fire 119.
TELEPHONES: No facilities for placing telephones on board.
SERVICES: Surveyor, tally, hold cleaning, tank cleaning.
GENERAL: Discharging ex-gearless vessel not possible at anchorage.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.
AUTHORITY : Port and Harbour Dept, Iwate Prefecture Government, 10-1 Uchimaru, Morioka City, Iwate Pref., 020 Japan. *Tel:* (0196) 51-3111. *Contact:* Masanao Takeda, Director, Port & Harbour Department.
AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Narasaki Sangyo Co., Ltd., Kamaishi Branch, Kamaishi Building, No. 1-1, Hama-cho Kamaishi-shi, Iwate-ken. Cable Address: Narasaki Kamaishi. Domestic Telex: 8355-56. Tel: (0193) 22-2731/2. Postal No.: 026.

KANDA: 33.47 N. 131.00 E. (See Plan)

PILOTAGE: Not compulsory; Inland Sea Pilots are available from Sekisaki, Hesaki or Mutsure if required. Harbour Pilots are available at the anchorage (Lat. 33° 48′ 03″ N., Long. 131° 03′ 02″ E).
RESTRICTIONS: Pilots are only available from sunrise to 1 hour before sunset.
PRATIQUE: Available at the Hesaki or Mutsure Anchorages. (In case of vessels from East, formalities will be carried out at the Hesaki Anchorage. If vessels from West, formalities will be carried out at the Mutsure Quarantine Anchorage. But after Free Pratique granted, vessels have to pass the Kanmon Channel en route to off Kanda).
TUGS: 1 × 3,000 h.p. and 1 × 1,300 h.p. (Tugs from Moji also available when required).

KANMON-KO (Kanmon Harbour). (See Plan)

According to Japanese Harbour Area Regulations, Moji, Shimonoseki, Kokura, Tobata, Wakamatsu and Yawata are respective sections included in one port namely Kanmon Harbour. The expression of the port as "Kanmon" has been used in charter parties, where these 6 ports are considered to be one port. Vessel's movements within these ports is treated as shifting berth in the same port. Therefore, if vessels calls at more than 2 ports within this area, such calls are covered by one payment of tonnage dues. However, at Tobata, Wakamatsu and Yawata, port dues are levied in addition to tonnage dues.

Entry/departure procedures to Customs, Immigration and/or Harbour Master should be effected at each port, as those officials stationed individually at each port.

Pilotage is compulsory for vessels over 10,000 g.r.t. passing through Kanmon Channel.

Also see "General" before first port.
AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan, 1-chome, Moji-Ku, Kitakyushu City, 801 Japan. *Tel:* (093)-321-5941. *FAX:* (093) 321-5915.

Shimonoseki Port and Harbour Bureau, 1-1, Nabe-Cho, Shimonoseki City, 750 Japan. *Tel:* (0832) 31-1111.

KANOKAWA: 34.11 N. 132.26 E. (See Plan)

(PORT STATUS: CLOSED PORT)
DOCUMENTS:

	Ship's Register.
	Last Port Clearance.
10	Crew Lists including Passport Numbers. (For Iwakuni and Kanokawa.)
10	Passenger Lists. (For Iwakuni and Kanokawa.)
2	Stores Lists. (For Iwakuni and Kanokawa.)
1	Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF Communication available with Inland Sea Pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 09′ N., 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N., 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Inland Sea Pilots also attend Harbour Pilotage but if specifically required Harbour Pilot boards at Port entrance South side of Ohkurokamishima, Position Lat. 34° 10′ N., Long. 132° 26′ E.
ANCHORAGES: Good holding ground. Entrance Channel and Harbour Channels. Depths 18 m. min. Bottom mud and sand. Difference between quoted datum and chart datum about 2 m. (to be added). Harbour anchorage about 2 miles South of "T" head berth where vessel remains if waiting berth. (Lat. 34° 08′ N., Long. 132° 24′ 3″ E.).
RESTRICTIONS: No berthing or unberthing between sunset and sunrise.
MAX. SIZE: Length 270 m., beam 40 m., draft 14 m., deadweight 125,000. See "Tankers".
HEALTH: Closed port. Vessel must call at another port (such as, Matsuyama or Iwakuni) for Customs and Health clearance before entering Kanokawa. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

N.B. Vessels destined for Kanokawa call at Iwakuni for quarantine and Customs formalities for entering Kanokawa (Closed Port) before proceeding to Kanokawa.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.
TUGS: Arranged from Kure. Normally join at Kanokawa Port Entrance. Usually tug's lines used without extra charge.

TANKERS:

DENSITY: 1023 – 1025 alongside berth. Rise of tide: Springs 3.4 m. Neaps 2.6 m.

FRESH WATER: Available at berth, ex-pipe-line. Average delivery rate – 20 t.p.h.

FUEL: Most grades of domestic and bonded oil obtainable by barge only at anchorage after completion of discharge, with 3 days' advance notice.

CONSULS: None.

REPAIRS: See "Kure".

AIRPORT: See "Kure".

TIME: GMT plus 9 hours. Permanent.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: No arrangements available for placing telephones on board.

AUTHORITY: Ohgaki Doboku (Public Works) Office, 25 – 3 Oaza Ohara, Ohgaki-Cho, Saiki-Gun, Hiroshima Pref., Japan. *Tel:* 0823 – 57 – 3434. (*Note:* This is a closed port, therefore there is no Port Authority.)

AGENT: See "Kure".

KASHIMA: 35.54 N. 140.42 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
5 Crew Lists including Passport Numbers.
5 Passenger Lists.
1 Stores List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot called through Agent. Pilot boards about 2 miles to N.E. from the end of South Breakwater, in vicinity of Lat. 35° 58.5′ N., Long. 140° 44′ E.

ANCHORAGE: No suitable anchorage at present. Quarantine Anchorage is within a rectangular section commencing at point "A" (089° 45′, 5,200 m. from Kashima lighthouse) thence 151° for 1,500 m., thence 241° for 1,000 m. thence 331° for 1,500 m. thence to point "A". Depth 18.3 m.

Shipmaster's Report: July, 1981.

Quarantine Anchorage only for small ships (under 3,000 d.w.t).

Pilots advised and requested vessel to anchor (on next visit) 2 to 3 miles, 45° off North end of pier, pilot station also located in this position.

Reasons: Anchorage close to outgoing traffic, especially for very large vessels. Also anchor holding ground not good in case of sudden wind gusts.

Anchorage as mentioned (also on B.A. Charts) is not used any more and Quarantine Officer boards after passing second breakwater.

APPROACHES: Normally the approaches to Kashima are not as congested as some of the other ports of Japan, but in good weather a large number of fishing and pleasure craft may be met.

Being free of off-lying dangers the approach to the Pilot Boarding ground do not present any difficulty, however, the presence of swell very often hampers the manoeuvre of the tugboat carrying the Pilot. A convenient leeway is required to enable the Pilot to board.

Approaches to Kashima Oil Co. Terminal: The berth approach is made only during daylight hours. Pilots board, at the latest, one hour before sunset.

All traffic for entering into or departing from the port, and all movements inside the port are controlled from the signal station near the N.W. side of the harbour entrance. For the signals shown please refer to H.O. PUB No. 156 or B.A. Japan Pilot Vol. 1 (No.41). The type of control is "one way" for larger vessels. The signal station is not equipped with radar or VHF, but may contact a vessel via telephone and Ibarki Port Radio.

The harbour entrance is marked by two buoys.

Leading lights, 183.5°, are exhibited for steaming up the channel. The depths in the outer channel are 24 m. and in the inner part 22 m. below chart datum. Tidal currents in the channel are weak, less than 0.5 knots.

No entry is made if wind velocity from Northerly directions is 7 m./sec. or over, or from other directions 10 m./sec. or more. Also, berthing operations are suspended if the wave height is 1.5 m. or more.

The tug that brings the Pilot(s) on board joins the vessel immediately. 4 other tugs join inside the breakwater.

During periods of Northerly swell the entry channel is fully exposed. Vessels at low speed generally have difficulty in steering therefore, laden VLCCs are also required to attain a speed up to 6 knots until as close as 0.75 miles from the 200,000 ton crude berth. The full power of five tugs is normally sufficient to timely reduce the headway but at times vessels engines are also called for prompt and strong astern action.

RESTRICTIONS: Pilot does not board vessel after dark.

Passages:

Name	*Width* (m.)	*Depth* (m.)
Central Passage	400 – 600	19 – 13
South Passage	300 – 430	12 – 10
North Passage	300	13 – 10
Outport Passage	480 – 540	24 – 22

MAX. SIZE: *Tankers:*

Berth	*Max. d.w.t.*	*Max. L.O.A.*	*Max. Safe Draft*
200,000 ton Sea Berth	200,000	336.34 m.	19.00 m.
100,000 ton Berth	100,000	258.16 m.	14.00 m.
70,000 ton Berth	70,000	238.50 m.	11.91 m.

Bulk carriers have entered with draft up to 44 ft.

HEALTH: Radio Pratique is available if application in accordance with Japanese Regulations. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: 50 Watt powered base station operates at Oh-aza Igiri, Kamisu-cho, using call sign "Ibaraki Port Radio", continuous watch is maintained 24 hours on Channel 16; all calling should be on Channel 16, and working Channels 14 and 12. Tugs (including Pilots) work on 400 mHz.

Shipmaster's Report: July 1981.

VHF station (call: "Ibaraki Port Radio") on Channel 16, traffic on Channel 14.

Handles all traffic about pilotage, etc. Station not yet mentioned in List of VHF stations (Radio Holland). Agents pay fee per ship per port call for using the station.

TUGS: Usually joins vessel at anchorage where Pilot boards; Tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

MEDICAL: No advance notice required unless urgent.

TANKERS: Requirements prior to arrival: Manifold: position, number and external and internal diameters. Reducer: type (ASA or JIS, etc.) and external and internal diameters. Bolt: diameter and number, also diameter of pitch circle. Pumping capacity. Ship's draft and ETA, to be received by 0900 hrs. every morning continued 3 days prior to day of arrival. Water requirement (because of necessity of pumping-up tank for preparation).

Berthing Procedure and Mooring at 200,000 d.w.t. berth: Normally 3 to 5 tugs attend and are employed in a combination of "alongside" and "on the hook".

Vessels always berth port side to. The normal procedure is to bring the vessel to a stop, parallel to the berthing face, at a distance of 100 – 150 m., and then warp her alongside with the tug assistance. The sequence for handling ship's lines is: spring lines, breast lines, and then bow and stern lines. 2 mooring launches are used.

Since the breasting dolphins at the 200,000 d.w.t. berth used for the spring lines are rather a long distance apart, conventional spring lines from the main deck are frequently very short and often break when a swell is running. Therefore, it is advisable to try using longer springs from the forecastle and poop decks.

The normal mooring configuration is: 4 bow lines, 4 stern lines, and 4 breasting lines and 2 spring lines both forward and aft.

The berth is equipped with a sonar docking system.

Discharge Rates:

Berth	*Product*	*Discharge Rate (t.p.h.)*		*Shoreline*
200,000 Ton Berth	Crude Oil	10/12,000		38 in.×1 42 in.×1
	Bunker	5/600	(Connection)	12 in.×1
100,000 Ton Berth	Crude Oil	4/6,000 4/6,000		24 in.×1 26 in.×1
	LPG	2/3,000	(Propane) (Butane)	22 in.×1 22 in.×1
	Bunker	5/600	(Connection)	8 in.×1
80,000 Ton Berth	Naphtha White Kerosene	1,800		14 in.×1
	Minus Crude Oil	3/3,500		16 in.×1
	Fuel Oil	1,800/2,000		20 in.×1
	Crude Oil	3/3,500		24 in.×1
	Bunker	5/600	(Connection)	8 in.×1

DENSITY: 1025.

FRESH WATER: 50 metric t.p.h. from shore pipe, 50% additional for service between 0600–0800 hrs. 1700–2200 hrs. and during rainy and rough weather, also on Sundays and holiday. 100% additional for service between 2200–0600 hrs.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days' prior notice. Bunkers are also available from Kashima Oil Co. with prior notice.

FIRE PRECAUTIONS: No special precautions, but water curtain made alongside dolphin in case of fire, and there is a fire boat (15 gross tons, and airfoam system).

CONSULS: None.

REPAIRS: Hull and engine repairs possible.

GANGWAY/DECK WATCHMEN: Not specially required unless at Kashima Oil Refinery Berth.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 40 cigarettes to take ashore but no spirits.

AIRPORT: Narita Airport (New Tokyo International Airport).

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance/Fire Tel. 119.

TELEPHONES: Not available for placing on board.

SERVICES: No equipment nor facilities, but compass adjusting and others arrangeable from Yokohama.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, extension possible for longer stay.

IDENTIFICATION CARDS: Not required.

DEVELOPMENTS: Port under construction. When completed, total length of wharf will be about 17 km. for about 30 big industries such as iron and steel works, oil refinery and chemical works, foodstuff and foodstuff industries, etc.

AUTHORITY: Kashima Port Administration Office, 13 Oh-aza Higashi Fukashiba, Kamisu-City, Kashima-Gun, Ibarak-Ken, Japan. *Tel:* 0299-92-2111.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Keiyo Shipping Agency Ltd., Kashima Office, 65-86 Kamisu, Kamisu-Machi, Kashima-Gun, Ibaraki-Ken. Cable Address: Keiyoshipkashima Itako Domestic Telex: 3658-926 Tel: Kashima 02999 2-2193.

KAWASAKI: 35.32 N. 139.46 E. (See Plan)

PORT LIMITS: The boundary of the Kawasaki Port consists of: The position of the central outfall of the border canal (Sakai Canal) of Ohkawa-cho, Kawasaki-ku, Kawasaki City and Anzen-cho, Tsurumi-ku, Yokohama City. From this position to a point of 151° 30′, 3,460 m. and from this latter position to a point of 126°, 2,310 m. The position of 136°, 5,150 m. from the Tamagawa River Haneda Light Beacon, the line drawn from the end point of the Tamagawa River administrative boundary border line and the sea surface which covers the shore. The water surface of the following canals: Sakai Canal (beyond the East of the administrative boundary border line), Siraishi Canal, Tanabe Canal, Minami Watarida Canal, Asano Canal, Ikegami Canal, Sakurabori Canal, Iriezaki Canal, Mizue Canal, Shiohama Canal, Yako Canal, Chidori Canal, Daishi Canal, Suehiro Canal and Tama Canal. The water surface of the area of Siraishi-cho No. 2, Asano-cho No. 1, Yako No. 3-1, Yako No. 1-1 and Ukishima-cho No. 100 of Kawasaki-ku, Kawasaki City and the downstream water surface of Kannongawa Iriebashi. The water surface area of Tamagawa River (beyond the West of the administrative boundary border line), downstream of the line drawn 43° 30′ from the S.E. side of Tono machi Kawasaki-ku, Kawasaki City.

HEALTH: Available at Kawasaki (same procedure as Yokohama).

BERTHING: Vessels of more than 1,000 g.r.t. desiring to enter First Section of Kawasaki, and Fourth Section, Yokohama Quarter, shall report ETA off Tsurumi Passage in advance to Captain of Port. When intending shift berths within First Section of Kawasaki and Fourth Section, Yokohama or to depart, the estimated time of getting under way shall also be reported in advance to Captain of Port. Report shall be made by noon of day before estimated date of entry or getting under way. Also see following "Tables".

RADIO: Available at Kawasaki (same procedure as Yokohama).

VHF: VHF radio telephone station under joint control of Tokyo, Kawasaki, Yokohama and Chiba Port and Harbour Bureau. Call Sign "Kawasaki Port Radio." This station covers all Tokyo Bay with radius 50 km. from location of transmitting antenna (Yokohama). Station keeps in touch with ships crossing in vicinity of Nojimasaki Point and is able to communicate with a ship that is a fairly long distance South of Jyogashima Island.

Channels, Class, Frequencies.

Nissho Iwai	Fuel Oil (C)	12 in.×1	1,000
	Fuel Oil (A)	10 in.×1	800

Nissho Co. Ltd., Kawasaki Terminal: This facility is located on the Western side of the Daishi Channel about 1,200 m. from the Northern entrance of the outer breakwater. It consists of a berth designed to accommodate tankers up to about 60,000 d.w.t. in the light loaded condition.

The berth consists of an "L" shaped jetty with a roadway and a pipe trestle 20 m. long. It is provided with 2 breasting dolphins which are connected to the platform by trestles. 2 bollards are installed on the dolphins. Other bollards are installed ashore along the face of the quay.

No capstans are provided and so it is difficult to send heavy wires ashore. Therefore, it is advisable to have a number of synthetic ropes readily available.

The back springs which are made fast to the bollards located on the dolphins, have a very short lead and are at a steep angle.

The 2 dolphins are provided with resilient buffer fender systems having hollow rubber tubes. No sonar doppler is provided.

The normal mooring configuration is:

3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

The terminal does not use hard arms. Rubber hoses are used, generally consisting of a string of 3 lengths of 10 in. JLS flanges, connected with bolts and nuts.

The vessel's derrick must be used for handling the hoses.

High pour fuels are generally handled at this terminal but vessel's assistance is no longer required at the end of each discharge for flushing the hoses and shore lines. The terminal now flushes back into the ship the line's contents.

No gangway is provided.

Bunkers and fresh water are not available at this berth.

Berth A-1: Berth A-1 is designed to accommodate tankers up to about 65,000 d.w.t. in light loaded condition. The berth consists of a T-shaped jetty with a roadway and pipe trestle 40 m. long, and is provided with 2 breasting dolphins positioned at a distance of 80 m. and connected to the platform by trestle. The dolphins are provided with small bollards which are seldom used for ship's lines. Usually the lines, including the springs are run ashore to bollards having adequate strength.

There are no capstans for pulling the lines ashore and some difficultie may be experienced, particularly when handling heavy wires. It i advisable to have ready a certain number of synthetic ropes.

2 smaller berths are located in the inner side of the jetty face. These berths are left vacant when a tanker is alongside Berth A-1. The structur on these berths may interfere with the vessel's mooring arrangemen and may create difficulties when sending the vessel's lines ashore.

The dolphins are provided with rubber cell fenders (diamond shaped Sliding along the dolphins should be avoided so as not to damage th rubber fenders.

The berth is provided with a sonar doppler to monitor the berthin speed. The pilot is advised by walkie-talkie if the berthing veloci exceeds the safety limit.

The normal mooring configuration is:

3 head lines,
2 breast lines forward,
2 back springs forward,
2 back springs aft,
2 breast lines aft,
3 stern lines.

3 hard arms are installed on the platform. 2×12 in. diameter are use for discharging crude and fuels and 1×12 in. is used for the discharg of LPG liquid. No LPG vapour return line is installed on the jetty. Arm are connected by means of nuts and bolts. The flanges are ASA 15 p.s.i. for bunker fuel, the others for lubricating oil. Bunker can be supplie simultaneously with vessel discharge operations.

Esso controlled tonnage generally discharges fuel and diesels oils a Berth A-1. High pour fuels are also handled at this berth and the termina may require vessel's assistance for flushing the arms and the lines afte each discharge. No slop or deballasting facilities are provided.

A heavy and bulky gangway is provided which has to be lifted by th vessel's derrick.

The hooks on the end of the gangway are narrow and cannot grip th ship's sheer strake so have to be laid on the ship's handrail. On severa occasions, vessel's handrails have been damaged by the gangwa hooks. Fresh water is available at this berth through a 2.5 in. outlet.

TIDAL CURRENT: The littoral current running Westward alon reclaimed industrial area of city is very slow and has rate of about 0.3 m around the head of municipal wharf when tide is on the ebb.

FRESH WATER: Supplied at piers and by water barges, overtime o Sundays and legal holidays.

	Barge	*Loading Capacity (ton)*	*Remarks*
Water Barge	Hoei Maru No. 12	350	Operated by Water Bureau of Kawasaki City
	Kosie Maru	300	

FUEL: All grades available.

CONSULS: See "Yokohama".

REPAIRS: All repairs possible.

DRY DOCKS: Hitachi Dockyard.

Dock Number	*Length*	*Breadth*	*Depth*	*Capacity*
No. 1	155.5 m.	25.4 m.	8.5 m.	14,200 g.r.t.
No. 2	210.0 m.	30.0 m.	11.0 m.	25,000 g.r.t.

GANGWAY/DECK WATCHMEN: Watchmen not necessary and no recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores

CERTIFICATES: See "Yokohama".

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes, Wines/spir 1 bottle per person.

AIRPORT: Distance from airport (Narita International Airport) 230 km Airport served by regular airlines.

TIME: GMT plus 9 hours. Permanent.

HOLIDAYS: National holidays, Sundays. National holidays January 1 2, 3, 15; February 11; March 21; April 29; May 3, 5; September 15, 2 October 10; November 3, 23; December 28, 29, 30, 31. Cargo wo cannot be arranged on following days: December 31; January 1, 2, 3

POLICE/FIRE/AMBULANCE: Police Kawasaki 266-9161; Ambulance and Fire Kawasaki 299-0119.
TELEPHONES: Connection to ship. Charge for use.
SERVICES: Tank-cleaning. Compass adjusting. Direction Finder calibration.
SHORE LEAVE: Crew members allowed ashore after being issued with shore passes.
IDENTITY CARDS: Needed to go ashore.
DELAYS: Awaiting favourable tide. Delay of Quarantine inspection.

SHIPMASTER'S REPORT: *The Tonen Ohgishima Sea Berth:*

1. Suggest Mikimoto Lighthouse used for end of passage as from there inwards to Uraga Channel (58 miles) heavy concentrations of traffic frequently experienced.
2. Entry to Uraga Channel for VLCC's permitted only during daylight i.e. sunrise to sunset).
3. Pilot boards in vicinity Uraga No. 1 Buoy from 1 of the 2 tugs which escort the vessel to Yokohama/ Kawasaki and requires fire fighting tug standing by at Uraga Buoys Nos. 1–6.
4. Deep draft signal to be displayed including the red flashing light and Code "First Substitute over Flag 'B'" and 2 black cylindrical shapes 0.6 m. × 1.2 m.) placed vertically (refer Maritime Traffic Safety Law).
5. ETAs (No. 1 Buoy Uraga) should be updated as promptly as possible. Considerable importance attached to the vessel's arrival/ sailing time by Tokyo Wan Traffic Advisory Service Centre (TWTASC).
6. Vessel must anchor at Kawasaki Anchorage where Port Health boards (pilot hoist used).
7. Berthing/Unberthing Ohgishima Sea – berth during daylight only sunrise to sunset).
8. Berthing pilots (2) embark at Quarantine Anchorage, 6 tugs all using nylon tow ropes with eye on bitts. Always port side alongside. Refer mooring diagram for details. No additional mooring ropes available on loan or hire from berth. Shore gangway, Chicksan arms 4×16 in. connections.
9. A spill boom completely surrounds the vessel on the berth. A comprehensive book (in English) of the Terminal Regulations placed on board on arrival. Tonen Company require a tape recording concerning oil pollution to be broadcast throughout the vessel's p/a system before cargo discharge commences.
10. Ullaging is witnessed by Oil Co. representative. Samples taken from all tanks necessitating the opening of tank hatches. All tanks dipped after discharging completed.
